Introduction to the College

MISSION STATEMENT

Randolph College prepares students to engage the world critically and creatively, live and work honorably, and experience life abundantly.

STATEMENT OF PURPOSE

Since its founding in 1891 as Randolph-Macon Woman’s College, Randolph College has offered students a rigorous education in the liberal arts and sciences. In keeping with the College motto, *vita abundantior*, integrated living and learning provide a foundation for meaningful lives characterized by a lifelong joy in learning.

Randolph College encourages each student to set and meet high personal goals. Campus life is grounded in the Honor System, which fosters individual integrity and mutual trust. As students from diverse backgrounds study and live together, they are expected to respect the rights and dignity of others, to be open to cultural differences, and to exercise personal and social responsibility. They are encouraged to develop confidence and to participate fully in a community in which women and men work together and treat one another as equals.

Through excellence in teaching, advising, and scholarship, the faculty provides the challenges requisite to the intellectual development of each student. With faculty support, the undergraduate students design individualized and coherent programs of study that combine academic and co-curricular components. While each student’s educational plan is unique, all programs of study foster these capacities: to think critically; to write and speak with clarity and accuracy; to employ quantitative reasoning; to use technology effectively and ethically; to cultivate an aesthetic sensibility; to understand key dimensions of the heritage of more than one society; to approach problems with creativity and imagination; to work both independently and collaboratively; and to recognize the power and limitations of knowledge. Graduate students pursue more narrowly focused programs of rigorous study designed to add specialized knowledge to their undergraduate education. The graduate programs are directed by faculty members who are especially knowledgeable about the professional standards to be met by those who earn advanced degrees.

Through their experiences at Randolph College, students are challenged to think ambitiously and to prepare thoughtfully for their futures in a diverse society and an increasingly complex world that offers them expanding opportunities for leadership, responsibility, and service.

ABOUT THE COLLEGE

Randolph College is committed to excellence in the liberal arts and sciences. The College believes that today the breadth and depth of the liberal arts bear as directly as ever on the needs of its students who, in a changing society, must be competent, flexible, and strong. Within the traditional framework of liberal studies, the College offers students from around the globe a challenging, enlightened, supportive, and inspiring environment in which to gain superior knowledge, pursue personal growth, and prepare for their futures. This enduring commitment to educating the whole person—affirming each student’s significance as an individual and as part of a larger community—is made possible by the small size of the College and is further demonstrated by its support of the student’s growth in personal integrity and in ethical and social responsibility. Concern for the individual fosters the atmosphere of caring valued so highly by the Randolph community. This is a community where students, faculty, and administrators share a common purpose: the pursuit of excellence in educating leaders for the global society of the 21st century.

Four characteristics of the College embody its purpose. The first characteristic is its grounding in the liberal arts and sciences. To provide a background for their major field of study and a solid foundation for their professions or careers, today’s students need broad exposure to the substance and methods of many disciplines. Ideally, such breadth of exposure prepares them to think logically and inspires them to strive for open-mindedness and compassionate understanding. Independent judgment and analytical thinking are among Randolph College’s goals, for the College believes that the best preparation for a career is not simply specific training, but also educating the whole person to be wise, independent, and responsible.
Another primary function of a broad education is to liberate the student from prejudice, provincialism, and ignorance. Randolph College recognizes that full learning occurs best in a multiracial, multiethnic environment. To enable students to be responsible citizens, the College strives to fashion academic programs that will ensure multicultural awareness, and seeks to attract students, faculty, and staff of varied racial and ethnic backgrounds.

Second, Randolph College is a small college. It has not been seduced by the notion that bigger is better or that increases in quantity mean increases in quality. Large enough to sustain the major ingredients of a liberal arts and sciences program and small enough to know and attend to individual students, the College aims to foster the kind of community that combats the anonymity pervading much of modern society.

The third characteristic of the College is the primarily residential nature of its undergraduate program. Because students, faculty, and staff live and work closely together, it is a caring community. The emphasis on community, particularly the trust that is part of the Honor Code, means that life at Randolph involves a moral commitment through which students prepare for leading roles in establishing community beyond the Red Brick Wall.

The fourth characteristics is its unique model of curriculum delivery, the TAKE2 program, where students engage in two courses at a time over seven weeks. Designed by faculty for the benefit of students, TAKE2 is designed to improve student learning, enhance opportunities for students during and after college, and support student success and persistence.

**History of the College**

Randolph College was founded as Randolph-Macon Woman’s College in 1891 by William Waugh Smith, president of Randolph-Macon College in Ashland, Virginia. Its purpose was to be “a college where our young women may obtain an education equal to that given in our best colleges for young men and under environments in harmony with the highest ideals of womanhood.” The Woman’s College became independent of Randolph-Macon College in 1953. In 2007 the College implemented coeducation and became Randolph College.

The parent institution was chartered by the Virginia legislature in 1830 and was named for two statesmen, John Randolph of Virginia (1773–1833) and Nathaniel Macon of North Carolina (1758–1837), as a project of the Methodist Church in Virginia. The ethos of Randolph-Macon Woman’s College was ecumenical, and the College was affiliated with the United Methodist Church for decades.

The academic strengths of the College received acclaim early in its history. In 1902 it was the first women’s college to be admitted to the Association of Colleges and Preparatory Schools of the Southern States, and in 1916 it was the first women’s college south of the Potomac to receive a Phi Beta Kappa charter, becoming the Delta chapter of Virginia. It was admitted to membership in the American Association of University Women in 1919.

As national recognition led to growth in enrollment, the campus expanded from Main Hall, listed in the National Register of Historic Places, to the current complex of twenty buildings occupying one hundred acres. The spirit and ideals which called the College into being continue to characterize its life. Building on a heritage of strength, Randolph College continues to challenge students to *vita abundantior*, a life more abundant.

**The Campus**

At the center of the campus stands Main Hall, a red brick structure whose towers rise above a tree-shaded hillside. Main Hall, built in 1893, and the other classroom buildings and residence halls, most of which are connected by enclosed corridors called trolleys, form a semicircle convenient to the more contemporary additions to the campus. The Blue Ridge Mountains are 20 minutes away and are visible from the campus, which is located on a 100-acre wooded tract near the James River in a residential section of Lynchburg.
Admission

The College seeks to enroll students who will benefit from the academic program and who will contribute to the shared life of the community. The Honor System requires that students assume responsibility for their own conduct and that they have a sense of concern for others.

Both traditional students and nontraditional students (age 24 and over) should contact the Office of Admission. To enroll, students must have graduated from high school, or received a recognized equivalent of a high school diploma, i.e., General Education Diploma (GED, or must be beyond the age of compulsory school attendance in Virginia (which is 18).

UNDERGRADUATE STUDENTS

In making its selections of students, the Admission Committee carefully considers many aspects of an applicant’s credentials, including the quality of the academic record, the courses taken, statements of recommendation, an essay or graded writing sample, out-of-class commitments and activities. Scores on the tests of the College Board (SAT) or the American College Testing Program (ACT) Are not required for admission, but a student can submit scores if the student feels it will enhance their application. However, submission of test scores will not serve as a detriment to a student’s admission

ADMISSION AND SCHOLARSHIP DEADLINES

The College has a series of deadline notification dates. Each application for admission is evaluated when all necessary materials are received.

Early Action

The deadline for submitting an application for Early Action is November 15 of a student’s senior year. SAT or ACT tests are not required for admission, but a student can submit their scores if the student feels it will enhance their application. However, submission of test scores will not serve as a detriment to a student’s admission status. A student will receive a decision on a rolling basis when all credentials, including junior-year grades, have been received.

Regular Decision

The deadline for submitting an application for Regular Decision is March 1 of a student’s senior year. A student will receive a decision on a rolling basis when all credentials, including first semester senior-year grades, have been received.

Rolling Admission

After the March 1 Regular Decision, students can apply and will be admitted on a rolling basis when all credentials, including first semester senior-year grades, have been received.

Transfers

Transfer students should apply by July 1 for the Fall semester.

Spring Admission

First-year and transfer students who intend to begin study in the Spring semester should apply by December 1.

Enrollment Deposit

Admitted students accepted must notify the College of their plans to enroll and submit the initial $300 enrollment deposit by May 1. The deposit is refundable if written notification is received in the Admission Office by May 1. After May 1, enrollment deposits will be accepted on a space-available basis.
APPLICATION REQUIREMENTS AND PROCEDURES

Applicants should submit the Common Application, the Universal College Application or the Randolph College Application, along with the following credentials:

1. **Secondary School Transcript:** An official transcript should be sent directly to the Office of Admission by the secondary school.
2. **Official Test Scores:** Randolph College is test-optional for applicants. If a student prefers to submit test scores because the student feels it will enhance their application, they are free to do so. However, submission of test scores will not serve as a detriment to the student’s admission status.
3. At least one letter of recommendation from the guidance counselor or from a senior-year teacher (highly recommended).
4. Essay or college-specified option (highly recommended).

It is strongly recommended that applicants visit the College. Appointments for visits should be made in advance by contacting the Admission Office. A student unable to visit the College should speak with a graduate or a current student. The Admission Office will help with arrangements.

SECONDARY SCHOOL PREPARATION

An applicant’s secondary school program should include at least four college preparatory courses for each of the four years of secondary school. However, the Admission Committee will give every consideration to an applicant whose course of study does not meet the recommendations outlined below. Recommended distribution of college preparatory courses:

- **English** ........................................................................................................................................... 4 Units
- **Foreign Language**
  - French, German, Greek, Italian, Japanese, Latin, Portuguese, Russian, Spanish ................. 3–4 Units
  - Three years of one foreign language are recommended, or applicants may offer instead two units of each of two languages.
- **Mathematics**
  - Algebra I, Geometry, and Algebra II ......................................................................................... 3 Units
  - (A student must have successfully completed or be enrolled in Algebra II in the senior year in order for the application to be considered. Students may be presented an additional option to complete a math course provided by Randolph College during the Summer prior to enrollment. If presented with this option, a student must successfully complete this assigned course prior to enrollment.)
- **History** ........................................................................................................................................... 2 Units
- **Biology, Chemistry, or Physics, with laboratory work ................................................................. 2-3 Units
- **Electives from other academic areas of study ........................................................................... 1–2 Units

Students can receive credit or advanced placement for college-level work completed prior to entering the College. See **Pre-Entry Credit/Placement Policies under Academic Procedures and Regulations.**

HOME SCHOOL

The College welcomes applications from students who are home schooled. Each candidate receives careful individual attention, and each application for admission is evaluated when all necessary materials are received.

1. Application for Admission.
2. **Official Transcript.** There are two ways a student may submit a transcript: (a) submission of an official transcript from a home school association or (b) submission of the Randolph College official **Home School Transcript** form (available on the College’s website) with the curriculum approved through the local school board.*
3. **Official Test Scores.** Randolph College is test-optional for applicants. If a student prefers to submit test scores because the student feels it will enhance their application, they are free to do so. However, submission of test scores will not serve as a detriment to a student’s admission status.
4. At least one Letter of Recommendation.
5. **Essay or College-specified option** (highly recommended).
If necessary, the Office of Admission may ask for additional test scores or other documentation, such as a General Education Diploma and/or portfolio, to supplement the regular application requirements.

ADMISSION OF TRANSFER STUDENTS

An applicant who receives any college credit after receiving a high school degree or GED is considered a transfer student. Requirements for transfer students are listed below:

1. Application for Admission.
2. Essay or College-specified option (optional).
3. Official college transcripts from every college and university attended and a statement indicating the name of your high school and your high school graduation date. Students may submit their high school transcript if they feel it will strengthen their application.
4. High school transcripts are required when an applicant presents less than 30 transferrable college credits.
5. One letter of recommendation from a college official (a faculty member from whom the student has taken a course or an Academic Dean or faculty advisor. (optional)).
6. Transfer applicants must be in good standing with the last institution attended.

The Registrar of Randolph College will evaluate all previous college work for which transfer credit is requested in consultation with appropriate faculty. See Transfer of Credit Policy. To be eligible for a degree from the College, transfer students must take at least 52 credit hours of their work at the College and must earn a cumulative grade point average of 2.0 (rounded) in all work for which a letter grade is recorded at Randolph College.

INTERNATIONAL STUDENTS

The College encourages applications from international students and offers scholarships for qualified applicants. International students use the same admission application forms as candidates from the United States; however, they must submit standardized test scores from one of the following:

- SAT or ACT
- Test of English as a Foreign Language (TOEFL) with a minimum of 79 internet-based
- International English Language Testing System (IELTS) with a minimum of 6.5
- Pearson Test of English Academic (PTE) with a minimum of 54
- Duolingo with a minimum of 100

GRADUATE PROGRAMS

Master of Arts in Teaching

1. Graduate Application for Admission.
2. Personal statement focusing on the rationale for entering the program.
3. Official transcripts from all undergraduate institutions attended.
4. A minimum GPA of 3.0 (rounded) on a 4.00 grading system in major or field of interest.
5. Results of professional teachers’ examinations prescribed by the Virginia Department of Education.
6. Two Letters of Recommendation.
7. Scheduled interview with the Director of the Educator Preparation Program.

Students who hold a bachelor’s degree from another institution may participate in the M.A.T. Program. Contact the Education Department for details and an evaluation of undergraduate transcripts for licensure. Additional coursework may be required for general licensure outside of the endorsement areas in curriculum and instruction or special education.

*See Non-Degree Programs for information regarding application for teacher licensure only.
**Master of Arts in Coaching and Sport Leadership Candidates**

Candidates for the Master of Arts in Coaching and Sport Leadership program must submit the following to the Admission Office:

1. Graduate Application for Admission.
2. Cover letter/Statement of Purpose: 2-3 pages on professional goals and reasons for seeking admission including short- and long-term goals.
3. Unofficial transcripts from all undergraduate or graduate institutions attended. Official transcript will be required upon acceptance to the program.
4. A baccalaureate degree with a cumulative GPA of at least 2.75 on a 4.0 scale is required; applicants with an undergraduate GPA of lower than 2.75 may still apply and be provisionally accepted.*
5. Two letters of recommendation.
6. TOEFL or IELTS Scores (international students only).
7. Resume or CV: including background, sport participation (if applicable), honors/awards, and employment and/or experience.
8. $40 application fee.

The program accepts applications from February 1 - June 1.

The GRE is not required. TOEFL scores are required for international students.

Admission preference is given to individuals with coaching experience. All students need access to sports teams and/or athletes on a regular basis given the applied nature of many course assignments and practicum requirement.

*To remain in the program, provisional admits must achieve a 3.0 GPA by the close of their first 7-week session. Admission to the program is highly competitive.

**Master of Fine Arts Candidates**

Candidates for the Master of Fine Arts in Creative Writing should submit the following to the Admission Office:

1. The M.F.A. Application form.
2. Cover Letter/Statement of Purpose: This 2-3 page letter indicates the applicant’s purpose in applying to the program, including short-term and long-term writing goals.
3. Unofficial transcripts from all undergraduate or graduate institutions attended. Official transcripts will be required upon acceptance into the program.
4. A minimum GPA of 3.0 (rounded) on a 4.00 grading system in major or field of interest.
5. Contact information for two references.
6. A Writing Sample in Applicable Genre. Fiction sample: 15-20 pages in length, comprising one or more short stories or a book excerpt. Poetry sample: 8-10 pages in length, comprising one or more poems. Nonfiction sample: 15-20 pages in length, comprising one or more short essays or a book excerpt.
7. TOEFL or IELTS Scores (international students only).
8. Resume or CV (Optional).

**NON-DEGREE PROGRAMS**

**Certificate of Major**

The Certificate of Major Program enables a student to earn, in effect, a second major in order to develop background needed for a career change, prepare for graduate school in a new field, or pursue a new interest in depth through fulfillment of the requirements of the major field. Applicants must have completed a bachelor’s degree. The College awards a Certificate of Major upon completion of a minimum of 32 credit hours at the College and upon fulfilling of all the requirements of the major program. An applicant to the Certificate of Major Program must submit the following:

1. Application for Admission.
2. At least one Letter of Recommendation.
3. Official college/university transcripts from every college or university attended.
4. Interview with an admission counselor (alternative arrangements can be made for applicants who live some distance from campus).
5. A statement of personal and academic goals.

Community Students and Auditors

A person who wishes to take courses at the College but is not planning to work toward a degree may apply to be a community student if he or she has interest in a particular course. Contact the Registrar’s Office or look under Registration Information for Non-Degree Students on the Registrar’s website to obtain a Special Student Application and registration information. In addition, auditors must complete an Audit form and obtain the permission of instructor to audit a course.

Dual Enrollment Program for High School Students

A secondary school student from the Lynchburg area who has an accelerated secondary school program may also enroll in specific courses at the College under the Dual Enrollment Program. Dual enrollment means that the student’s courses count toward the high school degree program and may be transferred to a college program. Prospective students should contact the Registrar’s Office or look under Registration Information on the Registrar’s website for a Special Student Application that must be accompanied by a high school transcript and a recommendation from the high school principal.

High School Students Not Dually Enrolled

A secondary school student from the Lynchburg area who wishes to enroll in a class that does not need to be part of the student’s high school program may apply as a special student. Prospective students should contact the Registrar’s Office or look under Registration Information on the Registrar’s website for a Special Student Application. A copy of the student’s high school transcript is required.

Co-Enrollment Program for Central Virginia Community College Students

In partnership with Central Virginia Community College (CVCC), a degree-seeking student in good standing at CVCC is eligible to take up to one class per semester (Fall and/or Spring) at Randolph College free of charge as part of the co-enrollment agreement between the institutions. The co-enrollment program allows a student to be enrolled at both institutions simultaneously. To participate in the program a student needs to contact the Office of Admission, complete an application and submit an enrollment verification form. Randolph College reserves the right to change eligibility requirements as necessary.

Teacher Licensure Only

Students who have already completed a bachelor’s degree and are seeking a Virginia Teaching License can apply to the Teacher Licensure Program. An individual interested in licensure should contact the Director of the Educator Preparation Program before beginning an application. Students may also complete prerequisite coursework for a graduate program. An applicant to Teacher Licensure must submit:

1. Application for Admission.
2. One Letter of Recommendation.
4. A statement of personal and academic goals.
5. A minimum GPA of 2.5 on a 4.00 grading system in major field of interest.
6. An interview with a faculty member in the Education Department to review requirements for Teacher Licensure and entrance criteria for the Teacher Licensure Program, as described in the Academic Programs and Courses of Instruction section, under Education.

Summer Programs

The College offers several undergraduate and graduate academic opportunities during the Summer, including travel courses, Summer research programs, internships, and seated and online coursework. Summer courses are open to Randolph College
degree-seeking students and to non-degree seeking students. For Summer tuition and fee information, see the *Tuition, Fees, and Expenses* section of this catalog.

**Degree-seeking Randolph College Students**

Degree-seeking Randolph College students are not required to apply to take Summer courses, and may register for them as soon as Summer registration opens in the Spring semester. Degree-seeking, graduate students in the Master of Arts in Teaching program should consult with their program adviser for information about registering for graduate courses during the Summer.

**Special Student Application for Summer Online Courses**

Non-degree seeking students interested in taking Summer courses at either the graduate or undergraduate level must complete the *Special Student Application*, available on the Registrar’s webpage at [www.randolphcollege.edu/registrar](http://www.randolphcollege.edu/registrar). Non-degree students applying to take online classes are required to provide permanent address information as well as residency location while engaged in coursework. A legally recognized form of photo ID is also required. Access to student computing resources and course management services will not be granted, nor will registration be permitted, until all application materials, including address information and photo ID, have been received. Students participating in courses through the Academ Consortium should consult with the Registrar at their home institution for registration information.

For information regarding fees and refunds for summer courses, see *Tuition, Fees, and Expenses* section of this catalog.

**Tuition, Fees, and Expenses**

Fees are payable at the Business Office on the dates indicated below. This catalog statement is considered sufficient notice of the time and terms of payment. As a reminder, however, statements are posted electronically for the convenience of families and students before each payment is due.

Annual tuition payment plans are available for parents who wish to spread payments over the respective academic year. Information about these plans is mailed directly to parents or students upon request to the Admission Office or the Financial Aid Office. If fees cannot be paid as stipulated in the schedule, or by loans or other sources, one of these plans should be seriously considered, since all fees are due and payable as stated.

A completed and returned Educational Benefit Account Agreement and College’s Initial Disclosure (EBAA) is required of all students and their parent(s) or guardian(s) prior to matriculation. This form will remain on file in the Business Office for the duration of the student’s enrollment. By completing this form, the student and parent(s) or guardian(s) agree to pay all financial obligations that are due to the College. This form grants permission to the College to discuss financial matters regarding tuition accounts with all parties on the EBAA.

**General Fee Policies**

No student may be enrolled in or attend classes until all fees due at the time have been paid, nor will an official transcript be issued on behalf of a student having unpaid bills. Failure to keep accounts current may jeopardize participation in room draw and registration for the next semester. No senior who has an unpaid balance as of April 30 prior to commencement will receive a diploma until their balance is paid. The College will, at its option, send a delinquent account to a collection agency and will add to the balance any costs of collection incurred.

Checks returned to the College for any reason will be added to the student’s account balance. In addition, the current returned check fee will be added to the account. These transactions will be reflected on the next statement sent and will be due upon receipt of that statement. Once the check is returned, the Business Office will not accept checks as payment of tuition and fees, even if the student wishes to use someone else’s check.
EXTRAORDINARY ROOM AND BOARD ADJUSTMENTS

Should the College decide to move to online learning and close its residence halls at any time due to a pandemic or other circumstances requiring students to move out of residence during a semester, room and board refunds will be calculated as follows. In order to calculate a student’s room and board refund, the student’s College financial aid package will be calculated on a weighted average basis across tuition and room and board sticker prices. This methodology is necessary to reflect the actual net cost of room and board to each family, which is different for every student based upon their financial aid package. Upon determining the student’s net room and board charge after their weighted average of financial aid is applied in this manner to room and board, the refunds will be prorated based on the date the College closes its residence halls. Additionally, the College may, at its discretion, reduce the calculated refund for certain costs related to the provision of room and board which it cannot recover from its food service provider or otherwise.

TUITION, ROOM AND BOARD ADJUSTMENTS (UNDERGRADUATE)

Undergraduate students who withdraw before a semester begins or on the first day of classes will be given a full refund of all charges less the enrollment deposit. If the withdrawal is prior to May 1, the enrollment deposit will also be refunded. The withdrawal date is established by the date of receipt by the Associate Provost of written notice of intent to withdraw. For purposes of calculating refunds, a school week is defined as beginning on Monday and ending on the following Sunday. All refund calculations take into account any charges that are unpaid at the time of withdrawal. The student activities fee, technology fee, and any other miscellaneous fees are not included in the refund policy calculations. There is a $100 processing fee charged for all students who withdraw during the first four weeks of a semester. Refunds for students withdrawing from programs with outside institutions will be calculated based on the other institutions’ guidelines. Refund requests must be made in writing to the College’s Business Office.

If withdrawal occurs, tuition, room and board are refunded based on the school week of the semester within which the student withdraws. The schedule of reductions for tuition and room and board follows. There will be no exceptions to this policy.

- Within the first or second week of the semester: 90% reduction of the semester’s tuition, room, and board
- Within the third or fourth week of the semester: 50% reduction of the semester’s tuition, room, and board
- Within the fifth to seventh week of the semester: 25% reduction of the semester’s tuition, room, and board
- After the seventh week of the semester: no reduction of fees

For information regarding Summer adjustments, see the Summer Refund Policy.
Late Fee Policy on Past Due Account

Payments not received by the due date are subject to a monthly late fee of 2% of the past due balance. Such fees are subject to change at the discretion of the Board of Trustees.

Other General Policies

The enrollment deposit is applied as payment toward the new student’s account for the upcoming academic year and is refundable if a student submits a written request for a refund by May 1. The request should be submitted to the Admission Office. For new students entering mid-year, the enrollment deposit is due December 1, and written requests for a refund to the Admission Office must be submitted by January 1. Student financial aid awards are credited to accounts with 50% of the award credited to the Fall semester charges and 50% to the Spring semester charges. Only students who are properly enrolled and have paid room and board fees may occupy residence hall rooms on campus.

PART-TIME STUDENT POLICY

All part-time students must pay for their classes at the time of registration, prior to class attendance. Part-time students who increase their hours during the add/drop period will be billed for the additional hours at the end of the add/drop period with fees payable upon receipt of the bill. Any reduction of hours will be credited per the College refund policy.

Part-Time Student Fees

Part-time, Degree, Nonresident: $1,094 per credit hour. Applicable to fifth year undergraduate students and nontraditional undergraduate students (age 24 and over).

SPECIAL STUDENT FEES

Auditors

With prior permission of instructor, a special, part-time, non-degree, non-resident student may audit courses, with the exception of courses in art studio, music performance lessons, physical education activity courses, and science courses with required laboratory. Rate: $175 per credit hour.

Certificate of Major

For program description, see Certificate of Major under Admission. Rate: $547 per credit hour.

Dual Enrollment of High School Students

This fee applies to all high school students who enroll for one or more courses which will transfer back to their high school and count towards graduation. Rate: $150 per credit hour.

Special, Part-time, Non-Degree, Nonresident

A student will be allowed to take up to 6 hours per semester for this special fee. In addition, only 15 hours at this fee may be used towards a degree at Randolph College. If the student takes more than 15 hours at this fee, the difference in fees (in effect at the time the course was taken) would have to be paid or the extra hours not used towards the degree. A student may transfer these credits to another institution at any time at no additional charge beyond the normal transcript fee in effect at the time the transcript is sent. Rate: $350 per credit hour.

Joint Program with CVCC

A student who is registered at Central Virginia Community College may register for one course per Fall or Spring semester at Randolph College at no charge.
**Student Teaching (Undergraduate)**

For Teacher Licensure Only students or for students who require a ninth semester solely for the purpose of completing student teaching. Rate: $4200 (12 student teaching hours).

**Teacher Licensure Only**

For program description, see *Teacher Licensure Only* under *Admission*. Rate: $782.50 per credit hour.

</table>

**SUMMER REFUND POLICY**

Undergraduate online courses can be dropped before the first day of class with a 100% refund. Courses dropped within the first 3 class meeting days will not appear on the Randolph College transcript and students will receive a 90% refund; withdrawals between the fourth and seventh class meeting days will be noted on the transcript with a grade of “W” and students will receive a 50% refund. After the seventh class meeting day, students may no longer withdraw from the course except for documented medical or extenuating circumstances and no refunds are available.

**OTHER FEES FOR ACADEMIC YEAR 2021-2022 (UNDERGRADUATE ONLY, UNLESS OTHERWISE NOTED)**

**Orientation Fee**

All first-time, first-year, and transfer students will be assessed an Orientation Fee of $200 in their Fall tuition bill that partially offsets the costs of materials, and programming for parents and the students, and student meals during Orientation Week.

**Student Activities Fee**

Annual Fee: $210

**Technology Fee**

Fee charged to all students to cover computer lab and network connectivity. For students who would like a land line in their room, the Information Technology (IT) department will lease a VOIP phone for $150 per year and it will be charged to the student’s tuition account. Return of the phone to the IT department in working order at the end of the year will result in $100 of that deposit being credited back to that same account. Residential, Commuter and Online Students (annual): $430
Graduation Fee
All graduates (both bachelors and masters) are charged a graduation fee of $200 in the term in which they are scheduled to graduate. The fee is used to partially offset costs associated with Commencement, including the graduation robe, cap, and tassel, printing of diplomas and programs, speaker travel and accommodations, etc.

Course Overload Fee
Students taking in excess of 20 credit hours will be billed $450 per additional credit hour

Music Performance Fees
The music performance lesson fee is waived for music minors. If the student drops the music minor, music performance lesson fees will be charged retroactively for the semester. Music Lessons (1 credit): $325 per session

Art Fees
Students enrolled in art classes may be charged an art fee in their tuition bill that covers the cost of materials during the session ranging from $50 to $150 per course. Students should consult the professor for the fees associated with their particular course.

Physical Education Activity Courses Fees
Students enrolled in certain physical education activity classes will be charged an additional fee. Current courses that have such a fee are fencing, rock climbing, and scuba diving. Students should consult the professor for the fees associated with their particular course.

Health Insurance Fee
The College requires all full-time students to be covered under a health insurance plan. Students who already have health insurance should review their existing policy to determine whether the coverage will be available in Lynchburg. If a student does not have health insurance coverage, the College offers an optional Health Insurance Plan for a yearly fee. The College automatically enrolls all students in the College Health Insurance Plan and the charge is placed on the student’s account for the July 1 billing. Students covered under another health insurance plan are required to waive the optional College plan. If a student does not waive the optional College plan, the fee will remain as a charge on the student account. If the plan is waived, the fee is removed. The deadline to waive the insurance plan is August 15.

Student Accident Insurance
All full-time Randolph College students are covered by an Individual Student Accident Policy. This policy assures that if a student is injured during the academic year, there is up to a $5,000 accidental medical benefit in place. The mandatory plan is a nominal charge of $61 per semester charged to the student’s tuition account. Since unforeseen illnesses and accidents do happen, Randolph College is working to facilitate a student’s academic success by not having to worry about unforeseen medical bills due to lack of coverage.

Parking Registration Fees
Parking registration fees are nonrefundable once the academic years starts. Parking penalties are in addition to the normal registration fee.

Residence Damage Policy

Charges for damages to residence hall rooms and common-use areas within the halls are applied to students’ accounts upon notification by the Residence Life Office. Damages to individual residence hall rooms and their furnishings will be charged to the room occupants unless the identity of others responsible for the damage is known and the charges are paid in full by these individuals. Charges for damages to common-use areas and furnishings therein will be assessed equally to all residents of the residence hall unless the identity of individuals responsible for the common-use area damage are known and those individuals pay for the damages in full.

Online Textbook Purchases (Undergraduate Only)

Each enrolled student is eligible to charge up to $500 for textbooks through our virtual online bookstore to their tuition account in the first two weeks of each semester. Charges will be applied during the third week of classes and will be due within the next billing cycle.

Student Medical Costs (Graduate and Undergraduate)

The services of the College nurse practitioner, nurses, and counselors, and the use of the Health and Counseling Center are provided to residential students without additional cost. Non-residential, full-time students are charged a mandatory, non-refundable fee of $50 per semester for Health Center and Counseling Center services. Patients are expected to pay for medications, laboratory work and, if additional medical attention is desired, for such fees as those of the hospitals, urgent care centers, surgeons, special nurses, and/or consulting physicians.

Graduate Program Fees

Master of Arts in Teaching (M.A.T.)

Student Fees

Graduate education students will be charged $350 per credit hour for credit courses and $175 per credit hour for auditing a course. During the Fall and Spring semesters, room and board is charged only if the student resides on campus. Students may also live on campus during the Summer for a weekly rate, based on current fees, as posted for the Summer. For information, contact the Office of the Dean of Students.

*Health and counseling fee is applicable only to commuter students during the Fall and Spring semesters (not Summer).

**Accident insurance fee is not applicable to students enrolled in the online-only program. This fee is subject to change.
Withdrawal and Refund Policy (M.A.T.)

Students who withdraw before a session/semester begins or on the first day of classes will be given a full refund of all charges less the enrollment deposit. The withdrawal date is established by the date of receipt by the Associate Provost of the College of written notice of intent to withdraw. For purposes of calculating refunds, a school week is defined as beginning on Monday and ending on the following Sunday. All refund calculations take into account any charges that are unpaid at the time of withdrawal. The student activities fee, technology fee, and any other miscellaneous fees are not included in the refund policy calculations. Refund requests must be made in writing to the College’s Business Office.

If withdrawal occurs, tuition, room and board (if applicable) are refunded based on the school week of the session/semester within which the student withdraws. The schedule of reductions for tuition and room and board follows. There will be no exceptions to this policy.

Master of Arts in Coaching and Sport Leadership (M.A.C.S.L)

Student Fees

The program requires a total of 36 hours and takes place in five sessions of seven weeks each (one session in Summer and two in Fall and Spring). Students are required to take 7 hours during the Summer, 14 hours in the Fall (7 per session) and 15 hours in the Spring (7 hours in the first session and 8 hours in the second session). The program may be pursued entirely online or in person at the college. Billing is divided into 3 periods per academic year.

Graduate assistants pay reduced tuition and receive room and board, when available, at no cost to the student. For information about the graduate assistant program, see the Master of Arts in Coaching and Sport Leadership program in the Academic Programs section of this catalog. All other students may live on campus during the Fall and Spring semesters, and pay the same room and board rate as undergraduate students for the academic term. Students may also live on campus during the Summer for a weekly rate, based on current fees, as posted for the Summer. For information, contact the Office of the Dean of Students.

Withdrawal and Refund Policies (M.A.C.S.L)

MACSL students who withdraw before a session/semester begins or on the first day of classes will be given a full refund of all charges less the enrollment deposit. The withdrawal date is established by the date of receipt by the Associate Provost of the College of written notice of intent to withdraw. For purposes of calculating refunds, a school week is defined as beginning on Monday and ending on the following Sunday. All refund calculations take into account any charges that are unpaid at the time of withdrawal. The student activities fee, technology fee, and any other miscellaneous fees are not included in the refund policy calculations. Refund requests must be made in writing to the College’s Business Office. If withdrawal occurs, tuition,
room and board (if applicable) are refunded based on the school week of the session/semester within which the student withdraws. The schedule of reductions for tuition and room and board follows. There will be no exceptions to this policy.

- Within the first week of the session/semester: 90% reduction of the session’s tuition, room, and board
- Within the second week of the session/semester: 50% reduction of the session’s tuition, room, and board
- Within the third or fourth week of the session/semester: 25% reduction of the session’s tuition, room, and board
- After the fourth week of the session/semester: no reduction of fees

Two-year program tuition and fee costs are estimated at $37,665 and are based on the tuition and fees above plus a fifth residency fee of $775 (graduation residency fee). In addition, there are housing costs for the Summer and Winter residencies.

**Withdrawal and Refund Policies (M.F.A.)**

MFA courses can be dropped before the first day of class with a 100% refund. The withdrawal date is established by the date of receipt by the Associate Provost of the College of written notice of intent to withdraw. For purposes of calculating refunds, a school week is defined as beginning on Monday and ending on the following Sunday. If dropped during the first school week of the term, beginning at residency, the student will be reimbursed 90% of tuition. If dropped sometime in the second school week of the term, the student will be reimbursed 50% of tuition. Beyond the second school week, there is no reimbursement. All refund calculations take into account any charges that are unpaid at the time of withdrawal. The student fee, residency fee, housing fee, and any other miscellaneous fees are not included in the refund policy calculations.

**Scholarships & Financial Aid**

Randolph College recognizes the challenges families face when choosing the appropriate college or university for their students and makes every effort to support each family to the fullest extent. Access to a quality liberal arts education is paramount to our mission. Each year, the College awards scholarships, federal need-based grants, campus employment, and low interest student loans. All students are encouraged to complete the Free Application for Federal Student Aid (FAFSA) at [www.studentaid.gov](http://www.studentaid.gov), because it establishes eligibility for Federal grants and low interest student and parent loans. The Financial Aid Office provides applicants with information regarding payment and loan alternatives.

**How to Apply for Scholarships and Aid**

**Applying for Randolph Scholarships and Merit Awards**

The student’s application for admission serves as an application for all scholarships and merit awards. Although the application deadline is March 1, first-year students are encouraged to apply for admission early in order to be given full consideration for all scholarships.

**Academic Scholarships Based on Application for Admission for First-year and Transfer Students**

Academic scholarships are awarded based on a wide range and combination of criteria, such as academic achievement, leadership experience, community involvement, and special talents. When a student is the recipient of an honor scholarship or merit award and it is determined that there is financial need, the honor scholarship or merit award is incorporated as a part of
the comprehensive financial aid award. A student may be granted a maximum of one year on approved leave of absence and still retain the award upon returning with confirmation that the renewal criteria as noted in the original award letter were met. These scholarships are awarded to first-year and transfer students for full-time attendance provided the student remains in good standing. First-year students may defer their enrollment for a semester or up to one year and retain their eligibility for merit-based and other institutional incentives or awards at the discretion of Randolph College. Institutional award offerings are reviewed on an annual basis and some awards may not be offered after a student has indicated their plans to defer enrollment. In order for a student to be eligible for their awards after deferring their admission, the student may not enroll at another college or institution without approval from the Office of Admission at Randolph College.

Applying for Need-Based Aid and Determination of Need

Students should complete the Free Application for Federal Student Aid (FAFSA). This application should be completed and submitted to Federal Student Aid by October 1, but before March 1 for incoming students and by April 1 for continuing students. Include the College’s federal code number (003734). Students may apply online at www.studentaid.gov or on the phone app. When applying, both the parent and student must create a Federal Student Aid Identification (FSA ID) at www.studentaid.gov/fsa-id/create-account/launch. Families with special expenses/ circumstances should provide written documentation directly to the Financial Aid Office. Requests for additional funds are subject to approval by the Office of Admission.

Eligibility for need-based assistance is determined as a result of the student filing the FAFSA each year they are enrolled at Randolph College. Students are awarded need-based grants, student loans, and campus employment based upon the results of this report. Financial aid is distributed in accordance with federal, state, and institutional guidelines. Applicants who have been accepted for admission will be notified of their financial aid status following the receipt of all necessary materials.

STUDENT RIGHTS AND RESPONSIBILITIES

Students have the responsibility to submit accurately completed applications before the deadlines applicable to each program. Students are expected to read and understand their financial aid award or, in the case of a loan or student employment, to understand fully their obligations before signing a promissory note or work agreement. All students receiving financial assistance from the College are granted the right of appeal to the Financial Aid Committee for reconsideration. Requests for review must be submitted to the Financial Aid Director. Students with questions about consumer information/disclosure requirements should contact the Financial Aid Director.

SOURCES OF AID

Need-Based Grants

The Free Application for Federal Student Aid (FAFSA) serves as the application for most grant assistance programs; exceptions are noted below.

Federal Pell Grants: Need-based federal government non-repayable grants up to $6,495 (estimated) per year available to qualifying students. Eligibility is based upon a federal formula determination of a family’s ability to pay for college.

Federal Supplementary Educational Opportunity Grants (SEOG): Need-based non-repayable grants up to $4,000 per year available to qualifying students with exceptional financial need, and is subject to allocated funding from the Department of Education.

Virginia Tuition Assistance Grants (VTAG): Non-repayable grants up to $4,000 (estimated maximum) are available to Virginia residents who attend the College as full-time degree candidates. The VTAG was established to help reduce the difference between the tuition at private and state-supported educational institutions in the Commonwealth. A student does not have to be eligible for need-based aid to receive a VTAG. Applications are available online or can be requested by contacting the Financial Aid Office. It is not necessary to reapply for this grant every year. The amount of this grant is subject to change based on state appropriations. VTAG eligibility requirements can be found at https://www.schev.edu/docs/default-source/tuition-aid-section/financial-aid/vtag/tagapplication2122a.pdf.
**Other State Assistance**: Several states offer state grant programs that can be used for attendance at an out-of-state college. Applications should be completed in accordance with state deadlines.

**Student Employment**

Need-based financial aid recipients may be offered campus job opportunities. Off-campus community service jobs are also available. Funding is provided through the College and the Federal College Work-Study Program. Limited openings are available to students who have not demonstrated financial need. A typical campus job assignment involves 2-10 hours per week.

**Parent and Student Direct Loans**

Most student and parent loans are made directly with the U.S. Department of Education and are referred to as Direct Plus Loans. Direct Plus Loans are low-interest loans for students and parents to help pay for the cost of a student’s education after high school. The lender is the U.S. Department of Education, though most of the contact will be with a loan servicer. With Direct Plus Loans, families borrow directly from the federal government and have a single contact for everything related to repayment, even if they receive Direct Plus Loans at different schools. Students have online access to their Direct Plus Loans account information through the loan servicer’s website where they can choose from several repayment plans which can be switched if their needs change.

As with all federal student aid, students qualify for Direct Plus Loans by filling out the Free Application for Federal Student Aid (FAFSA). The information on the FAFSA is transmitted to the schools that are listed on the application, and those schools use the information to assess financial need for student aid. Direct Plus Loans are generally awarded as part of a larger award package which may contain other types of aid as well, to help families meet the costs of going to college. For more information, go to www.studentloans.gov or contact the Financial Aid Office.

The Direct Loans Program offers the following types of loans:

- **Subsidized**: for students with demonstrated financial need, as determined by federal regulations. No interest is charged while a student is in school at least half-time, during the grace period, and during deferment periods.

- **Unsubsidized**: not based on financial need, interest is charged during all periods, even during the time a student is in school and during grace and deferment periods.

- **PLUS**: loans for the parents of dependent students and for graduate/professional students. PLUS loans help pay for education expenses up to the cost of attendance minus all other financial assistance. Interest is charged during all periods.

**Other Student and Parent Loans**

**Plitt Loan (PLITT)**: This student loan, funded by the Clarence Manger and Audrey Cordero Plitt Trust and the College, helps families pay for college in regular non-deferred installments over an extended period of time. The student is the borrower with a parent/relative cosigner. Qualifying applicants may apply for a maximum of $10,000 per year. Funds are limited and eligibility determination includes credit reviews as well as an analysis of the applicant and cosigner’s debt/income ratio.

**Private Loans**: Private loans represent another option for paying the cost of a student’s education after high school. Lenders are banks or other lending institutions that have agreed to offer loans for defraying higher education expenses. Students will likely need a cosigner in order to obtain a private loan. Interest rates can be fixed or variable, and repayment terms can vary as well. Borrowers are encouraged to exhaust their eligibility for federal Direct Plus Loans before considering private loans as a financing option.

**Financial Aid for International Students**

The College offers merit-based aid to eligible international students who have been admitted to the College. Award amounts are based on grades in secondary school and test scores. All international students are required to show adequate financial resources for attending Randolph College.
Financial Aid for Students Studying Abroad

If the College agrees to accept credit from an affiliated study abroad program toward the Randolph College degree, it will process federal Title IV financial aid on behalf of the student or sign a government-approved consortium agreement allowing the other approved college or university to process such assistance. Most honor scholarships are applicable when the student is in attendance at certain colleges or universities with which the College has a formal affiliation or exchange program.

Veteran Affairs Benefit and Eligibility

Prior to funding, Post 9/11 GI Bill (Chapter 33) or Veteran Readiness and Employment (Chapter 31) recipients must produce the Veterans’ Affairs’ Certificate of Eligibility before the first day of class in order to enroll. In order to receive funding in a timely manner, the following needs to take place.

1. Apply and be admitted to Randolph College in an eligible, degree seeking program
2. Submit a copy of VA’s Certificate of Eligibility to the Financial Aid Office.

In addition to VA benefits, students will be considered for institutional, state, and federal aid. VA benefits may arrive after the semester has begun, but that will not prevent student from enrolling. Students will not be assessed late fees or be required to secure additional funding until VA funds arrive. In addition, students will not be denied access to any school resources.

The Virginia State Approving Agency (SAA), is the approving authority of education and training programs for Virginia. The office investigates complaints of the GI Bill beneficiaries. While most complaints should initially follow the school grievance policy, if the situation cannot be resolved at the school, the beneficiary should contact SAA via email saa@dvs.virginia.gov.

ACADEMIC REQUIREMENTS FOR FINANCIAL ELIGIBILITY

Federal regulations require that students make satisfactory academic progress (SAP) according to institutional policy in order to receive federal Title IV funds. Randolph College also requires that students meet these standards in order to maintain eligibility for institutional funds. Financial Aid conducts a review of academic progress every June in accordance with the Ineligibility and Probation Status Report from the Office of the Provost.

Qualitative Standard:

Students must maintain a minimum cumulative GPA in order to meet satisfactory academic progress standards for financial aid. As a part of the annual June financial aid progress review, students who are on academic probation will be placed on financial aid probation. During this probationary period, the student is eligible to receive financial aid. The student must attain the appropriate minimum cumulative GPA before the next annual progress review, or the student will be ineligible to receive financial aid for the upcoming academic year. For the definition of good standing, see Academic Procedures and Regulations.

Pace of Progression: Federal student aid (Title IV) eligibility is also related to the successful completion of credit hours completed versus credit hours attempted. Percentages are rounded up for this calculation. Students receiving federal student aid from Title IV programs must be making progress towards their degree at the cumulative rates of completion as follows:

- 50% cumulative rate of completion for undergraduate first-year students.
- 67% cumulative rate of completion for all other undergraduate class year.
- 67% cumulative rate of completion for all graduate class years.

Quantitative Standard:

Federal Financial Aid: Undergraduate students who consistently meet the qualitative standards listed above are eligible to receive federal financial aid for up to 150% of the published program length of 124 semester hours, i.e., for a maximum of 186 semester hours for all course work applicable to the Randolph undergraduate degree, including transfer credit. Time frames for part-time students are adjusted proportionately according to whether the student is enrolled at least three-quarters time, half-time, or less than half-time. Non-degree candidates for Teacher Licensure must submit a proposed academic progress plan to be reviewed by the Financial Aid Committee for determination of the maximum number of semesters of eligibility for federal student loans.
Institutional Aid: First-time, first-year students are expected to complete all graduation requirements within four years and are generally eligible to receive eight semesters of institutional funding. Undergraduate transfer students are eligible to receive institutional funding based on the number of remaining hours needed to complete all degree requirements after enrolling at Randolph. Undergraduate students who need additional time to complete their program of study may submit an appeal for extended institutional aid to the Associate Provost, contingent upon available funds which are verified and approved by the Treasurer.

Satisfactory Academic Progress: In order to make satisfactory academic progress for financial aid review, a student must meet the following minimum criteria: after the first-year of study, 24 hours completed; after the second year of study, 56 hours completed; after the third year of study, 88 hours completed; and upon graduation, 124 hours completed. Students who do not meet these standards during the annual progress review at the end of the academic year are placed on financial aid probation. During this probationary period, the student is eligible to receive financial aid. Students must progress to the appropriate level of hours completed before the next financial aid progress review, or financial aid will not be renewed for the upcoming academic year. Incomplete courses, withdrawals, and noncredit remedial courses are not counted as hours completed toward satisfactory academic progress. All periods of attendance, including Summer sessions and semesters during which a student does not receive financial aid, are counted toward the maximum time frame and the qualitative component. Time frames are not adjusted based upon a change in major or degree.

Transfer Credits: For the purposes of Satisfactory Academic Progress reviews, all transfer credits that are accepted as meeting a degree requirement will be counted as both attempted and completed credit hours.

Repeating Courses (SAP): Title IV aid may be received for the retaking of any course previously passed or failed. Only one retake is permissible per course regardless of the outcome of the retake. This retaken course may be included in the student’s enrollment status, and would count toward the student’s eligibility for Title IV aid. (Randolph supports the retaking of courses if a grade of D+, D, D- or F is earned.) Randolph requires special permission to retake a course when a grade greater than D+ is earned.

Remedial Courses: Randolph College does not offer remedial courses and they are not accepted as transfer credit.

Loss of Eligibility and Appeal Procedures:

Student eligibility is reviewed at the end of the academic year and students are notified of probationary or non-renewal status by July 1. To appeal this decision, the student must submit a written letter of appeal to the Director of Financial Aid by July 16. Appeals should be based on the basis of: injury or illness, the death of a relative, or other special circumstance. Appeals should explain why the student failed to make satisfactory progress and what has changed in their situation that will allow them to make satisfactory progress at the next evaluation. In some cases, additional documentation may be requested. Students will be notified of the result of the appeal by August 1.

Adjustments When a Student Withdraws

Official Withdrawals:

Any student planning to withdraw from the College, either during or at the end of a session, must complete the exit procedure initiated by completing a Voluntary Withdrawal form. The official withdrawal determination date is established by the date of receipt by the Associate Provost of written notice of intent to withdraw.

Unofficial Withdrawals:

Students who cease to attend all classes and do not participate in any official academic activities will be considered unofficial withdrawals and will be subject to the Return of Title IV Funds Policy. The return of funds procedures will begin when one of the following takes place, whichever occurs earlier:

- College staff becomes aware that the student is no longer attending any classes and the official withdrawal process, voluntary or involuntary, commences.
• The term ends and it is determined that the student ceased to attend classes during that term. All students who do not earn at least one passing grade in a term will be reviewed to determine if they should be considered unofficial withdrawals.

The **determination date of withdrawal** for Unofficial Withdrawals will be one of the following, based on the best available information:

• The mid-point of the term.
• The last date the student attended class or participated in an organized educational activity. This date can only be used if supported by documentation deemed appropriate by the Associate Provost.

**Return of Title IV Calculations:** Title IV Return calculations will be done within 30 days of the Date of Determination.

**Notifications to Students:** Notification of the results of the Title IV Return process will be sent to the student in writing by the Financial Aid Office within 45 days of the Date of Determination. The notice will include the following:

• Information regarding any grant overpayments owed to the federal government.
• Explanation of potential eligibility for post withdrawal disbursement of student loan funds (if applicable).
• Amount owed to the College as a result of the Title IV Return process.

**Financial Aid Adjustments**

Grants and scholarships that are awarded from institutional funds will be reduced in accordance with the above procedure for adjustment of charges. The policy for federal financial aid funds is given below. Other financial aid funds (outside scholarships, state funds, etc.) will be refunded in accordance with the rules/regulations governing each specific program. For further information, including examples of return of Title IV financial aid, contact the Financial Aid Office.

**Title IV Fund (Federal Financial Aid) Adjustments**

The College follows the following mandatory policy when calculating the return of Title IV financial aid funds. During the first 60% of each session of an enrollment period, federal financial aid is earned in direct proportion to the length of time and number of credits in which the student is enrolled. A student who remains enrolled beyond the 60% point of each session earns all aid for that period. During each semester of the academic year, the student attains full-time eligibility for all aid when they are enrolled and complete 60% of the 2nd session. If student is enrolled in less than 12 credits at the 60% point of 2nd session of a semester, aid will be prorated as necessary. The percentage of the period that the student is enrolled is derived by dividing the number of days the student attended by the number of days in the enrollment period. Calendar days are used, but breaks of at least five days are excluded.

Federal aid that has been earned by the student and which could have been disbursed, but has not yet been received/dispursed by the school must be disbursed to the student’s account after withdrawal. After calculating the amount of funds to return, the College must return unearned aid for which the school is responsible. Funds are repaid in the following order:

2. Federal Subsidized Stafford Loan  4. Federal Pell Grant  6. Other Title IV Programs

The student (or parent for a PLUS loan) must return unearned aid for which the student/parent is responsible. If the student is unable to repay the portion of unearned aid a payment plan must be arranged with Randolph College or the U.S. Department of Education. Students who have not repaid or entered into a signed repayment agreement within forty-five days of notification may lose eligibility for Title IV funds and will not be eligible to receive an academic transcript from Randolph College.

**Student Life**

Learning takes place at all times during a student’s time at Randolph College: in the classroom, while studying abroad, in the dining hall, in the residence halls, on the field, court, or pool, and in the various student organizations that exist, to simply name a few. At the College, there is a close relationship between the academic program and cocurricular activities among the
students, faculty, and administrative staff. Provided below are descriptions of the offices and opportunities available to students through the Dean of Students Office. Additional information is available in the The Wildcat Way: The Randolph College Student Handbook, available at: https://www.randolphcollege.edu/student-handbook/

RESIDENCE LIFE

Randolph College is a small residential college, which accounts in part for the exceptional quality of student life. There are six residence halls and apartments for upper-level students overseen by head residents and resident assistants. The Office of the Dean of Students, head residents, and resident assistants serve as valuable sources of information and support for students.

A prominent feature of our environment is the sense of community that results from the strength of our residential living experience. Through on-campus residency, students develop strong interpersonal connections with their peers, enjoy social and educational experiences together, develop the ability to negotiate solutions to community and personal issues, and learn to appreciate the rich diversity of cultures, opinions, talents and experiences that our community offers.

All traditionally aged students (23 or younger) are required to maintain full-time enrollment and to live in campus housing, unless classified as a Commuter Student. Students who are 24 or older may not reside in student housing. In order to be eligible for Commuter Student status, the student must be enrolled full time, must apply for approval to live off campus, and meet one or more of the following criteria on or before the first day of classes of the semester they initially enroll:

- reside with a parent/guardian within a 50 mile radius of the College in the parent’s primary residence,
- be married and living with a spouse,
- have a dependent child living with the child,
- be enrolled in their fifth year or greater at the College.

Students should start the application process to reside off campus if they meet the above criteria by contacting the Assistant Dean for Residence Life and Student Conduct.

Students who are transferring to Randolph from another higher education institution located within 50 miles of the Randolph campus, and who at the time of matriculation are renting in the local community, may apply for commuter student status. Each application will be reviewed by the Dean of Students or their designee. An exception to the residency requirement will be granted if a student’s application is approved. Such requests must be made at the time of initial matriculation and will not be granted at a later date.

STUDENT ACTIVITIES AND TRADITIONS

Student activities promote opportunities for leadership development, the pursuit of common interests, service to the community, and exploration of today’s world. Through these activities, a student learns to work with others and usually develops greater insight and confidence. These experiences, enhanced by leadership development programs, contribute substantially to the quality of life on campus and to the development of personal and professional skills that a graduate takes into the future. Membership in most organizations is open to any student who applies. For other groups the necessary qualifications or the basis of election are described in the The Wildcat Way: The Randolph College Student Handbook, available at: https://www.randolphcollege.edu/student-handbook/.

Athletics

Intercollegiate teams are active in the following sports for women: basketball, cross country, lacrosse, soccer, softball, swimming, tennis, track and field, and volleyball and for men: basketball, cross country, lacrosse, soccer, swimming, tennis, and track and field. All intercollegiate sports are conducted in accordance with the guidelines of the Old Dominion Athletic Conference (ODAC) and the National Collegiate Athletic Association (NCAA).

Identity, Culture, and Inclusion

Randolph College celebrates diversity in all its many forms and seeks to build a more inclusive world. Students may seek support for their various identities and how they intersect in the Office of Identity, Culture, and Inclusion, including but not
limited to students of color, the LGBTQ+ community, and international students. Programs are offered that seek to affirm the unique identities of people while building a community that strengthens itself from these identities and cultivates leaders who will integrate the value of human diversity to the world.

Physical Fitness

The Student Center fitness areas and the Randolph Michels Athletic Center weight room, gymnasium, pool, and aerobics room are open to students for general fitness activities. Outdoor venues include the track, turf field, grass field; softball field, tennis courts, and disk golf course are also available. A variety of intramural and recreational activities are also available and scheduled throughout the year.

Social and Recreational Activities

Concerts featuring comedians, magicians, and professional musicians are held regularly. The Randolph Programming Board plans these along with campus-wide and traditional events such as Fall Formal, Geek Week, and Summer-Sendoff. Group trips to cities such as Washington, D.C. are organized throughout the year. On occasion, trips and other events are planned in conjunction with neighboring colleges.

Student Media

The Sundial, the campus newspaper, involves the writing, administrative, and photography efforts of students. The literary magazine, Hail, Muse! Etc., publishes student works in poetry, prose, and the visual arts. The campus radio station, WWRM, broadcasts on campus and also webcasts at www.wwrm.org.

Performing Arts

Randolph College offers students interested in various aspects of the performing arts a rich array of opportunities and experiences that foster a spirit of community and artistic collegiality.

The Performing Arts Department produces two or three theatre productions each year, where students work alongside Theatre faculty and visiting guest artists in Thoresen Theatre, the Lab Theatre, and the Mabel K. Whiteside Greek Theatre. Student productions, workshops, and classroom projects round out the season. Theatre productions provide opportunities for students in performance, design, management, and technology, both as an extra-curricular activity and for academic credit. Theatre majors often join the artistic team on a main stage production for their senior capstone project.

Throughout the year the Performing Arts Department brings in visiting artists who teach, choreograph, and stage works for the Annual Spring Dance Concert. Whether creating original works or re-staging others, the choreography highlights a broad variety of styles. In recent years, Paul Taylor’s Esplanade, Isadora Duncan’s Dance of the Furies, and Takehiro Ueyama’s Footsteps in the Snow have been performed.

The Chorale, Touch of Harmony, and Chamber Orchestra are directed by music faculty. Participation in these groups carries academic credit. Chorale prepares four programs per year including Christmas Vespers and the Spring Concert. Touch of Harmony (a vocal jazz ensemble) presents several programs in the community and on campus. Chamber Orchestra has established a reputation in the Lynchburg area for fine and enjoyable performances of quality repertoire. The ensemble provides a rare and valuable opportunity for students to perform masterworks side by side with area professional musicians. Students may also join one of two student-run acapella groups.

The Heritage Ensemble presents The Flavor Show each year, an evening of music, dance, and theatre. Other on-campus opportunities include student productions, an “improv” group, and open mic nights. The rich variety of these productions allows students to explore and invest in their creative and artistic interests whether their preference is onstage or backstage.

Traditions

Traditions are a very important part of student life. Alternate classes unite together, as sister classes, so that the Odds (odd-year classes) and the Evens (even-year classes) enjoy many special events and share a spirit of rivalry with each other in fun.
As students move through four years here, they participate in the important roles played by each class in serenades, the Daisy Chain, Holiday on Main, and Pumpkin Parade.

**Volunteerism**

Student Affairs offers opportunities for students to engage in service in the Lynchburg community. The Life More Abundant program, the College’s justice-based service program, is designed to help students get beyond the Red Brick Wall and into their role as active citizens. Students can also take part in some more comprehensive service based opportunities like the Alternative Break trips.

**STUDENT LIFE POLICIES**

**The Honor System**

The Honor System at the College demands that all students abide by the highest standards of honesty and integrity in their academic, social, and personal life. This charge has been fundamental to conduct and governance since the opening of the College in 1893. The effectiveness of the Honor System depends upon the concept of dual responsibility: individuals assume the responsibility for their own actions and those of other students. The resulting atmosphere of mutual trust and the opportunity for self-awareness and personal growth make the Honor System a precious inheritance and an essential part of student life.

**Student Government**

Student Government is the student administrative body that promotes the general welfare of each student by creating an atmosphere conducive to student development in the spirit of a true liberal arts education. Student Government is responsible for the continuance of student clubs and organizations. It consists of those students elected or appointed to positions in the executive, legislative, and judicial branches of the government. Officers of Student Government are elected annually in the Spring.

**STUDENT LIFE SERVICES**

**Counseling Services**

The Counseling Center is open Monday through Friday during the regular academic year and staffed by diverse licensed mental health professionals, one resident in counseling, and one supervised graduate student intern. Services include individual counseling, group counseling, emergency on-call support, and referral to off-campus community resources when needed. Students receive support for a wide variety of concerns including adjustment to college, relationship issues, identity development, gender issues, stress management, anxiety and depression, substance use, trauma recovery, and more. Counseling services are free and confidential for all full-time students, including commuters and graduate students. Numerous resources on a variety of topics are available for loan.

**Health Services**

The Randolph College Student Health Center offers a variety of prevention, treatment, health promotion, and educational resources to all full-time Randolph College students. College Health Nurses and the Nurse Practitioner strive to promote healthy lifestyle habits and provide treatment, counseling, and education for typical student health needs and concerns. For more specialized needs, students may be referred to an off-campus medical office or facility. The Health Center is open weekdays during the regular academic year.

All new full-time students are required to submit a completed medical record before July 1 (January 1 for new students entering in the Spring semester). Students who do not have a complete medical record on file at the Health Center will not be permitted to register for classes and can only be seen in the Health Center for emergencies. Proof of health insurance coverage is also required of all full-time students during their entire enrollment at Randolph College. Students who cannot provide proof of coverage will be enrolled in the health insurance plan endorsed by the College and will be billed for the cost of that
coverage. Information about the College endorsed plan and the process for waiving enrollment due to other coverage will be provided to all students.

Orientation

All new students attend an orientation program prior to matriculation in August or January. During orientation, students are introduced to college life and guided in their transition to life at the College. The College’s orientation model includes Summer advising, Fall orientation and Spring orientation programs. Activities during these events include information sessions, placement examinations, and social and recreational events. Students have an opportunity to meet key staff of the College, student leaders, and faculty. Specific orientation sessions are provided for international, commuter, and transfer students.

Spiritual Life

The College supports all sincere expressions of religious faith and is committed to the study of religion as a vital part of a liberal arts education. Campus spiritual life is fully ecumenical as well as interfaith, and students are encouraged to participate in the activities of the local synagogue, mosque, and congregations. Area campus ministers of several denominations are available to students. Student groups often gather for Bible studies, fellowship meetings, and prayer groups as well as service and mission opportunities. Through a variety of options, a student may participate in or initiate activities, which engage, promote, and nurture the development of an intellectual and spiritual life.

The Academic Program

The academic program is the heart of Randolph College. Designed to develop the student as a whole person, the academic program is the vehicle for acquiring a broad base of knowledge while simultaneously preparing for a meaningful career. The liberal arts curriculum fosters numerous intellectual virtues, including critical thinking, scientific inquiry, and artistic expression. Additionally, the curriculum reinforces at all levels the fundamental importance of effective writing and speaking. Randolph College’s TAKE2 program supports student success in these virtues by allowing them to intensely focus on two courses at a time over seven weeks.

The General Education Program

Randolph College celebrates excellence in the liberal arts and sciences. Our liberal arts education teaches students to reason creatively, humanistically, scientifically and quantitatively; speak and write with clarity and accuracy; cultivate habits of lifelong learning; develop cultural literacy (regarding their own culture and cultures beyond their own), and consider how to lead a meaningful life (vita abundantior). The General Education Program contributes to these goals by granting students broad exposure to several disciplinary ways of knowing as well as helping students develop core competencies that lay a firm foundation for the work they will do within and beyond the red brick wall.

Courses fulfilling General Education requirements are noted in the course descriptions with the following indicators: WR: Writing; WI: Writing Intensive; QR: Quantitative Reasoning; LA: Language; CE: Common Experience—Life More Abundant; AE: Artistic Expression; HE: Human Experience; CI: Culture and Identity; SS: Social Science; NS: Natural Science; PE: Physical Education.

Core Competencies

WR. Writing.

Every student should develop the ability to write English effectively, to use College library resources and research processes, and to follow appropriate conventions in academic writing. Unless granted an exemption by the Department of English on the basis of an English Composition Placement Test or earned college credit for the equivalent, each student must take WRIT 1103 (or its equivalent) during their first year.

For non-native speakers only, the following sequence must be begun in the first session: WRIT 1101,1102: English Composition I and II.
WI. Writing Intensive.

Each student must complete a course in any discipline with a Writing Intensive (WI) designation. This course may also fulfill one of the Ways of Knowing General Education requirements.

AMCP 3322; ARTH 2277, 2280; BUS 2271, 3367; CHEM 3307-3307L*; CHEM 3378-3378-L*; CLAS 1132; ENGL 1111, 1112, 1140, 1142, 1161, 2256, 2263, 2265, 2266, 2276, 2277, 2279; EVST 3326; HIST 1124, 1167, 2203, 2204, 2258, 2277, 2278; MAC 1101, 2204, 2277; PHIL 1122, 1132, 2280, 3351; PHYS 3331, 3332, 3378-3378L*; POL 2265, 3372; PSYC 4401; RELG 1147, 1172, 2202; SES 3307, 3364; THTR 2276, 2277, 2279

*If using chemistry or physics, both the lecture and lab must be passed in order to fulfill the requirement.

QR. Quantitative Reasoning.

Every student should demonstrate fundamental quantitative reasoning and application skills. Students can demonstrate these skills by passing an optional competency exam or by successfully completing (or receiving transfer credit for) one of the following courses:

ASTR 1101, 1103; BUS 3334; CHEM 1105, 1106; ECON 2227; EVST 2201; MATH 1109, 1117, 1118, 1119, 1149, 1150, 2208, 2227; PHYS 1105, 1106, 1115, 1116, 3301; POL 2231; PSYC 2227; SOC 3395

LA. Language.

Every student should develop some capability in a language, ancient or modern, other than her or his own. Fulfillment of this requirement may be accomplished in one of the following ways:

1. Successful completion of two sessions of a single foreign language not previously studied; or
2. Successful completion of two sessions of a single foreign language at the elementary or intermediate level in a language previously studied, depending on placement; or
3. Successful completion of a course above the intermediate level; or
4. Exemption based on a qualifying SAT II score, an Advanced Placement score of 4 or better, an International Baccalaureate score of 5 or better, or departmental examination. International students fluent in a language other than English may request an exemption from the Office of the Provost of the College. Other students fluent in a language other than English may apply to the Board of Review for exemption.

LMA 1101. Life More Abundant.

This course, taken in the first session of the first year, is intended to expose students to a variety of different disciplinary traditions and approaches through the exploration of contemporary issues and questions in society, and to provide an intellectual experience common to all students in an entering class. Includes academic skills workshops and a selection of required out-of-class activities. Transfer students entering with 12 or more hours completed are exempt from this requirement.

Ways of Knowing

AE/HE. Arts and Letters.

Every student should learn how humanists and artists “chronicle, record, analyze, transmit, and deepen our understanding of the human condition and experience.” This requirement may be fulfilled by successfully completing 9-12 credit hours in at least 3 courses in the arts and letters division, including at least 3 to 4 credit hours in each of the following two categories:

AE. Artistic Expression

ARTH 1101, 1102, 1107, 1179, 2204S, 2277, 2238, 2242, 2243, 2244, 2257, 2263, 2264, 3315, 3380, 3382, 3384; ARTS 1103, 1181, 2279; CLAS 1183, 2275; DANC 1101, 1102, 1131, 1132, 1141, 1142, 2231, 2232, 2241, 2242, 2261, 2262; ENGL 1111, 1112, 1113, 1142, 1161, 2253, 2255, 2263, 2265, 2266, 2276, 2277, 2279, 3336, 3343, 3357; GREK 3301, 3302, 3304, 3305, 3307, 3309; LATN 3301, 3303, 3304, 3305, 3306, 3308; MAC 1181, 1183, 2277, 2279, 3344, 3351, 3382, 3384; MUSC 1103, 1107-1107L, 1129, 1131, 1133,
HE. Human Experience

Students should be able to think about differences in culture and identity. Each student should take at least one course dealing substantively with issues related to gender, race, class, or disability, or focusing on a culture other than Europe or the United States.

```
AMCP 3322; ARTH 2214, 2215, 3380, 3378, 3384; CHIN 1105, 1106; EDUC 2213; ENGL 1111, 1140, 3333, 3343, 3378; EVST 1101; FREN 3320, 3365, 3366; GST 2203; GEO 2203; HIST 1123, 1124, 1167, 2221, 2222, 2226, 2230, 2237, 2258; MAC 1101, 2204, 2205, 3342, 3380, 3384; MUSC 2220, 2227, 2228; POL 1115, 2205; PSYC 2212; RELG 1128, 1147, 1168, 1199, 2202, 2203, 2238, 2253, 2264, 2266, 2268, 2270; SES 2262; SOC 1114, 2216, 2231, 3327, 3335, 3342
```

SS. Social Science.

Every student should learn how social and behavioral scientists acquire, organize, and apply knowledge in the study of society or human behavior. This requirement may be fulfilled by successfully completing one course in the social or behavioral sciences.

```
ECON 1101, 1102; EDUC 1101, 1108; EVST 2250; MAC 2204, 2205; POL 1101, 1106, 1113, 2201, 2222, 2225, 2245, 2265, 3332; PSYC 1105; SOC 1101, 1114, 2209, 2218, 2222, 2265, 2276, 3310, 3321, 3394
```

NS. Natural Science.

Every student should learn how scientists acquire, organize, and apply knowledge about nature based on experiments and observations. This requirement may be fulfilled by successfully completing a course in the natural sciences and its laboratory component.

```
```

PE. Physical Education.

A liberal arts education includes development of the mind and body. Through active participation in a wide range of physical activity options, students gain an appreciation for the benefits that come from physical activity and exercise. One hour of credit is required and completion in the first two years of study is strongly recommended. Choose from the following list of courses.

```
DANC 1121, 1131, 1132, 1141, 1142, 2222, 2231, 2232, 2241, 2242, 2261, 2262; PED Activity and Team Courses; THTR 2228
```

General Education Program Policies

1. A minimum of 30 hours are required to fulfill the General Education Program. Students who are exempted from a requirement must complete additional hours in another Core Competency or Ways of Knowing category to reach 30 hours.
2. With the exception of the writing intensive course and the culture and identity requirement, no single course can be used to fulfill the requirements of the General Education more than one time.
   a. A single course cannot be used to fulfill more than one requirement if it drops a student’s total General Education credit hours below 30.
   b. No course can be used to simultaneously fulfill three General Education requirements.
3. Courses included in a Major or Minor Program may also be used toward General Education requirements.
4. Credit given for Advanced Placement, the International Baccalaureate, CLEP subject tests, by college examination, and for courses taken at other institutions may be used to satisfy the requirements.
5. Excluded from fulfilling the requirements are Independent Study, Experiential Learning, and 4400 level courses.
6. Transfer credit may be used to fulfill General Education requirements. If the title and/or description of a course is substantially the same as that of a Randolph College course, the Registrar may automatically approve the course as one which counts toward the requirements. If a course does not duplicate but approximates a Randolph College course, the Registrar, in consultation with pertinent department chairs or other appropriate members of the faculty, may approve the course to count toward the requirements. If the student disagrees with the rulings described above, a written appeal may be submitted to the Board of Review for further consideration.
7. For General Education requirements, the governing catalog is the one in effect upon matriculation. These requirements remain in effect for as long as the student is continuously enrolled at the College. Following a gap in enrollment for any reason, a student who is approved for readmission will be subject to all General Education requirements of the catalog in effect at the time of re-enrollment, unless otherwise approved by the Board of Review.
8. For one-time only courses fulfilling general education requirements, please reference the class schedule.

**ACADEMIC OPPORTUNITIES**

**The Major Program**

Depth of understanding in one field, including both specialized knowledge and a grasp of methodology, is attained through the Major Program, which becomes the focus of the student’s work during the junior and senior years. A major may be either departmental or interdisciplinary in character. In the English Department, the student selects an emphasis within the major. By meeting the requirements for the major in two separate departments, a student can complete a double major. A student may even elect to develop an Independently Designed Major Program of related courses chosen from two or more departments. For more information on declaring a major see Academic Procedures and Regulations.

**Departmental and interdisciplinary majors offered by the College include:**

- Art History
- Biology
- Business
- Chemical Physics
- Chemistry
- Comparative Philosophy*
- Computer Science and Mathematics
- Economics
- Elementary Education
- Engineering Physics
- English (Literature; Creative Writing)
- Environmental Science
- Environmental Studies
- Global Studies
- History
- Mathematics
- Media and Culture
- Museum and Heritage Studies
- Physics
- Physics Education
- Political Science
- Psychology
- Sociology
- Spanish
- Sport and Exercise Studies
- Studio Art
- Theatre

*Curriculum under review

**The Minor Program**

Each student may elect a maximum of three minors in addition to the major. A minor is a five-to-seven-course cluster that may be departmental, interdisciplinary, or independently designed by the student. The purpose of the minor may be to enrich the student’s major, to emphasize the interconnectedness of liberal arts fields, or to provide an opportunity to pursue special academic or pre-professional interests. A student may self-design a minor in collaboration either with a faculty advisor or with one of the faculty concerned. For more information on declaring a minor see Academic Procedures and Regulations. Minors offered include:
Departmental Minors

American Politics
Art History
Biology
Business
Chemistry
Chinese Studies
Classical Civilization
Comparative Philosophy*
Comparative Politics/Int’l Relations
Computer Science

Creative Writing
Dance
Data Science
Economics
Editing
Engineering
Environmental Science & Analysis
Environmental Studies & Sustainability
History
Latin

Literature
Mathematics
Music
Physics
Political Theory
Psychology
Sociology
Spanish
Sport and Exercise Studies
Studio Art
Theatre

*Curriculum under review

Interdisciplinary Minors

African & African American Studies
American Culture
Asian Studies

Cognitive Science
Earth Science Education
Film Studies
Gender Studies

Global Studies
Human Services
Museum and Heritage Studies
Renaissance Studies

Experiential Learning

The Career Development Center coordinates a range of activities including internships, externships (job shadowing), and volunteer opportunities to assist students in developing career related skills. Qualified sophomores, juniors, and seniors have the opportunity to arrange internships for credit either on campus or in off-campus businesses and organizations. Students receive expert guidance from a sponsoring faculty member and an on-site supervisor. Experiential Learning for academic credit is not available to first-time, first year students in their first full semester except with special permission from the Randolph College Career Center Director.

Students may register for one to four experiential learning (EX L) credits and complete them over a session or a full semester. A limit of 8 EX L credit hours may be counted toward graduation.

Honors in the Major

Students of exceptional ability are encouraged by the various departments to engage in independent Honors study for up to 12 hours. Honors work is done under the supervision of a faculty member in the student’s major department and culminates either with a written research paper or thesis upon which the student takes an oral examination, or with a project which culminates in a presentation suitable to the nature of the project. Junior standing is required to enroll in Honors courses. A student completing the program with distinction is awarded Honors in the major field at Commencement. See Academic Procedures and Regulations.

Independent Study

Independent Study is a program that enables the student to pursue a course of study which is of special interest but is not offered in the regular curriculum. The College encourages the able student to undertake independent study as a means of increasing self-reliance, identifying educational objectives, and structuring a program to meet these objectives. The student is responsible for selecting and defining the topic to be pursued and for making important decisions determining the development and outcome of the project. See Academic Procedures and Regulations.

Tri-College Consortium

Three senior colleges in the Lynchburg area have formed a consortium, which increases the diversity of courses open to students and of professors with whom they may study. It also makes available other educational resources on the three
The colleges involved, in addition to Randolph College, are University of Lynchburg and Sweet Briar College. See Academic Procedures and Regulations.

The Writing Program

The College-wide Writing Program offers support and resources for the development of student writing skills at every ability level, across the curriculum, and through all four years. Faculty formally evaluate student writing skills at the end of each course where there is a basis for such assessment. The Writing Board then submits to the Provost a list of students assessed by two or more faculty members to have demonstrated excellent writing skills. In addition, the Writing Board also awards annual prizes for excellence in writing. Students assessed by two or more faculty members to have deficiencies in writing skills during the course of the semester must either pass a proficiency test or enroll in a designated writing intensive course or a weekly tutorial in the Writing Lab in the semester following low evaluations in order to remain eligible to continue at the College. See Writing Skills Evaluation.

All students must fulfill the general education requirement under Writing during the first year. The English Department also offers elective courses in creative writing. In the senior year, majors prepare and present seminar papers to their respective departments. Over four years, the essay tests and regular writing assignments undertaken in small class and tutorial settings develop the critical thinking and communication skills that become a lifelong advantage for the liberal arts graduate.

The Senior Program

The Senior Program is the culmination of a student’s undergraduate studies in the major field. It should be a well-integrated and unified body of intellectual work which will permit evaluation of the student’s initiative and independence in organizing, relating, and applying significant ideas within a major field. The form of evaluation shall be determined by each department. Evaluation can be achieved in many cases within the framework of a senior seminar, but alternatives or supplements such as the following may be used:

1) a project with results presented in either written or oral form,
2) a recital or exhibition,
3) an Independent Study Program, or
4) a program of courses.

An Honors Program may be designed to subsume any of the above. A brief description of the Senior Program for each department appears under Academic Programs and Courses of Instruction. All requirements of the Senior Program must be completed and results reported by the date that senior grades are due in the Registrar’s Office. A student who has failed the Senior Program will not be eligible to receive the degree at Commencement of that year, but may, with the approval of the department, make up any deficiencies within a period of three years and receive the degree at the next Commencement following meeting all the requirements for the degree.

Off-Campus Programs

Recognizing that a student’s program may be enhanced through course work and experiences elsewhere, the College supports off-campus study opportunities, both domestic and abroad. Such opportunities should be consistent with the goals of a liberal arts education, demonstrate a level of academic rigor commensurate with Randolph College’s institutional expectations, have well-defined academic and programmatic objectives, and offer academic and experiential opportunities that will enhance and contribute to a student’s course of study. For study abroad, such opportunities should promote cross-cultural immersion and interaction with people of the host country, demonstrate quality in the delivery of support services to students, and contribute to programmatic and geographical diversity relative to existing programs.

The International and Off-Campus Programs Committee (IOCPC) reviews applications for off-campus study. Students are expected to submit well-developed proposals that demonstrate that the program elected will enrich the overall degree program, and demonstrate concretely the student’s ability to meet degree requirements. The College encourages students to participate in its own, faculty-led programs and its affiliated programs of study, which usually yield graded (GPA) course credit. Other programs may be submitted for consideration by the IOCPC for transfer course credit.
Domestic Study

American Culture Program

The American Culture Program was established in 1990 for implementation in 1991–92. The American Culture Program draws on the specific advantages present at the College, such as the expertise of the faculty; the College’s location in an area of the United States that is especially rich in museums, historic sites, and other places useful to the study of both America and preconceptions of America; and the College’s nationally recognized collection of American art housed in the Maier Museum.

Taking the tension between perception and reality as its intellectual basis and offering an inclusive study of American society that properly recognizes women and minorities, the program involves a rigorous immersion into the study of American culture for one session, usually in the Spring semester. Study is concentrated, interdisciplinary, and often on-site at key locations in and near Virginia. The program is part of the curriculum of the College. All courses are taught by Randolph College faculty. See American Culture Program in Academic Programs and Courses of Instruction.

Admittance to the American Culture Program is open to any student who has completed the first three semesters and is not on academic probation, provided that the student completes the application process and is selected for participation. The program accepts applications from undergraduates from both Randolph College and other campuses who can show an academic record of substance and promise. For full-time Randolph College students, fees for the program will be the same as those for a semester of study at the College. For full-time, one-year international students and students from other institutions, consult the Director for fee information. Financial aid is available; contact the Financial Aid Office. Program Director: Julio Rodriguez.

Study Abroad

The College established a strong identity as an international institution in the first decades of its history and is committed to offering international and cross-cultural experiences for students. Qualified students may apply to study abroad for one or two semesters provided that an overseas experience is appropriate to their program of study. Students may also request approval to enroll directly in a foreign university or to study abroad in an approved program coordinated by another U.S. institution.

Students interested in pursuing study abroad options should consult with the Associate Provost for guidance on application and approval processes.

Unless otherwise noted, students pay Randolph College tuition and room and board to participate in affiliated study abroad programs. Students are also responsible for a required study abroad fee. Federal aid, Randolph College merit scholarships, and need-based assistance are applicable to most programs. International students should note that Randolph College financial aid packages are available for use solely on the Lynchburg campus and will not otherwise transfer to Randolph College study abroad programs or any other overseas study experience. Several endowed global studies funds provide limited need-based scholarships to both U.S. and international students who wish to study abroad. For more information, consult the Associate Provost and the Financial Aid Office. See Financial Aid for International Students and Students Studying Abroad and see Off-Campus Study and Transfer of Credit.

Centre Internationale d’Etudes Françaises (CIDEF) in Angers, France

Randolph College has an agreement with l’Université Catholique de l’Ouest (UCO) in Angers, France. Students may study for a full academic year or a Spring semester at CIDEF, which is part of UCO. All instruction is conducted in the French language. To participate in the program, students must have attained an intermediate proficiency in French. Interim Faculty Coordinator: Carl Girelli.

Intercollegiate Center for Classical Studies in Rome, Italy

The Intercollegiate Center for Classical Studies in Rome provides undergraduate students with an opportunity to study Greek and Latin literature, ancient history, archaeology, and ancient art. The Center is operated through Duke University for a consortium of accredited American and Canadian four-year colleges and universities that offer a major in classical studies. Each semester approximately 30 qualified students from participating institutions, primarily juniors and seniors majoring in Latin, classical studies, archaeology, art or art history, with strong classical interests and background, are enrolled in the Intercollegiate Center. Because the College is a member of the consortium, qualified applicants receive priority in the selection process.
process. Students pay the program fee charged by the Intercollegiate Center for Classical Studies to participate in this program. Only federal financial aid is applicable to this program. Faculty Coordinator: Susan T. Stevens.

**Kansai Gaidai, Osaka, Japan**

Randolph and Kansai Gaidai University of Foreign Studies in Japan have a formal intercollegiate relationship for the purpose of increasing cross-cultural experiences for students. Students may study for a semester or a full academic year. The Asian Studies Program is taught in English with optional courses taught in Japanese. Faculty Coordinator: Mari Ishibashi

**Tsuda University, Tokyo, Japan**

Randolph and Tsuda University have a formal intercollegiate relationship for the purpose of increasing cross-cultural experiences for students. Students may study for the Spring semester or a full academic year. All instruction is conducted in the Japanese language. Faculty Coordinator: Mari Ishibashi

**Queen’s University, Belfast, Ireland**

Randolph has an agreement with Queen’s University in Ireland. This agreement provides an opportunity for Randolph students to study in Belfast in a wide range of disciplines from archaeology to zoology. Students may study for a semester or a full academic year. Faculty Coordinator: Mara Amster

**University of Santiago de Compostela, Spain**

Randolph College has an agreement with the University of Santiago de Compostela in Spain. Students may elect to spend their Spring semester at this institution. All courses are taught in Spanish. The prerequisite for participation in this program is five semesters of college-level Spanish. Faculty Coordinator: Maria Vázquez-Castro.

**International Study Seminars**

Faculty members lead 1–3 week study seminars across a range of academic disciplines and in countries around the globe either during Winter break, Spring break, or the Summer. After completion of one semester of study, all students are encouraged to participate in these unique programs, which may have prerequisite courses and include pre-departure sessions and post-trip activities. The average cost of each program is $4,200 to $4,800 and the fees typically cover tuition, lodging, meals, activities, and round-trip travel expenses. Limited need-based financial assistance for participation in these trips is available. For more information, contact the Associate Provost or visit the study abroad website.

**Other Study Abroad and Domestic Study Opportunities**

The College encourages students to pursue opportunities to engage in other domestic study programs. The International and Off-Campus Programs Committee (IO CPC) is available to assist students with the approval process. Various departments at the College also may provide guidance to students who are interested in particular areas of study, from archeology to marine biology. Students should seek guidance from their major advisors, program directors, Chair of the IO CPC, the Associate Provost or the Registrar for more information regarding approval of such programs.

**ADVISING**

To facilitate their growth and to help them reap the greatest benefit from the academic opportunities that the College affords, students need sound advice from faculty mentors whose familiarity with the academic program can foster students’ own strategic thinking about the college years, not as eight separate semesters, but as integrated stages of a personal four-year educational plan. Consequently, an advising process that takes into account their evolving strengths, intellectual interests, and career plans is critical to helping students assess their academic and extra-curricular options, to select wisely, and to make meaningful connections. The kind of advising system that is consistent with the College’s philosophy is one that views the college years as an integrated four-year process, encourages students to be equal partners with faculty in the advising relationship, and involves collaboration of faculty with student affairs and career development staff to coordinate services and share information about student activities, internships, and study abroad programs.
Each student works with an advisor to devise an academic program that meets requirements in skills and breadth of learning, major requirements, and, if the student chooses, requirements for a minor program. Reflective of the College’s emphasis on developing a student’s sense of responsibility, the advising process gives primary responsibility for establishing the academic program to the student.

Prior to matriculation, students are assigned a faculty advisor. These students may remain with this advisor until they declare a major, usually by the second semester of the sophomore year. Departmental chairs or their designated faculty representative(s) serve as advisors to students in the major. Each student who declares a minor is advised by the department chair, designated departmental representative, or program coordinator.

Pre-professional advisors in pre-law, pre-vet, the health professions, engineering, and teacher education are available to students interested in pursuing these career areas. See Programs for Specific Careers for more detailed information.

In addition, community service, leadership activities, athletic participation, and career development have the potential to enhance a student’s formal academic learning. As with academic coursework, students stand to benefit most from making strategic choices about the roles and experiences, both on and off campus, that will develop their leadership capabilities, challenge them to discover new talents, and support their career goals.

**The Randolph Plan**

The Randolph Plan is a way of looking at the undergraduate degree program, or a methodology for the journey from Orientation to Commencement. It is a process for addressing short- and long-range personal, educational, and professional goals.

It is our goal to provide students with the resources and guidance that will enable them to chart a degree program that is coherent, strategic, and uniquely tailored. Students work with a faculty advisor and staff members to create their own versions of The Randolph Plan, mapping out their plans, using interests, values, and goals as the basis for decisions about the curricular and co-curricular programs at the College—the major, minor, course electives, internships, jobs, volunteer work, leadership commitments and extra-curricular activities. The overview of *The Randolph Plan* that follows describes the goals and events of the undergraduate academic experience at the College and shows the parallel processes taking place from the perspectives of the career development staff and staff involved in the co-curricular life of students at the College.

**First-Year: Academic Exploration and Career Assessment**

In the first year, the academic focus is on acquisition and honing of basic skills and competencies and the exploration of a wide variety of disciplines. Academic policy requires all first-year students to take courses in four different departments in their first year. The emphasis on General Education Program requirements complements this exploration and competency development. Students begin to identify strengths and weaknesses and to explore interests, a vital experience in preparation for the decisions to follow.

In the career development process, the first year is a time of self-assessment, a time for students to get to know themselves and to begin to identify interests (what they like to do), skills (what they do well), and values (what things are important to them). Thus, a first-year student is encouraged:

- to begin to identify career goals through readings, informational meetings, and assessment administered by the Career Development staff;
- to become familiar with various career options and assess possible interest in those fields through observation and an examination of the career information;
- to explore academic disciplines, preparatory to establishing a major, which are of greatest interest and support to possible career choices;
- to become involved in campus activities which reflect interests and to begin to accept responsibilities in organizations in order to establish a track record of achievement that is attractive to employers and graduate schools; and
- to develop a work-in-progress resume.
Sophomore Year: Academic and Career Exploration

In the sophomore year, there is continuing focus on competency and skills development and on exploration in course selections through further attention to requirements. Each student declares a major by the end of this year. Practically speaking, this emphasis on competencies and skills, interests, and exploration makes it possible for students to have earned prerequisites for several major options and prerequisites for minors and supporting programs that can enhance the major and support career goals.

To meet career development goals, the sophomore year is a time for the student to gather information and continue self-assessment. Activities should include:

- reviewing, revising, and/or reaffirming interests, skills, and values in an effort to evaluate assets and liabilities;
- accepting leadership roles on campus to expand a track record;
- continuing to explore possible areas of career interest and learning what preparation is needed for certain fields under consideration, particularly through informational interviewing, where the student can talk with a person successful in that field and learn more about how one prepares for it, what it involves, and what the current possibilities of employment and advancement in it are;
- trying out a career field through an internship; and
- continuing to develop a work-in-progress resume.

Junior Year: Academic Specialization and Career Experimentation

The academic focus in the junior year is on specialization. While there is still attention to requirements, students begin to see them in a different way, discovering that although they may seem to divert attention from high-level interest courses, they can contain content that will serve as enrichment and background to the major, require skill development that will improve competencies in the major, and provide knowledge and exposure that will make the major more marketable in the chosen career field.

The College’s academic program offers students the option of declaring a minor and, in some majors, to emphasize areas of study within the major discipline in the form of an emphasis.

The student in the junior year should focus more seriously on the career fields of the greatest interest. The student is encouraged:

- to participate in Experiential Learning (Internships), working with a staff member to select possible sites, and to define projects that will provide an opportunity to try out career fields;
- to evaluate what background and skills are important for the career field of interest and then to set goals for acquiring the courses or experiences that will enhance employability in these fields;
- to become involved in leadership capacities in organizations and committees;
- to attend seminars and workshops relating to career decision-making; and
- if graduate school is an option, to begin researching those graduate schools that best fit the student’s needs and goals and to determine entrance requirements and required tests as well as deadlines for application. Graduate school information and catalogs are available from Career Development staff, along with test booklets for all major pre-professional tests.

Senior Year: Academic Specialization and Career Decision-making

Specialization continues throughout the final year, and the Senior Program serves as the “capstone” for the specialization. See The Senior Program. During the senior year, the student clarifies goals and commits to achieving those goals.

The course of action taken depends on whether the student has chosen to seek employment or to pursue graduate study; many seniors continue to consider both for at least part of the final year. The senior seeking employment:

- prepares a search campaign, targeting employers, making contact with them, and learning to interview through workshops, resource information, and mock interviews which may be videotaped and discussed;
- writes a senior resume in an individual or group session with staff;
• opens a credential file for recommendation letters supporting employment or future graduate/professional school application;
• participates in job fairs that provide access to employers interested in employing students with liberal arts degrees;
• accesses current job openings through the Internet, the Job Hotline, job bulletins, and alumnae job referrals; and
• interviews and evaluates offers.

**CAMPUS RESOURCES**

**Academic Computer Information**

Though not required, all students are strongly encouraged to bring a PC laptop or MacBook for class use, however, desktop computers are available in campus labs for student use 24 hours a day, seven days a week. Laser printers and scanners are also available in most labs. Access to a color laser printer is available at the Help Desk, located on the fifth floor of the Leggett building, for special projects. For printing purposes, students are provided a paper allocation each semester. Students do not need to bring a personal printer, as printing may be done from your personal computing device, directly to one of many web-connected print release stations located across campus or students may print from a lab computer directly to a printer located in the lab. Microsoft Office 365 is also conveniently provided for use to enrolled students.

Web-based information resources on the portal can be accessed from any internet connected device by navigating to inside.randolphcollege.edu. From this site, students can access a variety of college information including announcements, college email, and PowerCampus Self-Service. Self-Service allows students to view their records, including billing and financial information, class schedules, and grades. Moodle course management software is also accessible through the portal and allows professors to interact with students providing syllabi, class notes, and discussion groups. Access to student computing, registration, and course management resources will not be granted to degree-seeking or non-degree-seeking students (all programs) until all application materials, including address information and photo ID if applicable, have been received. For additional information, please visit http://www.randolphcollege.edu/it.

**Academic Services Center**

The Academic Services Center, located on the 4th floor of Lipscomb Library, offers free access to subject tutoring, an academic strategies lab, a writing lab, and Access Services.

Peer subject tutors are available for the majority of 1100- and 2200-level courses. The academic strategies lab tutors assist students with broader areas of study skills, and with life skills (e.g., time management, note-taking, self-care). The writing lab is a responsive reader service for student, staff, and faculty writers. Tutors in both labs work one-on-one with students on a referral, walk-in, self-scheduled appointment, or contract basis. Many of these services are available through online asynchronous and/or synchronous sessions. Students may schedule appointments using a web-based reservation system.

Randolph College is committed to providing learning experiences that are accessible for all students, and will make reasonable accommodations for individuals with documented disabilities. Students with a disability and who require accommodations should contact the Coordinator of Access Services at 434-947-8132.

**Access Services and Accommodations for Students with Disabilities**

Located within the Academic Services Center, the office of Access Services works to provide learning experiences that are accessible for all students. In compliance with the Americans with Disabilities Act and Section 504 of the Rehabilitation Act of 1973, the Coordinator of Access Services ensures that students with disabilities are provided equal access and reasonable accommodations appropriate to their disability in all College programming and academic pursuits. Disclosure by the student and a meeting with the Coordinator of Access Services are required in order to determine eligibility for accommodations due to a disability. The Coordinator of Access Services interviews the student, reviews documentation, and determines if specific accommodation requests are reasonable and appropriate. Students requesting accommodations should contact the Office of Access Services at (434) 947-8132.
Career Development Center (CDC)

The Career Development Center provides a number of services to students and alumni. Individual assistance is available in planning and executing a job search or preparing an application for graduate or professional school. Students can explore majors and career options through self-assessment programs. Job shadowing and internship opportunities are provided to students and are offered as credit bearing or non-credit bearing. Internships offerings include a variety of work settings and are accompanied with intentional learning goals. Whether a student is going into the world of work or into graduate school upon graduation, such activities are strongly encouraged to strengthen a student’s career development. See Experiential Learning (Internships).

The Center also provides programming to include career fairs, career-related workshops, access to job and internship listings, and a career resource library and comprehensive career website. The curriculum provides excellent preparation for graduate or professional school. As early as possible in the undergraduate years, students should coordinate their academic programs with the entrance requirements of the schools or programs of interest. Information about graduate study is available through academic department chairs, faculty members, and the CDC. It is strongly recommended that students wishing to apply to a graduate or professional school program complete at least one internship that relates to that field of study, during their college experience.

Center for Ancient Drama

With the Mabel K. Whiteside Greek Theatre at its heart, this center coordinates the Randolph College Greek Play and organizes the Ancient Drama in Performance Conference, each of which provides resources and experiential opportunities for students who are interested in the study of classics and ancient drama.

Center for Student Research

The Center for Student Research helps students engage in meaningful research that enhances their education and their preparation for graduate studies, careers, and other opportunities after college. The Center coordinates the Summer Research Program, the RISE Program, the Lunch and Learn Program, and the Symposium of Artists and Scholars.

Ethyl Science and Mathematics Center

The Ethyl Science and Mathematics Center provides science and mathematics students and faculty an innovative facility for study and discussion. The Center’s library includes a collection of information on careers in science and mathematics in addition to textbooks, reference materials, and trade books on science and mathematics topics. The small computer lab has a variety of specialized math and science programs.

International Programs and Study Abroad Office

The Associate Provost provides expertise and support through planning, advising, coordinating, and promoting off-campus study opportunities to both students and faculty.

Lipscomb Library

Lipscomb Library provides access for students to the intellectual and creative resources that support the liberal arts curriculum. Service to users is a primary focus, as well as providing guidance that encourages the process of discovery. The Lipscomb Library experience helps students gain confidence and competence on life’s information journey.

Lipscomb Library’s in-house collection of over 200,000 volumes provides books; magazine and journal titles with backfiles in microform and paper; and extensive holdings in audiovisual formats. Lipscomb Library’s online collection of over 700,000 volumes offer e-books; electronic newspapers, magazine and journal titles with backfiles; and streaming video. Over 100 electronic databases enhance students’ research experiences.

Lipscomb Library provides special-purpose areas designated for group study, reserve materials, multimedia, and children’s literature. Other features include computers, printers and scanners; periodical and current reading rooms; microform reading
and printing; and copy machine. Special collections can be found in the Watts Rare Book Room, the Lininger Children’s Literature Browsing Room, and the College Archives.

Maier Museum of Art

The Maier Museum houses the College’s collection of American paintings and works on paper which began in 1907. Representing all major movements in nineteenth, twentieth, and twenty-first century American art, the collection’s breadth and quality have been cited by curators and collectors as one of the finest collections of American art in the country. Works by Jennifer Bartlett, Thomas Hart Benton, Mary Cassatt, Thomas Cole, Arthur Dove, Thomas Eakins, Hans Haacke, Childe Hassam, Robert Henri, Winslow Homer, Edward Hopper, Jacob Lawrence, John Marin, Elizabeth Murray, Georgia O’Keeffe, Philip Pearlstein, Maurice Prendergast, Betye Saar, J.A.M. Whistler, and Andrew Wyeth are among the works displayed in the Museum’s galleries. Many other paintings hang in hallways and study areas throughout the campus, reflecting the College’s belief that the first-hand study of art is an essential component of a liberal arts education.

The collection and staff of the Maier Museum of Art are integral to both the museum and heritage studies major and the minor in museum studies. Both of these academic programs provide students with an understanding of the role of museums in society and the range of career possibilities within museum work. The Maier staff teaches in the program so that students can learn from professionals in the field and the Maier collection allows students to work directly with works of art in many of the courses. The major and minor capitalize on the collections on campus and the relationships the College has with institutions around the world which offer our students exceptional learning experiences in arts management, historic preservation, and art conservation. The College’s unique partnership with the National Gallery, London, affords Randolph students the exclusive opportunity to intern there in the Summer.

PROGRAMS FOR SPECIFIED CAREERS

Athletic Training

The College has an agreement with the Master of Science Athletic Training Program at Bridgewater College. Students meeting the prerequisites are eligible for guaranteed consideration in the admissions process. Students are required to complete a bachelor’s degree in a field of their choosing as well as prerequisite coursework. Interested students must contact the program advisor as early as possible in their academic planning in order to be aware of these prerequisites.

Engineering

Employers have made it very clear that engineers benefit from a liberal arts education. Engineers need to be able to write, communicate, and understand the world around them in order to best design for the future. For the student interested in a career or a degree in engineering, there are many options at Randolph College.

Students should meet with the engineering advisor early on in order to determine which paths to explore. The options include, but are not limited to, a minor in engineering with degrees in related fields, pertinent research and internship experiences, and the dual degree program in engineering. Pre-engineering students generally follow a program of study which involves a rigorous selection of physics, chemistry, mathematics, and computer science courses. The student then has the option in the junior year to apply to an associated engineering school to complete the dual degree program, or to stay at Randolph and pursue a path which will prepare them well for a career in engineering. More than half of the College’s physics majors get jobs in engineering upon graduation.

A student interested in a degree in engineering gets the best of both worlds with the dual degree program: a solid liberal arts education with the opportunity to work closely with faculty, which is appealing to graduate schools and the job market alike, and the experiences of studying at a large research university. Randolph College has an agreement with the engineering school at Washington University in St. Louis. Admission to the fourth year at the engineering school requires at least a 3.25 or better GPA both overall and in the Randolph College major. At the end of the first or the second year at the engineering school, the student may receive a Bachelor of Science degree in Engineering Physics from Randolph College; completion of the second year results in a Bachelor of Science or a Master’s degree in engineering from the partner institution.
Law

The College subscribes to the policy of the American Association of Law Schools, which recommends an undergraduate program aimed at developing such basic skills as clear communication, critical understanding of institutions and values, and creative thinking. Experiences with corporate, criminal, and judicial internships with law firms and judges prepare students for the realities of a career as a lawyer. The Pre-Law Advisor assists students, who plan to apply to law schools, in selecting courses which prepare students to be successful law students and lawyers.

Medical and Health-Related Study

A student intending to enter a career in the health sciences following graduation should consult with the Health Professions Advisor early in their academic program, and no later than the end of the first year. Requirements for medical, dental, pharmacy, and veterinary schools typically include one year of biology, two years of chemistry and a year of physics at a minimum. The MCAT will require biochemistry, psychology, and sociology in addition to the courses listed above. Students should plan to take BIOL 2201-2201L, 2203-2203L, 2204-2204L, CHEM 1105-1105L, 1106-1106L, 2205-2205L, 2206-2206L, and PHYS 1105-1105L, 1106-1106L or PHYS 1115-1115L, 1116-1116L, ideally by the end of the sophomore year. Those planning to take the MCAT should plan to complete these courses and CHEM 3335, PSYC 1105, and SOC 1101 or 1114, prior to the MCAT. Additionally, BIOL 3308 and 3320-3320L are highly recommended.

Because there can be considerable variation in requirements between programs, and because the requirements are sequential in nature, the student is urged to consult with the Health Professions Advisor who will assist in creating a four year academic and co-curricular plan. Early action is especially important for students planning to study abroad.

Physical Therapy

The College has established an agreement with the Doctor of Physical Therapy Program at University of Lynchburg. Students satisfying the prerequisites for the program are eligible for one of two guaranteed positions in the class. Students are required to complete a bachelor’s degree in a major of their choosing, as well as to complete the required prerequisite coursework. Interested students should contact the program advisor as early as possible in their academic planning.

Teacher Education

The Educator Preparation Program (EPP) offers a nationally accredited and state approved four-year course of study that qualifies teachers for a Virginia License in elementary education (grades preK–6), in a variety of secondary education subject area endorsements (grades 6–12), and in certain specialty areas (preK–12). A student interested in the EPP should consult with the director or chair as soon as possible to plan the appropriate program of study. The College offers a major in Elementary Education major as an option for students who would like to teach PreK-6. Students seeking secondary licensure complete a major in the area they wish to teach (additional coursework in the major may be required). A five-year master’s program option for initial licensure is available for elementary, secondary and special education.

ACADEMIC DISTINCTION

Academic work of superior quality is recognized by the College through the Dean’s List and the academic distinction conferred with the degree. See Graduation Honors. The Dean’s List is published twice a year. It is based upon the academic grades of the preceding semester and consists of the students in each class who have earned a superior record. Superior students are awarded the academic distinctions summa cum laude, magna cum laude, and cum laude with the degree. See Academic Procedures and Regulations for specific criteria. In addition, the College has the following honor societies:

Phi Beta Kappa  Phi Beta Kappa is the oldest and most prestigious of academic honor societies. It was founded at William & Mary in 1776, and few American colleges and universities have a chapter. The Delta Chapter of Virginia was installed in 1917; its charter, obtained in 1916, was the first to be granted by Phi Beta Kappa to an independent college for women in the South. Each year certain members of the senior class are elected to membership in the society in recognition of their high achievements in scholarship and maintenance of a balanced program of study in the liberal arts including demonstrated knowledge of a second or non-native language at the intermediate level.
Alpha Kappa Delta  The Pi Chapter of Virginia of Alpha Kappa Delta, an international sociology honor society, promotes interest in sociology and social problems. Its membership is composed of juniors and seniors who have demonstrated serious interest in sociology and high academic achievement.

Alpha Sigma Lambda  The Lambda Phi Chapter of Alpha Sigma Lambda was established in October 1997. This national honor society for students in continuing higher education honors those dedicated nontraditional students (age 24 and over) who, while ably handling their responsibilities at home and at work, achieve and maintain academic excellence. Each year membership is awarded to students on the basis of their scholastic achievements.

Beta Beta Beta (TriBeta)  Beta Beta Beta (TriBeta) is a society for students, particularly undergraduates, dedicated to improving the understanding and appreciation of biological study and extending boundaries of human knowledge through scientific research. Since its founding in 1922, more than 200,000 persons have been accepted into lifetime membership, and more than 553 chapters have been established throughout the United States and Puerto Rico. TriBeta was founded in 1922 at Oklahoma City University—the Alpha Chapter—by Dr. Frank G. Brooks and a group of his students. The idea of an honor and professional society for biology students spread rapidly and by 1925, the society was a national organization. Biennial national conventions of student and faculty members began in that year and in 1930 the society journal, BIOS, began publication of student research, articles of interest to biologists and society news. As the society grew, it was divided into regional and district groups, each of which holds a convention annually. At the heart of every district and national meeting are student research papers presented in the style of graduate meetings. Awards are given for outstanding individual and chapter accomplishment.

Chi Alpha Sigma  This chapter of the National College Athlete Honor Society was established in March 2006 and honors those student-athletes who have earned a varsity letter while maintaining a 3.4 or better GPA throughout their junior and senior years. The society also serves to foster citizenship, moral character, and friendship among academic achievers in college athletics.

Eta Sigma Phi  The Delta Alpha Chapter of Eta Sigma Phi was established in April 1961. This society encourages classical scholarship and appreciation of ancient learning. Each year students in advanced Latin and Greek courses are elected to membership on the basis of excellence of scholarship.

Iota Sigma Pi  A national chemistry honor society for women, the La chapter (for Lynchburg Area) of Iota Sigma Pi was established in 1998. Founded in 1902, the objectives of the society are to promote interest in chemistry among women students, to foster mutual advancement in academic, business, and social life, and to stimulate personal accomplishment in chemical fields. The local chapter was founded by faculty at the University of Lynchburg, Sweet Briar College, and Randolph College, and serves to foster scientific and social interaction between the three colleges.

Lambda Pi Eta  The Omicron Omega Chapter of Lambda Pi Eta, the communication studies honor society of the National Communication Association, was established in April 2005. The society seeks to recognize outstanding scholarship in the area of communication studies, stimulate interest in communications fields, and promote professional development for majors. This society represents what Aristotle described as the three ingredients of persuasion: character, credibility, and ethics.

Omicron Delta Epsilon  The Phi Chapter of Omicron Delta Epsilon, the international honor society in economics, was established in the spring of 1998. Omicron Delta Epsilon has among its objectives the recognition of scholastic attainment, the honoring of outstanding achievements in economics, and the establishment of closer ties between students and faculty in economics. Membership is awarded to undergraduates who have a genuine interest in economics and who have attained an outstanding performance level, not only in their economics courses, but also cumulatively in all courses.

Omicron Delta Kappa  Circle of Omicron Delta Kappa (ODK), a national leadership honor society, was established in the spring of 1989. ODK was founded upon the idea that leadership of exceptional quality and versatility should be recognized. The society recognizes and encourages achievement in scholarship; athletics; social service, religious activities and campus government; journalism, speech, and mass media; and the creative and performing arts. Membership is awarded to juniors and seniors and to members of the faculty and administration.

Phi Alpha Theta  The Alpha Kappa Alpha Chapter of Phi Alpha Theta, the national honor society in history, was established in the fall of 2001. Founded in 1921, Phi Alpha Theta seeks to promote the study of history through recognition of academic excellence, encouragement of scholarly research and good teaching, and facilitation of the exchange of ideas among students.
and faculty. Membership is not limited to history majors, but is open to anyone who has demonstrated serious interest in history and has met the societies’ standards of academic achievement.

**Pi Sigma Alpha** The Alpha Gamma Eta Chapter of Pi Sigma Alpha, the National Political Science Honor Society, was established in April 2005. Founded in 1920, Pi Sigma Alpha seeks to stimulate scholarship and intelligent interest in political science and to create an enriching environment by raising critical issues of public concern. Membership is not limited to political science majors but to any juniors and seniors who meet the standards of academic achievement set by the society.

**Psi Chi** A chapter of Psi Chi, the national honor society in psychology, was chartered in April 1993. Founded in 1929 for the purposes of encouraging, stimulating, and maintaining excellence in scholarship and advancing the science of psychology, Psi Chi is open to graduates and undergraduates who are making the study of psychology one of their major interests. Psi Chi is an affiliate of the American Psychological Association and the American Psychological Society.

**Sigma Delta Pi** Chi Beta, a chapter of the national Spanish Honor Society Sigma Delta Pi, was installed September 29, 2005. Sigma Delta Pi seeks to deepen understanding of the Hispanic world, to foster an appreciation for Hispanic culture, and to recognize high student achievement in advanced Spanish courses. Membership is not limited to Spanish majors. As part of its mission of greater understanding of Hispanic culture, Sigma Delta Pi offers travel scholarships to countries where Spanish is the primary language. Any student member may apply for these competitive awards.

**Sigma Pi Sigma** A chapter of Sigma Pi Sigma, the national honor society in physics, was established in 1999. Sigma Pi Sigma is an honor society which operates within the Society of Physics Students. Sigma Pi Sigma nurtures a spirit of professional community among its members. Students elected to membership must attain high standards of general scholarship and outstanding achievement in physics. Membership is not limited to physics majors, but is open to anyone who has met the standards and who has demonstrated an interest in physics.

**Sigma Tau Delta** A chapter of Sigma Tau Delta was established in 2006. Sigma Tau Delta was founded in 1924 to recognize academic distinction among undergraduate students of English language and literature. Membership entails enrichment opportunities, including eligibility to submit creative work and literary criticism for publication in the Society’s journals.

**Sigma Xi** Sigma Xi was founded in 1886 to honor excellence in scientific investigation and encourage a sense of companionship and cooperation among researchers in fields of science and engineering. Faculty members of Sigma Xi can nominate graduating seniors who are going on to do research, and who have met the academic standards.

**Theta Alpha Kappa** The Alpha Theta Omega Chapter of Theta Alpha Kappa was established in November 2007. The society cultivates scholarship in religious studies through various media, including its journal and awards. Seniors of quality and high attainment in religious studies and of general academic excellence are eligible.

**Academic Procedures and Regulations**

**Degree Options and Requirements**

At the undergraduate level, three degrees, are conferred: the Bachelor of Arts, the Bachelor of Fine Arts, and the Bachelor of Science. The Bachelor of Arts degree may be elected by any student. The Bachelor of Fine Arts degree may be elected by students who declare a major in English (Creative Writing), Studio Art, or Theatre while the Bachelor of Science degree may be elected by students who declare a major in Biology, Chemistry, Engineering Physics, Environmental Science, Mathematics, or Physics. Students who declare a double major must elect which degree will be displayed on their diploma.

The Certificate of Major Program is open to students who have already completed a bachelor’s degree and wish to pursue a second major for career exploration, graduate school preparation, or personal enrichment. A second bachelor’s degree is not awarded. For admission procedures, see *Non-Degree Programs*.

At the graduate level, the Master of Arts in Teaching, Master of Arts in Coaching and Sport Leadership, and the Master of Fine Arts in Creative Writing are conferred.
Requirements for the Undergraduate Degree

1. Students must take courses in at least four different departments in their first year.
2. A senior, in order to qualify for graduation, must present credit for at least the following:
   a. 124 credit hours of work, which may include a maximum of 8 credit hours in physical education activity courses.
   b. 8 courses (no fewer than 32 credit hours) in a Major Program are required as a minimum; any department, however, may set the requirements for the major above this minimum. See Courses of Instruction for requirements for particular majors (whether departmental or interdisciplinary), including the Senior Program.
   c. Requirements for the General Education Program. See General Education Program.
3. 52 credit hours of courses completed through Randolph College, i.e., excluding transfer credit (see General Transfer of Credit Policies), which must include:
   a. 20 credit hours of courses in the major, including the equivalent of the senior program, must be completed through Randolph College, with the exception of the dual degree program in Engineering Physics.
   b. 8 credit hours of the courses in any minor must be completed through Randolph College
   c. NOTE: with the support of the major or minor department, students may appeal to the Board of Review for exceptions to the major or minor residency requirements.
4. The student must have earned a cumulative grade point average of 2.0 (rounded) both for all courses taken for a grade and for all courses counted toward major requirements.

Requirements for the Certificate of Major

1. 32 credit hours in residence at the College.
2. All requirements for the Major Program as outlined in the catalog in effect when they begin the Certificate of Major program.

Requirements for the Master of Arts in Teaching Degree

1. 36-38 credit hours of graduate coursework must be completed.
2. A maximum of 6 credit hours may be transferred to Randolph College at the graduate level.
3. All requirements, including transfer courses, must be completed within a period of six calendar years.
4. The student must have earned a cumulative grade point average of 3.0 (rounded) both for all courses taken for a grade and for all courses counted toward major requirements. Only one course with a grade of C+ or below will count toward degree requirements.

Requirements for the Master of Arts in Coaching and Sport Leadership

1. 36 credit hours of graduate coursework must be completed.
2. A maximum of 6 credit hours may be transferred to Randolph College at the graduate level.
3. All requirements, including transfer courses, must be completed within a period of two calendar years.
4. The student must earn a cumulative grade point average of 3.0 (rounded) both for all courses taken for a grade and for all courses counted toward major requirements.

Requirements for the Master of Fine Arts Degree

1. A minimum of 60 credit hours of graduate M.F.A. coursework must be completed.
2. Students may transfer one semester’s credits (15 credits, including successful completion of one residency) from another low-residency M.F.A program for Workshop I (601,603, or 605) credit. Students may transfer 15 credits from a traditional-residency M.F.A program for Workshop I (601,603, or 605) credit.
3. All requirements, including transfer courses, must be completed within a period of six calendar years.
4. The student must earn a cumulative grade point average of 3.0 (rounded) both for all courses taken for a grade and for all courses counted toward major requirements. Only one course with a grade of C+ or below will count toward degree requirements.
ASSESSMENT

To assess and improve its academic programs, the College must obtain periodic measurements of student perceptions and intellectual growth. Participation in assessment activities is expected of all students. The information obtained through these assessment procedures is used solely to improve the quality of the educational experience.

HONOR PLEDGE

Randolph College students agree to act with honesty and integrity in all matters, whether academic or personal, from the time they enter the College for orientation. An atmosphere of freedom and trust is the result, as are unproctored tests, pledged works, and self-scheduled exams. All students sign the Honor Pledge below. Actions that violate the Honor Pledge include but are not limited to lying, cheating, stealing, plagiarism, submitting a particular paper, or similar papers, for credit in more than one course without obtaining prior specific permission from all professors involved, and misuse of library materials that constitutes obstruction to research, administration, or other College activities. The spirit of honor on the Randolph College campus lies in the broader challenge of the Honor Pledge: the commitment not only to be honest in all aspects of one’s life and to hold others to that standard as well, but also to maintain the integrity of one’s word and respect the rights of others.

One of the actions that violates the Honor Pledge is plagiarism defined as using the words or ideas of another person without properly acknowledging their source. When a student presents work for academic credit, the instructor assumes that the work is original except where the student shows through correct documentation that he/she is citing the work of another. Inadequate or improper documentation is grounds for a student being charged with plagiarism. Whether the student is found to have been ignorant of the conventions for documentation, careless in applying his/her knowledge of those conventions, or dishonest in presenting someone else’s work as though it were the product of his/her own understanding, the result is the same: the student has committed plagiarism. The Honor System requires that a student who has committed plagiarism go through the judiciary process. For full information on the Honor System, see The Honor System in the The Wildcat Way: The Randolph College Student Handbook, available at: https://www.randolphcollege.edu/student-handbook/.

The Honor Pledge: I pledge absolute honesty in my academic work and in all personal relationships at Randolph College. I will maintain the integrity of my word, and I will respect the rights of others. Realizing that these standards are an integral part of life at Randolph College, I assume my obligation to uphold this honor pledge. If at any time I fail to live up to my obligation of this pledge, I will report myself to the Chair of the Judiciary Committee. I will also ask others to report themselves for any infraction of this pledge.

CLASSIFICATION

The classification of an undergraduate student during any academic year will be the responsibility of the Registrar. Full-time, undergraduate students are expected to maintain progress towards degree completion according to the chart below:

<table>
<thead>
<tr>
<th>Classification</th>
<th>First Semester</th>
<th>Second Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>First Year</td>
<td>0 to 12 completed credit hours</td>
<td>greater than 12 and up to 24 completed credit hours</td>
</tr>
<tr>
<td>Sophomore Year</td>
<td>greater than 24 and up to 41 completed credit hours</td>
<td>greater than 41 and up to 56 completed credit hours</td>
</tr>
<tr>
<td>Junior Year</td>
<td>greater than 56 and up to 75 completed credit hours</td>
<td>greater than 75 and up to 88 completed credit hours</td>
</tr>
<tr>
<td>Senior Year</td>
<td>greater than 88 and up to 108 completed credit hours</td>
<td>greater than 108 and up to 124 completed credit hours</td>
</tr>
</tbody>
</table>

Students wishing to change their anticipated graduation year should consult with the Registrar or the Associate Provost.

ACADEMIC STANDING

In order to achieve the graduation requirement of 124 hours with a cumulative grade point average (GPA) of 2.0, a student must attain an average grade of C in all courses (not including those taken on a pass/fail basis). Experience shows, however, that First Year, First Semester students who have difficulties in their first semester frequently make sufficient improvement in
subsequent semesters to overcome their deficit in grade. For this reason, the College has set a rising scale of minimum requirements based on completed credit hours.

**Academic Probation**

Students who fail to maintain a cumulative grade point average of 2.0 are placed on academic probation. Students on academic probation who fail to show significant improvement in cumulative GPA within one semester may be declared academically ineligible to continue.

*Undergraduate Academic Probation*

Students on academic probation are required to complete an individually prescribed program through the Academic Services Center as a condition for eligibility to continue. All enrolled undergraduate students validly registered are considered to be in good academic standing for the purposes of enrollment verification and athletic participation.

*Graduate Academic Probation*

See ACADEMIC PROGRAMS AND COURSES OF INSTRUCTION for individual graduate program policies.

**Academically Ineligible to Continue**

Students who also fail to meet the minimum cumulative GPA requirements as shown in the chart below are declared academically ineligible to continue.

<table>
<thead>
<tr>
<th>Attempted credit hours at semester end</th>
<th>Minimum cumulative GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Greater than 24 and up to 124</td>
<td>1.8</td>
</tr>
<tr>
<td>Greater than 12 and up to 24</td>
<td>1.6</td>
</tr>
<tr>
<td>Up to and including 12</td>
<td>see note*</td>
</tr>
</tbody>
</table>

*First Year First Semester students’ GPA’s are monitored individually. Students with a GPA below 2.0 at the end of their first session with Randolph may be required to complete an individually prescribed program as a condition for academic eligibility to continue.

Academically ineligible students will be notified of their status by the Associate Provost and may submit a written appeal to the Board of Review through the Associate Provost to continue. Students whose appeals are unsuccessful will be notified by the Board of Review. Students whose appeals are successful will remain on academic probation and will be required to meet requirements set forth by the Board of Review as a condition to continue.

**Academic Warning in the Major**

To meet graduation requirements, students must also maintain a GPA of 2.0 in their major. Students failing to maintain this standard will be placed on academic warning in the major at the end of the semester in which their major GPA falls below 2.0 and will be required to consult with the Associate Provost within the first week of the subsequent term. Continued failure to achieve this standard may result in ineligibility to continue in the major.

**Course Load**

For full-time status an undergraduate student normally maintains a course load between 12 and 20 credit hours each semester (between 8 and 10 credit hours per session) exclusive of physical education activity courses. The typical course load in order to graduate in eight semesters and achieve the required 124 credit hours is approximately 16 credit hours per semester (8 credits per session). A student enrolling in more than 20 credit hours is considered to be maintaining a course overload. Overloads are not allowed during a student’s first year, and overloads are not allowed thereafter unless the student has consulted their advisor. Overloads are not recommended unless the student has received a cumulative grade point average of at least 3.0 in the previous semester and has a cumulative average of at least 2.75. The College charges a fee for credits in excess of 20 for which the student is not already paying an additional fee.
Traditional undergraduate students may not take fewer than 12 credit hours (exclusive of physical education activity courses) in any semester except under extraordinary circumstances and with written permission from the Associate Provost. First-time, first-year students are required to take a minimum of 4 credits per session in both semesters of their first year at the college. During all subsequent terms, all full-time, traditional students are required to take a minimum of 1 credit hour in the first session of each semester (Sessions One and Three) which may not be a physical education activity course only. It is recommended that students register for no fewer than 6 and no more than 10 credits in any session.

Students must take a minimum of 12 credits during a semester to be eligible for full-time financial aid. Registering for fewer than 12 credits in a semester or 6 credits in a session may have financial aid and/or housing implications. For further information, contact the Provost, Business, Financial Aid, and/or Dean of Students offices.

Nontraditional students who may be enrolled on a part-time basis are exempt from this regulation.

For full-time status, a graduate student normally maintains a course load of at least 9 credit hours each term.

**CLASS MEETINGS AND ATTENDANCE**

All undergraduate courses meet for a minimum of 75 minutes of scheduled class time per week, with approximately 265 weekly minutes of independent learning, for each credit hour awarded (assuming a seven-week course calendar). This total of 340 educational minutes per week is equivalent to that of the traditional credit hour definition, which is based on 50 minutes of scheduled class time and 120 minutes of out-of-class work for each credit hour, applied to the traditional 14-week course calendar. Additional out-of-class work is assigned by faculty specifically to augment class meetings and maximize the concentrated learning experience.

At the beginning of each session faculty members are responsible for making clear their individual policies on students’ attendance and participation in class. In line with this policy, each student assumes responsibility for attending scheduled classes. An absence does not relieve the student from responsibility for the work required while the student was absent.

**COURSE EXAMINATIONS**

An examination or its equivalent shall normally be given in each course at the end of each course; all students are required to take these examinations. A period of approximately two and a half days is set aside for examinations at the end of each session. Students are responsible for deciding at what time during this period they will take each of their examinations. No student may take a final examination in a course at any time except within the period officially set aside for this purpose without the written permission of the Associate Provost. All tests and examinations, including self-scheduled exams, are conducted under the Honor System. Any violation of the trust which this involves is considered a serious offense. Exam periods are shortened for shorter Summer term classes but all other policies remain. See *The Wildcat Way: The Randolph College Student Handbook*, available at: [https://www.randolphcollege.edu/student-handbook/](https://www.randolphcollege.edu/student-handbook/) for further details.

**COURSE WORK**

A student must obtain, in advance, specific permission from all professors involved in order to submit a particular paper, or similar papers, for credit in more than one course. All written work for courses undertaken must be turned in no later than 4:30 p.m. on the last day of classes of the session. Papers serving as whole or part of final examinations must be turned in no later than the end of final examinations of the session.

**EXPERIENTIAL LEARNING (INTERNSHIPS)**

A sophomore or junior or senior with a grade point average of 2.0 or higher may earn up to 8 hours per semester, 4 hours per session, up to 4 hours during a semester break, or up to 8 hours during the Summer under the Experiential Learning Program. A maximum of 8 hours of Experiential Learning may be counted toward the Randolph College degree. This 8-hour limit for Experiential Learning credit applies as well to practica, with exceptions allowed for students taking education laboratories. Each credit bearing internship under this program must represent a different learning experience. Experiential Learning is graded on a Pass/Fail basis only. A student may undertake up to 4 hours of Independent Study and 4 hours of Experiential
Learning in the same semester. Experiential Learning for academic credit is not available to first-time, first-year students in their first semester except with special permission from the Randolph College Career Center Director.

Applications to obtain credit for Experiential Learning must be signed by the on-site supervisor and the faculty sponsor, and submitted to the Career Development Center. The minimum number of hours needed for the experience per credit hour is 42 hours. The tuition for courses taken during the Summer, including experiential learning, is payable by June 1.

**OFF-CAMPUS STUDY**

A student not on academic probation wishing to study abroad must apply to the Associate Provost. In order to receive permission for an off-campus study program, the student’s proposed plans must ensure normal progress toward meeting the requirements for the degree at Randolph College and have the approval of the major advisor. Course work to be taken must be approved in advance on a *Transfer of Credit Approval* form. The student’s re-entry to the College is assured provided that the program is approved in advance and that the student maintains good standing while pursuing off-campus study. Forms for applying for non-affiliated off-campus domestic study and for study abroad are available in the Office of the Associate Provost; *Transfer Credit Approval* forms are available on the Students tab on the portal under Forms. See *Transfer of Credit*.

**GRADES**

**Academic Alert**

The professor shall file an Academic Alert with the Director of Student Success whenever a student’s progress in a course (any session of Fall, Spring or Summer) is unsatisfactory or when the midsession or final grade is a D+ or below. During the Summer, the Director will, via email, counsel Randolph students who receive alerts for online coursework. During the Fall and Spring sessions, copies of academic alerts are sent to the student and to the student’s faculty advisor who counsels the student; after two alerts have been received for a first-year student, sophomore, or junior, or one for any senior, the Director of Student Success also counsels the student.

**Commendations**

Faculty members may also submit a commendation for any students doing exceptional work in a particular course, project, examination, or paper. Copies of the *Commendation Form* will become a part of the student’s file and will be forwarded to the academic advisor.

**Grading System**

The system used in assigning and recording grades is as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Explanation</th>
<th>Grade</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>A, A-</td>
<td>Excellent</td>
<td>AU</td>
<td>Auditor</td>
</tr>
<tr>
<td>B+, B, B-</td>
<td>Good</td>
<td>S</td>
<td>Satisfactory</td>
</tr>
<tr>
<td>C+, C, C-</td>
<td>Satisfactory</td>
<td>W</td>
<td>Withdrawed from Course</td>
</tr>
<tr>
<td>D+, D, D-</td>
<td>Passing</td>
<td>I</td>
<td>Incomplete</td>
</tr>
<tr>
<td>F</td>
<td>Failure</td>
<td>P</td>
<td>Passing</td>
</tr>
</tbody>
</table>

**Grade Point Average**

The academic average for work carried at Randolph College is the ratio of grade points earned to credit hours for which a letter grade is recorded. The grade points per credit hour for each grade are as follow:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Grade Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>B+</td>
<td>3.3</td>
</tr>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
</tr>
<tr>
<td>A-</td>
<td>3.7</td>
</tr>
<tr>
<td>B-</td>
<td>2.7</td>
</tr>
<tr>
<td>C-</td>
<td>1.7</td>
</tr>
<tr>
<td>D-</td>
<td>1.0</td>
</tr>
<tr>
<td>F</td>
<td>0</td>
</tr>
</tbody>
</table>
Excluded from the computation of the grade point average are S, SP, W, and I. P is also excluded, except as indicated under Course Repeats.

The computation of grade points does not include courses taken at other institutions except where Randolph College has affiliation or consortium agreements. Credit earned through coursework undertaken through consortium or affiliated programs is recorded as a letter-grade on the student’s transcript and is used in calculating the student’s cumulative, major and minor GPA’s. For information about consortium agreements, see the section on Transfer of Credit in this catalog. For a list of affiliated programs, see the Study Abroad section of this catalog or the Study Abroad website (www.randolphcollege.edu/studyabroad) or contact the Associate Provost. Credit earned through coursework undertaken through non-affiliated programs is awarded transfer credit and is not used in calculating the student’s GPA’s. Students must receive a grade of C- or higher in order to receive credit. However, grades for coursework undertaken through non-affiliated programs is used in the computation of a student’s eligibility for graduation honors.

Grade Reports

In order for a student to receive a grade or credit in a course, the student’s name must appear on the official class list provided by the Registrar’s Office. Students and faculty advisors have electronic access to grades throughout each academic session.

Course Repeats

If a grade of D+, D, D-, or F is earned, the student may elect to take the course again. Courses with grades above D+ may not be repeated. The subsequent grade will replace the original in the grade point average, but both grades will appear on the transcript. Credit will be granted for the course only once. This policy is only for courses taken at Randolph College. The policy is in effect beginning Summer 2018 and affects only course repeats taken Summer 2018 and later. Currently enrolled students who previously repeated a course are still subject to the prior policy. While a student can gain credit to fulfill a requirement by transfer, tri-college or Academium consortium courses, a student cannot replace a Randolph grade by taking a course elsewhere. There is no guarantee that a course will continue to be offered and be available to be repeated. This means that it will not always be possible to repeat a course to eliminate a lower grade from the grade point average.

Pass Grade

A grade of P is given only when registration is on a Pass/Fail basis.

Pass/Fail Option

Under the conditions listed below, student may choose to take courses on a pass/fail basis:

a. the student has completed at least twelve credit hours at a regionally accredited college or university;
b. the student has the permission of the instructor and the faculty advisor;
c. the student is applying to take only one course on this basis during that semester; and
d. the student fills out the appropriate form available on the portal or through the Registrar’s Office.

Departments also have the option of designating certain courses to be taken only on a pass/fail basis. Students enrolled in a pass/fail only course may still register for one optional pass/fail course. Courses taken on a pass/fail basis may not be used to fulfill the minimum requirements for a major or a minor unless the course is being offered only on a pass/fail basis. Non-degree international students participating in Randolph College exchange programs are exempt from the regulations above, and are allowed to take up to 9 credit hours each semester on a pass/fail basis with the approval of the faculty members involved and the Associate Provost.

Audit

A designation of AU is given when a student has registered as an auditor and has met the requirements set forth by the instructor for the audit. An auditor has the privilege of attending classes but receives no credit. To audit a course, a student must obtain written permission from the instructor and from the faculty advisor. Student may not audit courses in art studio,
music performance lessons, physical education activity courses, and science courses with required laboratory. If the requirements set by the instructor for the audit are not met, the course will be removed from the student’s academic record.

**Satisfactory Grade**

A grade of S is given in the thesis seminar for the Master of Education Program when the student is making satisfactory progress and needs additional time to complete the thesis. It will remain on the transcript to indicate that the thesis work is ongoing.

**Incomplete Grade**

If a student has completed the majority of course work satisfactorily but is unable to complete the course because of illness or other circumstances beyond his/her control, the college may grant a temporary grade of Incomplete (I).

**Course work:** The I grade may be granted if a student cannot complete all the required course work. The instructor must submit an *Incomplete Grade* online form (available on the portal) by 4:30 pm on the final day of classes.

**Final exam:** The I grade may be granted (in an emergency situation only) if a student cannot take the final exam in exam week.* This grade of I may be granted only by the Associate Provost, who shall notify the faculty member of this decision.

*NOTE: If a student will be “not enrolled” or “not in residence” in the subsequent session, the student must obtain written permission from the faculty member to take the exam off campus and submit this permission to the Associate Provost.

In the Fall and Spring sessions, a grade of I automatically becomes an F unless the student has submitted all required work by the end of the first week of classes of the following session and the faculty member has filed a change of grade in the Registrar’s Office before the end of the second week.

In the Summer, a grade of I automatically becomes an F unless the student has submitted all required work within two weeks of the course end date. No exceptions to Summer refund deadlines will be made for prerequisite issues resulting from incomplete grades (see the *Summer Fees* section of this catalog).

In all sessions, if the incomplete course is a prerequisite for a course in which the student is registered in the next immediate session, the student must receive permission of instructor to continue in the subsequent course while the incomplete grade is being resolved.

**Withdrawal Grade**

A non-punitive grade of W is recorded if a student withdraws from a course after the drop period but prior to the designated last day to withdraw for each session (see the Academic Calendar). Withdrawal after the last day to withdraw each session or failure to submit the appropriate drop/withdrawal request prior to the withdrawal deadline results in the recording of an automatic F except under medical or other serious mitigating circumstances which must be documented. Mitigating circumstances must be evaluated by the Associate Provost and include a certification by the faculty member that the student was making satisfactory progress at the time of the mitigating circumstances.

**Grade Change Policy**

A change in a recorded grade must be made in writing within one calendar year of the date the grade is originally assigned. Instructors should complete a *Change of Grade* form available in the Registrar’s Office (this form is not available on the portal). Change of I grades require only the instructor’s signature. Change of grades other than the grade I may be made by a professor only with the consent of the Provost of the College, who must also sign the Change of Grade Form.

**Dean’s List**

At the end of each semester the College publishes the Dean’s List. To qualify for the Dean’s List, student must earn a minimum of 3.5 semester GPA (rounded to one digit after the decimal) with no grade lower than a D.
A student whose record contains an *Incomplete* (I) is not eligible for the Dean’s List until that I is changed to a letter grade; at that time, the student becomes eligible provided that the other requirements are met. When a student has been named to the Dean’s List, a notation is included on the academic record. Part-time students carrying fewer than 12 hours per semester are recognized on an annual Dean’s List covering the full year’s work.

**MAJORS AND MINORS**

**Declaration of Major**

Students declare a major by completing a Declaration of Major Form. A major may be either departmental or interdisciplinary in character. By meeting the requirements for two separate majors, a student can complete a double major. The College will only assure the opportunity for completion of a single major. For major requirements, the governing catalog is the one in effect when the student declares the major. These requirements remain in effect for as long as the student is continuously enrolled at the College. A student may petition the chair of the department to follow the major requirements listed in a subsequent catalog but not those of a previous catalog. Following a gap in enrollment for any reason, a student who is approved for readmission will be subject to the major requirements of the catalog in effect at the time of re-enrollment, unless otherwise approved by the chair of the department.

The student must earn a cumulative grade point average (GPA) of 2.0 (rounded) for all courses required in the Major Program. Courses taken on a Pass/Fail basis may not be used to fulfill the minimum requirements for a major unless the course is being offered only on a Pass/Fail basis. If all of the requirements as specified in the student’s governing catalog cannot be completed, then a Request for Substitution of Major/Minor Requirement Form must be submitted to the Registrar’s Office prior to enrollment in the substituted course.

**Declaration of Independently Designed Major**

A student who desires to work out an individualized program consisting of related courses chosen from two or more departments should consult with appropriate faculty in each department involved. A cumulative GPA of at least 2.5 is required at the time of the application of the independently designed major.

The major must be consistent with the liberal arts and sciences and cannot duplicate an existing major. There must be sufficient faculty and resources at the College to support the proposed program of study. The proposal must present a solid intellectual course plan that demonstrates a coherent whole with intellectual depth as evidenced by a sufficient number of upper-level courses.

After meeting jointly with the department chairs involved and other faculty as may be appropriate to work out the program, the student shall complete the Declaration of Independently Designed Major Form. The completed form should be submitted to the Provost of the College, along with the rationale underlying the major, explaining how the courses selected (and their prerequisites) contribute to the major and describing the Senior Program. In addition, a letter of support from the faculty member who is designated as the major advisor must be sent to the Provost. If the Provost approves the program, the proposal will be forwarded to the Curriculum Committee for final approval. In the event that this program should involve any course work taken as Independent Study, the student must meet the general college-wide requirement of a cumulative GPA of at least 2.3 at the time of registration for these courses. If the Senior Program involves independently designed courses, these shall be designated as Interdisciplinary Studies 4493 and 4494 rather than Independent Study and thus not subject to the GPA requirement of the latter. A student may not use more than two courses from an independently designed major toward any other major or minor.

**Deadlines for Declaring Majors**

Students may select a major (departmental, interdisciplinary, or independently designed) during their first year but no later than the end of the first semester of the sophomore year prior to the Spring advising period. Junior transfer students may wait until just prior to the advising period of the first semester in residence.

With permission of their advisor, students may change and/or add a major prior to the end of the Spring advising period of the student’s junior year. A student may drop a second major or change from a BS degree to a BA degree in the same major at any time.
Honors in the Major

To encourage students of exceptional ability to engage in independent and intensive study in their fields of interest, faculty of the College are authorized to offer Honors courses as described below. A junior or senior who has a cumulative academic average of 3.45 in all academic work recorded for a letter grade and a cumulative average of 3.7 in the major is eligible to read for Honors in the Major on an approved topic. A student whose overall average qualifies but whose major average does not may petition faculty in the major to read for Honors. If at the end of the first semester of the senior year the student’s cumulative GPA in the major falls below 3.5, the student is no longer eligible to continue the Honors Program. Students who enter with academic credit may, after at least two semesters at the College, apply to read for Honors. In such cases, both the quality of work completed at Randolph College and that completed elsewhere are considered.

Students may begin working on Honors in the Major no earlier than their junior year. Honors work may be completed in two sessions for a total of eight hours, or in three sessions for a total or twelve hours. Applications for Honors in the Major should be submitted to the department or program chair of the student’s major in the semester immediately prior to beginning the Honors work. The department shall report to the faculty the names of those students who are reading for Honors. The Candidate for Honors form must be submitted to the Registrar’s Office to authorize Honors work, and for the appropriate courses to be included in the student’s program of study.

An Honors course shall be planned for the individual student or students concerned and shall be conducted through seminars or weekly conferences. The Honors work shall be distinct from that of other courses; in no case shall it be constituted of additional assignments given in connection with classes open to students who are not reading for Honors. At the option of the department or program chair involved, the Honors Program may be regarded as constituting the student’s Senior Program. The student who has a double major may do an integrated Honors Program or do individual Honors Programs in one or both majors. If the student does not have an integrated Honors Program, the student shall complete the Senior Program in the major in which the student does not read for Honors.

The department or program chair, in consultation with the student, shall assign each Honors student a special Honors Supervisor who will be in immediate charge of the student’s program. If the field of the student’s Honors work embraces more than one major, the appointment of the Honors Supervisor shall be made by the department and program chairs of the majors in consultation. The manner in which the Honors work shall be carried on shall be determined by the faculty concerned.

The Honors student must submit a thesis or completed project in a field of special interest. This thesis or project shall be under the direction of the student’s Honors Supervisor, but when completed must be approved by a majority of members of the examining committee. In the case of a thesis, the student must send electronically one copy of the approved Honors paper to the Lipscomb Library, which catalogs such papers and maintains a file of them in the Library archives. This copy shall contain any revisions which the examining committee has required and bear the signatures of the majority. In the case of a project in the areas of fine arts or performing arts, the project should be recorded and submitted to the library in a commonly used digital format with an accompanying scan of the cover page, signed by the majority of the examining committee, and given to the Lipscomb Library. The Honors Supervisor must ensure the student’s thesis or project is submitted to the Director of the Lipscomb Library by the date senior grades are due as the final step before conferring Honors upon the student.

The examining committee shall be composed of an odd number of faculty members, usually three, including the Honors Supervisor, the department or program chair of the major or a faculty member appointed by the chair, and one faculty member from another department. The members of the committee shall be appointed by the Honors Supervisor, subject to the approval of the Provost of the College, who shall notify members of this appointment. This appointment shall be made during the first eight weeks of the semester which precedes the semester of the examination in order to allow the student to consult with other members of the examining committee during the course of the Honors work. It shall be the purpose of the examining committee to determine whether the student’s work merits the designation of Honors. The examining committee for each student’s program shall meet at the end of the first semester of the senior year to decide whether there has been sufficient progress to permit the completion of the program. The committee may decide that the program should continue, should be converted to an Independent Study project, or should be discontinued.

The Honors student shall take an oral examination of at least one hour’s duration on the subject of the Honors work. This examination shall be given on a date prior to the end of the final examination period. The Honors Supervisor is responsible for notifying the Provost of the College of the date of the Honors examination.

62
A successful Honors project shall receive the grade of A or A-. A student whose work does not merit the designation of Honors will receive a grade commensurate with the quality of the work and will receive the hours earned. These hours shall appear on the transcript as either Independent Study or the Senior Program in the major. The student’s Honors work shall be entered on the permanent record and, if the candidacy is successful, a notation such as “Degree with Honors in Psychology” or “With integrated Honors in Psychology and Sociology” shall be placed on the permanent record.

Declaration of Minor

Students declare a minor by completing a Declaration of Minor form. A student may elect a maximum of three minors in addition to the major, and must meet the requirements, as listed in this catalog, for each minor. The student may not elect a major and a departmental minor from the same department, except in the Departments of Art and Art History, Economics and Business, Computer Science and Mathematics, and Physics and Engineering.

For minor requirements, the governing catalog is the one in effect when the student declares the minor. These requirements remain in effect for as long as the student is continuously enrolled at the College. A student may petition the chair of the department to follow the minor requirements listed in a subsequent catalog but not those of a previous catalog. Following a gap in enrollment for any reason, a student who is approved for readmission will be subject to the minor requirements of the catalog in effect at the time of re-enrollment, unless otherwise approved by the chair of the department. A student may design a minor in collaboration either with a faculty advisor or with one of the faculty concerned. The Declaration of Independently Designed Minor form must be completed which requires a rationale in writing and approval of the departments involved, of the Provost of the College, and of the Curriculum Committee. Approved declaration forms are forwarded to the Registrar’s Office.

The student must earn a cumulative GPA of 2.0 (rounded) for all courses required in the Minor Program. Courses on a Pass/Fail basis may not be used to fulfill the minimum requirements for a minor unless the course is being offered only on a Pass/Fail basis. If all of the requirements as specified in the student’s governing catalog cannot be completed, then a Request for Substitution of Major/Minor Requirement form must be submitted to the Registrar’s Office prior to enrollment in the substituted course.

INDEPENDENT STUDY

Independent study is a program which enables the student to pursue a course of study which is of special interest but is not offered in the regular curriculum. The College encourages the able student to undertake independent study as a means of increasing self-reliance, identifying educational objectives, and structuring a program to meet these objectives. The student is therefore responsible for selecting and defining the subject or topic to pursue and for making important decisions determining the development and outcome of the project. The sponsoring faculty member alone has responsibility for supervision and evaluation of the work. After a student has successfully completed a semester’s program at Randolph College or another accredited college, the student may apply to any department for independent study to be carried on during the academic year or during the Summer (upon payment of a Summer tuition fee by June 1). Independent Study forms are available on the portal. Permission is contingent upon the following conditions:

1. The student is in good standing academically and has a cumulative grade point average of at least 2.3. In addition, if it is a Summer project, the student must have earned an average of at least a 3.0 in the subject area of the project. Permission to undertake an independent study project must be applied for by submitting an application form to the Registrar as follows:
   a. Fall and Spring projects: before the end of the add period of the session in which the project is to be completed
   b. Summer projects: no later than the end of the last day of classes of Session 4 of the Spring semester.
2. A qualified faculty member is willing to serve as supervisor.
3. The proposed project has been approved by the supervisor, chair of the department in which the study is being done, the Registrar, and the Curriculum Committee.
4. A project does not duplicate the work of a course regularly available at the College.
5. The project is to be completed within the confines of a given session or during a single Summer. During the academic year, the student in independent study may earn 1, 2, 3 or 4 hours of credit per session; during the Summer, the student may earn 4 hours. Credit hours awarded for satisfactory completion of independent study projects may not exceed 20 within the minimal number of hours completed for the degree, and normally not more than four hours are permitted per semester. The Honors Program is a separate program and does not affect this limitation. A student may undertake up to 4 hours of independent study and 4 hours of Experiential Learning in the same session.
6. The tuition fee for each course taken during the Summer is payable in advance and nonrefundable.

7. If a student decides not to complete a Summer independent study project after having registered, the fact of the registration shall not appear on the academic record provided the student withdraws formally before the first day of classes of the Fall semester, Session 1. If notification of the withdrawal is not received by the Registrar before that time, a grade of F shall be entered for the course.

GRADUATION INFORMATION

Graduation Application Information

Rising seniors are asked to complete their degree application one year ahead and this normally happens during Spring registration for Fall semester courses. Master’s degree candidates are asked to complete their degree application by October 1 for May commencement. Information obtained from degree applications is used in the ordering of diplomas and in the preparing the Commencement Program.

Degree completion dates are in May, August, and January with a Commencement exercise occurring only in May. All undergraduate students are expected to have completed all requirements for the degree to be eligible to participate in commencement. Under special circumstances undergraduate students who fall short of their degree requirements may appeal to the Board of Review for permission to participate in Commencement exercises. Further, the student must have a minimum major and cumulative GPA of 2.0 or be able to reach that minimum, and the student must be able to complete any other remaining degree requirements with no more than eight course credits.

Students participating in the dual degree engineering program between Randolph College and an approved partner institution may participate in commencement when their Randolph College degree requirements have been met even if the requirements at the partner school are still in progress. Completion of Randolph College requirements includes successful completion of one year at an associated engineering school, i.e., the senior program. Completion of these requirements must be certified by the Chair of Physics and Engineering and the Registrar at Randolph prior to participation. Dual degree students who fall short of these requirements may appeal to the Board of Review for permission to participate in Commencement exercises. Diplomas are not issued until the official, final transcript from the partner institution is received and completion of all degree requirements is certified by the Registrar at Randolph College.

Students are permitted to participate in commencement exercises only once.

Graduation Honors

Undergraduate students of superior academic achievement are awarded the academic distinctions of summa cum laude, magna cum laude, and cum laude with the bachelor’s degree as follows:

- **Summa cum laude**: a grade point average of 3.9
- **Magna cum laude**: a grade point average of 3.7
- **Cum laude**: a grade point average of 3.5

The preceding grade point averages, rounded, must be achieved in all courses taken through Randolph College.

HOLDS ON STUDENT RECORDS

The College will not issue academic transcripts or diplomas for various financial reasons, including but not limited to:

1. tuition accounts with overdue balances above zero
2. federal loans held by the student that are in collections or in default, and
3. institutional loans (e.g., Plitt) for the student that are in collections or in default.

Additionally, transcripts and diplomas are also held for non-tuition related charges including, but not limited to the following:

1. overdue books or fines due to the library,
2. unpaid miscellaneous fees assessed to the student account (e.g., parking violations, health center charges, etc.), and
3. College property in the possession of the student.

Transcripts and diplomas may also be held by the Registrar and Provost of the College if there are any unresolved discrepancies in credentials. Registered students who incur a hold may correct their schedule through add/drop/withdrawal activities and receive their grades.

**PRE-ENTRY CREDIT/PLACEMENT POLICIES**

There are several ways in which students can receive credit or advanced placement for college-level work completed prior to entry, as follows:

**Advanced Placement Program (AP)**

The College participates in the Advanced Placement (AP) Program conducted by the College Board by awarding academic credit or advanced placement to entering students who have made specified scores on AP examinations taken prior to entry to the College. Accepted students should have AP score reports sent directly to the College (College code 5567) in the Summer following the senior year of high school.

Faculty members of the appropriate academic departments establish policies for academic credit and advanced placement in each discipline. Entering students who have earned scores of “3” or better on AP Program examinations may be considered for advanced placement in college courses and for credit toward graduation, at the discretion of the department chairs involved. Most departments require a minimum score of “4” before granting credit. Upon request, the Registrar will provide details of department policy.

Credit awarded for Advanced Placement is counted toward graduation but is not used in calculating the student’s grade point average. Such credit, if deemed equivalent to a Randolph College course, may also be used to satisfy any major, minor and/or general education requirement fulfilled by the equivalent course when taken in residence at the College.

**College Courses Taken prior to High School Graduation**

College courses taken while in high school will be considered as part of transfer credit and can be transferred contingent upon compliance with policies and procedures outlined in the *Transfer of Credit* section.

**College-Level Examination Program (CLEP)**

Applicants offering scores on a CLEP Examination will be awarded credit provided 1) the examination is a Subject Examination covering a subject area offered in the Randolph College curriculum, 2) the examination is taken prior to entry, and 3) the score received is equal to or better than the mean test score of students who earn a grade of C in the corresponding course. The amount of credit awarded is determined by the corresponding program according to the coverage of courses in that program. Subject Examinations in foreign languages will not be afforded credit unless they represent a level of achievement beyond that of previous high school or college preparation.

**GCE A-Leve ls**

Students may submit official results of General Certificate of Education (GCE) A-Level examinations for consideration of academic credit if such examinations are taken prior to entry. No grade below C is considered and no credit is awarded for AS-level, AO-level, or O-level results.

**International Baccalaureate (IB)**

The College recognizes the successful achievement of students participating in the curriculum of the International Baccalaureate organization. The student who has earned individual course Certificates or Program Diplomas may submit credentials for evaluation. Entering students who have earned scores of “5” or better on IB Higher Level Subject Examinations
may be considered for advanced placement in college courses and for credit toward graduation, at the discretion of the department chairs involved.

Credit awarded for International Baccalaureate is counted toward graduation but is not used in calculating the student’s grade point average. Such credit, if deemed equivalent to a Randolph College course, may also be used to satisfy any major, minor and/or general education requirement fulfilled by the equivalent course when taken in residence at the College.

**Military Credit**

Credit will be allowed for military service school experiences if credit is recommended in *The Guide to the Evaluation of Educational Experiences in the Armed Services* produced by the *American Council on Education* and if the course work is relevant to the liberal arts curriculum offered at Randolph College. A copy of official discharge papers (DD-214) and official military transcripts should be submitted to the Registrar’s Office for evaluation.

**Randolph College Placement Tests**

Placement tests in English, mathematics, and foreign languages are administered online and/or during Orientation Sessions. Students who demonstrate college-level ability may be granted placement and/or exemption from certain requirements.

**Writing Skills Evaluation**

Recognizing the importance of strong writing skills to success both in college and after, the College provides ongoing instruction and evaluation of each student’s writing during their enrollment. All students must fulfill the English writing requirement (WRIT 103, or the STAR program’s WRIT 104, 105) by the end of the first year. In addition, at the end of each session, the faculty of all courses assess the writing competence of each of their students using the following scale: Excellent; Adequate for satisfactory academic work; Weak or clearly inadequate, could be detrimental to academic work; No basis for judging writing performance.

To ensure that students who need to strengthen writing skills receive the assistance they need, the procedures described below have been adopted by the faculty. Any student who receives a rating of “weak” from two different faculty members during a semester will be required to elect one of the following options during the subsequent semester in order to maintain eligibility to continue at the College:

1. Enroll in and satisfactorily complete a designated Writing Intensive (WI) course,
2. Complete an individual tutoring program under a contract with the Director of the Writing Program in the Writing Lab, or
3. Pass a writing proficiency examination to be prepared and evaluated by the Writing Board.

Choice of option will be made by the student based upon the recommendation of the Director and in consultation with the faculty advisor.

**TRANSFER OF CREDIT**

Work done at another regionally accredited institution will be considered for transfer credit at Randolph College. In order to be acceptable for transfer, a course does not necessarily need to duplicate exactly a course offered at Randolph College; however, approval is based on the appropriateness of the course to a liberal arts degree program of study. To be considered for transfer credit, all course work should be collegiate level and relevant to the liberal arts degree program of study, with course content and level of instruction resulting in student competencies at least equivalent to those of students enrolled in Randolph College’s own undergraduate degree program. In assessing and documenting equivalent learning and qualified faculty, the College may use recognized guides which aid in the evaluation for credit. Such guides include those published by the American Council on Education, the American Association of Collegiate Registrars and Admissions Officers, and the Association of International Educators. Students may appeal to the Board of Review to have coursework from nationally accredited or other post-secondary institutions considered for transfer credit. In support of such an appeal, the student may be asked to provide substantial additional information (textbook information, instructor credentials, contact hours, etc.). The student who is transferring credits to Randolph College is responsible for having an official transcript of work mailed to the Registrar as promptly as possible.
General Transfer of Credit Policies

- Each course selected for transfer must not duplicate a course already completed or a course to be taken at Randolph College.
- A grade in the C range or better must be earned in each course considered for transfer to Randolph College.
- Courses offered on a pass/fail basis only will be considered for credit; courses taken on an optional pass/fail basis are not awarded credit.*
- At the undergraduate level, a maximum of 72 credit hours may be transferred toward Randolph College requirements.
- At the graduate level, a maximum of 6 to 9 credit hours may be transferred to Randolph College. (See details related to each graduate program in this catalog.)
- Modern language courses taken online must have an acceptable oral/aural component.
- Online courses with an accompanying laboratory component require additional review by the department to be considered for transfer.
- No grade earned elsewhere will be recorded on the Randolph College transcript nor will the hours of credit and grades earned be included in computing the academic average, with the exception of grades earned at certain institutions with which Randolph College has consortium or affiliation agreements. For a list of affiliated study abroad programs, see the Study Abroad section of this catalog. For a list of consortium programs see below.
- Transfer credit is granted based on credit earned at the awarding institution. When approved, these courses may count toward a students’ major or minor. However, for students transferring to Randolph from institutions that follow a standard semester hour system (where most academic courses are valued at 3 semester hours), this may result in a shortfall of credit in majors and minors in the TAKE2 curriculum. In such cases, the college will waive the shortfall of credit. This policy applies only to total hours toward majors and minors resulting from the transfer of courses. Students must still fulfill all residency requirements and meet all course requirements for each major and/or minor. This waiver also does not apply to overall hours toward graduation. All other major, minor and degree requirements must also be met.
- Credit awarded for Advanced Placement and/or International Baccalaureate is counted toward graduation but is not used in calculating the student’s grade point average. Such credit, if deemed equivalent to a Randolph College course, may also be used to satisfy any major, minor and/or general education requirement fulfilled by the equivalent course when taken in residence at the College.

*Randolph College will consider for transfer credit, courses taken on a provisional pass/fail basis during the COVID-19 pandemic only. In such cases, documentation from the transfer institution outlining policies specific to COVID-19 grading and applicable terms will be reviewed and taken into consideration in the evaluation of the course for transfer credit, either toward graduation and/or toward a student’s major/minor program. Decisions will be made on a case-by-case basis, and transfer of credit is not guaranteed.

Transfer Pre-Approval Process

Current students interested in pursuing any type off-campus work should note the following in selecting courses and assessing credit potential. All courses taken elsewhere, including those appearing on pre-approved lists, must be approved in advance by each student’s faculty advisor(s) and by the Registrar. Approval is obtained by completing a Transfer of Credit Approval form. A course not approved in advance for each student may not be approved and may not count toward particular academic requirements. Students should read major, minor, and degree requirements carefully before taking a course off-campus. It is also preferable for a student to take the basic courses in the department in which the student plans to major at Randolph College. Courses taken to fulfill General Education Program, major, or minor requirements require special approval, which must be noted on the Transfer of Credit Approval form.

Tri-College Consortium

Undergraduate students may enroll without payment of any additional tuition in an approved liberal arts course at University of Lynchburg or Sweet Briar College during the academic year, provided the course is not currently available at Randolph College, the prerequisites for the course have been met, and there is space in the class for a guest registrant. To participate, a student must carry a full-time overall course load. Students may not sign up to take more than half of their work at another campus in any one semester, although exceptions can be made by the deans of the institutions concerned. Students wishing to undertake internships for credit offered through the Tri-College Consortium must satisfy Randolph College’s eligibility
requirements for Experiential Learning and abide by policies governing both Experiential Learning and general Tri-College enrollment as stated above. The Tri-College Registration form is available on the portal. Students from University of Lynchburg or Sweet Briar College may enroll in credit-bearing courses at Randolph College under the same arrangement.

Acadeum Consortium

Undergraduate students may enroll in an approved course through Randolph College’s Consortium agreement with Acadeum, provided the course is not currently available at Randolph College and the prerequisites for the course have been met. To participate, a student must carry a full-time course load (12 hours minimum) at Randolph College each semester i.e., not including Acadeum courses. Acadeum coursework cannot comprise half or more of the required credits for any degree and/or program.

All courses taken through Acadeum must have prior approval from the Registrar and, where applicable, from the chair of the student’s major and/or minor department. Credit earned through coursework undertaken through Acadeum is recorded as a letter-grade on the student’s Randolph College transcript and is used in calculating the student’s cumulative, major and minor GPA’s as well as in determining eligibility for honors, including Latin honors at graduation.

Readmission

Students who voluntarily withdraw or who have been declared academically ineligible to continue must apply for readmission to the College if they wish to return. Students must submit an application form available from the Associate Provost, official transcripts of any college course work completed since leaving the College, if applicable, and a nonrefundable fee of $25. If the withdrawal was for medical or disciplinary reasons, clearance by the Dean of Students Office is also required. For the Fall semester, readmission applications will not be accepted prior to the preceding April, and for the Spring semester, readmission applications will not be accepted prior to the preceding November. Application must be made at least three weeks prior to the start of classes.

Any student approved for readmission will be subject to all requirements (including general education, major, minor and academic regulations) of the catalog in effect at the time of re-enrollment, unless otherwise approved by the Board of Review.

For information about readmission following academic ineligibility, see the Academic Standing section of this catalog.

Withdrawal From the College

Any student planning to withdraw from the College, either during or at the end of a session, must complete the exit procedure initiated by completing a Voluntary Withdrawal form. Before a voluntary withdrawal during a session may be authorized, a dependent student should have a parent or guardian confirm that the academic and financial consequences of such action are understood. This confirmation may be given in writing or orally, but must be received before the withdrawal can be granted. Unless the student follows these steps, any student who voluntarily withdraws during a session will forfeit the right to honorable withdrawal. The record of a student who voluntarily withdraws will reflect withdrawal from courses according to standard criteria. The College reserves the right to require at any time the withdrawal of any student whose conduct or academic standing it regards as undesirable or whose continued presence is a risk to the student or others. Students who decide to return to the College after withdrawal must apply for readmission. See Readmission. For some students needing to interrupt their studies for a specific length of time, a leave of absence is another option to consider. See Not-Enrolled-Student Status.

Not-Enrolled-Student Status

If a student wishes to take a leave of absence from the College for medical or personal reasons, the student must apply to the Associate Provost. Not-Enrolled-Student Status Application forms are available in the Office of the Associate Provost. Re-entry to the College is assured provided plans have been approved, carried out, and all previous financial obligations have been met.
REGISTRATION, ADD/DROP, AND WITHDRAWAL FROM A COURSE

Registration is required before a student may attend classes. Specific registration information is available at the Registrar’s Office, in the class schedule, and on the Students tab on the portal. After the initial registration each semester, students may make adjustments to their schedule within the following time frames. A student may add courses through the third day of the session. A student may drop a course during the first two weeks of the session and not have the course become a part of the student record. Summer sessions follow a different schedule. See the Summer Programs section of this catalog and Summer information located on the Randolph College website at: https://online.randolphcollege.edu.

A non-punitive grade of W is recorded if a student withdraws from a course after the drop period but prior to the designated last day to withdraw for each session (see the Academic Calendar). Withdrawal after the last day to withdraw each session or failure to submit the appropriate drop/withdrawal request prior to the withdrawal deadline results in the recording of an automatic F except under medical or other serious mitigating circumstances which must be documented. Mitigating circumstances must be evaluated by the Associate Provost and include a certification by the faculty member that the student was making satisfactory progress at the time of the mitigating circumstances.

STUDENTS’ RIGHTS OF ACCESS TO THEIR EDUCATIONAL RECORDS (FERPA)

The College complies with The Family Educational Rights and Privacy Act of 1974 (FERPA), as amended (often referred to as the “Buckley Amendment”), which protects the privacy of educational records, establishes students’ rights to inspect their records, provides guidelines for correcting inaccurate or misleading data, and permits students to file complaints with the Family Educational Rights and Privacy Act Office. Specifically, students are afforded the following rights with respect to their educational records:

a. The right to inspect and review the student’s education records within 45 days of the day the college receives a request for access. Students should submit to the Registrar, Provost of the College, Dean of Students, chair of the academic department, or other appropriate official, written requests that identify the record(s) they wish to inspect. The College official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the College official to whom the request was submitted, the official shall advise the student of the correct official to whom the request should be addressed.

b. The right to request the amendment of the student’s education records that the student believes are inaccurate or misleading. Students may ask the College to amend a record that they believe is inaccurate or misleading. They should write the College official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading. If the College decides not to amend the record as requested by the student, the College will notify the student of the decision and advise the student of the right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

c. The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosures without consent. The right to inspect a student’s academic record is limited to the student. Access to students’ records, except directory information which may be released, is never granted to individuals from off campus requesting information, unless the student involved has given written permission or as applicable law requires or permits. Directory information is defined as the student’s name, photograph, program of study, degrees granted and awards received, classification, enrollment status, dates of attendance, participation in officially recognized activities and sports, and height and weight of members of athletic teams. Students may restrict access to their directory information by contacting the Registrar’s Office and filing a written request. In addition, the College will publish for internal use a student directory which includes names, pictures, major program of study, and class year. Further, to minimize the risk of improper disclosure, academic and disciplinary records are kept separate.

d. The College expects that students will discuss their academic progress with their parents. Students may authorize disclosure of information to parents or anyone else by completing a Consent to Disclose Information from Education Records form. Upon request the college will exercise its discretion to disclose information from the student’s education records to authorized individuals under the following circumstances:
i. through the written consent of the student;
ii. by submission of evidence that the parents declared the student as a dependent on their most recent federal income tax form;
iii. in compliance with a subpoena. In cases of divorce, separation or custody, when only one parent declares the student as dependent, an institution may grant equal access to information from the student’s education records. However, when access is given to one parent, the College must grant equal access to the other parent upon request, unless there is a court order, state statute, or legally binding document stating otherwise. One exception that permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person employed by the College in an administrative, supervisory, academic or research, or support staff position (including security personnel and health staff); a person or company with whom the College has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill professional responsibility.

e. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the College to comply with requirements of FERPA. The name and address of the office that administers FERPA is Family Policy Compliance Offices, U.S. Department of Education, 400 Maryland Avenue SW, Washington, D.C. 20202-4605.

RANK

The College will not release information on a student’s specific rank in class. However, if a student desires it, the College will release information regarding academic standing according to the following classifications: top 1% of the class, top 5% of the class, and each decile of the class.

TRANSCRIPTS

Current and former students may request that copies of their transcripts be forwarded to other educational institutions, employers, or any person designated by the student. Students must authorize release of their transcript by completing a Transcript Request available in the Registrar’s Office or on the Registrar’s website. There is a $5.00 per copy fee for a transcript. Electronic (PDF) transcripts, rush service, and overnight delivery are available for an additional fee. Generally transcript requests will be processed within five working days.

Due to limitations on access to student information under the Family Educational Rights and Privacy Act of 1974, telephone and third party requests for transcripts cannot be honored. The College also does not release transcripts if there are outstanding financial obligations.

As required by the Code of Virginia, the Registrar must include a notation on the transcript of any student who has been suspended for, has been permanently dismissed for, or withdraws from the institution while under investigation for an offense involving sexual violence. See The Wildcat Way: The Randolph College Student Handbook, available at: https://www.randolphcollege.edu/student-handbook/ for details.

RECORDS RETENTION POLICY

The academic record of a student will be maintained either in paper copy or electronic format by the Registrar’s Office according to the following schedule: Permanent retention is maintained for the academic transcript and the students’ file folders which contain application forms, high school and college transcripts, major declarations, graduation certification materials, and other information kept in the student file folder. Three-year retention from the date of origination is maintained for registration and add/drop/withdrawal forms. One-year retention from the date of origination is maintained for transcript request forms, and change of student address information; enrollment verifications are retained until the student graduates.
Academic Programs and Courses of Instruction

Guide to Courses of Instruction

This catalog presents, subject to change, the major and minor programs and the courses currently available. For specific courses taught in any given session, consult the class schedule. The following numbering and lettering systems are used throughout for course identification. See the samples of course listings below for further illustration.

1100-1199    A course primarily, though not exclusively, for first-year students.
2200-2299    A course which assumes some previous college-level study in the field of a course primarily, though not exclusively, for sophomores.
3300-3399    A course directed primarily to juniors or seniors, or one which assumes an intermediate level of intellectual maturity.
4400-4499    A course directed primarily to seniors and which assumes knowledge gained in several college courses in the field or an advanced level of intellectual maturity.
5500-6699    Graduate level courses
L after number    Laboratory course which accompanies a lecture course.
P after number    Field experience/practicum component which accompanies a lecture course.
S after number    A course offered only during the Summer.

Other Course Indicators:

Cross-Listed, One-Time Only Courses: 1173, 1174, 2273, 2274, 3373, 3374, 4473, 4474
One-Time Only Courses: 1185, 1186, 2285, 2286, 3385, 3386, 4485, 4486
Independent Study: 1190, 2290, 3390, 4490
Experiential Learning: 3391, 4491
Senior Programs: 4493, 4494, 4495, 4496, 4497, 4498, 4499
Departmental Honors Program: 3397H, 3398H, 4497H, 4498H

AFRICAN AND AFRICAN AMERICAN STUDIES

Interdisciplinary Minor Coordinator: Julio Rodriguez

This interdisciplinary minor explores African and African American experiences, drawing from approaches across the campus. Students will gain an understanding of how the histories of the United States and the wider world have benefited from Africa and African descendants. Knowledge of the experiences of Africans and African descendants past and present is critical to understanding the urgent issues of our time. The insight students will gain from this minor will better prepare them to critically engage the world and to live honorably.

Total for minor in African & African American Studies 20

* Must be from at least three different departments. Relevant Special Topics and one-time only courses can be substituted for courses other than AAAS 1101, with approval by the minor program coordinator.

African American Studies Courses

AAAS 1101. Introduction to African & African American Studies  This interdisciplinary course explores the historical, social, cultural and political experience of people of African descent in the United States and in the wider diaspora. It will introduce students to the distinct theoretical approaches and methods of African & American Studies, centering Black, African and African American thought, scholarship, and culture. Topics may include imperialism, colonialism, slavery, inequality, and capitalism. Credit hours: 4.

AMERICAN CULTURE PROGRAM

Faculty: Justina Licata, Julio Rodriguez

The American Culture Program offers an opportunity for an analysis of the United States in ways that transcend traditional approaches to American studies. The Program is based on the thesis that America is more than a geographic location; that for centuries it has also been a state of mind and a set of hopes. Accordingly, the Program focuses not only on what Americans are but also on what they think they are, and not only on American realities but also on the development and transmission of American consciousness. Students study how Americans present themselves through museums, historic sites, and places of entertainment, as well as through books, movies, politicians’ speeches, civic celebrations, and television. In approaching America as both a social reality and a cultural construct, each of which has been subject to continual debate, students should develop a deeper sense of the nation’s complex character as well as a more precise conviction about what they themselves wish the nation to be.
Students admitted to the Program will take eight hours structured as two courses in a single session (AMCP 2272 and 3322) that comprise the curricular core. Courses are team-taught and revolve around the expertise or area of the Helen and Agnes Ainsworth Visiting scholar of American Culture, a position that rotates biannually. Both courses will incorporate travel to a variety of locations; for example, work places, government institutions, chambers of commerce, museums, and historic sites and to hear from workers, bureaucrats, ministers, curators, interpreters, and the like about their identities and experiences as Americans. Travel will include day, multi-day, and weekend trips. The American Culture minor offers students the opportunity to formalize and augment their experience in the American Culture Program.

American Culture Courses

AMCP 2272. American Images  An interdisciplinary exploration of the ways Americans represent themselves in intellectual and popular culture from the nineteenth through the twenty-first centuries. By considering themes such as race, ethnicity, class, gender, and environment, students will examine visual, literary, and musical texts for the diverse and distinctive images of America. Credit hours: 4. Prerequisite: admission to the American Culture Program.

AMCP 3322. American Culture Seminar  An interdisciplinary seminar that will examine selected themes in American culture from the perspectives of faculty expertise. The course will include extensive reading and a tutorial writing component wherein the student will work individually with faculty on writing assignments. Credit hours: 4. Prerequisite: admission to the American Culture Program. (CI, WI)

AMCP 3332. American Culture Practicum  A course that offers students the opportunity to experience research and work in businesses and organizations that relate to thematic considerations of the Program. The hours in this course will count as Experiential Learning. Credit hours: 1, 2, 3 or 4. Prerequisite: Permission of the Instructor. Offered on a Pass/Fail basis only.

ART AND ART HISTORY

Faculty: Andrea W. Campbell, Christopher Cohen, Lesley Shipley

Visual literacy is critical to understanding our increasingly complex world and its images. Courses in the Department provide a framework for the study of art through knowledge of its principles and history, through creative studio work and through hands-on learning experiences with the outstanding collection of American art at the Maier Museum of Art. The Department’s courses develop critical and creative skills that prepare students for the demands of a changing marketplace.

Graduates have immediately stepped into jobs in a variety of fields, including animation, graphic design, teaching, and fashion design, and have landed many different types of positions within gallery and museum work. The Department encourages qualified students to pursue graduate study. Graduates have gone on to degree programs in architecture, art history, art therapy, studio art, architectural preservation, and museum studies at institutions including Yale University, the University of Pennsylvania, Parsons, University of Virginia, Pratt, University of Chicago, George Washington University, Royal Ballard Institute of the University of London, American University, the School of the Art Institute of Chicago, New York University, Queens College, Virginia Commonwealth University, and the Fashion Institute of Technology, among others.

Museum and Heritage Studies

Director: Andrea W. Campbell

Faculty: Andrea W. Campbell, Jennifer L. Gauthier, Ron D. Gettinger, Gerard F. Sherayko, Lesley E. Shipley

Museum and Collections Staff: Lisa Broughman, Martha Kjeseth-Johnson, Laura A. McManus

The museum and heritage studies major is a distinctively interdisciplinary program that introduces students to a rich variety of approaches for presenting and studying visual and material culture. The program is designed for a broad range of students in the arts, humanities, and social and natural sciences. Majors will take core courses in museum and heritage studies, and select from supporting courses in several departments. Courses in the major encourage the development of fresh perspectives and practical skills, and are taught by museum professionals at Randolph College and its faculty in art history, biology and history who have developed a special interest in tangible cultural heritage. The senior program features an exhibition broadly defined, designed and executed by each major.

The program is based on Randolph College’s world-class Maier Museum of Art and the College’s notable natural history and archaeology collections, and has a strong commitment to hands-on, experiential learning in and out of the classroom. Majors are required to complete at least two internships. Thomas Jefferson’s Poplar Forest, and other local and regional historical and archaeological sites, as well as a variety of archives, collections, and museums give students access to exceptional resources for research and career exploration. The program also capitalizes on Randolph College’s impressive range of internships and fieldwork with professional organizations in the US and abroad, including the Preservation Institute Nantucket, The National Gallery (London), and the Archaeological Conservation Institute (Italy).

Total for Minor in Museum Studies and Heritage Studies  20  

Recommended Courses  

Art history majors: studio art, classics, history, literature, media and culture, and philosophy courses. Studio art majors: art history, history, literature, and philosophy courses.

Special Programs  

The Maier Museum of Art houses the College’s preeminent American art collection which is featured in the teaching of many art history and studio courses. The Maier also curates the longest-running annual exhibition of Contemporary Art held at a college or university in the country.

The Department maintains an active program of visiting artists and art historians who lecture on their work and offer workshops, critiques, or seminars for students. Polly Apfelbaum, Jake Berthot, Barbara Haskell, Bill Jensen, Elizabeth Murray, Maya Lin, Judy Pfaff, Jules Prown, Elena Sisto, Toyin Odutola, and Larry Silver are among past participants.

Experiential Learning Examples  

Randolph College is the only institution of higher learning in the U.S. that has an internship program at the National Gallery of Art, London. Art history and studio art majors are encouraged to apply for this very special opportunity. Numerous internships are offered by the Maier Museum of Art and the Career Development Center, which may be applied to the minor in Museum
and Heritage Studies, an attractive option for studio art or art history majors. These offer qualified students the opportunity to gain marketable skills in numerous areas of museum work: curatorship, management, education, public relations, and conservation. Randolph College students are offered a scholarship to attend the Nantucket Preservation Institute where they earn graduate credit in historic preservation and are paid a stipend to intern in arts management at the Lyric Opera of Chicago. Students have successfully obtained competitive internships at distinguished institutions such as: the Smithsonian Institution’s American Art Museum, the National Gallery of Art in Washington, D.C., the Museum of Modern Art, and the Whitney Museum of American Art, New York. Studio majors have been accepted by competitive summer programs, including Yale/Norfolk, Chautauqua, and the Vermont Studio School, as well as to summer programs in France and Italy.

**Art History Courses**

**ARTH 1101. Art, Culture, and Society before 1400**  
Beginning with the very first evidence of human expression, students in this course explore the art and architecture of Western civilization. Students will acquire visual and critical skills that will allow them to understand how works were made and what messages they conveyed to their prehistoric, ancient and medieval audiences.  
*Credit hours: 4. Offered every Fall. (AE, HE)*

**ARTH 1102. Art, Culture, and Society after 1400**  
How does the study of art contribute to our understanding of history and the current moment? In this introduction to western art from the Renaissance to the present, students will explore the relationship between a work of art and its historical context, while developing valuable skills in visual literacy and in the critical analysis of imagery.  
*Credit hours: 4. Offered every Spring. (AE, HE)*

**ARTH 1107. History of Photography**  
Students will explore the cultural history of photography in the United States and Western Europe from the 1830’s to the present. Students will investigate debates around photography as fine art, the role of photography in archives, as a scientific tool, and as a medium for social justice. There will be opportunities to examine works at the Maier Museum of Art and in the College archives.  
*Credit hours: 4. Alternate years: offered Spring 2022, Session 4. (AE, CI, HE)*

**ARTH 1179. Masterworks of Greek and Roman Art**  
As an introduction to the artistic culture of ancient Greece and Rome, this course discusses select works of art and architecture in depth, from both art historical and archaeological perspectives. Its aim is to set works of art in their specific historical and cultural context while exploring the connection (in style, material, technique, aesthetic) between them and our world.  
*Identical with CLAS 1179. Credit hours: 4. (AE, HE)*

**ARTH 1186. One-Time Only**

*Fall 2021, Session 2: Women, Art and Power*

In 1971, Linda Nochlin asked, "Why have there been no great women artists?" launching a feminist revolution in art history. To honor the 50th anniversary of Nochlin's essay, this course centers on the history of women and women-identified artists from the 18th century to the present. Includes opportunities to examine works in the Maier Museum of Art.  
*Credit Hours: 4. (CI, HE)*

**ARTH 2204S. Renaissance Art Study Tour: Rome and Florence**  
This two-week study tour will travel to sites where Renaissance art can still be seen in its original location and context. The group will also study art in the outstanding museum collections in Florence and Rome. Day trips to cities such as Siena and Ostia are also on the itinerary. All work must be submitted by the end of the fourth week of the Fall semester following the tour.  
*Credit hours: 4. Prerequisite: ARTH 2263 or 2264 or permission of instructor. (AE, HE)*

**ARTH 2214. African American Art**  
Students will discover and analyze a range of expressions of African American artistic creativity from the colonial period to the present, including: religious art, portraiture, landscape, photography, the Harlem Renaissance, social realism, abstraction, public art, performance, and art as a tool for social justice. Includes opportunities to examine works at the Maier Museum of Art.  
*Credit hours: 4. Prerequisites: sophomore standing or permission of instructor. Alternate years. (CI, HE)*

**ARTH 2215. American Art**  
This course will explore topics such as nationalism, race, gender, space and place in art of the United States from the colonial period to the 20th century. Special use will be made of the works in the Maier Museum of Art.
Field trips to local architectural sites. **Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years. (CI, HE)**

**ARTH 2238. Medieval Art: From Castles to Cathedrals**  Through lecture and seminar-style discussion, this course introduces the major ideas and artistic trends of the Medieval period. The political, philosophical, and spiritual changes that shaped the Western world after the dissolution of the Roman Empire are related to a selection of artistic periods and styles so that students can achieve an understanding of Medieval art and architecture within its context. **Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Offered Spring 2022, Session 3. (AE, HE)**

**ARTH 2242. Baroque Art and Architecture: Saints and Sinners**  This course studies the emergence of the Baroque style in painting, sculpture, and architecture as a response to the political and spiritual upheaval wrought by the Protestant Reformation, the Council of Trent, and the Counter-Reformation. The formation of the style in Italy and its modification by northern European artists is addressed within their varied cultural contexts. **Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. (AE, HE)**

**ARTH 2243. Nineteenth-Century European Art**  This course analyzes major trends in European art from 1770 to 1900, from Neo-Classicism and Romanticism, to Realism and Post-Impressionism. Students will consider the shifting roles and definitions of art and the artist during a time of frequent revolutions, imperialist and capitalist expansion, rapid industrialization, urban development, and shifting social and cultural norms pertaining to gender, race, and class. **Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years: offered Fall 2022. (AE, HE)**

**ARTH 2244. Modern Art in Europe and the Americas**  An examination of Modern art as it developed in Europe and the Americas between 1860-1945. Students will consider the central role that art and visual culture played in the social, cultural, and political transformations across Europe and the Americas in the early 20th century. Includes opportunities to examine works in the Maier Museum of Art. **Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years: offered Fall 2021, Session 2. (AE, HE)**

**ARTH 2257. Contemporary Art**  How did art evolve after 1960? How has globalization shaped contemporary art and its institutions? This course will focus on artists, objects, writings, and events that exemplify salient trends within contemporary art, including conceptual and performance art, feminist art, post-modernism and photography, site-specific art, new media, and socially-engaged art. Includes opportunities to examine works in the Maier Museum of Art. **Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years. Offered Spring 2022, Session 4. (AE, HE)**

**ARTH 2261. Introduction to Museum Studies**  This course explores the history, philosophy, and functions of museums in society and the sociocultural meanings embodied in such institutions. Students interpret and critically examine museum collections and exhibitions, and are introduced to the various facets of museum work, including curating, education, conservation, and management. Special focus is placed on the exhibitions and programs of the Maier Museum of Art. Field trips are required. **Credit hours: 4. Prerequisite: ARTH 1101 or 1102. Offered Spring 2021, then every Fall.**

**ARTH 2263. Early Renaissance Art and Architecture: An Age of Courts and Communes**  A bold, new style emerged in fifteenth-century Florence, setting the standard for European and American art until it was challenged by Impressionism and Modernism. Students will become familiar with cornerstones of the Western tradition in painting, sculpture, and architecture, made by great artists including Giotto, Donatello and Brunelleschi. By examining the intellectual, spiritual and political context of the works, students will understand not only their artistic significance but their original meanings as well. **Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Offered Fall 2021, Session 2. (AE, HE)**

**ARTH 2264. High Renaissance Art and Architecture: Leonardo and His Legacy**  Who does not know the painting of the *Mona Lisa*? This course examines the career of one of the most influential artists of all time, Leonardo da Vinci, and focuses on his rival, Michelangelo. Students will also discover the contributions of Venetian masters such as Titian and Palladio, whose works have inspired artists and architects for centuries. **Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. (AE, HE)**

**ARTH 2277. American Movies**  An overview of the history and aesthetics of American films made both in Hollywood and independently. It examines the stylistic and narrative techniques utilized by filmmakers, the political economy of the film industry, and cinema’s role in the global market. Students will explore various types of writing about film and develop their
critical analysis and writing skills. Identical with MAC 2277. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Offered Fall 2021, Session 2. (AE, HE, WI)

**ARTH 2280. Philosophy of Art**  A survey of philosophical thinking about the nature of art. Students explore the most influential theories of art offered by philosophers from Plato through the postmodernists. Additional topics include the nature of artistic inspiration, the role of art in society, aesthetic judgment, postmodernism, and the evolutionary origins of art. Identical with ARTH 2280. Credit hours: 4. Offered Fall 2021, Session 1. (HE, WI)

**ARTH 2286: One-Time Only**

**Fall 2021, Session 2: Art and the Landscape**

A survey of landscape as subject matter and medium in western art from 1700 to the present. Topics include ideas of the beautiful, sublime, and picturesque; landscape, national identity, and power; Land Art; eco-feminist and decolonial approaches to representing landscape; and environmental activist art. Includes opportunities to examine works in the Maier Museum of Art. Credit Hours: 4. Prerequisite: sophomore standing or permission of instructor. (HE)

**ARTH 2286 and 2286S: One-Time Only (International Travel Course)**

**Spring 2021, Session 4 and Summer 2021: Conflict and Confluence: Christianity, Islam, and Judaism in the Art and Literature of Early Spain**

This international travel course begins on campus in the fourth session and travels to Spain in late May. With an interdisciplinary approach, the class will explore intercultural exchanges between Christians, Muslims, and Jews in early modern Spain. Through the study of art, architecture, and literature, students will learn about key moments in Spain’s development from the fifth to the seventeenth centuries, including the Visigothic period, the Muslim conquest of the Iberian peninsula, the Christian “reconquest” against Islam, and the expulsion of the Jews. Students will learn that despite the oppression and conflict between these groups, there was the assimilation of artistic forms and even friendship, as seen in the novel The Abencerraje. No prior knowledge of Spanish is required. Credit hours: 1 (2286); and 3 (2286S). Identical with SPAN 2286 and 2286S with the same title. (AE, HE)

**ARTH 3314. Special Topics in Art History**

Topic will vary from year to year. Credit hours: 4. Prerequisite: 2200-level art history course or permission of instructor (or as indicated for each topic).

**Fall 2021, Session 1: Heritage and the Classical Legacy**

This course studies the forms of classical architecture developed in ancient Greece and later modified by the ancient Romans, known by extant examples and the treatise by Vitruvius. We will explore how later cultures responded to the forms, meanings, and appropriate uses of the Classical orders, and adapted them to their own needs. At the heart of this endeavor is the question why? What makes the architectural vocabulary of the Classical world so enduring and resonant?

Part of the answer may be found in UNESCO’s world heritage process which evaluates the universality of cultural sites as a criteria for inclusion on their list. We will consider the processes of determining heritage, which function as a mirror, reflecting back to us the globally acknowledged value and meaning of this architectural tradition. Prerequisite: ARTH 101 and junior standing, or permission of instructor. Identical with MUHS 3301 in Fall 2021.

**ARTH 3315. Curatorial Seminar at the Maier Museum of Art**  Students will co-curate an exhibition drawing largely on artworks from the permanent collection at the Maier Museum of Art. The instructor, with the assistance of the museum staff, will supervise the students. Credit hours: 4. Prerequisites: ARTH 2215 and 2261 and permission of instructor. Offered as needed. (AE)

**ARTH 3378. Power and Beauty: Gender in Renaissance Art and Literature**  This course seeks to understand, analyze, and interpret representations of gender and sex within Renaissance art and literature (in both England and Italy). Using
contemporary texts when possible and readings from the disciplines of literature, social history, feminist theory, and art historical texts, the course aims for a fuller assessment of gendered Renaissance life as it pertains to art and literature. Identical with ENGL 3378. Credit hours: 4. Prerequisite: junior standing or permission of instructor. (CI, HE)

ARTH 3380. World Cinema    This course explores the major movements in world cinema. It also examines such related issues as the impact of globalization on national cinemas, the role of the state in legislating film policy, and the integration of cinema with movements for political and economic change. Identical with MAC 3380. Credit hours: 4. Prerequisite: MAC/ARTH 2277 or permission of instructor. Alternate years. Offered Spring 2023. (AE, CI)

ARTH 3382. Studies in Film    The topic of this course will vary from year to year. Students may examine specific genres, directors, national cinemas, or film theories. Identical with MAC 3382. Credit hours: 4. Prerequisite: MAC/ARTH 2277 or permission of instructor. May be repeated for credit when topic differs. (AE)

ARTH 3384. Documentary History and Theory    This course is an introduction to the history, theory, and aesthetics of documentary film. It traces several major historical movements in the development of documentary from Russia and Great Britain to Canada and the United States. Students will explore questions of ethics in documentary production, the development of various formal techniques, and a number of theoretical approaches to analyzing documentaries. Identical with MAC 3384. Credit hours: 4. Prerequisite: MAC/ARTH 2277 or permission of instructor. Alternate years. Offered Spring 2022. (AE, CI, HE)

ARTH 4493. Senior Seminar    The seminar provides a systematic consideration of the major methods practiced by art historians, both pre-modern and modern, ranging from biography, iconography, and social history to feminism, post-structuralism, post-colonialism, and critical race art history. Students will choose one or more of these methods to write the senior paper and will present their research in a public forum at the Maier Museum of Art. Credit hours: 4. Prerequisite: permission of Department.

Studio Art Courses

Artistic expression is an integral component of a liberal arts education. The practice of art, as well as the study of its history, forms the studio art major.

The strength of the studio art program is the depth of study and practice of drawing and painting. Additional courses in special topics and printmaking are offered on an alternating basis. This emphasis on the two-dimensional has enabled students to pursue graduate study at major universities, nationally and internationally, and to work in art-related fields. The Department welcomes the non-major and offers a variety of courses.

Students interested in studio art (especially those wishing to study abroad in their junior year) are encouraged to take the introductory course (ARTS 1103) as soon as possible and to consult with studio art faculty. Questions concerning studio fees should be directed to the individual course instructors.

ARTS 1103. Introduction to Studio Art    An introduction to the principles and visual vocabulary of studio art with emphasis on drawing and color using a variety of materials and techniques. Credit hours: 4. Not open to students who have previously completed an advanced studio art course. Offered Fall 2021, Sessions 1 and 2. (AE)

ARTS 1106. Animal Drawing    In this course students will draw animals, birds and reptiles. Skeletons of birds, reptiles, and other animals will also serve as our models. Films and field trips will augment this course. Credit hours: 4. May be repeated for credit up to a maximum of eight credit hours. Offered Spring 2022, Session 4.

ARTS 1181. Introduction to Digital Photography    An introduction to the aesthetics and techniques of digital photography. Techniques include depth of field, lens choice, aperture settings, exposure, and use of software. Students will develop their creative vision, conceptualization skills, and technical proficiency, leading to a portfolio. Identical with MAC 1181. Credit hours: 4. Offered Fall 2021, Session 2. (AE)

ARTS 1190. Nature Sculpture    Students will study the sculpture of indigenous people and their use of materials of nature in making art. Students will incorporate this study making contemporary sculpture in art studios and outdoors using materials
found in nature. Finished works will be sited in nature. Credit hours: 4. No prerequisites. Offered once every 4 years. Offered Fall 2023.

ARTS 2201. Watercolor Painting An introduction to the materials and techniques of watercolor. Credit hours: 4. Prerequisite: ARTS 1103 or permission of instructor. May be repeated for credit up to a maximum of eight credit hours.

ARTS 2210. Children’s Book Illustration In this course students will develop, draw, and paint characters and creatures as illustrations for a children’s book that they will produce. Source materials will include folk tales, contemporary children’s books, and films for children. Credit hours: 4. Prerequisite: ARTS 1103 or permission of instructor. May be repeated for credit up to a maximum of eight credit hours. Offered Fall 2021.

ARTS 2231. Intermediate Drawing This course will focus on developing observational skills and hand/eye coordination. Students who take this course for credit a second time have the option choose their own subject matter to develop as drawings. Credit hours: 4. Prerequisite: ARTS 1103 or permission of instructor. May be repeated for credit up to a maximum of eight credit hours. Offered Fall 2021 Sessions 1 and Spring 2022 Session 3.

ARTS 2233. Oil Painting This course is an introduction to the process and practice of oil painting. Both traditional and contemporary approaches will be used. Students who take this course for credit a second time have the option choose their own subject matter to develop as oil paintings. Credit hours: 4. Prerequisite: ARTS 1103 or permission of instructor. May be repeated for credit up to a maximum of eight credit hours. Offered Spring 2022 Sessions 3 and 4.

ARTS 2235. Printmaking: Monotypes This course will focus on the history and technique of monotypes. Often called the “painterly print” monotypes have drawn artists to explore the spontaneous and expressive depths of this colorful print technique. Contemporary modes will be explored. Credit hours: 4. Prerequisite: ARTS 1103 or permission of instructor. Offered Fall 2021, Session 2.

ARTS 2248. Special Topics in Studio Technique and History of Japanese Woodcuts An exploration of printmaking through the technique of woodcut. Inspiration will be drawn from the arts and culture of Japan. Credit hours: 4. Prerequisite: ARTS 1103 or permission of instructor. May be repeated for credit when topic differs.

ARTS 2279. Digital Film Making This course is a basic introduction to filmmaking in the digital format; no previous filmmaking experience is necessary. It will familiarize students with the components of the digital video camera, the process of creating a moving image from single digital images, and the basics of non-linear digital editing. Identical with MAC 2279. Taught concurrently with MAC 2279. Credit hours: 4. Prerequisite: ARTS/MAC 1181 or ARTH/MAC 2277 or permission of instructor. Offered Spring 2022, Session 3. (AE)

ARTS 3312. Special Topics in Studio Art Topics in studio art will vary from year to year. Possible topics include mosaic and fresco painting. Credit hours: 4. Prerequisite: ARTS 1103 or permission of the instructor. May be repeated for credit when topic differs.

Fall 2021, Session 1: Etching

ARTS 3323, 3324. Studio Drawing/Painting/Printmaking/Watercolor A student will continue study of a studio discipline at an increased level of challenging, independent work. This course is divided into sections as follows: Section A: Drawing; Section B: Painting; Section C: Printmaking; Section E: Watercolor. Credit hours: 4. Prerequisite: ARTS 2231; 2233; 2235; or permission of instructor. May be repeated for credit up to a maximum of eight credit hours.

Fall 2021, Session 1; Spring 2022, Session 3: Drawing

Spring 2022, Session 3 and 4: Painting

ARTS 3376. Advanced Digital Filmmaking This advanced course in the art of digital filmmaking teaches students how to create and tell visual multimedia stories in the digital age by using video, still images, time-lapse photography, and audio. Students will study new visual storytelling practices and film art using mobile devices and apps to produce narratives for the web, iPads, and smartphones. Identical with MAC 3376. Credit hours: 4. May be repeated for up to eight credit hours. Prerequisite: ARTS/MAC 2279 or permission of instructor.
ARTS 4423, 4424. Advanced Studio For students who have completed Art 3323, 3324. A student will continue study of a studio discipline pursuing a set of issues in depth. ARTS 4423 will also include professional practices training including, but not limited to, archival practices, museum/gallery practices, studio safety, and professional development. Credit hours: 4. Prerequisite: ARTS 3323, 3324 and permission of instructor. May be repeated for credit up to a maximum of eight credit hours.

ARTS 4425. Senior Studio I Seniors are expected to develop their individual artistic sensibility that will allow them to explore, in-depth, some aspect of creative visual expression. Credit hours: 4. Prerequisite: permission of instructor. Required of all studio art majors.

ARTS 4426. Senior Studio II Continuation of the Senior Studio I. At the end of the year students will present an exhibition of their work at the Maier Museum of Art. Credit hours: 4. Prerequisite: ARTS 4425. Required of all studio art majors.

Museum and Heritage Studies Courses

MUHS 1112. Natural History Collections An introduction to natural history as a way of understanding the earth’s biotic and abiotic diversity. Special attention will be paid to the scientific, cultural, and historical development of natural history collections and to the importance of these collections. Students will use the Randolph College collections and nature preserves as resources for interdisciplinary, hands-on natural history investigations. Credit hours: 4.

MUHS 2201. Collections Management This course focuses on information management and care of objects under a museum’s purview. Topics include acquisitions, cataloging and documentation using physical and electronic systems, storage and access, proper handling of objects, preventative conservation, and security measures. Students will be engaged in practical, hands-on training utilizing campus and local collections. Credit hours: 2. Prerequisite: ARTH 2261.

MUHS 2262. Museum Education This course focuses on the educational role of the museum. Students will put learning theories into practice by developing interpretive tools and activities. Topics include educational theory, audience characteristics, visitor studies, exhibition interpretation, object-based teaching, marketing, community and school partnerships, and digital technologies. The Maier Museum of Art and the Natural History and Archaeology Collections will be utilized. Fieldtrips included. Credit hours: 4. Prerequisite: ARTH 2261.

MUHS 3301. Topics in Museum and Heritage Studies Concentrated readings and discussion on a specific theme or themes in museum and heritage studies. Themes/topics will vary from year to year. Can be repeated. Credit hours: 4. Prerequisite: junior standing or permission of the instructor (or as indicated for each topic).

Fall 2021, Session 1: Heritage and the Classical Legacy

This course studies the forms of classical architecture developed in ancient Greece and later modified by the ancient Romans, known by extant examples and the treatise by Vitruvius. We will explore how later cultures responded to the forms, meanings, and appropriate uses of the Classical orders, and adapted them to their own needs. At the heart of this endeavor is the question why? What makes the architectural vocabulary of the Classical world so enduring and resonant?

Part of the answer may be found in UNESCO’s world heritage process which evaluates the universality of cultural sites as a criteria for inclusion on their list. We will consider the processes of determining heritage, which function as a mirror, reflecting back to us the globally acknowledged value and meaning of this architectural tradition. Prerequisite: ARTH 101 and junior standing, or permission of instructor.

MUHS 4494. Senior Program The senior seminar for this interdisciplinary major has two major objectives: to give students an understanding of contemporary issues in heritage studies, especially those relevant to the fields of archaeology, art history, history, and natural history, and to guide students in the preparation of their capstone projects. Credit hours: 4. Prerequisite: MUHS 3301 and senior standing.
ASIAN STUDIES

Interdisciplinary Minor Coordinator: Kun An

Since antiquity, Asia has made monumental contributions to humankind in the areas of political organization, religion, art, and technology. That continent’s economic importance underlines the usefulness of knowledge of Asia. Nearly fifty years ago, the College became one of the first small liberal arts colleges in the South to provide its students with the opportunity to minor in Asian Studies. Today that commitment continues, enabling students to craft the sort of Asian Studies Program that best suits their needs.

Students of any major may choose to pursue a minor in Asian Studies. It will prepare students for the ever-increasing career opportunities available to those with a grasp of the languages, contemporary affairs, and rich traditions of Asia.

The goals of this minor are to ensure that the student has at least a minimal working knowledge of at least one Asian language, to provide an introduction to some aspects of traditional Asia, and to give exposure to facets of the modern political history, economy, diplomacy, and societies of Asian countries—especially the two most prominent players in East Asia: China and Japan.

Total for Minor in Asian Studies: 24

- A history major may not count more than two courses toward both the major and the minor.
- Approved Tri-college courses may substitute for one or more of the above courses.
- In fulfilling the requirements listed above, the student must complete at least one course in political science and one course in religious studies. At least one Asian language course and two of the non-language courses must be completed in residence at Randolph College.

SEE WORLD LANGUAGES DEPARTMENT LISTINGS FOR COURSES AND ADDITIONAL INFORMATION
**BIOLOGICAL SCIENCES**

Faculty: Kristin M. Bliss, Ronald D. Gettinger, Erin Heller (visiting), Adam J. Houlihan, Amanda C. Rumore, Janna Russell

Staff: Sara Harper

The curriculum of the Department supports both the liberal arts and career interests of the student. Stressing current trends in biology and laboratory investigation, the curriculum for the major includes core courses in zoology, botany, physiology, and molecular biology; a wide variety of upper-level subjects; opportunities for independent study, experiential learning, and honors study in related areas; and a senior program focusing on topics in contemporary biology. Students majoring in biology may focus their major in field biology, molecular and cell biology, organismal biology, health-related biology, or choose a more general program. For the non-major, the Department offers courses, without prerequisite, in human biology as well as introductory biology.

In addition to laboratory work, the Department also supports an active program of field studies. The location of the College in the Piedmont region of Virginia permits access to the Blue Ridge Mountains, especially the Blue Ridge Parkway, to two National Forests, to the Atlantic Ocean and coastal plain, and to the Washington, D.C., area for trips to the National Zoo and the Smithsonian Institution. Local trips are made to the Blackwater Creek Natural Area and to the College’s nature preserves.

**Total for Minor in Biology**

19-20

At least two 2200- or 3300-level course with labs must be completed in residence at Randolph College.
Special Programs

Majors have had a number of exceptional academic opportunities, including Summer study at Oak Ridge National Laboratory, Mountain Lake Biological Station, Rocky Mountain Biological Laboratory, Shoals Marine Laboratory, Gulf Coast Research Laboratory, Bowman Gray School of Medicine, MIT, University of Alabama, and Mayo Clinic.

The Marnie Reed Crowell ’60 Award in Field Biology provides funds for biology majors of promise to carry out Summer study in environmental concerns at a field station of the student’s choice.

Experiential Learning Examples

Veterinary medicine (large and small animal); respiration therapy; physical therapy; medical technology; commercial and Virginia State laboratory testing; pharmaceutical quality control; public health; family-practice clinic; neonatal and pediatric care.

Biology Courses

BIOL 1100L. Biological Principles Laboratory  An introduction to fundamental principles in biology. Students explore cell structure and function, cell division, genetics, symbiotic relationships, evolution, and biodiversity, and learn basic laboratory techniques. Credit hours: 1. Concurrent enrollment in or previous completion of either BIOL 1103; 1108; or 1118. Not open to students who have completed a 2200-level biology course. Offered every session. (NS)

BIOL 1103. Introductory Biology  A broad introduction to modern biology. Topics include evolution and the origin of life, biological molecules, cells, genetics, molecular biology, biodiversity, ecology, and other current issues in biology. Biology 1100L may be taken concurrently. Credit hours: 3. Only one 1100-level biology lecture course counts towards the biology major. Offered every year: Fall 2021, Session 1 and 2 and Spring 2022, Session 4. (NS)

BIOL 1108. Human Biology  Fundamentals of modern biology in a human context. Human evolution, genetics, development, physiology, population biology, ecology, and behavior are all considered in this examination of Homo sapiens. Biology 1100L may be taken concurrently. Credit hours: 3. Only one 1100-level biology lecture course counts towards the biology major. Offered Spring. Session 3. (NS)

BIOL 1118. Evolution  A survey of the historical and scientific development of the modern theory of evolution. The contributions of Darwin and Wallace, the modern synthesis, recent refinements in evolutionary theory, and evidence for evolution are among the topics considered. Biology 1100L may be taken concurrently. Credit hours: 3. Only one 1100-level biology lecture course counts towards the biology major. Offered as needed. (NS)

BIOL 2201. Zoology  An introduction to the structure, ecology, behavior, and evolution of all major animal groups, including molluscs, annelids, arthropods, echinoderms, and chordates. Protists, the origin of multicellular forms, and basic environmental factors affecting multicellular animals also are considered. Credit hours: 3. Prerequisite: BIOL 1100L and either BIOL 1103; 1108; 1118; or the equivalent. Corequisite: BIOL 2201L. Offered every Fall, Session 2; also offered Fall 2021, Session 1.

BIOL 2201L. Zoology Laboratory  Laboratory and field studies illustrating the structure, ecology, behavior, and evolution of many of the organisms discussed in Biology 201. Students evaluate the major animal groups on a comparative basis through microscopy, dissection, and the study of live animals. Credit hours: 1. Corequisite: BIOL 2201. Offered every Fall, Session 2; also offered Fall 2021, Session 1.

BIOL 2202. Botany  An introduction to the structure, function, physiology, evolution, and life history of plants. A comparative survey of the diversity found among other organisms including bacteria, fungi, and algae, formerly classified as plants, is also considered. Vascular plant morphology, anatomy and physiology are explained. Credit hours: 3. Prerequisite: BIOL 1100L and either BIOL 1103; 1108; or 1118; or the equivalent. Corequisite: BIOL 2202L. Offered every Spring, Session 4.

BIOL 2202L. Botany Laboratory  A survey of the diverse life histories of organisms studied in a botanical framework, including photosynthetic bacteria, algae, and plants. Emphasis is also placed on developing student’s experimental design
capabilities. Students design, conduct, and monitor long-term plant experiments over the course of the session. Students also conduct complex analyses and write detailed lab reports about their research results. Credit hours: 1. Corequisite: BIOL 2202. Offered every Spring, Session 4.

BIOL 2203. Physiology  An introduction to the functional processes of animals. Physical and chemical principles that dictate physiological function are explored. Nervous, endocrine, muscular, cardiovascular, respiratory, excretory, and reproductive systems are examined at different levels of organization. Credit hours: 3. Prerequisite: BIOL 1100L and either BIOL 1103; 1108; or 1118; or the equivalent. Corequisite: BIOL 2203L. Offered every Fall, Session 1.

BIOL 2203L. Physiology Laboratory Exercises in cardiovascular, muscular, nervous, and respiratory physiology, as well as basic investigations in microscopy, cell function, and histology. Emphasis is on critical skills such as technical writing and data analysis. Credit hours: 1. Corequisite: BIOL 2203. Offered every Fall, Session 1.

BIOL 2204. Introductory Genetics and Molecular Biology  Examination of cellular processes involved in the storage, transfer, and expression of genetic information. Topics include transmission genetics and inheritance probabilities; the structure, function, and synthesis of DNA; mutation and repair; gene expression and protein synthesis; and regulation of gene expression. Credit hours: 3. Prerequisite: BIOL 1100L and either BIOL 1103; 1108; 1118; or the equivalent; sophomore standing recommended. Corequisite: BIOL 2204L. Offered every Spring, session 3.

BIOL 2204L. Introductory Genetics and Molecular Biology Laboratory Laboratory exercises involve multi-week projects implementing the fundamental tools of molecular biology. Techniques include molecular cloning, transformation, DNA isolation, gel electrophoresis, PCR, DNA sequence analysis, and examination of proteins. Credit hours: 1. Corequisite: BIOL 2204. Offered every Spring, Session 3.

BIOL 3306. Immunology  A presentation of the fundamentals of immunology blending theory with practical application. Topics include development of the cells of the immune system, antigens, antibodies, immunization, allergic reactions, organ transplants, immunology of cancer, the autoimmune phenomenon, and immunodeficiency diseases. Credit hours: 4. Prerequisite: two courses in biology at the 2200 level, including BIOL 2203-2203L. Offered every Fall, Session 2.

BIOL 3306L Immunology Laboratory Advanced and applied laboratory course integrating the principal methods of cell biology and immunology. Techniques covered include, but are not limited to, immunoblotting, SDS-PAGE, PCR, ELISA, immunohistochemistry, tissue culture, microscopy, and working with murine models. Credit hours: 1. Prerequisite or corequisite: BIOL 3306. Offered every Fall, Session 2.

BIOL 3308. Genomics and Bioinformatics  Students in this course will use computational methods to analyze and manipulate large genomic, proteomic, and biomedical data sets. Topics may include: analysis of genomic sequences, comparative genomics, genome annotation, transcriptomics, network biology, proteomics, protein folding and structure prediction, protein-protein interaction, and statistical methods. Credit hours: 3. Prerequisite: Two courses in biology at the 2200 level, including BIOL 2204-2204L, or permission of instructor. Alternate years: Offered Spring 2022, Session 4.

BIOL 3308L. Genomics and Bioinformatics Laboratory Advanced laboratory exercises in molecular genetics, bioinformatics, and biostatistics. Credit hours: 1. Prerequisite or corequisite: BIOL 3308. Alternate years: offered Spring 2022, Session 4.

BIOL 3316. Developmental Biology  An introduction to the patterns of embryonic development in several organisms, including chordates. The origin of differentiated tissues and the development of organ systems are considered. Comparative reproductive patterns of vertebrates, metamorphosis in insects and amphibians, and stem cells are also discussed. Credit hours: 3. Prerequisite: two courses in biology at the 2200 level, including BIOL 2204-2204L. Alternate years: offered Spring 2023, Session 4.

BIOL 3316L. Developmental Biology Laboratory Laboratory studies and experiments illustrating the concepts presented in Biology 316. The student gains familiarity with the important stages in the development of plants, amphibians, birds, and mammals. In addition, the student observes the process of fertilization in sea urchins and ferns, studies the development of living amphibian and bird embryos and investigates insect metamorphosis. Credit hours: 1. Prerequisite or corequisite: BIOL 3316. Alternate years: offered Spring 2023, Session 4.
BIOL 3319. Ecology  The relationships of organisms to their environments are examined from an evolutionary perspective. Topics include speciation, adaptation, population dynamics, competition, predator/prey relationships, mutualism, productivity, succession, trophic dynamics, and biogeography. Students may also enroll in BIOL 319L but it is not required. Credit hours: 3. Prerequisite: two courses in biology at the 2200 level, including BIOL 2202-2202L. Offered every Spring, Session 4.

BIOL 3319L. Ecology Laboratory  Field study of local natural history and an introduction to instrumentation and ecological methods. Credit hours: 1. Prerequisite or corequisite: BIOL 3319 or permission of instructor. Offered every Spring, Session 4.

BIOL 3320. Microbiology  An introduction to microorganisms with an emphasis on bacteria and archaea. Topics may include microbial cell structure and function, metabolism, growth, evolution, classification, genomes, ecology, disease, and epidemiology. Credit hours: 3. Prerequisite: two courses in biology at the 2200 level, including BIOL 2204-2204L. Corequisite: BIOL 3320L. Offered every Fall, Session 1.

BIOL 3320L. Microbiology Laboratory  Exercises on laboratory methods and their underlying concepts. Exercises may include isolation and identification of bacteria, effects of environmental factors on microbial growth, enumeration of bacteria, food microbiology, and clinical microbiology. Credit hours: 1. Corequisite: BIOL 3320. Offered every Fall, Session 1.

BIOL 3321. Animal Behavior  An introduction to the biology of behavior. Topics include the genetic basis for behavior, neural anatomy, the evolution of behavior patterns, behavioral ecology, communication, orientation and navigation, and comparative vertebrate social behavior. Emphasis on results from animal studies, which lead to a better understanding of human behavior. Credit hours: 3. Prerequisite: two courses in biology at the 2200 level, including either BIOL 2201-2201L or 2203-2203L. Alternate years: offered Spring 2023, Session 3.

BIOL 3321L. Animal Behavior Laboratory  Field and laboratory experiments in animal behavior, as well as projects and discussions supporting and complementing Biology 3321. Credit hours: 1. Prerequisite or corequisite: BIOL 3321. Alternate years: offered Spring 2023, Session 3.

BIOL 3324. Ornithology-Mammalogy  An examination of the evolution, structure, ecology, and behavior of birds and mammals. Topics include the impact of Pleistocene glaciations on avian and mammalian evolution and diversity, predator-prey relationships, mammalian thermoregulation and water economy, mammalian echolocation, and the mechanics of avian flight. Credit hours: 3. Prerequisite: two courses in biology at the 2200 level, including BIOL 2201-2201L. Corequisite: BIOL 3324L. Offered as needed.

BIOL 3324L. Ornithology-Mammalogy Laboratory  Field and laboratory studies and experiments illustrating the concepts presented in Biology 3324. Topics include the comparative skeletal anatomy of major mammalian groups and basic avian anatomy and physiology. Students also gain experience with preparing study skins and identifying Virginia species of birds and mammals. Credit hours: 1. Corequisite: BIOL 3324. Offered as needed.

BIOL 3329. Economic Botany  An examination of how agriculture, industry, and medicine rely on plant diversity and their products. Topics include origin of crops, medicinal plants, plant fibers, spices, and industrial uses of plants. Emphasis is placed on written analysis of primary literature and student presentations. Credit hours: 4. Prerequisite: two courses in biology at the 2200 level, including BIOL 2202-2202L, or permission of instructor. Alternate years: offered Fall 2021, Session 2.

BIOL 33351. Topics in Biology  This course is intended to develop and enhance student research skills through analysis of primary literature, presentation, class discussion, and written assignments. Research papers will be analyzed through a global lens and real world ramifications will be discussed. Credit hours: 4. Prerequisite: Two 2200-level biology courses. Alternate years: offered Fall 2022, Session 1.

BIOL 3386, 3386L. One-Time Only

Spring, 2022, Session 3: Wildlife Biology and Lab

Wildlife biology will cover many key concepts relevant to the field of wildlife biology and the techniques used to study wildlife. We will address key biological principles that are important to understanding fish and wildlife populations, and students will learn about the natural history of selected animals common to the southeastern United
States, with emphasis on species native to Virginia. **Credit Hours:** 3. **Prerequisites:** BIOL 2201/L and junior standing or permission of the instructor.

Wildlife biology lab will provide students with field and/or laboratory experience in the identification, taxonomy, and natural history of selected animals common to the southeastern United States, with emphasis on species native to Virginia. **Credit Hours:** 1. **Corequisite:** BIOL 3386.

**BIOL 4495. Senior Program** Students perform in-depth library research on a contemporary topic in biology that is relevant to their own post-graduate goals or general interests. Students present their findings in a formal paper and in an oral presentation. **Credit hours:** 4. **Offered every year:** Fall 2021, Session 1 and 2, and Spring 2022, Session 3.

**CHEMICAL PHYSICS**

Interdisciplinary Major Coordinator, Jesse Kern

The major in Chemical Physics provides students with broad training in physical science, mathematics, and laboratory techniques. The core courses provide the conceptual foundation of the many interactions between matter and energy, which are fundamental to an understanding of the natural world. Students develop specialized interests in their choice of elective courses and might focus on coursework that prepares them for careers in academia, research and development, quality assurance, scientific writing, public outreach, and more. Qualified majors have the opportunity of serving as laboratory assistants and tutors. All students will have hands-on experience with original research as part of the senior program in either the Department of Chemistry or the Department of Physics & Engineering.

CHEMISTRY

Faculty: William D. Bare, Ann M. Fabirkiewicz, Jesse L. Kern

Through lectures, laboratory work, research, and seminars, the program of the Department of Chemistry provides students with a basic knowledge and conceptual understanding of matter: its structure and properties and the nature, energetics, and dynamics of its transformations. The Department maintains small lecture and laboratory sections to ensure that students have extensive access to its faculty, facilities and instrumentation. Qualified majors have the opportunity of serving as laboratory assistants and tutors. The Department encourages and aids in the placement of students into Summer research programs, which can, with permission from the Department, be used to partially fulfill the requirements for the senior program.

Total for B.S. Degree in Chemistry: 40-41
• Transfer students must complete the equivalent of the normal junior and senior year credit hour requirement in chemistry (a minimum of 15-21 hours) in residence at Randolph College.
• Additional courses required as prerequisites for courses for the chemistry major include MATH 1149 and 1150 and PHYS 1115-1115L, 1116-1116L, or their equivalents.

*At least 8 of the credit hours must be earned in residence at Randolph College.*

Recommended Courses

BIOL 1103; PHYS 2251, 3032; MATH 2241 and 2250; PHIL 2230; I ST 1141.

Special Programs

Chemistry majors have completed special programs in forensic science with the Charlottesville Police Department; pharmacy at Lynchburg General Hospital; sanitation in the Hampton Roads Sanitation District; analytical chemistry at Fleet labs and Abbott labs, scribing at the Lynchburg Free Clinic, working with the Department of Environmental Quality, and working in the College’s Natural History Collection.

Chemistry Courses

For all prerequisites, unless stated otherwise, a student must have a passing grade or the equivalent or permission of instructor. The first lecture and laboratory course in a course sequence are both prerequisites for the second course.

CHEM 1105, 1106. General Chemistry I, II  An introductory course presenting atomic and molecular structure and reactions, bonding, stoichiometry, the periodic table, energy relationships, kinetics, equilibrium, acids and bases, and electrochemistry. *Credit hours: 3, 3. Corequisite: CHEM 1105L, 1106L. Prerequisite: MATH 1119 or equivalent or placement in a higher level mathematics course.* (NS, QR)

CHEM 1105L, 1106L. General Chemistry Laboratory I, II  Laboratory experiences that supplement and illustrate the concepts presented in CHEM 1105, 1106. *Credit hours: 1, 1. Corequisite: CHEM 1105, 1106.* (NS)

CHEM 2205, 2206. Organic Chemistry I, II  A systematic study of the compounds of carbon, with emphasis on modern electronic interpretations of reaction mechanisms and multistep organic synthesis. *Credit hours: 3, 3. Prerequisite: CHEM 1106 or the equivalent. Corequisite: CHEM 2205L, 2206L.*

CHEM 2205L, 2206L. Organic Chemistry Laboratory I, II  Laboratory experiences that supplement and illustrate the concepts presented in Chemistry 205, 206, including a survey of the techniques of organic chemistry, the preparation of representative organic compounds, and an emphasis on instrumental techniques including gas and high performance liquid chromatography, mass, infrared, magnetic resonance and ultraviolet spectroscopy. *Credit hours: 1, 1. Corequisite: CHEM 2205, 2206.*

CHEM 2235. Environmental Chemistry and Analysis  This course focuses on the complex chemistry of soils, rivers, streams, and oceans. Important topics will include acid-base chemistry, complex equilibria, redox chemistry, pH-diagram, pollution, and waste water systems. *Credit hours: 3. Prerequisites: CHEM 1106.*
CHEM 2235L. Environmental Chemistry and Analysis Laboratory  In this course students will gain practical experience with the sampling and analytical techniques that are essential for the chemical analysis of the environment. Credit hours: 1. Prerequisites: CHEM 1106. Corequisite: CHEM 2235.

CHEM 2245. Environmental Chemistry of Energy and the Atmosphere  In this course students will study the chemical composition and behavior of the Earth’s atmosphere. Special attention will be given the chemical reactions involved in global warming, ozone depletion, smog formation, and the production and consumption of energy. Credit hours: 4. Prerequisites: CHEM 1106. Alternate years: offered Spring.

CHEM 2291L. Chemical Research  This course provides an opportunity for students to undertake an individual research project. The course will introduce students to current chemical literature, laboratory research methods, and presentation of experimental results. The research project will culminate in a written report following the guidelines of the ACS. Credit hours: 1 or 2. Prerequisite: permission of instructor. May be repeated for credit up to a maximum of four hours.

CHEM 3307. Molecular Quantum Mechanics  This course presents a survey of quantum mechanics including properties of particles and waves, wave mechanics, model quantum-mechanical systems, the hydrogen atom, and simple molecular system. Credit hours: 3. Prerequisite: CHEM 1106; MATH 1150R; PHYS 1116; or permission of instructor. (WI, when both lecture and lab are passed)

CHEM 3307L. Molecular Quantum Mechanics Laboratory  Laboratory experiments that supplement concepts presented in Chemistry 3307, with an emphasis on professional writing in ACS format. Credit hours: 1. Corequisite: CHEM 3307. (WI, when both lecture and lab are passed).

CHEM 3312. Topics in Organic Chemistry  A continuation of Chemistry 2205, 2206. Topics may include concerted reactions and reaction mechanisms, advanced nomenclature, linear free energy relationships, total synthesis, and organic spectroscopy. Credit hours: 4. Prerequisite: CHEM 2206. Alternate years: offered Spring.

CHEM 3335. Biochemistry  The chemistry of substances of biological importance and reactions involved in biological processes, including protein structure and function, metabolic pathways, and an introduction to the chemistry of genetic material. Credit hours: 3. Prerequisite: CHEM 2206.

CHEM 3335L. Biochemistry Laboratory  Laboratory experiences that supplement and illustrate the concepts presented in Chemistry 3335, including basic biochemical techniques and procedures. Credit hours: 1. Prerequisite or corequisite: CHEM 3335.

CHEM 3378. Classical and Statistical Thermodynamics  An introduction to thermodynamics and statistical mechanics, including review of important topics from statistics and probability, statistical description of particle systems, calculation of thermodynamic quantities, quantum statistics of ideal gases, and other basic methods and results of thermodynamics and statistical mechanics. Credit hours: 3. Prerequisite: MATH 1150 and PHYS 1116. Identical with PHYS 3378. (WI, when both lecture and lab are passed).

CHEM 3378L. Classical and Statistical Thermodynamics Lab  Laboratory experiments that supplement concepts presented in Chemistry/Physics 378, with an emphasis on professional writing in ACS format. Credit hours: 1. Identical with PHYS 3378L. Corequisite: CHEM/PHYS 3378. (WI, when both lecture and lab are passed).

CHEM 3391. Graduate and Professional Development  Career development, webinars on a variety of topics, invited speakers, and student oral presentations. Credit hours: 1. Prerequisite: permission of the Department.

CHEM 3392. Information Literacy and Digital Competence  Information Literacy and Digital Competence Literature searching techniques, digital age literacy, use of chemical software and electronic research tools. Credit hours: 1. Prerequisite: permission of the Department.

CHEM 4425. Inorganic Chemistry  A survey of topics in inorganic chemistry, including the fundamentals of atomic structure, bonding theory, nomenclature, coordination chemistry, descriptive chemistry, and an introduction to the Current literature in inorganic chemistry. Credit hours: 3. Prerequisite: CHEM 3307 and permission of instructor. Alternate years.
CHEM 4425L. Inorganic Chemistry Laboratory  Laboratory experiences that supplement the concepts presented in Chemistry 4425, including the preparation and characterization of inorganic compounds. Credit hours: 1. Corequisite: CHEM 4425. Alternate years.

CHEM 4494. Research Project  A senior project requiring intensive library research will be developed and conducted under the supervision of a faculty member. Credit hours: 1 Prerequisite: permission of the Department. Only B.A. chemistry majors not reading for Honors take this course. CHEM 4496. Laboratory Research  A senior project reflecting intensive laboratory research will be developed and conducted under the supervision of a faculty member. Credit hours: 1 May be repeated for credit. Prerequisite: permission of the Department. Only B.S. chemistry majors not reading for Honors take these courses.

CHEM 4499. Senior Capstone  A senior paper summarizing the work of the senior project will be presented for evaluation by all members of the Department. Students will also present their work orally, including a final public presentation before a group of faculty representing different area colleges. Credit hours: 1. Prerequisite: permission of the Department. Offered session 4.

CHINESE LANGUAGE: SEE WORLD LANGUAGES DEPARTMENT LISTINGS FOR COURSES AND ADDITIONAL INFORMATION

CHINESE STUDIES

Interdisciplinary Minor Chair: Kun An

The growing importance of China as an economic power means that Chinese language skills are in increasing demand. Randolph College offers students opportunities to gain spoken proficiency in Mandarin, as well as Chinese reading and writing skills.

Beyond providing four levels of Chinese language training, the College offers a number of courses which give insight into the Chinese culture, society, and politics. Periodically, a travel-study course is offered that exposes students to the richness and variety of life in China. The College has a distinctive Summer internship program which places selected students in positions with Energizer Holdings, Inc., located in Shanghai and presents them with an exceptional opportunity to gain first-hand experience in the Chinese business world.

COGNITIVE SCIENCE

Interdisciplinary minor coordinator, Blair Gross

Cognitive Science is the interdisciplinary study of the nature of human knowledge and how it is acquired and used. Cognitive science draws on concepts and methodology from psychology, philosophy, computer science, language sciences, and neuroscience and emphasizes how to think and engage in reasoning and constructive problem-solving – skills that can be applied across disciplines. Students will learn how information is represented and processed, and may also learn advanced computational skills such as computer programming and working with data structures.

**Total for Minor in Religious Studies** 20

Recommended Courses

SOC 1101, 3310; MAC/PHIL 1175; and appropriate courses in the History Department. Students aspiring to graduate school in religious studies should achieve fluency in a relevant ancient and/or modern language.

Experiential Learning Examples

Internships in local hospitals and organizations, participation in Summer language institutes, Summer travel-study programs, volunteer opportunities with NGOs and humanitarian groups, and so forth.

Philosophy Courses

**PHIL 1101. Introduction to Philosophy: Thinking for Life**  
This course introduces students to the practice of philosophy. Students will read and think about ideas of enduring human interest, such as ethics, human nature, knowledge, free will, beauty, and the nature of mind. Through such study, students will gain practice questioning the basic assumptions of everyday life. **Credit hours: 4. (HE)**

**PHIL 1122. Early Modern Philosophy**  
This course studies European philosophy from 1600-1800, a time period when scientific discoveries inspired philosophers to radically reevaluate traditional sources of knowledge and methods of inquiry. During this period, the human mind becomes not just a tool but also an object of philosophical inquiry. Authors studied include Descartes, Hume, and Kant. Topics covered include the sources and limits of knowledge, the mind/body relationship, and personal identity. **Credit hours: 4 (HE, WI)**

**PHIL 1132. Introduction to Philosophy: Knowledge and Reality**  
An introduction to philosophy through reading classical and contemporary authors on traditional issues. Topics will be selected from among the following: reason and religious belief, the grounds and limit of knowledge, mind and its place in nature, determinism and free will, and the meaning of life. **Credit hours: 4. Offered Fall. (HE, WI)**
PHIL 1133. Ethics and Public Life  An introduction to philosophical thinking about morality and human nature. Readings address concrete issues such as world hunger, and sexual misconduct, as well as theoretical topics such as human happiness, the nature of right and wrong, and the relationship between morality and law. Credit hours: 4. (HE)

PHIL 1173. One-Time Only

Fall 2021, Session 1: Philosophies of Asia

An introduction to the major traditions of philosophical thought found in Hinduism, Buddhism, Confucianism and Daoism, with an emphasis on each tradition’s claims about the nature of the self and possibilities for its transformation. Identical with RELG 1173 taught in the same term and session. Credit hours: 4. (CI, HE)

PHIL 1175. Practical Reasoning  An introduction to the practice of reasoning and problem-solving. Emphasis on the analysis of arguments of the sort encountered in everyday discourse and in textbooks and lectures; on the clear and persuasive presentation of arguments, reports, and papers; and on the refinement of ordinary critical instinct. Identical with MAC 1175. Credit hours: 4. (HE)

PHIL 1177. Classical Philosophy  An introduction to ancient Greek philosophy. Topics include the nature of reality, human nature and happiness, political order. Readings are selected from the pre-Socratics, Plato, Aristotle, and others. Identical with CLAS 1177. Credit hours: 4. (HE)

PHIL 1183. Faith and Doubt  Is ‘faith’ a desperate pitch to gain influence over a world ill-suited to human desires? Is it a by-product of fear, resentment, wishful thinking, and/or a primitive stage in human intellectual development? Is it immoral? Is it coherent? This course investigates several historically significant instances of ‘doubt’ as representative of four general approaches to the critique of ‘faith.’ Special attention to repercussions for believers and to responses and strategies of response to critics. Identical with RELG 1183. Credit hours: 4. (HE)

PHIL 2214. Bioethics  A careful analysis of issues arising in medical practice and research. Topics include abortion, euthanasia, surrogate parenting, allocation of scarce resources, cloning, experimentation on living subjects (human and nonhuman), and the doctor/patient relationship. Credit hours: 4. Prerequisite: sophomore standing.

PHIL 2226 Thought Experiments  Thought experiments are used in philosophy, science, and artistic works to examine concepts, consequences, and counterfactuals that cannot be empirically tested. Such thinking tools are intended to extend our imagination and hold our focus. Students in this course will carefully analyze the role such experiments play in philosophical methodology in comparison to their use in science and art. Credit hours: 4. Alternate years. (HE)

PHIL 2230. Logic  An introduction to formal logic covering propositional logic and predicate logic. Attention is given to the nature of proof in formal theories and to the evaluation of arguments in natural language. The course also includes a brief treatment of logic problems that may appear on the LSAT. Credit hours: 4. Prerequisite: sophomore standing or PHIL 1175.

PHIL 2275. True Religion  A study of modern and postmodern philosophical reflection on religions, centering on modern efforts to distill ‘true religion’ from story and postmodern efforts to reclaim the truth of story beyond supernaturalism and scientism. Course themes include the relationship between ‘faith’ and reason, religion and sex, religion and gender, religion and violence, the logic of religious discourse, the nature of religious experience, and the death of God. Abrahamic. Identical with RELG 2275. Credit hours: 4. Prerequisite: sophomore standing.

PHIL 2280. Philosophy of Art  A survey of philosophical thinking about the nature of art. Students explore the most influential theories of art offered by philosophers from Plato through the postmodernists. Additional topics include the nature of artistic inspiration, the role of art in society, aesthetic judgment, postmodernism, and the evolutionary origins of art. Identical with ARTH 2280. Credit hours: 4. (HE, WI)

PHIL 3331. Existentialism and Continental Philosophy  An advanced study of central ideas in European Continental philosophy from the nineteenth and early twentieth centuries, including works by Hegel, Nietzsche, Schopenhauer, Kierkegaard, Heidegger, and Sartre. Topics include the nature of the human condition, human subjectivity and freedom, authenticity and bad faith, and existential anxiety. Credit hours: 4. Prerequisite: PHIL 1133 or PHIL/RELG 1183 or permission of instructor. Alternate years.
PHIL 3351. Philosophy of Mind  An advanced study of the views of contemporary philosophers on the mind and its place in nature. Topics include the mind-body problem, consciousness, and the problem of other minds. Students will also reflect on the relationship between scientific and philosophical investigation of the mind. The nature of representation, free will, concepts, emotions, perception, and the self may also be discussed. Credit hours: 4. Prerequisite: six hours of philosophy and/or psychology (excluding PSYC 227R). (HE, WI)

PHIL 3361. Environmental Philosophy  An advanced study of ethical and aesthetic issues concerning the environment. Topics include the definition of nature; whether humans are inside or outside of nature; the moral standing of animals, plants, species, and ecosystems; the tension between environmental preservation and economic development; and, the value of wilderness. Credit hours: 4. Prerequisite: PHIL 1133 or 214 or EVST 1102, or permission of instructor. Alternate years: offered Fall.

PHIL 3376. Topics in Political Philosophy  An examination of themes in Western political philosophy relying on the works of philosophers from the classical through the modern era. Topics will vary from year to year and will include themes such as justice, equality, liberty, and democracy. Credit hours: 4. Prerequisite: junior standing. May be repeated for credit when topic differs up to a maximum of twelve hours.

PHIL 4493. Seminar I  Detailed study and discussion of the work of a major philosopher, selected according to the interests and needs of the students enrolled. Credit hours: 4. Prerequisite: PHIL 1122; 1133; 1177; and 2230.

PHIL 4494. Seminar II  Detailed study and discussion of a problem or topic in contemporary philosophy, selected according to the interests and needs of the students enrolled. Credit hours: 4. Prerequisite: PHIL 1122; 1133; 1177; and 2230.

Religious Studies Courses

RELG 1111. Hebrew Bible  The Hebrew Bible is an anthology reflecting the religious life and thought of ancient Israel and a primary source for beliefs, desires, and norms that underpin Western civilization. Students study and employ a wide range of strategies proper to scholarly analysis of the diverse textual traditions enshrined in the Hebrew Bible. Topics include founding legends, prophecy, wisdom, and apocalypse. Special emphasis on resettling the Bible into its ancient Near Eastern milieu. Credit hours: 4. (HE)

RELG 1112. New Testament  Scholarly analysis of the canonical anthology of the early Christian movement, emphasizing its origin in provincial Palestinian culture and efflorescence in Asia Minor of the first two centuries CE. Students study and employ a wide range of strategies for ascertaining the origin, setting, transmission, and aims of New Testament writings. Topics include scholarly reconstructions of the historical Jesus, diverse perspectives on Jesus among early Christian communities, the thought-world and ministry of the apostle Paul, formation of the New Testament canon, and the evolution of orthodoxy. Credit hours: 4. (HE)

RELG 1128. Hinduism and Visual Culture  This course examines the creation and transmission of those religious traditions of South Asia commonly labeled “Hinduism” via visually mediated interactions such as film, comic books, murti, puja, and darshan. Topics to be examined include caste and class, brahmanical and renouncer traditions, women and gender, diaspora, and the continuing relevance of visual renderings of great epics such as the Ramayana. Credit hours: 4. (CI, HE)

RELG 1147. The Religions of Asia  This course provides a thematic and historical overview of Hinduism, Buddhism, Daoism, and Confucianism. To accomplish this ambitious goal, students focus on the major themes of each tradition, paying attention to how traditions developed in dialogue with each other, and how they crystallized into distinct traditions in reaction to each other. Credit hours: 4. (CI, HE)

RELG 1168. Death, Dying, and Other Opportunities  What happens after we die? Is death an end, an interruption, or a beginning? How should the living relate to the dead? This course explores several Asian religions’ answers to these questions. By surveying a variety of beliefs, rituals, and cultural practices about death and the afterlife, this course demonstrates how views about death intimately shape our understanding of life. Credit hours: 4. Alternate years. (CI, HE)

RELG 1172. Jesus to Jerry: Two Thousand Years of Christianities  From Jesus to Jerry Falwell, inquisitors to snake-handlers, martyrs to mystics, orthodoxy to ‘full gospel’ Pentecostalism, this course surveys the first two millennia of the diverse global family called Christianity. Attending closely to historical context, students consider major theological
innovations (from creeds to the black Jesus), spirituality (from desert ascetics to tent revivalists), modes of authority (from charisma to papal infallibility), and institutional formations (from monasteries to comunidades eclesiales de base). Credit hours: 4. (HE, WI)

RELG 1173. One-Time Only

Fall 2021, Session 1: Philosophies of Asia

An introduction to the major traditions of philosophical thought found in Hinduism, Buddhism, Confucianism and Daoism, with an emphasis on each tradition's claims about the nature of the self and possibilities for its transformation. Identical with PHIL 1173 taught in the same term and session. Credit hours: 4. (CI, HE)

RELG 1183. Faith and Doubt

Is ‘faith’ a desperate pitch to gain influence over a world ill-suited to human desires? Is it a by-product of fear, resentment, wishful thinking, and/or a primitive stage in human intellectual development? Is it immoral? Is it coherent? This course investigates several historically significant instances of ‘doubt’ as representative of four general approaches to the critique of ‘faith.’ Special attention to repercussions for believers and to responses and strategies of response to critics. Identical with PHIL 1183. Credit hours: 4. (HE)

RELG 1199. Haunted: Ghosts and Other Monsters

Monsters from a fringe beyond ordinary experience share our cultural landscapes, unsettling our present, our normal, and our futures with their/our unfinished business. Haunted views the strange power and persistence of ghosts, the occult, and ‘the night side of nature’ as opportunity for the study of how we construct knowledge, experience, and authority at the complex intersections of race, gender, and class. Topics include apparitions, vampires, zombies, and more across a wide range of literature and media. Credit hours: 4. (CI, HE)

RELG 2201. Children of Abraham

A historical overview of the principal religious traditions of Western civilization through close study of primary and secondary sources, with attention to the internal logic of each religion and to their respective views of cosmic order, divine and human natures, human community and responsibility, and divine service or worship. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. (HE)

RELG 2202. Sons and Daughters of the Buddha

What is an ideal Buddhist life? Beginning with an examination of the life-narrative of the historical Buddha Shakyamuni, this course uses biographies, autobiographies, and narrative films to examine how Buddhist traditions in various historical periods and cultural contexts have come to understand what constitutes an exemplary human life. The course assumes no prior experience studying Buddhism or religious studies. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. (CI, HE)

RELG 2203. Sacred Violence, Sacred Peace

Interdisciplinary analysis of theories, documents, and events pertaining to the nexus of religious commitment and practice, violence, and peace-building. Why do violent extremists seem so often to lean on sacred texts and traditions? Does religious belonging inevitably source and aggravate conflict or can it contribute to new solidarities in a world where religious actors/institutions exercise influence at every level of policy? Course includes local and global case studies and touches on warfare, radicalization, extremist violence, reconciliation, nationalism, and the like. Credit hours: 4. Offered every third year. (CI, HE)

RELG 2238. In the Footsteps of Muhammad

What is Islam? Concerned about shari’a? In love with Rumi? Angry with Orientalists? An introduction to the symbolic world and enduring venture of ‘Islam,’ to the shared grounds of all subsequent historical expressions of Islam and to alternative paradigms of authority and interpretation that underlie the historically and culturally diverse expressions of Islam. Readings from the Qur’an, Rumi, Edward Said, Tayeb Salih, Ziauddin Sardar, Fatima Mernissi, and others. Credit hours: 4. Prerequisites: sophomore standing or permission of instructor. Alternate years. (CI, HE)

RELG 2240. The Man from Nazareth

Who was Jesus of Nazareth? Until recently the ‘historical Jesus’ was hidden by the transhistorical Christ, whose legacy was shaped in the centuries after Easter. Is the distinction between Jesus and Christ legitimate? Can the sediment of tradition be excavated in order to arrive at the ‘real’ life of Jesus? Analysis of ‘primary’ sources supplemented by readings in the field of historical Jesus research. Credit hours: 4. Prerequisites: sophomore standing or permission of instructor. Alternate years.

RELG 2250. God after Auschwitz

Should ‘Auschwitz’ revolutionize how Jews think of God and covenant? Is poetry ‘after Auschwitz’ an obscenity? Is Christianity? This course seeks to fathom the impact of the Holocaust (Shoah) on
contemporary Jewish thought through analysis of theological, literary, testamentary, and filmic responses to it. Special attention to the dialectic between responses that reaffirm traditional forms of fidelity and those that question all prior securities. Abrahamic. **Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years.**

**RELG 2253. In Memory of Her** Luce Irigaray asks, “In what way are women subjects in our cultures and religions?” This seminar poses that question through analysis of women and gender in canonical and non-canonical Jewish and Christian literature of late antiquity. Students will practice feminist and other strategies for remembering ‘her’ in ancient traditions and omissions. Special attention to women’s participation in Mediterranean religions to the 6th century and the imprint of ancient formations on contemporary outlooks. Abrahamic. **Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years.** (CI, HE)

**RELG 2261. Reel Religion** Many films expressly or subtly treat religious themes and subjects. This course uses film to open up a discursive space wherein to think critically about religious desire and imagination, to reflect on the nature of film and representation, and to assess the strange progeny of ‘Hollywood’ and the ‘Holy.’ Films include Nattvardsgästerna, The Exorcist, Blade Runner, Jésus de Montréal, Breaking the Waves, Jesus Christ Superstar, among others. Abrahamic. **Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years.**

**RELG 2264. Tibet: Religion in the Land of Snows** This course is a survey of Tibetan Buddhism and its role in shaping Tibetan religion and culture throughout the Himalayas. In addition to surveying the foundations of Buddhist thought, this course will explore the history of Tibetan Buddhism, and the role of Buddhist beliefs in the shaping of Tibetan worldviews and religious and political institutions. **Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years.** (CI, HE)

**RELG 2266. Hindu Traditions of India** Is Hinduism one religion or many? This question guides our historical exploration of those South Asian religious traditions commonly labeled “Hinduism.” Concentrating on the classic Hindu religious ideals of dharma or duty, karma or action, and bhakti or love for the lord, we explore ritual in early Vedic texts, philosophical speculations in later Upanishads, Purana literature, and devotional poetry. **Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years.** (CI, HE)

**RELG 2268. Gendering Enlightenment** The historian Caroline Walker Bynum wrote, “Religious experience is the experience of men and women, and in no known society is this experience the same.” Taking this claim as our point of departure, this course uses scholarship from religious studies, anthropology, and gender studies to examine Buddhist philosophical conceptions of gender and the status of historical Buddhist women. Eastern. **Credit hours: 4. Prerequisites: sophomore standing or permission of instructor. Alternate years.** (CI, HE)

**RELG 2270. Buddhism** This course introduces Buddhist thought and practice, from its roots in ancient India to its efflorescence in Asia and elsewhere. Analysis of central Buddhist narratives and tenets is balanced with a study of the ‘lived religion’ in several diverse cultural contexts. Shared and distinctive commitments and practices of the three major living traditions, Theravada, Mahayana, and Vajrayana, will receive close attention. Sources include classical texts, memoirs, scholarly essays, and documentary and feature films. **Credit hours: 4. Prerequisite: sophomore standing or permission of instructor.** (CI, HE)

**RELG 2275. True Religion** A study of modern and postmodern philosophical reflection on religions, centering on modern efforts to distill ‘true religion’ from story and postmodern efforts to reclaim the truth of story beyond supernaturalism and scientism. Course themes include the relationship between ‘faith’ and reason, religion and sex, religion and gender, religion and violence, the logic of religious discourse, the nature of religious experience, and the death of God. Abrahamic. **Identical with PHIL 275. Credit hours: 4. Prerequisite: sophomore standing.**

**RELG 3301. Immortal Longings: Formations of Mystical Consciousness** Seminar on ‘mystical’ traditions in world religions. Approaching these traditions in their native historical, cultural, institutional, and textual settings, the course will consider the logic of esoteric and exceptional uses of language in service of insight, the cultivation of ecstatic and special somatic states, and the relationship between masters of esoterica and the ‘establishment.’ Is ‘mysticism’ simply a scholarly fiction for assessing texts/practices that bypass ‘company’ gatekeepers? Does ‘mysticism’ name a transcultural core that transcends religious particularity? What did Eckhart mean: “I pray God that he rid me of God”? Abrahamic. **Credit hours: 4. Prerequisite: sophomore standing or permission of instructor.**
RELG 3317. Topics in Modern and Contemporary Religious Thought A seminar on a topic in modern and contemporary religious thought. Topics vary from year to year. Credit hours: 4. Prerequisite: junior standing or permission of instructor. May be repeated for credit when topic differs.

RELG 4493. Methods in Religious Studies This is the first part of a two-part senior program sequence, in which religious studies majors explore ethnographic method and discipline-specific theory, develop an individual research proposal, obtain approval from Randolph College’s Institutional Review Board for work with human subjects, and begin fieldwork and observation in a religious community. Credit hours: 4. Prerequisite: permission of the Department.

RELG 4494. Writing Workshop This is the second of a two-part senior program sequence. In this session, religious studies majors finish collecting textual and ethnographic data, before working with fellow department majors and professors to craft a senior project in completion of their major requirements. Credit hours: 4. Prerequisite: permission of the Department.

Data Science Courses

DSCI 2232. Introduction to Data Science Data science is an interdisciplinary field incorporating statistical techniques with algorithms to collect and to process large data sets, in order to extract meaning and make decisions. Students will explore the collection and filtering of data, machine learning algorithms, and methods for drawing conclusions. Credit hours: 4. Prerequisite: ECON 2227 or EVST 2205 or MATH 2227 or MATH 3343 or POL 2231 or PSYC 2227 or SOC 3395. Identical with MATH 2232. Alternate years; offered Spring.

DSCI 2233: Machine Learning A broad introduction to machine learning and statistical pattern recognition. Unsupervised and supervised learning algorithms including dimensionality reduction (PCA and variants), clustering (simple clustering, agglomerative and non-agglomerative), probabilistic models, neural networks, and support vector machines. Credit hours: 4. Prerequisite: ECON 2227 or EVST 2205 or MATH 2227 or MATH 3343 or POL 2231 or PSYC 2227 or SOC 3395.
**DSCI 4495: Data Science Seminar**  The seminar requires students to explore the areas of their personal interest in data science in order to inform their choice of research topics, graduate school, and employment. Students will review the major ideas in data science and will prepare for the rigorous data science-related job interview. *Credit hours: 1.*

**DANCE: SEE PERFORMING ARTS DEPARTMENT LISTINGS FOR COURSES AND ADDITIONAL INFORMATION**

**EARTH SCIENCE EDUCATION**

Interdisciplinary minor coordinator: Margaret A. Schimmoeller

This minor is open to undergraduate students accepted into the Educator Preparation Program who seek to add the earth science endorsement to their base license. Students with this minor must also complete the Professional Studies course work excluding student teaching (completion of student teaching is required to qualify for the license).

**Earth Science Education Minor for Licensure**

**Total for Minor in Earth Science Education** 24

A student electing a major or minor in environmental studies may count no more than two courses used for the environmental studies program for any other major or minor, with the exception of the earth science education minor for licensure.

**ECONOMICS AND BUSINESS**

Faculty: John D. Abell, Jeffery M. Heinfeldt, A.T.M. Sayfuddin, Elizabeth A. Perry-Sizemore

The Department of Economics and Business provides a liberal arts education in the fields of economics and business. The Department offers the B.A. in Economics and the B.A. in Business, as well as minors in both disciplines. Courses of study emphasize critical thinking, quantitative skills, and the ability to write and speak with clarity.

The economics curriculum treats economics as a social science; it develops analytic thinking. The economics program prepares students for professional careers in for-profit, government, and nonprofit organizations. At the same time, it prepares students for graduate studies in economics, business, law, and other fields. Coursework is offered in the core areas of macroeconomics, microeconomics, and international economics. Coursework is also offered in several topics of immediate social relevance (behavioral economics, environment, money and banking, e.g.). Several courses involve service learning and community based research. All economics majors complete a two-session senior program culminating in the writing and presentation of an independently authored research paper.

The business curriculum treats business and management as applied disciplines; it develops skills in solving practical problems. The business program prepares students for professional careers in for-profit, government, and nonprofit organizations. At the same time, it provides a solid background for advanced training in business or management. Coursework is offered in the core areas of accounting, finance, management, and marketing. Coursework is also offered in business analytics and other advanced topics. All business majors complete a one-session senior capstone project.

- The core program must be completed prior to the senior year.
- ECON 2227 may NOT be used as a 2200-level elective in the major.
- Twenty hours of the major, including ECON 4495 and 4496, must be completed in residence at Randolph College.
- Students may major in both Business and Economics or major in one field and minor in the other field; for double majors the only courses that can overlap are ECON 1101, 1102, 2227 and MATH 1149, and for a major and a minor ECON 1101 and 1102.
- Students reading for honors in economics must, prior to the senior year, complete ECON 3303 for a letter grade and at least one other elective.

- The core program must be completed prior to taking BUS 4495.
- ECON 2227 may NOT be used as a 2200-level elective in the major.
- Students who transfer into Randolph College with credit for a 2200-level, or higher, course in business or management, but not BUS 1151 (Introduction to Business), will substitute a BUS 2200-level or 3300-level elective for BUS 1151.
- Sixteen hours of the BUS courses, including BUS 4495, and twenty hours of the major must be completed in residence at Randolph College.
• Student may major in both Business and Economics or major in one field and minor in the other field; for double majors the only courses that can overlap are ECON 1101, 1102, 2227, and MATH 1149, and for a major and a minor ECON 1101 and 1102.

Students reading for honors in business must declare their intention to the department (Chair and instructor of BUS 4495) on or before the last day of regular classes (prior to final exam week) of Session 4 the Spring before taking BUS 4495. In addition, both of the business electives must be passed with a letter grade before reading for honors.

• Students who transfer into Randolph College with credit for a 2200-level, or higher, course in business or management, but not BUS 1151 (Introduction to Business), will substitute a BUS 2200-level or 3300-level elective for BUS 1151.
• Not more than two economics or business courses that are used in the completion of another major or minor may be used to fulfill the requirements for a business minor.

Recommended Courses

Economics majors are encouraged to take ECON 3303. Students planning graduate study in economics should consider completing the mathematics minor with MATH 1149, MATH 1150, MATH 2241, MATH 2250, and either MATH 3343 or MATH 3331. Business majors and minors planning to pursue an MBA should consider taking BUS 2256 and BUS 3368.

Business Courses

BUS 1151. Introduction to Business  An introductory course covering current events in American business. Topics include basic theories and practice in the functional areas of accounting, finance, marketing, and management. Additional subject areas include ethics, social responsibility, economic systems, and organizational structure. Credit hours: 4. Not open to students who have completed a 2200-level, or higher, business or management course. Offered Fall, Session 1 and Spring, Session 3.

BUS 2255. Principles of Accounting I  This course is directed toward an understanding of the utilization of accounting methods in the recording, classifying, and reporting of basic economic transactions. Special emphasis is placed on accounting as the language of business and its use in communication. Credit hours: 4. Prerequisite: BUS 1151. Offered Fall, Session 1.
BUS 2256. Principles of Accounting II  This course deals with the uses of financial information for internal management purposes. Stress is placed on accounting as an aid to management in the planning, direction, and control of business activities and in the evaluation of results. Credit hours: 4. Prerequisite: BUS 2255. Offered Spring, Session 3.

BUS 2261. Management  A survey of the practice of management. Topics include the roles of the manager; planning, organizing, leading, and controlling the organization (both for-profit and nonprofit organizations); organizational behavior, motivation, and leadership. Case studies are used. Students apply theory to realistic managerial situations, analyze courses of action, and make recommendations. Credit hours: 4. Prerequisite or corequisite: BUS 1151 or permission of the department. Offered Spring, Session 3.

BUS 2264. Marketing  A study of the marketing function of a business. Topics include brand management, consumer behavior, market analysis, and the “four Ps” of the marketing mix. Case studies are used. Students apply theory to realistic marketing situations, analyze courses of action, and make recommendations. Students also research a marketing venture, analyze the market, and create a marketing plan. Credit hours: 4. Prerequisite or corequisite: BUS 1151 and 2261 or permission of the department. Offered Fall, Session 2.

BUS 2270. Topics in Management  In-depth exploration of a selected topic in management. Topics may include leadership, negotiation, organizational behavior, or other topics of interest. Case studies are used. Students apply theory to realistic managerial situations, analyze courses of action, and make recommendations. Students research a managerial problem in the area, perform a situation analysis, and recommend a course of action. Credit hours: 4. Prerequisite: Unless otherwise specified, BUS 2261 or permission of the department. May be repeated for credit when topic differs.

BUS 3334. Corporate Finance  The financial organization and management of a business corporation. Time value of money and risk/return concepts serve as the foundation for valuing (analyzing) the firm’s sources of capital (debt and equity) and effectively allocating these funds through the capital budgeting process. Credit hours: 4. Prerequisite: BUS 2255; ECON 1101 or 1102. Offered Spring, Session 3. (QR)

BUS 3368. Business Analytics  The course introduces business analytics to students from diverse academic backgrounds. Students are introduced to R programming for statistical analysis. Topics include regression analysis, hypothesis testing, market segmentation analysis, perceptual mapping, consumer choice models, conjoint analysis, and sales and promotion analytics. Emphasis is given on the applications of relevant concepts and interpretation of results rather than theoretical aspects. Credit hours: 4. Prerequisites: ECON 2227 (or an equivalent statistics course) and two of the following three courses: Econ 1101, Econ 1102, or Bus 1151; or permission of instructor. Offered Spring, Session 3.

BUS 3369. Financial Markets and Institutions  An examination of financial markets (stock, bond, money, etc.) and the operations of various financial institutions (banks, thrifts, mutual funds, insurance companies, etc.) within the legal and competitive environment. Credit hours: 4. Prerequisite: BUS 3334 or permission of the department. Offered Fall, Session 1.

BUS 3370. Advanced Topics in Finance  In-depth exploration of a selected topic in finance. Topics may include investments, financial theory, or other topics of interest. Credit hours: 4. Prerequisite: BUS 3334 or permission of the department. May be repeated for credit when topic differs.

BUS 3371. Advanced Topics in Business  In-depth exploration of a selected topic in business. Topics may include sustainable business, entrepreneurship, or other topics of interest. Case studies are used. Students will apply theory to realistic business situations, analyze courses of action, and make recommendations. Students research a business problem in the area, perform a situation analysis, and recommend a course of action. Credit hours: 4. Prerequisite: Unless otherwise specified BUS 2261, 2264, and 3334, or permission of the department. May be repeated for credit when topic differs.

BUS 4495. Senior Capstone in Business  Students integrate concepts from accounting, finance, marketing, and management and use them in concert to manage the business as a whole. Strategic theories such as Porter’s “Five Forces” model of industry analysis and the resource-based view of the firm are applied to realistic situations. Students analyze situations at the level of the firm, evaluate courses of action, and make recommendations. Students complete a term project. Credit hours: 4. Prerequisite: major core or permission of the department. Offered Spring, Session 4.
Economics Courses

ECON 1101. Principles of Macroeconomics  An introduction to the concepts and analytical tools of the economist. The frame of reference is the macroeconomy. Working with a variety of economic models, attention is focused on issues like the business cycle, interest rates, inflation, deflation, the stock market, Federal Reserve policy-making, government policy, and international trade. Hands-on research projects help students to make connections between economic theory and the real world. Credit hours: 4. Offered Fall, Session 2 and Spring, Session 4. (SS)

ECON 1102. Principles of Microeconomics  An introduction to the concepts and analytical tools of the economist as related to the microeconomy, which focuses on decision-making at the individual level. This course examines the behavior of consumers, firms, and industries, and their effects on resource allocation. Students study various market structures and gain an understanding of market failure and issues pertaining to the role of government at the microeconomic level. Credit hours: 4. Offered Fall Session 1 and Spring, Session 3. (SS)

All students wishing to enroll in any economics course at the 2200 level or above will normally have completed MATH 1109 or 1113, or will have placed into a higher-level mathematics course.

ECON 2206. Microeconomic Theory and Its Application  This course examines in detail, producer and consumer theory, market structure, game theory, market failures, and the role of government in the marketplace. Special attention is given to using microeconomic theory to analyze modern social and political problems. Credit hours: 4. Prerequisite: ECON 1101 and 1102. Offered Fall, Session 1.

ECON 2207. Macroeconomic Theory  An analysis of the aggregate U.S. economy. There is an emphasis on the construction of macroeconomic models to describe and analyze the economy. Such models help to establish the linkages between financial markets, labor markets, markets for goods and services, and markets in the rest of the world. Students gain an understanding of economic policy making through study of theories, institutions and economic data. Hands-on statistical research will help analyze the relationship between economic theory and the real world. Credit hours: 4. Prerequisite: ECON 1101 and 1102. Offered Spring, Session 4.

ECON 2217. Economics of the Public Sector  This course studies the nature and consequences of the spending and taxing behavior of governments. Microeconomics tools will be applied to the study of such issues as public goods and externalities, income redistribution, poverty, social security, health care, education, transportation, housing, and government revenue generation. Throughout the session, students will participate in a class-wide Lynchburg community service project related to one of the above issues, thereby providing hands-on exposure to some of the objectives and constraints faced by economists, government officials, and urban planners. Credit hours: 4. Prerequisite: ECON 1101 and 1102. Offered Fall, Session 2.

ECON 2219. International Economics  On the microeconomic level, this course examines international trade theories and policies. International finance issues comprise the macroeconomic portion of the course. Special attention is given to using the tools of the economist to analyze contemporary problems in both international trade and finance. Credit hours: 4. Prerequisite: ECON 1101 and 1102. Offered Fall, Session 2.

ECON 2220. Environmental Economics and Sustainability  The application of economic principles in the analysis of contemporary environmental issues. Neoclassical as well as ecological perspectives will be considered. Of particular concern is whether the current management of the economy—with its emphasis on growth and extraction of natural resources—is ecologically sustainable. Credit hours: 4. Prerequisite: ECON 1101 and 1102. Offered Fall, Session 1.

ECON 2227. Elementary Applied Statistics for Economics and Business  An introduction to descriptive and inferential statistics with applications for economics and business. Content includes probability theory, random variables, sampling distributions, hypothesis testing and the basics of linear regression and forecasting. Credit hours: 4. Prerequisite: BUS 1151 or ECON 1101 or 1102. A student may receive credit for two of these courses: ECON 2227, MATH 2227, POL 2231, PSYC 2227, or SOC 3395. (QR)

ECON 2250. Topics in Economics  In-depth exploration of a topic in economics. Topic will be determined by the instructor, and topics will vary. Credit hours: 4. Prerequisite: ECON 1101 and 1102. May be repeated for credit when topic differs.
ECON 3303. Econometrics  A formal introduction to the use of economic theory and statistical inference as guides in the study of economic phenomena using observed data. This course focuses on the research process and the role of empirical modeling and regression analysis in economics. Credit hours: 4. Prerequisite: ECON 1101, 1102, 2227, and MATH 1149, or permission of the department. Offered Spring, Session 4.

ECON 4495, 4496. Senior Seminar, Senior Paper  In ECON 4495, students make connections across their previous economics courses through readings and discussions of topical issues in economics, (e.g., poverty, inequality, globalization, the environment) as well as history of economic thought. Students gain a better understanding of how economic theories and policies shape the world in which we all live and which future generations will inhabit. A principal course objective is to prepare each student for the preparation and presentation of the senior thesis. To this end, students read and evaluate professional journal articles, review and enhance their understanding of the research methods used by economists, and identify ways to use these methods in their own research. The final assignment for the class is a senior thesis proposal. In ECON 4496, there is preparation and presentation of a senior thesis. Credit hours: 4. Prerequisite: major core courses. 4495 offered Fall, Session 1; 4496 offered Spring, Session 3.

EDUCATION

Program Director and Chair: Margaret A. Schimmoeller; Faculty: Beth Gafford, Crystal D. Howell

Educator Preparation Program

The Randolph College Educator Preparation Program (EPP) is accredited by the Council for the Accreditation of Educator Preparation (CAEP). All licensure programs are approved by the Virginia Department of Education. Any student may declare and complete an undergraduate major in elementary education; however, students who wish to qualify for a Virginia professional teaching license must apply separately and be accepted to the teacher licensure program. Students seeking a secondary teaching license must major in the content area they will teach.

Undergraduate Program

The EPP provides an educational environment that supports teachers in becoming leaders and agents of equity and change with licensure at the elementary or secondary level. The requirements of initial licensure at the secondary level in Virginia include fulfillment of the College’s requirements for a Bachelor of Arts or a Bachelor of Science degree in a chosen field of study and successful completion of the professional studies courses in Education. The undergraduate major in Elementary Education is recommended for PreK-6 Elementary licensure. Professional competence is developed through (1) comprehensive study of content knowledge appropriate to the chosen licensure area, (2) thorough study of the professional foundations common to all teaching, (3) specialized study of teaching principles, and (4) appropriate field-based experiences.

Responsibility for meeting College and EPP requirements rests with the student. It is important to study the course requirements and to keep accurate count of credit hours applicable to graduation.

Notes: Program requirements are subject to change to reflect current Virginia Department of Education requirements and regulations as well as accreditation standards of the Council for the Accreditation of Educator Preparation (CAEP). All students interested in the EPP are encouraged to schedule an advising appointment with a faculty member in the Education Department in their first semester Students are responsible for transportation to local schools for all field experiences (practica and student teaching).

Entrance Criteria for the Education Preparation Program Leading to Licensure

Students may apply to the EPP by submitting application materials to the Registrar’s Office by the third Monday in October or the third Monday in February. Students are required to consult with EPP faculty prior to submission of their materials.

Undergraduate Student Teaching

Application for student teaching placement is due the Monday following Spring Break in the year prior to the student teaching experience. All candidates for teacher licensure are required to student teach in their endorsement area. Student teaching, which
consists of supervised classroom teaching in a school setting, involves five full-days each week for two sessions (session 2 and session 3) plus weekly seminars on campus. During student teaching, the candidate is not ordinarily permitted to carry more than four credit hours of approved additional course work. These additional credit hours must be scheduled outside the normal school day in order to keep the student teaching experience intact. All student teaching assignments are supervised by Randolph College faculty and college supervisors.

Prerequisites for student teaching include (1) official acceptance into the EPP leading to licensure, (2) a grade point average of 3.0 in major and professional education courses combined, (3) PRAXIS II, VCLA, and RVE (elementary only) assessment scores, (4) formal application to student teaching, (5) fingerprinting and background check including child protective services clearance (scheduled by the Education Department upon acceptance), and (6) TB test verification.

Once placed in a local classroom for student teaching, candidates may not withdraw from student teaching except with the approval of the Director of the EPP. A student who withdraws without this approval forfeits future placement in student teaching. Violation of any pre-K-12 school policy related to child safety will result in removal from the school and student teaching.

Licensure Requirements

1. Requirements for the bachelor’s degree in licensure area.
2. Student teaching program.
3. Passing scores on professional assessments (PRAXIS II) as prescribed by the Virginia Department of Education (additional cost).
4. Passing scores on the Reading for Virginia Educators Assessment (elementary and special education) (additional cost).
5. Passing scores on Virginia Communication and Literacy Assessment (additional cost).
6. Application for licensure to Virginia Department of Education (additional cost).
7. CPR/AED/First aid (additional cost).
10. Background check clearance.

*With careful advising many content courses will meet general education requirements.

- **Students complete EDUC 4493 and EDUC 4496 if they are not going into the M.A.T or they are going into the M.A.T. in an area other than Elementary Education.**
- **Non-Elementary Education majors interested in Elementary Licensure and entering Randolph’s M.A.T. program, must complete listed content courses to qualify for Virginia Elementary PreK-6 teaching license.**

Secondary Education Licensure

Professional Courses for Secondary Education

Students majoring in another area of study, may take the following courses to pursue endorsements for Secondary Licensure (grades 6–12) in: biology, chemistry, dance (PreK–12), earth science, English, health and physical education, history and social science, Latin (PreK–12), mathematics, music instrumental and vocal/choral (PreK–12), physics, Spanish (PreK–12), theatre arts (PreK–12), and visual arts (PreK–12). Additional endorsement may be added in the area of mathematics - algebra I.

Total for Secondary Education  48
History licensure candidates must take GEO 2203 and IST 3310 (or an econ class and US government course).

English licensure candidates must take EDUC 2210

Secondary licensure requirements may differ from major coursework. Meeting with the Director or Chair of the EPP is required.

Undergraduate Education Courses

EDUC 1101. Foundations of Education and Classroom Management  Students will develop an understanding of the historical, philosophical, and sociological foundations underlying the role, development, and organization of public education in the United States. Legal issues related to students and teachers, including federal and state laws, contemporary issues, and current trends in education are studied. Classroom management, roles of teachers and schools in communities, professionalism, and ethical standards will be reviewed and analyzed. *Credit hours: 4. Offered Session 1 and Summer. (SS)*

EDUC 1108. Educational Psychology and Human Development  Students will gain an understanding of the physical, social, emotional, speech and language, and intellectual development of children and the ability to use this understanding in guiding learning. Topics include the teacher’s role in motivation, emotional development of learners, and an analysis of the teaching-learning situation including the dynamics of interaction, classroom management, guidance, and instruction preK-12. *Credit hours: 4. Offered Fall, Session 2, Spring, Session 3, and Summer. (SS)*

EDUC 2207. Language and Reading Development  Exploration of educational theories and scientific research on teaching reading. This course will focus on the early stages of literacy development from language acquisition to emergent reader including analysis and discussion of the five areas of reading instruction, phonemic awareness, phonics, fluency, vocabulary, and comprehension. Teachers develop high quality strategies for teaching reading to all students based on the Virginia Standards of Learning. This course requires fieldwork in an elementary reading classroom. *Credit hours: 4. Prerequisite: EDUC 1108 or sophomore standing, or permission of instructor. Offered Fall, Session 1.*

EDUC 2210. Multicultural Children’s Literature  A survey of multicultural children’s literature. The course includes various authors and illustrators in such genres as the oral tradition, fantasy, realistic and historical fiction, poetry, and picture books. Special emphasis is given to teaching from a culturally relevant perspective and creating a diverse classroom library that includes authors and characters who are Black, Indigenous and people of color; women; LGBTQ+; and from a range of religious and cultural backgrounds. Reading and writing strategies will be incorporated related to text selection and the importance of using a wide variety of reading options in the classroom. *Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Offered Spring, Session 4.*

EDUC 2213. Dimensions of a Global Society and Multicultural Education  This course will focus on diversity in schools and society and the interrelated concepts of culture, worldview, and race/ethnicity. Students will analyze areas of concern teachers express about working with diverse students, multicultural education, and how our own cultural orientations can influence how we interact with those from other cultures. *Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Offered Fall, Session 2. (CI)*

EDUC 2216. Classroom Assessment  The characteristics and uses of both formal and informal assessment instruments and procedures will be studied with emphasis on formative assessment and principles and practices for effective standards-based instruction. Students will learn how to design, administer, and interpret a variety of assessment measures, including the teacher work sample. Topics will include reliability, validity, bias, performance assessment, portfolios, affective assessment, standardized test score interpretation, and formative assessment. *Credit hours: 4. Prerequisite: EDUC 1101 or 1108 or permission of instructor. Offered Spring, Session 3.*

EDUC 2230. Reading and Writing in the Content Area  Exploration of educational theories and scientific research on literacy development in adolescents. Participants develop skills in motivating adolescents, assessing reading and writing ability, selecting texts at appropriate level of difficulty, and in differentiating instruction to meet the needs of diverse learners. Techniques for developing comprehension and vocabulary will be emphasized based on Virginia Standards of Learning. This course requires fieldwork in a middle school or high school classroom. *Credit hours: 4. Prerequisite: EDUC 1101 and sophomore standing or permission of instructor. Alternate years: offered Spring 2023.*
EDUC 3306. Reading and Writing Instruction and Diagnosis  Theory and scientific research is used to advance an interactive perspective on reading and writing that lays the foundation for the assessment and instruction process. Through discussion of the component skills and strategies required to succeed in reading and writing teacher candidates make informed decisions in planning instruction based on informal and formal assessments and aligned with the Virginia Standards of Learning and national standards. This course requires fieldwork in an elementary classroom. Credit hours: 4. Prerequisite: EDUC 1101 or EDUC 1108 and sophomore standing. Offered Spring, Session 3.

EDUC 3312. Mathematics and Science Methods in Elementary and Middle School  This course is study of research and theories of developing and assessing mathematics and science concepts, process skills, and attitudes. Emphasis is on sciences and mathematics instruction based on National Standards and the Virginia Standards of Learning. Students will demonstrate the ability to design and implement age appropriate and content rich lessons. This course requires fieldwork in an elementary classroom. Credit hours: 4. Prerequisite: admission to the Educator Preparation Program. Prerequisite or Corequisite: EDUC 1101 or EDUC 1108 and sophomore standing. Offered Spring, Session 4.

EDUC 3315 Curriculum and Instruction PreK-12  Students explore theories, methods, and procedures underlying the development and design of curriculum and instruction, and the interrelationships among curriculum, instruction, and assessment. Researched based practices designed to improve learning and to develop college and career readiness skills of PreK-12 children are included. Students learn how data driven decision-making can lead to improved student achievement and how to integrate technology to improve learning outcomes. A school-based practicum is required as part of the course. Credit hours: 4. Prerequisite: EDUC 1101 or EDUC 1108 and sophomore standing or permission of the instructor. Offered Fall, Session 2.

EDUC 3318. Secondary Teaching in the Subject Area  Seminars and tutorials, arranged with local grades 6–12 teachers, focusing on the structure of the disciplines and subject-specific methods of teaching based on Virginia Standards of Learning and national standards. This course requires fieldwork in a middle school or high school in the candidate’s licensure area. Credit hours: 4. Prerequisite: EDUC 3315 and sophomore standing or permission of instructor. Alternate years: offered Spring 2022, Session 3.

EDUC 4472P. Action Research Field Placement  Students entering the M.A.T. program take this course instead of EDUC 4493/4496. Students will design and implement an action research project in a local school. The project requires students to work with a classroom teacher on the design process. Only open to students entering the M.A.T program in Elementary Education. Credit hours: 4. Prerequisite: EDUC 4494. Offered Spring, Session 3.

EDUC 4493. Student Teaching in Elementary Schools I  Supervised teaching assignments in a local elementary school. Student teachers maintain schedule of their assigned cooperating teacher. Students will maintain a reflective journal and create a professional portfolio of the student teaching experience. Weekly reflective seminar emphasizes interactive activities and the development of the student teaching portfolio based on Virginia Standards of Learning and national standards. Not open to students entering the M.A.T program in Elementary Education. Credit hours: 8. Prerequisite: admission to the Educator Preparation Program and to Student Teaching and an interview with the Director of the Educator Preparation Program. Students enrolled in EDUC 4493 may not enroll in any courses that interfere with student teaching hours. Offered Fall, Session 2.

EDUC 4494. Senior Seminar  Students will evaluate and conduct qualitative and/or quantitative research. Each student will work with a faculty supervisor to prepare a research project. Students will present their work during an oral presentation for students and faculty. Credit hours: 4. Prerequisite: permission of the Department. Offered Fall, Session 1.

EDUC 4495. Student Teaching in Secondary Schools I  Supervised teaching assignments in middle and/or high school. Student teachers maintain schedule of their assigned clinical teacher. Students will maintain a reflective journal and portfolio of the student teaching experience and critique a video lesson of personal teaching. Weekly reflective seminars emphasize interactive discussion and the development of the student electronic professional portfolio. Credit hours: 8. Prerequisite: admission to Student Teaching and an interview with the Director of the Educator Preparation Program. A student enrolled in EDUC 4495 may not enroll in any courses that interfere with student teaching hours, except for the Senior Program of the major. Offered Fall, Session 2.

EDUC 4496. Student Teaching in Elementary Schools II  Supervised teaching assignments in a local elementary school. Student teachers maintain schedule of their assigned cooperating teacher. Students will maintain a reflective journal and create
a professional portfolio of the student teaching experience. Weekly reflective seminar emphasizes interactive activities and the development of the student teaching portfolio based on Virginia Standards of Learning and national standards. Not open to students entering the M.A.T program in Elementary Education. Credit hours: 8. Prerequisite: admission to the Educator Preparation Program and to Student Teaching and an interview with the Director of the Educator Preparation Program. A student enrolled in EDUC 4496 may not enroll in any courses that interfere with student teaching hours. Offered Spring, Session 3.

EDUC 4497. Student Teaching in Secondary Schools II Supervised teaching assignments in middle and/or high school. Student teachers maintain schedule of their assigned clinical teacher. Students will maintain a reflective journal and portfolio of the student teaching experience and critique a video lesson of personal teaching. Weekly reflective seminars emphasize interactive discussion and the development of the student electronic professional portfolio. Credit hours: 8. Prerequisite: admission to Student Teaching and an interview with the Director of the Educator Preparation Program. A student enrolled in EDUC 4495 may not enroll in any courses that interfere with student teaching hours, except for the Senior Program of the major. Offered Spring, Session 3.

Undergraduate Interdisciplinary Courses Included in Education Curriculum

IST 3310. Civics and Economics Students will examine the roles citizens play in U.S. politics and government, and the basic economic principles that underlie the U.S. market economy. Students will investigate the processes by which decisions are made in the American market economy and explain the government’s role in it. Students study how patriotism, respect for the law, willingness to perform public service, and a sense of civic duty facilitate thoughtful and effective active participation in the civic life of an increasingly diverse democratic society. This course is open to all students and required of students seeking elementary education licensure or students seeking the history/social science teaching licensure. Course content maps to the Virginia Standards of Learning. Identical with POL 3310. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years, Session 4. Offered Session 4, 2022.

IST 3309. Interdisciplinary Inquiry Science Students explore scientific connections among earth and life science, physics, chemistry, and biology. Students will understand the nature of science and scientific inquiry including the role of science, and the science skills of data analysis, measurement, observation, and experimentation. Project-based and inquiry lessons weave together concepts that reinforce the Virginia Standards of Learning and incorporate classroom work, and labs. Students develop the concepts essential to inquiry and safety procedures. This course is open to all students and required of students seeking elementary education licensure. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Offered Fall, Session 1.

Undergraduate Special Education Courses

SPED 3361. Survey of Special Education and Special Education Law Provides an overview of the theories, definitions, and characteristics pertaining to individuals with disabilities. Reviews information in the DSM-5 related to various learning disabilities. Includes research and learning problems and difficulties children with learning differences face in the classroom, review of resources, accommodations and modifications as outlined by IDEA and by the Virginia Department of Education. Includes discussions on the special education process and influence of state and federal special education laws and policies on the public school program; provides background for designing appropriate individualized instruction, behavioral support, and classroom management applications and interventions for students with diverse learning needs. Credit hours: 4. Offered Fall, Session 1, and every Summer.

Graduate Program

The Master of Arts in Teaching (M.A.T.) will prepare qualified elementary, secondary, and special education candidates to be leaders in education. Candidates may complete initial teacher licensure in elementary (preK-6), special education: general curriculum (K-12), or secondary education (6-12 or preK-12 depending on content area). Undergraduate students may earn the M.A.T. after the fifth year of study normally in a Summer-Fall-Winter-Spring cycle.

Academic Standing

Graduate candidates must maintain a minimum cumulative GPA in order to meet satisfactory academic progress standards. As a part of the academic progress review each semester, M.A.T. must meet the academic standing criterion defined as a
cumulative grade point average of 3.0. Candidates who do not meet this standard will be placed on academic probation. Any student earning more than six hours with grades of C or below must retake courses as needed to bring the student back up to the program requirements. Candidates failing to meet the standards outlined above because of mitigating circumstances may appeal in writing for reconsideration by the Board of Review. Submit appeals to the Office of the Provost of the College.

Admission Requirements  See Admission.

Course Load

For full-time status, a student normally maintains a course load of at least 4-9 credits each quarter (9 credits minimum each semester). Candidates may complete the program on a full-time or part-time basis.

Financial Aid  See Student Financial Services.

Graduation Application and Information

Master’s degree candidates should complete degree applications by October 1 of the Fall semester for May commencement. Information obtained from the degree applications is used in the ordering of diplomas and preparing the Commencement Program. Degree completion dates are in May, August, and January with a Commencement exercise occurring only in May. M.A.T. candidates who have completed all academic requirements for the degree except for the Summer courses may participate in the Commencement ceremony.

Registration, Add/Drop, and Withdrawal from a Course  See Academic Procedures and Regulations.

Requirements for the Degrees

Randolph College confers the Master of Arts in Teaching degree. Requirements for the degree are:

1. Completion of 36-38 credit hours of graduate coursework.
2. A maximum of 9 credit hours may be transferred to Randolph College at the graduate level.
3. Completion of all requirements within a period of six calendar years, including transfer courses.
4. The student must earn a cumulative grade point average of 3.0 (rounded) both for all courses taken for a grade and for all courses counted toward major requirements.

Testing Requirements for Licensure

Master of Arts in Teaching

1. PRAXIS II
2. Reading for Virginia Educators Assessment (elementary and special education only)
3. Virginia Communication and Literacy Assessment

Tuition and Fees See Tuition, Fees, and Expenses.

Graduate Certificate in Dyslexia: Literacy, Support, and Intervention

The Graduate Certificate in Dyslexia (GCD) courses are aligned with the International Dyslexia Association’s Knowledge and Practice Standards for Teachers of Reading. GCD courses provide candidates practical, hands-on training and experience with research-based methods for reading instruction and intervention. GCD candidates will receive: (a) foundational content that will result in a comprehensive understanding of dyslexia and other language-based disabilities, (b) direct training in research-based curricula, and (c) fieldwork in delivering reading instruction to elementary and secondary students who struggle in reading.

Completion of the certificate program requires 18 credit hours (completed in three to five semesters) of specific reading and language-related coursework. Certificate completers will be able to teach at the community college level or adjunct at local colleges and universities that will make the certificate appealing to teachers.

**Graduate Education Courses**

**EDUC 5511. Educational Assessment and Measurement**  Students examine and analyze the theories and practice in psycho-educational diagnosis and remediation of children's learning disabilities. Students explore the areas of perception, cognition, language, and motivation in relation to school subject matter and classroom performance. *Credit hours: 3.*  
*Prerequisite: acceptance to the Program or permission of instructor.*

**EDUC 5517. Reading Assessment and Instruction Across the Curriculum**  A study of the techniques for diagnosing elementary, middle, and high school students with reading difficulties. Candidates will review the causes of reading problems, evaluation and instruction of frequently used tests and inventories including group and individual, ideas for integrating literature/writing into content area curriculum based on Virginia Standards of Learning, and techniques for improving reading/writing achievement of students of all ability levels. *Credit hours: 2.*  
*Prerequisite: acceptance to the Program or permission of instructor.*

**EDUC 5517P. Reading Assessment and Instruction Practicum**  Integration of theoretical and practical aspects of a reading program in a supervised clinical setting. Students function as members of the literacy staff and are required to develop, implement, and evaluate diagnostic and remedial reading programs based on Virginia Standards of Learning for children in grades K-5. *Credit hours: 1.*  
*Prerequisite: acceptance to the Program or permission of instructor.*

**EDUC 5523. Research and Inquiry into Teaching Practices**  Qualitative and quantitative research methods on teaching and learning of diverse learners. Criteria for judging validity and applicability of research-based knowledge. Framing educational problems worthy of inquiry. Designing and assessing studies of teaching practices. This course meets for the full semester. *Credit hours: 3.*  
*Prerequisite: acceptance to the Program or permission of instructor.*

**EDUC 5527. Current Trends and Legal Issues in Schools**  This course examines federal and state education law including the Individuals with Disabilities Education Act (IDEA). The first half of the course will involve the study and analysis of relevant case law and statutes. In the second half of the course students apply their knowledge of education law. *Credit hours: 2.*  
*Prerequisite: acceptance to the Program or permission of instructor.*

**EDUC 6600P. Interdisciplinary Practicum**  Field placement focused on the practice of curriculum implementation and instructional strategies appropriate for corresponding methods course. *Credit hours: 1.*  
*Prerequisite: acceptance to the Program or permission of instructor.*

**EDUC 6601. Foundations of Education and Classroom Management**  This course examines the multidisciplinary foundations of instruction via historical, philosophical, and sociological research. The intersections and relationships of assessment, instruction, classroom management, and human growth and development are the primary focus. Informed, teacher candidates develop individual educational pedagogies and engage with various teaching approaches and strategies, to make decisions for improving instruction, classroom management, and student performance. *Credit hours: 1.*  
*Prerequisite: acceptance in the Program or permission of instructor.*

**EDUC 6605. Instructional Methods Across the Curriculum**  Focuses on teaching and learning in schools (pre6-12) and includes the study of curriculum and methodologies suitable for a variety of content areas and students’ learning needs. Emphasis is placed on developing teachers’ leadership qualities in the classroom and in the school. *Credit hours: 3.*  
*Prerequisite: acceptance to the Program or permission of instructor.*

**EDUC 6606. Reading and Writing in the Content Area**  Intervention techniques for accelerating the reading ability of striving readers in grades 6-12. Students learn to match instructional techniques to assessed areas of literacy needs and to differentiate instruction for varying levels of reading and writing achievement based on Virginia Standards of Learning. *Credit hours: 3.*  
*Prerequisite: acceptance to the Program or permission of instructor.*

114
EDUC 6607. Early Language Acquisition and Reading  A study of the theories, processes, and acquisition of reading and language skills. Emphasis is on the cognitive, linguistic, social and physiological factors involved in oral and written language development. Emergent literacy and the relationship between language and reading acquisition are explored, including an examination of strategies for developing oral reading, comprehension, and literacy skills and techniques for building word recognition, phonics, integrating reading and writing, and comprehension. Credit hours: 2. Prerequisite: permission of instructor.

EDUC 6611. Human Growth and Development  This course is designed to give basic knowledge and understanding of human growth and development. Students will study the physical, social, emotional, and intellectual development of children and the ability to use this understanding in guiding learning experiences. Credit hours: 1. Prerequisite: acceptance to the Program or permission of instructor.

EDUC 6614. Science Methods for Elementary and Middle School  Students develop skills for effective science teaching grounded in research proven effective in working with diverse students. The course addresses science content and pedagogy connected with the Virginia and NGSS Standards. Students will design lessons appropriate for the diverse needs of children preK-6. Credit hours: 1. Prerequisite: acceptance to the Program or permission of instructor.

EDUC 6615. Curriculum and Teaching Problems in Elementary and Secondary Schools  Each student investigates a special instructional problem under the direction of the instructor. The research is supplemented by fieldwork in an appropriate grade/ content area. Open only to students accepted into the graduate education program and who have met one of the cross-listed requirements as an undergraduate. Individual conferences to be arranged. Credit hours: 3. Prerequisite: acceptance to the Program or permission of instructor. May be repeated for credit up to a maximum of 6 credit hours.

EDUC 6616. Mathematics Methods for Elementary and Middle School  Students develop skills for effective mathematics teaching grounded in research proven effective with diverse students. The course addresses competence through an emphasis on mathematics content, connected with the Virginia Standards. Students will design lessons appropriate for the diverse needs of children PK-6. The course will expose students to current mathematics teaching reforms and research based teaching strategies. Credit hours: 1. Prerequisite: acceptance to the Program or permission of instructor.

EDUC 6618. Instruction in the Subject Area  Seminars focusing on the structure of the disciplines and subject-specific methods of teaching based on Virginia Standards of learning and national standards. Supervised opportunity to implement subject-specific instructional strategies and classroom management skills in a local school setting. Credit hours: 3. Prerequisite: acceptance to the Program or permission of instructor.

EDUC 6684. Seminar in Educational Research and Teaching  This course is designed to provide M.A.T. candidates opportunities to conduct qualitative and quantitative research. Each candidate will work with a faculty supervisor to prepare a research project and develop a comprehensive proposal and IRB protocol. Candidates will present their work during an oral presentation for colleagues and faculty. This course meets for the full semester. Credit hours: 4. Prerequisite: acceptance to the Program and satisfactory progress in the professional licensure degree program.

EDUC 6693, 6694. Student Teaching for M.A.T. I-II  Supervised teaching assignments in local school settings. Student teachers maintain schedule of their assigned cooperating teacher. Placements are made according to endorsement area. Credit hours: 4, 4. Prerequisite: satisfactory completion of licensure assessments.

Graduate Special Education Courses

SPED 5500. Dyslexia and LD  Candidates will understand common characteristics of dyslexia and its influence on learning. Appreciate ways teachers use best practices with dyslexic students that maximize school success. Understand how student with language-based learning disabilities require specific, differentiated approaches to learning including oral language skills, reading, and writing. Recognize students’ unique strengths are often unidentified or overlooked, and use this information to assess and develop appropriate instructional accommodations and modifications. Credit hours: 3.

SPED 5510. Executive Function and Study Skills  Students with language-based learning disabilities often struggle with the cognitive and self-regulating tasks associated with executive function. These tasks range from organizing time, materials, information; preparing for work, managing frustration, accessing memory and self-monitoring one's progress and work. This course introduces educators to research-based strategies that increase and improve executive function through the use of
effective study skills. While the course will explore relevant research on language based learning disabilities and executive function. Credit hours: 2

**SPED 6602P. Special Education Practicum**  Field placement focused on best practices for special education students in inclusion and self-contained classrooms. Credit hours: 1. Prerequisite: acceptance into the Program or permission of instructor.

**SPED 6603. Methods for Teaching Students with Mild Disabilities**  Focuses on the knowledge base for educational intervention of students with diagnosed mild learning differences. Course content includes strategies for reading, written expression, mathematics, social-behavioral, study skills, and vocational and career options. The development of individualized programs in collaboration with general and special education colleagues will be emphasized. Credit hours: 2. Prerequisite: acceptance to the Program or permission of instructor. Corequisite: EDUC 6600P or 6602P.

**SPED 6620. IEP Development and Transitioning**  Overview and examination of Individualized Education Program (IEP) required components. Includes how IEPs are developed and used in the classroom. The roles and responsibilities of required members of IEP team will be reviewed and analyzed in relation to students, family members, and teachers. Students will develop the ability to prepare students and work with families to promote successful student transitions throughout the educational experience. Credit hours: 1. Prerequisite: acceptance to the Program or permission of instructor.

**SPED 6635. Reading Interventions for Students with LBLD (Language Based Learning Disability)**  This course focuses on the strategies and skills for supporting expressive language skills for students with dyslexia and other language based learning disabilities, primarily for writing. The course introduces the concepts of scaffolding the writing process, using a hierarchy of skills to build appropriate foundational skills sets, and understanding the hidden demands of writing for students with language based learning disabilities. Students in this course will draw from relevant research on expressive language arts to develop practical teaching strategies for their own learning environments. Reading in the content area is examined. Credit hours: 3.

**SPED 6661. Survey of Special Education and Special Education Law**  Provides an overview of the theories, definitions, and characteristics pertaining to individuals with disabilities. Reviews information in the DSM-5 related to various learning disabilities. Includes research and learning problems and difficulties children with learning differences face in the classroom, review of resources, accommodations and modifications as outlined by IDEA and by the Virginia Department of Education. Includes discussions on the special education process and influence of state and federal special education laws and policies on the public school program; provides background for designing appropriate individualized instruction, behavioral support, and classroom management applications and interventions for students with diverse learning needs. Credit hours: 3.

**SPED 6680 Intensive Reading Intervention/Action Research**  Students will develop and implement an action research project with one-on-one guidance with a faculty member. Prerequisite SPED 6635. Credit hours: 1.

**SPED 6688. Special Topics Related to Special Education Law**  This course examines federal and state special education law including the Individuals with Disabilities Education Act (IDEA), and the Rehabilitation Act of 1973. The content of this course traces the historical development of special education through landmark legislation and litigation, parent advocacy, and national economic and social needs. Credit hours: 1

**ENGINEERING PHYSICS**

Interdisciplinary Major Chair: Peter A. Sheldon

A student interested in a degree in engineering, but who also wants the benefits of a liberal arts education can elect the engineering physics major. The engineering physics major takes a rigorous program of physics, chemistry, mathematics, and computer science courses while at Randolph College for three years. The student then has the option to apply to an associated engineering school to complete the program in two more years. Randolph College has an agreement with the engineering schools at Washington University St. Louis and the University of Virginia. The student is not limited to these choices. After the first or second year at the engineering school, a B.S. in engineering physics may be received from Randolph College, and after the second year, a B.S. or in some cases a Master’s degree in engineering is received from the engineering school. Admission to the fourth year at the engineering school requires at least a 3.25 or better GPA both overall and in the Randolph College
major. If a student elects to remain at Randolph College, the possibilities are to complete the regular physics degree or possibly another degree depending on the courses taken.

Students in the dual degree engineering program are strongly advised to complete all of the requirements for their academic major(s) and general education program prior to departure from Randolph College, and prior to beginning at the engineering partner school. For the Engineering Physics major, typically only the senior program is done at the partner school. In addition, students should plan to complete at least 94 credits prior to departure.

**Total Randolph College hours for B.S. Degree in Engineering Physics** 48

- In order to complete this major in three years at Randolph College, the general physics sequences and calculus I and II must be taken in the first year at Randolph (or prior).
- A student cannot complete both a physics degree and the engineering physics degree.

*See individual departments for course descriptions*

**Recommended Courses**

Physics 2256, Green Engineering Design. For chemistry-related engineering: an additional year of chemistry. For biology-related engineering: two years of biology.

**ENGLISH**

Faculty: Mara I. Amster, Gary R. Dop, Heidi M. Kunz, Laura-Gray Street

**Undergraduate Program**

The major in English develops the student’s sensitivity to language and literature and enriches knowledge of the artistic imagination. It exposes students to a broad range of literary works and helps them improve skills in speaking, writing, and critical thinking. Every English major, whether emphasizing creative writing or literature, should have:

- knowledge of literary traditions, periods, schools, styles, forms, and genres;
- practice in the creative process;
- acquaintance with various ways of reading and understanding texts; and
- experience with both analytical and creative writing.
The English major offers excellent preparation for advanced work in graduate or professional school and for a wide array of
career options. Students considering graduate school in English should confer with their advisors to be sure they have planned
appropriate curricula. Since most graduate schools require at least one modern language and some require a classical language
as well, students should be proficient in at least one language other than English at the time of graduation.

There is only one major in the Department: the English major. Students may choose to emphasize either creative writing or
literature, but the Department is firmly committed to the mutual support and dependence of the two emphases, both of which
engage the student in reading, writing, and critical and creative thinking. The core requirements for the English major are
organized so that students who elect the one emphasis will both contribute to and learn from those who elect the other.

ARTH/ENGL 3378  Gender in Renaissance Art and Literature

Senior Program
ENGL 4493, 4494  Senior Seminar, Senior Paper 8

Total for B.A. Degree in English with an Emphasis in Creative Writing 44

*Students may use ENGL/THTR 2277 to fulfill the 2200-level Reading credit or the additional Literature credit but not both.

**Students may petition to place above ENGL 1161 Introduction to Creative Writing by presenting a portfolio of 5-7 pages of original poetry and/or fiction (during advising week ideally and at the latest by the first class day of a session) to the Coordinator of Creative Writing for assessment by creative writing faculty. Requests will be decided by the end of the first week of classes. English majors with an emphasis in creative writing who are allowed to place above ENGL 1161 will take 3 (rather than 2) of the 200-level single-genre writing courses (263, 265, 266, 279) to complete the equivalent credit hours in the major.

Additionally for B.F.A.

one additional 3363 or 3367 4
one additional 2200 or 3300 creative writing 4
Interdisciplinary Base* 9

*Students select the interdisciplinary base in consultation with their advisor. Courses selected must be from ARTH, ARTS, DANC, MUSC, or THTR with two departments represented and must include 1 course in artistic expression.

Total for B.F.A. Degree in English with an Emphasis in Creative Writing 61

English Minor

Recommended Courses

Courses in media and culture; British, American, and European history; mythology; Old and New Testament; gender studies; art and music history; philosophy; fine arts, studio and performance; and foreign languages and literatures.

Special Programs

An endowed fund allows the Department to invite distinguished writers to campus for residencies of varying lengths. Visiting writers over the years have included Margaret Atwood, Charles Baxter, Ann Beattie, Molly McCully Brown, Stephanie Burt, Eduardo C. Corral, Natalie Diaz, Camille Dungy, Claudia Emerson, Kaitlyn Greenidge, Allison Hedge Coke, Mira Jacob, Maxine Kumin, Maxine Hong Kingston, Shara Lessley, “Mc” McIlvoy, Wayetu Moore, Pattiann Rogers, Ira Sadoff, Mark Haskell Smith, Patricia Smith, Sue William Silverman, Peter Taylor, Ellen Bryant Voigt, Eudora Welty, Richard Wilbur, Christian Wiman, and many others.

English Composition Courses

WRIT 1101, 1102. English Composition I, II  Detailed instruction in language usage and writing techniques for students whose native language is not English. Students placed in WRIT 1101 are also required to take WRIT 1102. Credit hours: 4, 4. By placement only. (WR)

WRIT 1103. Writing in College  WRIT 1103 is an introduction to writing at the college level, with attention to using English correctly and effectively, thinking analytically, identifying audiences, finding and evaluating source materials, developing an arguable thesis and supporting it with evidence, and using disciplinary conventions for citation and documentation. Guided practice in generating, revising, and editing drafts of essays. Credit hours: 4. This course cannot be taken on a Pass/Fail basis. (WR)

WRIT 1104. Writing in College (STAR)  This is an introduction to writing at the college level, with attention to using English correctly and effectively, thinking analytically, identifying audiences, and developing an arguable thesis and supporting it with evidence. Guided practice in generating, revising, and editing drafts of essays. This course is offered to student who are accepted into the STAR program. Credit hours: 1-4. This course cannot be taken on a Pass/Fail basis. (WR)

WRIT 1105. Writing in College (STAR)  This is a continuation of WRIT 1104, addressing writing at the college level, with attention to developing an arguable thesis and supporting it with evidence, and using disciplinary conventions for citation and documentation. Guided practice in generating, revising, and editing drafts of research essays. This course is offered to student who are accepted into the STAR program. Credit hours: 1-4. This course cannot be taken on a Pass/Fail basis. (WR)

English as a Second Language

ENGL 2240. ESL Teaching Methods  This course will help students who are considering teaching English to speakers of other languages develop a theoretical framework, explore methods of teaching, and then learn to plan effective lessons based on principles they can discuss and defend. Students will learn to evaluate materials for teaching and testing and to use the
various resources (such as conferences, journals, Web sites) available for ESL (English as a Second Language) teachers. Credit hours: 4. Prerequisite: sophomore standing.

Literature Courses

**ENGL 1111. Reading Gender** Literature both expresses and explores identity, of which gender is an essential component. This course considers the ways that historical and cultural notions of gender shape literary narratives, as well as the ways that notions of gender operate to constrain and/or liberate literary creativity. Thematic topics vary; recent iterations include “US Women Regionalists,” “Science/Fiction,” and “Sanity and Spaces.” Emphasis on critical approaches and the writing of textual analysis. Credit hours: 4. (AE, CI, WI)

**ENGL 1112. Sports Literature** Walt Whitman said of baseball, it “belongs as much to our institutions, fits into them as significantly as our constitutions.” This course examines sports as subject for both analytical and imaginative writing. Students read works that present an American identity through sport, the tension between being self-reliant and playing for the team or, as Whitman would have it, “the snap, go, fling of the American atmosphere.” Credit hours: 4. (AE, WI)

**ENGL 1113. Introduction to Literary Studies** The topic varies by session. Credit hours: 4. May be repeated for credit when topic differs. (AE)

**ENGL 1140. Reading Race** Literature both expresses and explores identity, of which race is an essential component. This course considers the ways that historical and cultural notions of race shape literary narratives, as well as the ways that notions of race operate to constrain and/or liberate literary creativity. Thematic topics vary. Emphasis on critical approaches and the writing of textual analysis. Credit hours: 4. (CI, HE, WI)

**ENGL 1142. F. Scott and Zelda** How did a disorganized college student become a world-class novelist? This course traces the development of F. Scott Fitzgerald’s art through the wide range of his writing, including fiction, nonfiction, poetry, and drama. Attention will be given to his collaboration and competition with Zelda Sayre Fitzgerald, as well as to relevant cultural phenomena such as media celebrity and the rise of Hollywood. Credit hours: 4. (AE, WI)

**ENGL 2253. Reading Poetry** A study of lyric, narrative, and dramatic verse. Students will discover meaning by examining the formal properties of poetry, including meter, diction, imagery, and tone. Readings will include a range of genres such as epic, elegy, pastoral, and ode. Representative authors may include Spenser, Milton, Wordsworth, Whitman, and Dickinson. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. (AE)

**ENGL 2255. Reading Prose** A study of non-fiction prose, including autobiography, intellectual essay, reportage, criticism, and literary theory. Students will investigate the boundaries of critical thinking and creative imagination; of fact, fiction, and truth. Representative authors may include Montaigne, Douglass, Thoreau, Woolf, and Welty. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. (AE)

**ENGL 2256. Reading Fiction** A study of the short story and the novel with particular attention given to form and technique. Students will explore a variety of narrative types such as picaresque, epistolary, naturalistic, satiric, and experimental. Representative authors may include Voltaire, Austen, Twain, Joyce, García Márquez, and Walker. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. (AE)

**ENGL 2257. Reading Drama** A study of tragedy, comedy, and other varieties of works for the theatre, with attention given to historical and social context. Students will examine periods such as the Restoration, types such as melodrama, and movements such as theatre of the absurd. Attendance at screenings and at live productions by the theatre department may be required. Representative authors may include Sophocles, Ibsen, Williams, Miller, and Hansberry. Identical with THTR 2257. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. (WI)

**ENGL 2280. Sci-Fi, Fantasy, and Classical Traditions** This course explores how the genres of speculative fiction draw on and depart from ancient Greek and Roman literature, philosophy, myth, history, and art: in other words, how sci-fi and fantasy both transmit and transmute ancient materials and form deep wells of receptions of the ancient world. Students will focus on themes of perennial human significance (e.g., the uses of history, technology, fantastic voyages, metamorphosis, knowledge/wonder, and so on) in books, comics, films, television, and more. Identical with CLAS 2280. Credit hours: 4. Prerequisite: CLAS 1132 or permission of instructor.
ENGL 2277. Shakespeare An introductory course dealing with the principles of Renaissance stagecraft, the nature of performance, the construction and themes of the plays, and the concept of genre or type. Representative plays in all genres from throughout Shakespeare’s career. Identical with THTR 2277. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. (AE, WI)

ENGL 3331. Topics in Literature The work in the course varies from year to year. Credit hours: 4. Prerequisite: 1100- or 2200-level literature course or permission of instructor. May be repeated for credit when topic differs.

ENGL 3333. Literature of the American South A seminar-style, topically-arranged investigation of prose, poetry, and drama of the southern United States through selections from four centuries of Anglophone writing in the region. Topics, e.g. The African-American South, The Southern Renascence, Quintessential Faulkner, (Re)Constructions of the Old South, Belles and Ladies and Not, will vary. Credit hours: 4. Prerequisite: 1100- or 2200-level literature course or permission of instructor. Alternate years. (CI, HE)

ENGL 3336. Inspired by the Sea An exploration of the maritime imagination that proceeds from the sea as setting, subject, and figure to transnational notions of “sea consciousness” that challenge traditions of geopolitical “mapping” in literary and cultural studies. Texts will be selected from a range of ancient and modern writers such as Virgil, Columbus, Equiano, Melville, Conrad, and Carson. Credit hours: 4. Prerequisite: 1100- or 2200-level literature course or permission of instructor. Alternate years. (AE)

ENGL 3338. Selling Sex: The Prostitute in Literature The prostitute, the whore, the fallen woman, the sexually voracious woman, call her what you will, populates the literary landscape. She is a central figure in cultural debates about sexuality, about the role of women in public markets (both literal and authorial), and about the relationship between romance and fiction. Credit hours: 4. Prerequisite: 1100- or 2200-level literature course or permission of instructor. Alternate years.

ENGL 3343. Transatlantic Brontë The British sisters Anne, Charlotte, and Emily Brontë burst upon the Victorian literary scene with novels featuring passion and violence. Their astonishing fictions evoked outrage and admiration, and inspired responses not only from other British writers, but also from writers in the United States. This course will explore the cultural and literary contexts -- and legacies -- of the transatlantic Brontë phenomenon. Credit hours: 4. Prerequisite: 1100- or 2200-level literature course or permission of instructor. Alternate years. (AE, CI)

ENGL 3345. Radical Turns Just before the turns of the 19th and 20th centuries, the vogues of Gothicism and Naturalism, respectively, featured radical imaginations that shocked readers and redefined the terms of literature. Works by British and U.S. writers will provide a study of the phenomenon of creative extremity, as well as its influence and enduring power. Credit hours: 4. Prerequisite: 1100- or 2200-level literature course or permission of instructor. Alternate years. (AE)

ENGL 3364. Feminist Literary Theory This course provides an introduction to feminist literary criticism/theory. It also examines the ways that this strand of criticism overlaps, influences, and expands other fields of literary criticisms, including (among others) Marxist theory, queer theory, cultural studies, post-colonial theory, psychoanalytic theory, and new historicism. Credit hours: 4. Prerequisite: 1100- or 2200-level literature course or permission of instructor. Alternate years.

ENGL 3378. Power and Beauty: Gender in Renaissance Art and Literature This course seeks to understand, analyze, and interpret representations of gender and sex within Renaissance art and literature (in both England and Italy). Using contemporary texts when possible and readings from the disciplines of literature, social history, feminist theory, and art historical texts, the course aims for a fuller assessment of gendered Renaissance life as it pertains to art and literature. Identical with ARTH 3378. Credit hours: 4. Prerequisite: junior standing or permission of instructor. (CI, HE)

Writing Courses

ENGL 1161. Introduction to Creative Writing The writing of poetry, fiction, and plays, focusing upon group discussion of student work. The work of modern and contemporary authors will be used as models for discussions of theme, theory, and technique. Credit hours: 4. (AE, WI)

ENGL 1167. Exploring Creative Writing An introduction to creative process and the writing of poetry, short fiction, plays, or creative nonfiction. Taught by the current Randolph Writer in Residence. Credit hours: 1. First-year students have registration priority. Offered on a Pass/Fail basis only.
ENGL 2263. Writing Poetry  Intensive work in the writing of poetry. Reading of theory along with examples from contemporary poets as models. Primary focus on the workshopping of students’ poems. 
Credit hours: 4. Prerequisite: ENGL 1161 or permission of instructor. (AE, WI)

ENGL 2265. Writing Creative Nonfiction  Intensive work in the writing of creative nonfiction. Reading of theory along with examples from contemporary writers as models. Primary focus on the workshopping of students’ essays. 
Credit hours: 4. Prerequisite: ENGL 1161 or permission of instructor. Alternate years. (AE, WI)

ENGL 2266. Writing Fiction  Intensive work in the writing of fiction. Reading of theory along with examples from contemporary fiction writers as models. Primary focus on the workshopping of students’ stories. 
Credit hours: 4. Prerequisite: ENGL 1161 or permission of instructor. (AE, WI)

ENGL 2268. Professional Editing  Hands-on experience with professional editing, including proofreading; developmental, line, and copy editing; and other skills applicable to book publishing, literary and trade publications, online content editing, and more. Through work on Hail, Muse, Etc.:!, students learn the basics of producing a literary magazine, developing aesthetic judgment and the skills necessary for editorial and production responsibilities. 
Credit hours: 4. Prerequisite: any ENGL course.

ENGL 2279. Writing Plays  In this course, students learn how to structure a scene, how to structure a play, how to create, hold, and release the tension of a dramatic moment through taut and convincing dialogue, how to create characters that an audience will identify with and care about. Through the reading of modern and contemporary plays, both short and full length, students will study the ways that highly accomplished playwrights solve the problems presented by a variety of dramatic situations, and will begin to implement into their own scenes and plays the elements of the craft that they discover. Identical with THTR 2279. 
Credit hours: 4. Prerequisite: ENGL 1161 or THTR 1142 or permission of instructor. Alternate years. (AE, WI)

ENGL 3363. Advanced Creative Writing  A workshop in the writing of poetry, fiction, creative non-fiction, and/or playwriting. Students may pursue the genre(s) of their choice. 
Credit hours: 4. Prerequisite: ENGL 1161 and two of the following: ENGL 2263; 2265, 2266; ENGL/THTR 2279; or permission of instructor. May be repeated for credit up to a maximum of twelve hours.

ENGL 3367. Pearl S. Buck Workshop  An advanced creative writing workshop with varying topics and taught in conjunction with the current Pearl S. Buck Writer in Residence. 
Credit hours: 4. Prerequisite: One 2200-level creative writing course (2263, 2265, 2266, or 2279 and/or permission of the Coordinator of the Creative Writing Program. English majors and creative writing minors have registration priority. May be repeated for credit.

Senior Program Courses

ENGL 4493. Senior Seminar  A course designed to help develop critical perspectives in literature. The aim is to increase understanding of such key concepts as genre, period, school, and critical approach. The course will require both essays and oral presentations. 
Credit hours: 4. Prerequisite: permission of the Department.

ENGL 4494. Senior Paper  Each student will work closely with a faculty supervisor to prepare a major paper of about 25 pages. At the end of the session, faculty and students will meet as a group to hear oral presentations of the students’ work. 
Credit hours: 4. Prerequisite: ENGL 4493 and permission of the Department.

Graduate M.F.A. Program

The Master of Fine Arts in Creative Writing (M.F.A.) is a two-year, low-residency, intensive degree in creative writing: poetry, fiction or nonfiction. During the two years, students complete four semesters of one-on-one mentorship and attend five ten-day residency sessions, one beginning each semester, as well as a final graduation residency at the end of the fourth semester. After the residency session, each student works with one faculty mentor for twenty weeks, completing original new writing, revising works in progress, and writing critical analysis essays.
Academic Standing

Graduate students must maintain a minimum cumulative GPA in order to meet satisfactory academic progress standards. As a part of the academic progress review each semester, graduate students must meet the good academic standing criterion defined as a cumulative grade point average of 3.0. Students who do not meet this standard will be placed on academic probation. The student must attain the appropriate minimum cumulative GPA before the next progress review or the student will be ineligible to continue at the College. Any student earning more than six hours with grades of C+ or below will be ineligible to return to the program for a minimum of one semester.

Students failing to meet the standards outlined above because of mitigating circumstances may appeal in writing for reconsideration by the Board of Review. Appeals should be submitted to the Office of the Provost of the College.

Admission Requirements See Admission.

Financial Aid See Student Financial Services.

Graduation Application and Information

Master’s degree candidates complete degree applications when ready to complete their program. Information obtained from the degree applications is used in the ordering of diplomas and preparing the Commencement Program. Degree completion is available in August and January.

Registration, Add/Drop, and Withdrawal from a Course See Academic Procedures and Regulations.

Requirements for the Degrees

Randolph College confers the Master of Fine Arts in Creative Writing degree. Requirements for the degree are:

1. A minimum of 60 credit hours of graduate coursework must be completed.
2. A maximum of 15 credit hours may be transferred to Randolph College at the graduate level.
3. All requirements, including transfer courses, must be completed within a period of six calendar years.
4. The student must earn a cumulative grade point average of 3.0 (rounded) both for all courses taken for a grade and for all courses counted toward major requirements. Only one course with a grade of C+ or below will count toward degree requirements. Students may appeal to the Board of Review.

Tuition and Fees See Tuition, Fees, and Expenses.

*In rare circumstances, students working on hybrid texts may be allowed to complete a Workshop II course in a genre different than the genre for Workshop I. Students focusing in more than one genre or adding additional workshop or thesis courses may complete the program with up to 90 credits.

**Graduate English Courses**

**ENGL 5588. Independent Study**  In this variable credit course, a student undertakes a creative or critical project to fulfill specific, individualized learning objectives. *Credit hours: 1-6. Prerequisite: permission of instructor and MFA Director.*

**ENGL 5591. Additional Residency**  The residency course is for students who are not taking a full semester of workshop after the residency but who desire to attend residency and participate in lectures, readings, conversations, and other aspects of residency. This additional course is not required for the program and may only be taken with permission. *Credit hours: 1.*

**ENGL 6601. Poetry Workshop I**  This poetry workshop introduces students to graduate-level poetry writing, reading, and practical criticism. The semester begins with a ten-day residency of lectures, discussions, panels, workshops, and readings. Students finish the residency with an individualized study plan for a semester of reading deeply, writing creatively, and revising intentionally, all under the one-on-one guidance of a faculty mentor. *Credit hours: 15. May be repeated for credit.*

**ENGL 6603. Fiction Workshop I**  This fiction workshop introduces students to graduate-level fiction writing, reading, and practical criticism. The semester begins with a ten-day residency of lectures, discussions, panels, workshops, and readings. Students finish the residency with an individualized study plan for a semester of reading deeply, writing creatively, and revising intentionally, all under the one-on-one guidance of a faculty mentor. *Credit hours: 15. May be repeated for credit.*

**ENGL 6605. Nonfiction Workshop I**  This nonfiction workshop introduces students to graduate-level literary nonfiction writing, reading, and practical criticism. The semester begins with a ten-day residency of lectures, discussions, panels, workshops, and readings. Students finish the residency with an individualized study plan for a semester of reading deeply, writing creatively, and revising intentionally, all under the one-on-one guidance of a faculty mentor. *Credit hours: 15. May be repeated for credit.*

**ENGL 6641. Poetry Workshop II**  This second workshop builds upon the student’s progress in the first poetry workshop, deepening their understanding and experience of craft, criticism, research, revision, voice, and imagery. As in the first workshop, the semester begins with a ten-day, preparatory residency and continues with one-on-one mentorship. This second semester adds the additional requirement of regular peer workshopping and explorations in contemporary publishing. *Credit hours: 15. May be repeated for credit.*

**ENGL 6643. Fiction Workshop II**  This second workshop builds upon the student’s progress in the first fiction workshop, deepening their understanding and experience of craft, criticism, research, revision, voice, and imagery. As in the first workshop, the semester begins with a ten-day, preparatory residency and continues with one-on-one mentorship. This second semester adds the additional requirement of regular peer workshopping and explorations in contemporary publishing. *Credit hours: 15. May be repeated for credit.*

**ENGL 6645. Nonfiction Workshop II**  This second workshop builds upon the student’s progress in the first nonfiction workshop, deepening their understanding and experience of craft, criticism, research, revision, voice, and imagery. As in the first workshop, the semester begins with a ten-day, preparatory residency and continues with one-on-one mentorship. This second semester adds the additional requirement of regular peer workshopping and explorations in contemporary publishing. *Credit hours: 15. May be repeated for credit.*

**ENGL 6670. Creative Writing Workshop III and Applied Criticism**  The applied criticism semester builds upon the previous genre workshops, requiring an initial residency session and regular creative writing, reading, and workshopping with one-on-one mentorship. The major project of the third semester is the completion of a substantial essay incorporating applied criticism and craft analysis, as well as theory, publishing, translation, literacy, and/or pedagogy. *Credit hours: 15.*

**ENGL 6690. Thesis Workshop**  The thesis workshop semester begins with a preparatory residency and continues with a full semester of work on the MFA thesis: the completion of a book-length work of poetry, fiction, or nonfiction. In the event that the thesis shows progress but would benefit from additional work, the thesis workshop may be repeated up to three times for credit. *Credit hours: 14. May be repeated for credit.*
ENGL 6691. Thesis Residency  The thesis residency is taken after the completion of all other coursework in the program. During this final residency students present a public reading of their work and a craft lecture, defend their thesis, engage with industry professionals, shape their post-MFA plans, and graduate from the program. Credit hours: 1.

ENVIRONMENTAL STUDIES AND SCIENCE

Faculty: Sarah L. Sojka, Karin P. Warren

The world’s great issues do not have disciplinary boundaries, and neither should your mind. To pursue life work in the realm of the environment, you must grasp the complex interactions that characterize today’s most pressing environmental problems, which lie at the nexus of natural sciences, social sciences, and humanities. The Environmental Program at Randolph College provides a rigorous, interdisciplinary course of study, enriched with research and practical experiences. Many academic opportunities are available to environmental majors, such as the Natural History and Archeology Collections Project, the Randolph College Organic Garden, the Marine Biological Laboratory in Environmental Science at Woods Hole Oceanographic Institute, Summer and semester fieldwork, and off-campus and study-away options. The degree programs provide the knowledge base and the practical skills needed for graduate or professional school, private consulting, public advocacy or administration, and careers with government agencies and laboratories as well as non-governmental organizations. The minors in Environmental Studies & Sustainability and in Environmental Science and Analysis are appropriate for students in any major program who wish to add an environmental perspective to their chosen field. Students majoring in environmental studies or environmental science are encouraged to pursue a minor in a relevant discipline, such as biology, business, chemistry, media and culture studies, creative writing, data science, economics, engineering, global studies, computer science, mathematics, political science, psychology, or studio art. In particular, students with an interest in conservation are encouraged to minor in biology with courses including botany, zoology, and ecology, and those interested in technical careers to minor in chemistry, data science, or engineering.

BIOL 1103 or BIOL 1118 & BIOL 1100L; ECON 1101; 1102; MATH 2227; MATH 2223; PHIL 1133; POL 1113; PSYC 1105; SOC 1101

Environmental Studies Courses

EVST 1101. Environmental Science: Systems and Solutions A natural science-based introduction to many of today’s most pressing and significant issues regarding the environment, including energy and resource use, population growth, air and water pollution, human-induced climate change, environmental justice, and sustainable development. The course combines informational lectures, readings, and media with in-class activities, discussion, and field work designed to highlight the diversity of environment-related problems and the importance of critical thinking and scientific analysis. Credit hours: 4. Offered: Fall. (CI)

EVST 1104. The Ecosphere and Environmental Issues Climate change, deforestation, and water pollution all impact natural ecosystems. This class will cover ecological concepts such as biogeochemical cycles, speciation, and biodiversity in the context of current environmental issues. Credit hours: 3. Alternate years: offered Spring 2023. (NS)

EVST 1104L. The Ecosphere and Environmental Issues Laboratory Students will gain scientific knowledge about ecological principles and see how scientific theory can be applied to environmental issues. Credit hours: 1. Corequisite or prerequisite: EVST 1104. Alternate years: offered Spring 2023. (NS)

EVST 1117. Physical Geology Physical Geology is the study of the earth, its structure and composition, and the processes which shape it. This course offers an overview of geologic time, plate tectonics, volcanism, earthquakes, mountain building, weathering, erosion, soils, and the origin of minerals and rocks. Credit hours: 3. Alternate years: offered Spring 2022. (NS)

EVST 1117L. Physical Geology Laboratory The laboratory provides hands-on exploration of physical geology topics and concepts, and will include the use of geologic maps and remote sensing, and field trips in the Blue Ridge Mountains and other environs. Credit hours: 1. Alternate years: offered Spring 2022. (NS)

EVST 2201. Quantitative Aspects of Global Environmental Problems An interdisciplinary, quantitative approach to understanding environmental issues. Students will learn practical applications of methods used to assess environmental problems including estimation techniques, box modelling, and visual displays of data. Topics include transport and fate of persistent pollutants, impact of human activities on climate, climate feedbacks, air pollution, acid deposition, and other disruptions of biogeochemical cycles. Credit hours: 4. Prerequisite: EVST 1101 or permission of instructor. Recommended: MATH 1115, 1116 or 1119 and/or an introductory course in biology, chemistry, or physics. Offered Spring. (QR)

EVST 2205. Research Design and Geographic Information Systems This course provides students with a basic understanding of measurement and analysis techniques in environmental science. The course is focused on experimental design, data analysis, and sampling techniques, and introduction to ARCGIS. Credit hours: 4. Prerequisite: one of the following EVST 1101, EVST 1104-1104L, or other introductory class in natural science, or PSYC 1105, or permission of instructor. Alternate years: offered Fall 2022.

EVST 2215. Water Resources Water is critical for human health, agriculture, electricity generation and more and many of our water resources are threatened by climate change, pollution and overuse. In this class, students will study how water moves in the environment, water policy, water use and threats to water supply. The class will also look at the history of water use and water use conflicts. Credit hours: 4. Prerequisite: sophomore standing. Alternate years: offered Fall 2021.
**EVST 2250. Sustainability Principles and Practice**  This course surveys the three areas of sustainability—economic, environmental, and social equity—and considers current global trends in these areas and tools for implementing and assessing sustainability. Students examine applications of the principles of sustainability in food production, energy and resources, corporate management, consumption and waste, green architecture, and sustainable community planning. Students employ problem-based learning, and develop several practical skills and professional tools. Sustainability professionals share their experiences during guest lectures. *Credit hours: 4. Prerequisite: EVST 1101 or permission of instructor. Alternate years: offered Spring 2022.* (SS)

**EVST 3315. Energy & Society**  An interdisciplinary survey of human energy use, including its history, origins, constraints, consequences, and possible future scenarios. Students will develop analytical skills for addressing questions about energy, and will examine issues of sustainable energy futures, electric utility deregulation and restructuring, transportation policy, energy efficiency, and environmental impacts of energy and resource use. *Credit hours: 4. Prerequisite: EVST 1101 and 2201 or permission of instructor. Alternate years: offered Spring 2023.*

**EVST 3325. Climate Dynamics and Global Change**  In this course students examine the structure and dynamics of the earth’s atmosphere, ocean, and biosphere, and how they interact to drive changes in weather and climate. Topics include weather systems and forecasting, general circulation of the ocean and the atmosphere, paleoclimatological methods, historical climate change, natural climate forcing, regional climate variability such as the El Nino-Southern Oscillation, anthropogenic climate change, and mathematical modeling of climate. *Credit hours: 3. Prerequisite: EVST 1101 and 2201 or permission of instructor. Alternate years: offered Fall 2021.* (NS)

**EVST 3325L. Laboratory in Climate Dynamics and Global Change**  The laboratory provides a hands-on approach to field work and scientific inquiry, including use of weather forecasting products and instrumentation, remote sensing, and climatological data. *Credit hours: 1. Corequisite: EVST 3325. Alternate years: offered Fall 2021.* (NS)

**EVST 3326. Environmental Problems: History and Culture**  The course grounds students in the literature of environmental history in order to provide a cultural and historical framework for analysis of contemporary environmental problems, from the local to the global. Students evaluate the origin, scientific significance, and challenges of some of today’s most pressing environmental concerns. Special attention is given to the role and contribution of women in environmental history. *Credit hours: 4. Prerequisite: EVST 1101 and 1102; junior standing; or permission of instructor. Alternate years: offered Fall.* (HE, WI)

**EVST 3394. Research in Environmental Science**  The student will participate in a research project in environmental science in conjunction with a faculty member, in an area of mutual interest. Research projects will vary from session to session and with different faculty members. The student will gain experience in research and problem solving methods and refine laboratory and field techniques. Research results are written up in formal lab reports and in some cases will be published and/or presented at local, regional, or national conferences. *Credit hours: 1, 2, or 3. Prerequisite: permission of instructor. May be repeated for credit up to a maximum of nine hours.*

**EVST 4495. Senior Seminar**  Students critically evaluate scholarly articles from peer-reviewed environmental journals, gain expertise in researching and writing literature reviews, in their chosen area of focus, and hone oral presentation skills. *Credit hours: 4. Prerequisite: senior standing.*

**EVST 4496. Professional Development Seminar**  A forum on the environmental realm. Guest speakers include environmental professionals from government, non-profit organizations, and consulting firms. Students gain practical experience to prepare for employment in environmental studies and science. Certification programs, training modules, and continuing education options will be discussed. *Credit hours: 1. Prerequisite: senior standing. Pass/Fail only.*

GENDER STUDIES

Interdisciplinary Minor Coordinator: Danielle M. Currier

One purpose of a liberal arts education is to teach students to think about their place in society using perspectives from the social sciences, the humanities, and the sciences. The courses in this program focus on the importance of gender in society and culture and draw upon the insights and methodologies of a wide range of academic disciplines. To this end, students are required to take courses in at least three departments to fulfill the minor requirements.

Total for the Gender Studies Minor  20

* Both may be taken to fulfill the minor, replacing one from the electives list.
** Additional GST or gender-related one-time only and special topic courses may be substituted with permission of the coordinator.
**One-time only and special topic courses may be substituted with permission of the coordinator.

Gender Studies Courses

G ST 2201. Interdisciplinary Perspectives on Women The study of women of diverse racial, ethnic, and class backgrounds. Topics explored are contemporary concerns within women’s studies: relationships, sexuality, health, reproduction, socialization, media representations, law, and public policy. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years.

G ST 2202. Introduction to Gender Studies An introduction to the interdisciplinary field of Gender Studies. Students will study the history and evolution of the field of Gender Studies from the 1980s to the present. This will include analysis of the concepts of gender inequality in all its forms, gender identity, gender representation and performance, the social and cultural constructions of gender and the historic gender binary, intersectionality, and the importance of gender and identity politics. An experiential learning component of this course will engage students in the town/society/culture around them. 4 credits. Prerequisite: sophomore standing. Offered Fall 2021.

G ST 2203. Interdisciplinary Perspectives on Men An exploration of how social and cultural factors define and reinforce what is male and why this matters. Prominent themes addressed include race, class, sports, violence, sexuality, the power of the mass media, and personal agency. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years: offered Fall. (CI)

G ST 3301. Topics in Gender Studies An examination of a topic of theme in the field of gender studies reflecting the research interests of the expertise of a faculty member or a visiting scholar. Credit hours: 3. Prerequisites: junior standing and G ST 2202 or permission of instructor.

GEOGRAPHY

Geography Courses

GEO 2203. Survey of World Geography This course encompasses a study of geography throughout the major regions of the world. Attention is given to the physical processes that shape the surface of the earth and to the relationship between human activity and the physical environment. In addition, the course will explore how political forces influence the division and control of the earth’s resources. Maps, along with other geographic representations, tools, and techniques, will be used to demonstrate critical analysis of techniques for representation and presentation of information. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Identical with POL 2205. (CI)

GLOBAL STUDIES

Interdisciplinary Major Chair: Mari Ishibashi

The global studies program prepares students for work in key areas of world affairs, including global political forces, the international economy, and issues on the global agenda. The program emphasizes a core knowledge base, choice in the student’s area of interest, and essential skills, including language proficiencies, intercultural communication, and problem-
solving, all of which are necessary for success in today's labor market. Practical training takes place through participation in National Model United Nations, intercultural exchanges, and internship opportunities. Graduates are prepared for graduate and law school and for work in the public, private, and non-governmental sectors in careers that call for a global perspective.

Total for B.A. Degree in Global Studies 40-56

- Only two courses used in fulfilling the requirements for a second major in a contributing discipline can be used in the Global Studies major.
- At least 3 courses must come from Political Science.
- At least 3 courses must be at the 2200-level and up
- Twenty hours of the courses in the major, including POL 4496, must be completed in residence at Randolph College.

*Students, in close consultation with their advisor, identify a focus area that covers a global issue of interest. Possible focus areas include but are not limited to human rights, environmental sustainability, gender, conflict/war and its resolution, security, and diplomacy. Students should do a close reading of course descriptions and complete the Request for Course Credit in the Global Studies Focus Area. Courses taken abroad and on other campuses within the U.S. are eligible for inclusion; topics courses offered on a one-time-only basis may also be eligible.

**Intermediate-level proficiency in a modern language other than English is required. The student can demonstrate this proficiency either through coursework by earning a placement score beyond the intermediate level or by completing an intermediate-level language course. The student who has completed secondary education at a school whose language of instruction is other than English can seek an exception to this language requirement.

Special Programs

Majors are encouraged to develop skills for good citizenship through community service and engagement. Majors are also encouraged to study and/or intern off campus to complement their program of study and career goals. See Study Abroad.

HISTORY

Faculty: Selda Altan, Chelsea Berry, Justina Licata, Gerard F. Sherayko

The history program focuses not only on historical events, individuals, and institutions, but also on methodology, analysis and interpretation, and the critical examination of sources. Faculty employ various approaches to show the diversity of historical study. All courses include assignments designed to develop analytical and critical skills and the ability to present arguments based on evidence. The acquisition of an effective, clear style of written and oral expression is emphasized. The practical knowledge and skills acquired by the history major are respected by business, government, and professional and graduate schools.

In consultation with the staff, the major is encouraged to develop a field within the Department, specializing in a geographic region, in a period such as eighteenth- or nineteenth-century history, or in a thematic area such as women’s history or social/cultural history.

- A minimum of four hours of coursework at the 3300-level in addition to HIST 3393 is required.

History Minor

Total for Minor in History  20

- Twelve credit hours toward the minor must be completed at Randolph College.
- A minimum of eight hours above 2200-level, four hours of which must be 3300 or above.

Special Programs

Majors in the Department are encouraged to participate in endorsed programs abroad.

American History Courses

HIST 1139. North America to 1865  An introductory survey of the American experience from precolonial Native American cultures to the end of the Civil War. Topics include European invasion and colonization, the evolution of colonial societies, the slave trade and slavery, the American Revolution, antebellum reform, industrialization, immigration, the African-American struggle for freedom, the Confederate rebellion, and the new America the Civil War created. Credit hours: 4. (HE)

HIST 1140. United States Since 1865  A survey of the American experience since the end of the Civil War, emphasizing social and technological change; growing ethnic diversity; changing gender roles; civil rights and labor movements; political controversies; the nation’s emergence as an international power and superpower; and the evolution of government as a presence in citizens’ lives. Credit hours: 4. (HE)

HIST 1186. One-Time Only  

Fall 2021, Session 1: United States History from Colonial to the Present

This course provides a historical perspective on major themes in U.S. history from the Colonial Period to the present. It does not offer a comprehensive survey but will provide historical background on many significant topics: foreign policy, race relations, labor, immigration, social policy, and social movements. Students will learn how to read, use, and evaluate a wide range of primary historical sources, including memoirs, novels, letters, speeches, political cartoons, and oral interviews. They will identify different methods of historical inquiry and gain an appreciation for how history structures our daily lives. Credit hours: 4.

HIST 1187. One-Time Only  

Fall 2021, Session 2: African Americans and the Construction of America
This course explores African American history from 1619 to the present, with particular focus on the ways African Americans shaped American culture and resisted white supremacy. Throughout the session, we will examine a range of historical events and movements, including slavery, abolition, the Civil War and Reconstruction, the Harlem Renaissance, and the Civil Rights, Black Power, and Black Lives Matter Movements. Further, in this course, we will interrogate the construction of race in America through an intersectional lens.  

**HIST 2237. American Women's History**  
An exploration of American women from pre-contact Native American cultures to the contemporary United States, focusing on women's evolving roles, work and status; family construction; sexual attitudes and behaviors; reproductive patterns and rights; and the development and impact of feminist consciousness. The course is alert to regional, ethnic, ideological, and class diversity among American women.  

_Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. (CI, HE)_

**HIST 2240. The American Civil War and Reconstruction**  
The Civil War was not something that happened to us; it was something we did to ourselves. In this course we explore why a rational, idealistic people slid into this fratricidal barbarism that killed one out of every fifty Americans. We think about slavery’s impact and legacy. We ponder the concept of a “good war.” We consider what the war and its aftermath solved, worsened, and bequeathed to us, undone.  

_Credit hours: 4. Prerequisite: Sophomore standing or permission of instructor. Alternate years. (HE)_

**HIST 2242. The History of Virginia**  
This course explores Virginia’s crucial significance in the saga of America from pre-colonial Indian civilizations to the present, using Virginia as a laboratory in which to scrutinize central themes in American history: race, religion, democracy, violence, capitalism, and freedom.  

_Credit hours: 4. Prerequisite: Sophomore standing or permission of instructor. Alternate years: offered Spring. (HE)_

**HIST 2286. One-Time Only**  
_Spring 2022, Session 3: American Women’s History since 1848_  
This course examines women’s impact on U.S. history from 1848 to the present. The course materials break down the traditional and whitewashed waves analogy often used to represent women’s history. Through the examination of historical figures, movements, and events, this course will also demonstrate the complexities of women’s experiences and activism. Students will learn how to read, use, and evaluate a wide range of primary and secondary historical sources, such as memoirs, books, letters, speeches, and oral interviews.  

_Credit hours: 4_

**HIST 3335. Topics in the Era of the American Civil War**  
A seminar on a topic related to the causes, prosecution, and/or consequences of the American Civil War.  

_Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. May be repeated for credit when topic differs._

**HIST 3337. Topics in North American Social and Cultural History**  
A seminar on a topic in the social and cultural history of North America from the colonial period to the twentieth century.  

_Credit hours: 4. May be repeated for credit when the topic differs. Prerequisite: sophomore standing or permission of instructor._

_Fall 2021, Session 2: The Evolution of Sex, Pregnancy, and Abortion: The History of Reproduction in America_  
In today’s current political climate, a woman’s reproduction is highly politicized. By examining the history of reproduction in the U.S. from the colonial era to the present, this course will examine how the topic became a hotly contested debate. Using an assortment of primary and secondary source materials, students will explore the history of pregnancy and birthing, birth control, abortion, and coercive sterilizations.

**Asian History Courses**

**HIST 1123. East Asia to 1600**  
A survey of the civilizations of China, Japan, and Korea from roughly 2000 BC to 1600 AD.  

_Credit hours: 4. Offered Spring, Session 3. (CI, HE)_

**HIST 1124. East Asia 1600 to Present**  
The course is a continuation of East Asia to 1600. It introduces students to social and political change in East Asia from 1600 to present. The course complements modern histories of China and Japan with the
history of Korea and presents a comparative and transnational perspective. Credit hours: 4. Offered Spring, Session 4. (CI, HE, WI)

**HIST 2221. Modern China**  An introductory survey of the history of modern China from the early 19th century to the present that will examine the shifting contours of China’s social fabric, political identity, and international position. The course will focus equally on the Qing Dynasty, Republic of China, and post-1949 People’s Republic of China under the Communist regime. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. (CI, HE)

**HIST 2222. Modern Japan**  An introductory survey of the history of modern Japan from the mid-19th century to present that will begin with the Meiji Restoration and end with the Fukushima disaster of 2011. The course will examine Japan’s rapid modernization and its consequences, focusing on Japan’s shifting domestic identities, international position, and socioeconomic developments. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. (CI, HE)

**HIST 2226. History of the Middle East**  A selective survey of Middle Eastern history from the time of Muhammad until the present. Primary emphasis is on the Islamic Middle East, although the course will also be concerned with the establishment of Israel. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Offered Fall, Session 2. (CI, HE)

**HIST 2230. Chinatowns in the US**  Chinatowns have become a permanent feature of American urban life since the early nineteenth century. Yet, they are still the most mysterious and least understood social spaces with distinct histories of race, migration, and diaspora life. This course explores the history of American Chinatowns to understand the political Economy of Chinese migrations to the US, the formation of Chinese diaspora communities in major US cities, Chinese-American food culture and crime scenes, and the problems of integration and assimilation. Credit hours: 4. (CI, HE)

**HIST 3307. Topics in Asian History**  Concentrated reading and discussion on a specific theme or set of themes in Asian history. Topics will be selected in advance and will vary from year to year. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. May be repeated for credit when topic differs.

Spring 2022: Session 3: Asian Feminisms

Throughout recorded history, Asian women have protested the limitations placed on their lives and bodies. Their critique of a male-dominated society gained momentum when they met with western feminist movements and theories in the nineteenth century. Focusing on these transnational exchanges, Asian Feminisms examines feminist writings from China, Japan, Korea, and India to explore how local forms of feminist struggles in Asia have stimulated the growth of global feminism.

**Atlantic History Courses**

**HIST 1167. The Atlantic World, 1492-1888**  Christopher Columbus’ 1492 voyage created the first sustained link between the eastern and western Atlantic, opening new worlds of possibility, transformation, and unforeseen consequences that continue to reverberate today. This course explores the history of the Atlantic World, and the peoples from Europe, Africa, and the Americas who lived it. Topics include encounters, cultural adaptations, slavery, circulation, and revolutions. Credit hours: 4. Offered Session 2. (WI, CI, HE)

**HIST 2258. Early African History**  From the western Sahel to the central savannahs to the Swahili coast, Africa is as diverse in its regional history as it is in its geography. This course will investigate the distinct histories of these different regions, as well as the connections between them and to wider Indian Ocean, Atlantic, and trans-Saharan networks. Prerequisite: sophomore standing or permission of instructor. Offered Spring, Session 4. Credit hours: 4. (CI, HE, WI)

**HIST 3308. Topics in Atlantic History**  Concentrated reading and discussion on a specific topic or theme in Atlantic history. Topics will be selected in advance and will vary from year to year. Prerequisite: sophomore standing or permission of the instructor. Credit hours: 4.

Spring 2022, Session 4: The Haitian Revolution

In 1791, enslaved Africans in the wealthiest colony in the Atlantic rose up and set fire to the sugar cane fields where they had been forced to labor. From this initial uprising to their declaration of independence in 1804 they fought for
their freedom, creating an independent Black nation and transforming international debates on abolition. This seminar tells their story.

**European History Courses**

**HIST 1101. Europe to 1750** This course will introduce the main social, political, economic, and cultural forces that shaped and reshaped European societies and Europe’s relationship to the world in this period. Topics for discussion and study include the institutions of medieval Europe, the Renaissance, the Reformation, the emergence of modern commercial capitalism, the English Revolutions, and the Enlightenment. Credit hours: 4. Offered Fall, Session 1. (HE)

**HIST 1102. Modern Europe from 1750 to 1900** Between 1750 and 1900 most of the characteristics associated with the “modern world” became established facts of life in much of Europe. This course will introduce the main social, political, economic, and cultural forces that transformed European societies and led to an era of European domination of much of the globe. Topics include the Industrial Revolution, the French Revolution, nationalism and the unification of Italy and Germany, imperialism, the emergence of modern feminism, and socialism. Credit hours: 4. Offered Spring, Session 3. (HE)

**HIST 1104. Modern Europe from 1900 to the Present** This course explores European political, social, cultural and economic history from the turn of the twentieth century to today. Students will examine topics such as the Great War and its aftermath, the rise of Communism and Nazism, the Second World War, the Holocaust, the Cold War, the collapse of the Soviet Bloc, the impact of history and memory on European society, and the problems and possibilities facing Europe today. Credit hours: 4. Offered Fall, Session 2 and Spring, Session 4. (HE)

**HIST 1115. The Holocaust** This course will examine Nazi Germany’s systematic murder of Europe’s Jews and other minorities during the Second World War. Topics to be covered include the history of racism and anti-Semitism, Nazi racial policies, the mindset of perpetrators and bystanders, the variety of experiences of the victims, and memory after Auschwitz. Credit hours: 4. Offered Spring, Session 4. (HE)

**HIST 1180. Mediterranean Empires** This is a survey course covering the history of the Mediterranean from the introduction of agriculture (c. 9000 BCE) to the rise of Islam (632 CE). The course considers the cultural, political, and social history of the region across this period, paying particular attention to the Greeks and Romans. Credit hours: 4. Identical with CLAS 1180. Alternate years. (HE)

**HIST 2203. Modern Germany, 1789–1918** This course explores German political, social, economic, and cultural history from the French Revolution through the First World War. Students will examine topics such as the impact of the French Revolution on the German lands, the conservative reaction after the downfall of Napoleon, the revolutions of 1848, the establishment of the German Empire, the emergence of modern culture and mass politics, and the outbreak of the First World War. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years: offered Fall. 2022. (HE, WI)

**HIST 2204. Modern Germany, 1918 to the Present** This course explores German political, social, economic, and cultural history from the First World War to the present. Students will examine topics such as the impact of World War I, the Weimar Republic, the Third Reich, World War II, the Holocaust, the Cold War, the division and reunification of Germany, the impact of history and memory on German society, and the problems and possibilities facing Germany today. The course includes a required field trip to the U.S. Holocaust Memorial Museum in Washington, D.C. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years: offered Spring. 2023. (HE, WI)

**HIST 2277. Russian History, Ninth through the Nineteenth Century** This course explores Russian political, social, economic, and cultural history from the founding of Kievan Russia through the beginning of Nicholas II’s reign. Students will examine topics such as the impact of the Mongol invasion, the rise of Muscovy, the reigns of Ivan the Terrible, Peter the Great and Catherine the Great, the impact of the Napoleonic Wars, and developments in the Russian Empire as its leaders and people faced the changing, modernizing world of the nineteenth century. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years: offered Fall, Session 1. (HE, WI)

**HIST 2278. Russian History, 1900–Present** This course explores Russian political, social, economic, and cultural history from the turn of the twentieth century to today. Students will examine topics such as the Revolution of 1905, World War I, the Bolshevik Revolution, the reign of Joseph Stalin, World War II, the Cold War, the collapse of the Soviet Union, and the
problems and possibilities facing Russia today. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years: offered Spring, Session 3. (HE, WI)

HIST 3301. Topics in Modern European History Concentrated reading and discussion on a specific theme or themes in modern European history. Topics will be selected in advance. Themes/topics will vary from year to year. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. May be repeated for credit when topic differs.

General History Courses

HIST 1111. Introduction to Public History What is public history, and why does it matter? Who authors the narratives found on historical markers, memorials, and in museum exhibits? How do these public media shape our collective consciousness? This course draws from the historical, theoretical, and practical applications of the field through readings, discussions, lectures, and field trips. Credit hours: 4. Alternate years: offered Fall 2022. (HE)

HIST 3393. Methods in History This course introduces methods and tools of historical analysis and explores the mechanics of historical writing and research presentation to prepare history majors for successful completion of upper-division requirements. It also introduces students to the theories and methodologies historians employ, and leads them into discussions about ethical issues related to historical research, writing, and presentation. Credit hours: 4. Offered Fall, Session 1.

HIST 4495. Senior Capstone: Research Students will choose a topic for their independent research project and conduct the research in the first half of the capstone project. Working under the supervision of a faculty member, students will hone their research question and identify and analyze appropriate primary and secondary sources to help them answer it. Credit hours: 4. Prerequisite: HIST 3393 and permission of the History Department. Offered: Fall, Session 1.

HIST 4496. Senior Capstone: Writing In the second half of the capstone project, students will write their research paper. Students will organize the evidence gathered in HIST 4495, create and revise multiple drafts of their paper, develop and use skills in bibliography, and will present their findings together in a conference setting at the end of the session. Credit hours: 4. Prerequisite: HIST 4495 and permission of the History Department. Offered: Session 2.

HUMAN SERVICES

Interdisciplinary Minor Coordinator: Danielle M. Currier

This minor is recommended for students interested in public service, volunteer work, social activism, or careers in the helping professions. Selections from among the designated courses should enable students to explore a variety of issues from different perspectives, which could help them prepare for responsible citizenship, employment, or graduate or professional training in a related field.

</table>
Students majoring in a contributing discipline must select at least four courses from outside their major department.

The minor may be shaped to reflect a student’s particular interests and objectives. Students interested in counseling might take PSYC 2205, 2213; SOC 3321; in medical social work, PHIL 2214; in work with children, PSYC 2208 and SOC 2218; in criminal justice and corrections, SOC 2209. Students should select from among the courses listed in consultation with their advisors and participating faculty. In general, it is recommended that the student include courses which: (a) focus on the individual and the immediate social environment (PSYC 2205, SOC 3321); and (b) examine the larger institutional and societal contexts (ECON 1102).

INTERDISCIPLINARY STUDIES

The courses listed below are interdepartmental in subject matter or faculty or both. They explore the relationship and mutual dependence of ideas, methods, and beliefs in different disciplines and areas of knowledge. In addition, the curriculum includes a number of courses taught jointly by members of two departments which may be counted toward departmental majors. These are shown within the offerings of the individual departments.

Interdisciplinary Studies Courses

I ST 1101. Academic Strategies A personalized program for first-year students consisting of weekly one-on-one peer tutorials and homework assignments providing instruction and practice in strategies designed to increase academic success. The ASC Director, through initial study skill diagnostic, ongoing tutor/tutee conferences, and review of weekly journals/reports/ assignments, guides content and evaluates progress. Tutorials are provided by peer tutors. Credit hours: .5. Offered on a Pass/Fail basis only. Enrollment is open to all first-year students and required of some, depending on mid-session grades. The course is exempt from creating a course overload for the student.

I ST 1111. Alexander Technique The Alexander Technique is a somatic method for improving physical and mental functioning. The technique is useful for artists, athletes, performers, and those suffering from poor postural habits, stress and old injuries. Through guided experience the students learn to recognize habits that interfere with their natural comfort and balance. Ease, freedom and support replace fatigue, tension and discomfort. Credit hours: 2. Offered on a Pass/Fail basis only. Alternate years.

I ST 1115. Quantitative Lab A one-credit option for students who intend to major in quantitative-heavy fields (sciences, mathematics, engineering, business, and economics) and whose Summer placement exam or consultation with the academic advisor indicates a desire or need for practice and preparation before enrollment in the next needed quantitative course. Students will work independently, with faculty and tutorial support, to complete appropriate modules. Credit hours: .5 or 1. Offered on a Pass/Fail basis only. May be repeated for credit up to a maximum of three credits.

I ST 1142. Information Literacy for the Digital Age This course examines research and information trends, methods, and problems. Through class discussions, assignments, and course readings, students will explore information source types and uses; information organization and access; library and internet research methods; information ethics and problems -- including plagiarism and copyright, media bias and misinformation, and unequal representation among information contributors and subjects. Credit hours: 2. No prerequisites. Offered Spring.

I ST 1161. Step-Up to Physical Science and Engineering at Randolph (SUPER) This course is a lab/lecture course in which students will study physics and applied mathematics at the level of pre-calculus or calculus, depending on the level of the student enrolled. In the lab portion, students will study robotics and do a building project. This is an intensive class for new students and will meet for 45 hours over two weeks prior to August orientation. Credit hours: 4. Offered in the Summer prior to the start of the Fall.

I ST 2261, 2262. Research Academy I, II These sequential courses, which continue the SUPER Seminar Series, educate students about what research is and what research occurs in their discipline, prepares students to find research experiences, and
prepares students to begin research projects. Skills explored include, for example, how to approach faculty and how to do a literature search. I ST 2261 is prerequisite for 2262 and students are expected to register for both courses during the same semester in their second year. Credit hours: .5. Prerequisite: I ST 1161.

I ST 3309. Interdisciplinary Inquiry Science  Students explore scientific connections among earth and life science, physics, chemistry, and biology. Students will understand the nature of science and scientific inquiry including the role of science, and the science skills of data analysis, measurement, observation, and experimentation. Project-based and inquiry lessons weave together concepts that reinforce the Virginia Standards of Learning and incorporate classroom work, and labs. Students develop the concepts essential to inquiry and safety procedures. This course is open to all students and required of students seeking elementary education licensure. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor.

I ST 3310. Civics and Economics  Students will examine the roles citizens play in U.S. politics and government, and the basic economic principles that underlie the U.S. market economy. Students will investigate the processes by which decisions are made in the American market economy and explain the government’s role in it. Students study how patriotism, respect for the law, willingness to perform public service, and a sense of civic duty facilitate thoughtful and effective active participation in the civic life of an increasingly diverse democratic society. This course is open to all students and required of students seeking elementary education licensure or students seeking the history/social science teaching licensure. Course content maps to the Virginia Standards of Learning. Identical with POL 3310. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years.

I ST 3361, 3362. A Day in the Life of a Scientist I, II  These sequential courses, which continue the SUPER Seminar Series, will focus on understanding the daily work life of scientists and engineers and will track closely with the external mentoring program. I ST 3361 is prerequisite for 3362 and students are expected to register for both courses during the same semester in their third year. Credit hours: .5. Prerequisite: I ST 2261, 2262.

I ST 4461, 4462. Research Group I, II  These sequential courses, the last in the SUPER Seminar Series, will follow a laboratory group meeting format and will build students’ scientific presentation skills and give them the opportunity to keep their peers informed on their senior research progress. I ST 4461 is prerequisite for 4462 and students do not need to take them in the same semester. Credit hours: .5. Prerequisite: I ST 2261, 2262.

MATHEMATICS AND COMPUTER SCIENCE

Faculty: Marc S. Ordower, Michael Penn, Jia Wan

The Department of Mathematics wishes to share the beauty and usefulness of mathematics with as many undergraduates as possible, recognizing that each student has different reasons for studying mathematics. Some require mathematical training to support professional goals in related fields such as the sciences, the social sciences or engineering. Others choose to pursue mathematics for its own sake, either because of the many career opportunities stemming from a direct application of mathematics or because of the sheer beauty of the subject. And, of course, some degree of mathematical background is essential in order to understand the natural and human world and the many challenges facing humanity.

Randolph College provides many ways to engage with mathematics. In addition to the rigorous training afforded by our regular course offerings, faculty frequently engage students in independent study based on student and faculty interests. Furthermore, Randolph College students have been very successful participating in various mathematics competitions against other undergraduate students in the United States. Furthermore, Randolph College Mathematics students have participated regularly in undergraduate research opportunities and internships.

The study of computer science offers students the opportunity to develop problem solving facility and helps develop skills which have broad utility in theory and application and are amongst the most sought-after by employers. The abstraction of real-world problems, the construction of algorithms to display and transform data, and the theory of computation are all central concerns of computer science. The minor in computer science can be effectively combined with any major. Whether studied with professional goals in mind, to supplement the study of any other field, or just for interest’s sake, computer science offers a powerful way to approach many challenging problems. When combined with selected courses in mathematics and physics, the minor will help prepare the student for graduate work in computer science and related fields.

Two additional Mathematics courses from the following:
- MATH 1149: Calculus I
- MATH 1150: Calculus II
- Mathematics courses numbered 234 and above

**Senior Program**
- MATH 4492: Professional Development Seminar
- MATH 4494: Senior Seminar

**Total for B.A. Degree in Mathematics**: 33

### Additionally for B.S. Degree

Choose one of the following: 4
- CSCI 1151: Computer Programming I
- CSCI 1156: Computer Programming II

One Mathematics course numbered 2234 and above: 4

Two from the following: 8
- CHEM 3307-3307L: Molecular Quantum Mechanics and Lab
- CHEM/PHYS 3378-3378L: Classical & Stat Thermodynamics & Lab
- PHYS 1115-1115L: General Physics I and Lab
- PHYS 1116-1116L: General Physics II and Lab
- PHYS 2216: Statics
- PHYS 2251: Relativity and Introduction to Quantum Mechanics

Physics courses at the 3300 and 4400 levels

**Total for B.S. Degree in Mathematics**: 49

A student who elects mathematics will be placed in MATH 1109, 1117; 1119; 1149; 1150; or 2241; according to preparation.

Total for Minor in Computer Science  20

Recommended Courses
CSCI 1156; PHIL 2230; PHYS 1115, 1116.

Computer Science Courses

CSCI 1151. Computer Programming I  An introduction to computers and computer programming. Emphasis will be placed on problem-solving with examples and exercises from social, natural, and mathematical sciences. Techniques of flowcharting and structured programming, development of algorithms, and types of computer hardware will also be discussed. Intended for students with no previous programming experience. Credit hours: 4. A student may not receive credit for this course after taking CSCI 1156 or its equivalent.

CSCI 1156. Computer Programming II A continuation of Computer Science 151. Emphasis on top-down programming using methods. Topics include user-defined classes and advanced data types, arrays, recursion, algorithms for sorting, searching, exception handling, advanced GUIs and graphics, and embedding Java applets into HTML documents. Credit hours: 4. Prerequisite: CSCI 1151 or the equivalent.

CSCI 2225. Matlab and Labview  This course covers beginning and intermediate programming in the Matlab and Labview computer languages. Students will learn the basics of computer programming as well as the specifics of programming in Matlab and Labview including data input/output, code structuring, coding best practices and limitations, data acquisition and beginning GUI development. This course is project based with projects taken from real world computing problems. Credit hours: 4. Prerequisite: MATH 1149. Alternate years: offered Fall 2021.
CSCI 2251. Algorithms and Data Structures  Structures for the representation of data are considered: vectors, lists, queues, trees, heaps, hash tables, maps, and graphs. This course presents the logic behind choosing a particular structure, and the associated algorithms for using each structure. Fundamental algorithms for solving problems, including sorting, searching and graph algorithms are developed. General design, analysis and the study of complexity are emphasized. Credit hours: 4. Prerequisite: CSCI 1156.

CSCI 3326. Computer Architecture and Assembly Language  Introduction to internal computer architecture including the instruction cycle, parts of the CPU, memory hierarchy including caching, pipelining, exception handling, and issues of multiprocessing. Implementation of assembly language programs using sample architectures. Principles of translating high-level languages. Credit hours: 4. Pre- or co-requisites: CSCI 2251 and MATH 1149 or equivalent. Alternate years: offered Spring.

CSCI 3346. Software Development  This course provides an in-depth study of steps in the software-development process: user requirements, specifications, design, implementation, testing, maintenance, documentation, and management. Students will develop the facility to apply the general principles to new problems. Credit hours: 4. Prerequisite CSCI 2251. Alternate years: offered Spring.

CSCI 4492 Professional Development Seminar – Computer Science  Students will explore how the skills they have accumulated over the course of their degree may be applied both to solve problems in the real world and to extend the limits of human knowledge. They will select a research advisor and a research topic in computer science and begin directed readings. Credit hours:1. Prerequisite: CSCI 251.

Mathematics Courses

MATH 1109. Introduction to Quantitative Reasoning  This course presents mathematical ideas in a real world context. Topics covered include critical thinking and problem solving, the mathematics of finance, basic statistical principles, mathematics and the arts, and the theory of voting. Credit hours: 4. Offered as needed. (QR)

MATH 1117, 1118. Precalculus with Elementary Modeling  Relations defined algebraically, graphically, and numerically. Functions, including polynomial, rational, trigonometric, exponential, and logarithmic. Applications, including modeling. Algebraic techniques, and a review of basic geometric relationships. Credit hours: 4. 4. Not open to students who have been placed into MATH 1119 or above, except by permission of the Department. (QR)

MATH 1119. Precalculus  A study of the properties of various functions, including polynomial, trigonometric, exponential, and logarithmic. Analytic geometry of conic sections. Credit hours: 4. Not open to students who have been placed into MATH 1149 or above, except by permission of the Department. (QR)

MATH 1149. Calculus I  Limits, continuity, and differentiation of algebraic functions of one variable. Applications to curve sketching, optimization, and rates of change. The definite integral applied to finding the area under a curve. Credit hours: 4. Prerequisite: MATH 1118 or MATH 1119 or the equivalent. (QR)

MATH 2208. Concepts of Elementary and Middle School Mathematics  Introduces elementary problem solving with emphasis on the nature of numbers and the structure of the real number system. Topics studied include the structure and properties of number systems and of Euclidean Geometry applicable in elementary and middle school classrooms. This course is open to all students and required of students seeking elementary education licensure. Credit hours: 4. (QR)

MATH 2227. Elementary Applied Statistics  An introduction to statistics, including probability, binomial distributions, normal distributions, sampling theory, testing hypotheses, chi-square tests, and linear regression. Credit hours: 4. Not open to
students who have satisfactorily completed MATH 3343. A student may receive credit for two of these courses: ECON 2227, MATH 2227, POL 2231, PSYC 2227, or SOC 3395. Offered Spring. (QR)

MATH 2229. Advanced Mathematical Problem Solving In this course, students will be expected to solve and present solutions to a collection of problems gathered from various mathematics competitions. Problem solutions may involve the techniques of classical algebra, geometry, calculus, and combinatorics. Credit hours: 1. Prerequisite: permission of instructor. May be repeated for credit up to a maximum of 4 hours.

MATH 2232. Introduction to Data Science Data science is an interdisciplinary field incorporating statistical techniques with algorithms to collect and to process large data sets, in order to extract meaning and make decisions. Students will explore the collection and filtering of data, machine learning algorithms, and methods for drawing conclusions. Credit hours: 4. Prerequisite: ECON 2227 or EVST 2205 or MATH 2227 or MATH 3343 or POL 2231 or PSYC 2227 or SOC 3395. Identical with DSCI 2232. Alternate years.

MATH 2234. Techniques of Mathematical Proof An introduction to formal mathematical proof. Topics include logical inference, statements involving quantifiers, indirect proof, and mathematical induction. We investigate proofs in a variety of disciplines but with a particular focus on set theory, combinatorics, and graph theory. Credit hours: 4. Prerequisite: MATH 1149

MATH 2241. Linear Algebra Systems of linear equations, vector spaces and subspaces, bases and dimension, linear transformations, eigenvalues and eigenvectors, and inner product spaces. Credit hours: 4. Prerequisite: MATH 1149 or permission of the Department.

MATH 2250. Calculus III An introduction to vector calculus. Differential and integral calculus of more than one variable. Vector fields, including Green’s, Stokes’, and the Divergence Theorems. Credit hours: 4. Prerequisite: MATH 1150 and either MATH 2241 or PHYS 1115 or permission of the Department.

MATH 3320. Introductory Topology An introduction to point-set geometry, including topological spaces, metric spaces, homotopy, the Urysohn lemma, and Tychonoff’s theorem. Students explore topology as the underpinning of modern geometry. Credit hours: 4. Prerequisite: MATH 2241 or permission of the Department.

MATH 3331. Differential Equations First order linear and non-linear equations, second and higher order linear equations, series solutions, Laplace transforms, and systems of linear differential equations. Applications, primarily to mechanics and population dynamics. Credit hours: 4. Prerequisite: MATH 1150 and 2241 or the course may be taken concurrently with MATH 2241 by permission of the Department.

MATH 3337. Number Theory Properties of the integers. Unique factorizations, congruences and modular arithmetic. Diophantine equations, prime numbers, quadratic reciprocity, and integer functions. Applications to cryptography. Credit hours: 4. Prerequisite: MATH 1150 and MATH 2234 or permission of the Department. Alternate years.

MATH 3353. Mathematical Modeling The construction and analysis of mathematical models to solve problems in the physical and social sciences. Dynamical systems are emphasized with a particular concentration on linear and non-linear discrete dynamical systems. Topics may include dimensional analysis, stability, chaos, and fractals. Credit hours: 4. Prerequisite: MATH 1150 and 2241. Alternate years: offered Fall.

MATH 3360. Abstract Algebra Groups, rings, integral domains. Homomorphisms and isomorphisms. Elementary number theory. The fields of rational, real, and complex numbers. Credit hours: 4. Prerequisite: MATH 2234 and MATH 2241 or permission of the Department.

MATH 4443. **Introduction to Analysis**  A rigorous study of limits, continuity, differentiation, and integration of functions of a real variable. *Credit hours: 4. Prerequisite: MATH 2234 and MATH 2250 or permission of the Department.*

MATH 4492. **Professional Development Seminar - Mathematics**  Students will explore how the skills they have accumulated over the course of their degree may be applied both to solve problems in the real world and to extend the limits of human knowledge. They will select a research advisor and a research topic in mathematics and begin directed readings. *Credit hours: 1. Prerequisite: MATH 360.*

MATH 4494. **Senior Seminar**  This course will emphasize the importance of seminal problems in mathematics in motivating the development of techniques learned over the course of four years. Students will place their accumulated mathematical knowledge in context in the broad world of mathematics. Students will continue to conduct research into their broader world of mathematical knowledge. Students will continue to explore their chosen problem in mathematics or computer science, culminating in a paper and a talk on the topic. *Credit hours: 4. Prerequisite: MATH 4493 or CSCI 4493.*

**MEDIA AND CULTURE**

Faculty: Jennifer L. Gauthier, Julio Rodriguez

The Media and Culture (MAC) major is an interdisciplinary major/minor designed to help students explore the role that media plays in cultures around the world. It encourages students to become more thoughtful critics and practitioners of media and acquire an understanding of the cultural contexts in which media operate. It engages with issues of race, gender, sexualities, and social justice as a means to train ethical leaders who will make positive change in their chosen fields. Majors and minors in media and culture explore and learn to apply theoretical concepts, design and carry out original research and creative projects, and gain practical experience through internships. A major in media and culture prepares students for graduate study and/or careers in a wide range of fields including, but not limited to multimedia journalism, digital film production, broadcasting, social media marketing, public relations, activism, non-profit work, publishing, information science, and teaching.

Experiential Learning Examples

Reporting with the Lynchburg News & Advance, news production and writing with WSET-TV; public relations for the Community Market, Big Brothers & Big Sisters of Central Virginia, marketing for Amazement Square and the Academy of Fine Arts, and other positions at area schools, hospitals, museums, voluntary organizations, and businesses.

Media and Culture courses

**MAC 1101. Media, Culture, and Power**  This course investigates the way that individuals and communities use various forms of media to negotiate identity. It explores representations of race, class, gender and sexuality, paying specific attention to the workings of power in the media industry. Students examine such media as film, television, music, advertisements, and public discourse and gain experience with different kinds of writing about media. *Credit hours: 4. (CI, HE, WI)*

**MAC 1175. Practical Reasoning**  An introduction to the practice of reasoning and problem-solving. Emphasis on the analysis of arguments of the sort encountered in everyday discourse and in textbooks and lectures; on the clear and persuasive presentation of arguments, reports, and papers; and on the refinement of ordinary critical instinct. Identical with PHIL 1175. *Credit hours: 4. (HE)*

**MAC 1181. Introduction to Digital Photography**  An introduction to the aesthetics and techniques of digital photography. Techniques include depth of field, lens choice, aperture settings, exposure, and use of software. Students will develop their creative vision, conceptualization skills, and technical proficiency, leading to a portfolio. Identical with ARTS 1181. *Credit hours: 4. (AE)*

**MAC 1183. Classical Rhetoric and Persuasive Power**  We have inherited from ancient orators an understanding of the power of words to persuade and ideas about what makes a good speech appeal to an audience. Students will analyze speeches, delve into ancient rhetorical thinking, and apply its arts to speeches of their own. Students will read and write in English. Identical with CLAS 1183. *Credit hours: 4. Alternate years. (AE)***
MAC 2204. Media Technologies and Culture  The study of the relationship between culture and communication technologies, including oral communication, visual symbols, print, film, radio, television, cassettes, and digital media. Examination of how media industries, governments, militaries, religious movements, audiences, and communities employ communication technologies in power struggles, ideological conflicts, and cultural clashes in various global contexts. Reflection upon philosophical conceptions of sensory perception and media consumption experiences. Credit hours: 4. Prerequisite: MAC 1101 and sophomore standing or permission of instructor. (CI, HE, SS, WI)

MAC 2205. Media, Culture and Sport  An introduction to the cultural history of the United States through the lens of sport. Topics will include immigration and assimilation; the creation and maintenance of ethnic, racial, and national identities; class and leisure; industrialization and incorporation; civil rights; and women’s rights. Credit hours: 4. Alternate years. (CI, SS)

MAC 2220. Media and Masculinities.  This course will examine the representation of men and masculinities in a variety of media from early print to magazines, radio, television, film and virtual media. Topics will include advertising, marginalized masculinities, sports, violence, and male sexualities. Credit hours: 4.

MAC 2250. New Media and Identity  This course examines new media and its intersection with identity, community and activism. Students will examine such phenomena as social media, citizen journalism, blogs, wikis, memes and amateur video. The class will consider these texts as examples of both creative expression and social activism. Credit hours: 4. Prerequisites: MAC 1101.

MAC 2277. American Movies  An overview of the history and aesthetics of American films made both in Hollywood and independently. It examines the stylistic and narrative techniques utilized by filmmakers, the political economy of the film industry, and cinema’s role in the global market. Students will explore various types of writing about film and develop their critical analysis and writing skills. Identical with ARTH 2277. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. (AE, HE, WI)

MAC 2279. Introduction to Digital Filmmaking  This course is a basic introduction to filmmaking in the digital format; no previous filmmaking experience is necessary. It will familiarize students with the components of the digital video camera, the process of creating a moving image from single digital images, and the basics of non-linear digital editing. Identical with ARTS 2279. Taught concurrently with MAC 3376. Credit hours: 4. Prerequisite: ARTS/MAC 1181 or ARTH/MAC 2277 or permission of instructor. (AE)

MAC 3310. Contemporary Issues in Media and Culture I  Students gain practice with several methods of researching media, both qualitative and quantitative, with attention to texts, audiences and industry. Case studies from contemporary media will be analyzed using the various research methods. Students have the opportunity to develop skills in written, oral and visual communication. Credit hours: 4. Prerequisite: MAC 1101 or permission of instructor.

MAC 3311. Contemporary Issues in Media and Culture II  The study of key theories in media and cultural studies, including rhetorical theory, ideology, genre, semiotics, feminism, post-colonialism and queer theory. We will apply these theories as a way to understand contemporary issues in media and students’ media use. Students have the opportunity to develop skills in written, oral and visual communication. Credit hours: 4. Prerequisite: MAC 1101 or permission of instructor.

MAC 3330. Feminist Rhetorical Theories  This course provides an introduction to feminist theories of rhetoric. We will explore the work of scholars from diverse backgrounds, including Indigenous, Latinx, and Black women scholars, also highlighting the intersections of gender with race, class, sexuality and nationhood. We will examine theories of social change from a communication perspective, focusing on the nature and function of symbols used in the change process. Credit hours: 4. Prerequisite: MAC 1101 and 2204, or permission of instructor.

MAC 3342. Assuming Whiteness  An examination of the creation, representation, and maintenance of “whiteness” as a racial category. It explores the process by which certain groups have moved from racial “other” to “white,” the visual representation of “whiteness,” and the social, cultural, and political ramifications of being white (and non-white) in America. Identical with SOC 3342. Credit hours: 4. Prerequisite: junior standing or permission of instructor. Alternate years. (CI)
MAC 3344. Race and Hollywood  This course will provide a history of the representation of racial and ethnic minorities in popular film and its sociocultural implications; an application of sociological perspectives toward understanding popular film; and an examination of minorities as audiences and filmmakers.  Credit hours: 4. (AE, HE)

MAC 3351. Transmedia Storytelling  This course introduces students to the process of creating and publishing stories across multiple media platforms. Students will gain experience producing short films as well as creating content for social media. Issues such as audience participation, the democratization of media, and how to create and sustain an online identity as a content producer will be put into interactive practice.  Credit hours: 4. Prerequisite: MAC 1101 and sophomore standing or permission of instructor. (AE)

MAC 3376. Advanced Digital Filmmaking  This advanced course in the art of digital filmmaking teaches students how to create and tell visual multimedia stories in the digital age by using video, still images, time-lapse photography, and audio. Students will study new visual storytelling practices and film art using mobile devices and apps to produce narratives for the web, iPads, and smartphones. Identical with ARTS 3376. Taught concurrently with MAC 2279. May be repeated for up to eight credit hours.  Credit hours: 4. Prerequisite: ARTS/MAC 2279 or permission of instructor.

MAC 3380. Global Media and Society  This course explores media texts and movements around the world. Topics include cultural imperialism, global cultural pluralism, localization, hybridity, modernity, and cultural identity. Examination of the cultural politics of media representations and asymmetrical circulation from Western nations (Global North) to non-Western nations (Global South) as well as contra-flows and diasporic media. Identical with ARTH 3380.  Credit hours: 4. Prerequisite: MAC 1101 or permission of instructor. Alternate years. Offered Spring 2023. (HE, CI)

MAC 3382. Studies in Film  The topic of this course will vary from year to year. Students may examine specific genres, directors, national cinemas, or film theories. Identical with ARTH 382.  Credit hours: 4. Prerequisite: MAC/ARTH 2277 or permission of instructor. May be repeated for credit when topic differs. (AE)

MAC 3384. Documentary History and Theory  This course is an introduction to the history, theory, and aesthetics of documentary film. It traces several major historical movements in the development of documentary from Russia and Great Britain to Canada and the United States. Students will explore questions of ethics in documentary production, the development of various formal techniques, and a number of theoretical approaches to analyzing documentaries. Identical with ARTH 3384.  Credit hours: 4. Prerequisite: MAC/ARTH 2277 or permission of instructor. Offered Spring 2022 (AE, CI, HE)

MAC 4493. Senior Seminar  A critical study of significant works in media and cultural studies and a review of research methods and theory. Students will lay the groundwork for their senior research by formulating a research question and exploring related secondary sources. They will also determine a research method and theoretical framework. The course culminates in a formal research proposal.  Credit hours: 4. Prerequisite: MAC 3310 and MAC 3311 or permission of instructor.

MAC 4494. Senior Project  Students work independently with a faculty mentor to complete a project. Students electing the research option will write an original research paper and deliver a public oral presentation. Students who select the creative media project will produce a short film, a website, a multimedia project, or an investigative journalism project and give a public screening/presentation.  Credit hours: 4. Prerequisite: MAC 3310 and MAC 3311 or permission of instructor.

MUSEUM AND HERITAGE STUDIES: SEE ART AND ART HISTORY DEPARTMENT LISTINGS

MUSIC: SEE PERFORMING ARTS DEPARTMENT LISTINGS FOR COURSES AND ADDITIONAL INFORMATION

PERFORMING ARTS

Dance

Faculty: Marie Zvosec; Accompanist and Artist-in-Residence: Hiawatha Johnson, Jr.

Students interested in dance may minor in dance or simply take a courses of interest in dance. Courses are available in ballet, jazz, and modern dance techniques from elementary through advanced levels. These courses expose students to the joy and
power of movement, as well as the discipline of dance. Students develop both physical and spatial awareness and increased flexibility and coordination. Students also gain a greater understanding and appreciation of the art form, making them more well-informed patrons of the art form.

Dance technique courses in ballet, jazz, and modern dance are taught by an impressive array of guest teachers brought to the College through the Helen McGehee Visiting Artist Program. Throughout the academic year students study with guest instructors, choreographers, and dancers from the professional world of dance, many of whom have performed nationally and internationally with some of the most prestigious dance companies in the world and trained and taught at leading conservatories, such as the Juilliard School. Dance technique courses have live musical accompaniment.

The Helen McGehee Visiting Artist Program is an endowed program that was founded in 1971 by Ms. McGehee who began her own dance training at the College. She was a leading soloist with the Martha Graham Dance Company for nearly thirty years. Because of her vision and commitment to the College, Helen McGehee made it possible for generations of students to be inspired by these guest artists many of whom stage and choreograph works for student performances.

The Department also offers courses in anatomy, dance history, Pilates, dance composition, and repertory. Dance composition courses expose students to the art and craft of choreography. Students interested in performance take courses in repertory. These classes stress the demands and artistry of dance performance while exposing students to the work of many choreographers of note, including: Anton Dolin, Michel Fokine, Martha Graham, Jose Limon, Marius Petipa, Pilobolus, Paul Taylor, and many others. In addition, the department offers certification in dance education.

Students and recent alumnae have received competitive internships at the Kennedy Center for the Performing Arts, Chicago Lyric Opera, the Spoleto Festival, the Juilliard School and the American Dance Festival. Recent graduates have danced with various dance companies including: the Jump Rhythm Jazz Project, the Bebe Miller Dance Co., Ivy Baldwin Dances, and Hamby Dances. Students have attended graduate dance programs at American University, New York University, SUNY Brockport, Ohio State University, and the University of Illinois. Several teach dance at the elementary and secondary levels, others have taken positions at the Kennedy Center for the Performing Arts, the American Dance Festival, and the Houston Museum of Fine Arts.

Recommended Courses

ARTH 1101, 1102; CLAS 1132; MUSC 1109; and THTR 1117.

Special Programs

Programs have included Master classes and performance by Susan Marshall & Dancers; Chuck Davis and his African-American Dance Ensemble; master class and performance with Taylor 2; Summer dance workshops with Jump Rhythm Jazz Project, Taylor 2, the Pilobolus Institute; environmental dance composition.

Experiential Learning Examples

Occasionally dance students have gained experience by teaching classes and/or staging choreography through Lynchburg Parks & Recreation, classes at local elementary and middle schools, etc. Students also participate as choreographers and dancers for theatrical productions on campus, as needed.

Dance History and Composition Courses

DANC 1101, 1102. Composition  Studio work/lectures on the fundamentals of modern dance choreography through the development and awareness of a personal movement vocabulary and style. Course will explore rhythm, design in space, dynamics and motivation, as well as the development of thematic material and the devices used to manipulate that material. Assignments may include prop studies, pre-classic dance forms, and dance studies set to poetry. Credit hours: 2. Corequisite: a dance technique course. (AE)

DANC 2201, 2202. Intermediate/Advanced Composition  Studio work/lectures on various techniques used to generate movement material from theme and variation, theme and manipulation, improvisation, accumulation and game planning. At this level students will be urged to explore choreography and form for multiple dancers. Assignments may include character studies through movement, canonic studies, and movement studies exploring assorted artistic movements, such as archaic, impressionistic, expressionistic, or romantic. Credit hours: 2. Prerequisite: DANC 1102 or permission of instructor. Corequisite: a dance technique course.

DANC 2207. History of Dance I  The first half of this course looks at defining dance; exploring who dances, how, why, where and when; dance and religion, dance as a form of ethnic identity; sex and social dance; and the development of theatrical dance forms. The second half of the class looks at the ancient roots of Western-based theatrical dance forms from ancient Egypt to eighteenth-century France. Credit hours: 4. (HE)

DANC 2208. History of Dance II  A survey of the history of Western-based dance forms beginning with era of Romanticism and going through to the present. Emphasis will be placed on the role women have played in the development of nineteenth- and twentieth-century social and theatrical dance forms in Europe and the USA. Credit hours: 4. (HE)
DANC 3301, 3302. Advanced Composition  Lectures and studio work in principles of movement as related to performing techniques. Experimentation with different contemporary points of view in solo and small group compositions. Credit hours: 2. Prerequisite: DANC 2202.

DANC 3313, 3314. Special Topics  Concentrated individual work in the particular area in which the student desires additional training. Credit hours: 1, 2, or 3. Prerequisite: permission of instructor.

DANC 4493, 4494. Senior Seminar  Since the focus of this seminar for each student is the creation of a fully-produced piece of choreography, students will be required to read, write and discuss aspects of the creative process before they begin work on their individual senior projects. Students will also be reflecting on the role of dance in American culture and the role of dance in education. They will also be responsible for a final paper that reflects on the each student’s creative process and the final product of that process. Credit hours: 2 or 3. Prerequisite: permission of the Department.

Dance Technique Courses

The prospective dance major should consult the Chair of the Department of Dance for placement in the appropriate dance technique courses, beginning in the first year. All dance technique courses may be repeated for credit (up to a maximum of 4 credit hours) with the permission of instructor. Permission to repeat a course will be based on departmental determination of placement.

Students in 2200-, 3300-, 4400-level technique courses should plan to enroll concurrently in DANC 1121 or DANC 2222.

DANC 1131, 1132. Elementary Dance Technique  These sequential courses introduce students to beginning modern dance technique and movement essentials, such as the locomotive movements of walking, running, slipping, and jumping, and the axial movements of bending, twisting, and turning. Credit hours: .5 or 1. DANC 1131 is prerequisite for 1132 and students are expected to register for both courses during the same semester. Repeatable for up to 4 credits. Offered in successive sessions each semester. (AE, PE)

DANC 1141, 1142. Elementary Ballet  These sequential courses introduces students to the foundations of ballet technique. Credit hours: .5 or 1. DANC 1141 is prerequisite for 1142 and students are expected to register for both courses during the same semester. Repeatable for up to 2 credits. Offered in successive sessions each semester. (AE, PE)

DANC 2231, 2232. Intermediate Dance Technique  These sequential courses expose students to a variety of different modern dance techniques. Many of these techniques have principles or movement theories at their core, such as contraction/release, fall/recovery, shift of weight, etc. Credit hours: .5 or 1. Prerequisite: DANC 1131, 1132 or permission of instructor. DANC 2231 is prerequisite for 2232 and students are expected to register for both courses during the same semester. Repeatable for up to 4 credits. Offered in successive sessions each semester. (AE, PE)

DANC 2241, 2242. Intermediate Ballet  These sequential courses allow students to continue their previous studies in the art and technique of classical ballet. Credit hours: .5 or 1. Prerequisite: DANC 1141, 1142 or permission of instructor. DANC 2241 is prerequisite for 2242 and students are expected to register for both courses during the same semester. Repeatable for up to 4 credits. Offered in successive sessions each semester. (AE, PE)

DANC 2261, 2262. Jazz and Dance in Musical Theatre  These sequential courses will explore energy, time, and space by incorporating different qualities of motion, concepts of rhythm and accent-making, and employing those concepts through energy-driven exercises, movement sequences, and activities. Taught primarily in the Jump Rhythm technique, this class incorporates simple and complex rhythms in swinging and Latin jazz, blues, and funk music and focuses on sharing those rhythms and energy with peers in the class. Useful to those interested in dance and musical theatre, students will acquire performing confidence and knowledge that will help them choreograph for community theatre or audition for the Broadway stage. Credit hours: .5. Prerequisite: 1100-level dance technique course or permission of instructor. DANC 2261 is prerequisite for 2262 and students are expected to register for both courses during the same semester. Repeatable for up to 2 credits. Offered in successive sessions each semester. (AE, PE)

DANC 3331, 3332. Advanced Dance Technique I  These sequential courses allow students to continue their previous dance studies by learning a variety of different modern dance techniques. Many of these techniques have principles or movement theories at their core, such as: contraction/release, fall/recovery, shift of weight, etc. Credit hours: .5 or 1.
Prerequisite: DANC 2231, 2232 or permission of instructor. DANC 3331 is prerequisite for 3332 and students are expected to register for both courses during the same semester. Repeatable for up to 4 credits. Offered in successive sessions each semester.

**DANC 3341, 3342. Advanced Ballet and Pointe I** These sequential courses allow students to continue their previous studies in the art and technique of classical ballet. Credit hours: .5 or 1. Prerequisite: DANC 2241, 2242 or permission of instructor. Student works on pointe at the discretion of the instructor. DANC 3341 is prerequisite for 3342 and students are expected to register for both courses during the same semester. Repeatable for up to 4 credits. Offered in successive sessions each semester.

**DANC 4431, 4432. Advanced Dance Technique II** These sequential courses allow students to continue their previous dance studies by learning a variety of different modern dance techniques. Many of these techniques have principles or movement theories at their core, such as: contraction/release, fall/recovery, shift of weight, etc. Credit hours: 5 or 1. Prerequisite: DANC 3331, 3332. DANC 4431 is prerequisite for 4432 and students are expected to register for both courses during the same semester. Repeatable for up to 4 credits. Offered in successive sessions each semester.

**DANC 4441, 4442. Advanced Ballet and Pointe II** These sequential courses allow students to continue their previous studies in the art and technique of classical ballet. Credit hours: 5 or 1. Prerequisite: DANC 3341, 3342 or permission of instructor. DANC 4441 is prerequisite for 4442 and students are expected to register for both courses during the same semester. Repeatable for up to 4 credits. Offered in successive sessions each semester.

**Body Alignment and Conditioning Courses**

**DANC 1121. Pilates Mat I** Pilates is a body conditioning system developed by Joseph Pilates to enhance flexibility, coordination, and strength. The exercises emphasize breath, core-conditioning, and body awareness in a total body workout. Core stability creates proper alignment to promote long, lean muscles. Pilates is a safe, highly effective method of neuromuscular conditioning to strengthen and streamline the body. This course focuses on the essential principles and progresses through a series of fundamental exercises. These non-impact exercises are suitable for a broad spectrum of people with varying levels and abilities. Credit hours: 1. No prerequisites. No previous dance experience necessary. May be repeated for credit once. Considered an activity course. Offered on a Pass/Fail basis only. (PE)

**DANC 2209. Living Anatomy I** A study of musculoskeletal anatomy of the living, moving human being. An examination of physical laws and principles affecting human motion. Through personal experience, reading and class discussion we explore balanced body alignment, and everyday and specialized movement patterns. Credit hours: 4. Prerequisite: Some exposure to dance technique or permission of instructor. Alternate years: offered Fall.

**DANC 2210. Living Anatomy II** An overview of various body therapies and elements of fitness that aid dancers and non-dancer in longevity of career and quality of life. A survey of the diagnosis and treatment of injuries to the musculoskeletal system. Credit hours: 4. Prerequisite: Dance 2209. Alternate years.

**DANC 2222. Pilates Mat II** This course will review the essential principles and fundamental exercises of Joseph Pilates’ body conditioning system (see Pilates Mat I) and progress to the intermediate and advanced exercises. The focus will be on total body exercises that rebalance the body to its optimal state of alignment and function. Credit hours: 1. No prerequisite, DANC 121 is recommended. May be repeated for credit once. Considered an activity course. Offered on a Pass/Fail basis only. Alternate years: offered Fall.

**Repertory Courses**

Courses in repertory are numbered 1155, 1156; 2255, 2256; 3355, 3356; and 4455, 4456 according to student classification. Rehearsal and performance of dance works are choreographed by dance faculty, students, and visiting choreographers. Credit hours: 1. Corequisite: a dance technique course. For students not majoring in dance, these courses may be taken on a Pass/Fail basis only.
Music

Faculty: Emily Yap Chua, Randall C. Speer

From the time of the early Greeks, music has been considered an important component of a liberal arts education. While a form of artistic expression, music employs a scientific language and is based on a logic of its own which fosters intellectual stimulation as well as aesthetic sensibility. Course offerings in the Department acknowledge this and provide the opportunity to pursue music’s three interrelated areas: its theory, history, and performance. The curriculum provides opportunities for music study whether the students’ interests are oriented towards career, avocation, or expanding their breadth of knowledge. Courses in performance involving individual instruction are taken for one credit. Students enrolled receive one hour of instruction each week.

All students wishing to study an instrument must consult with the Chair of the Department. Students who wish to study voice must audition prior to registration. Ordinarily, new voice students will be placed in MUSC 1129 (voice class) before being considered for MUSC 1131 (private voice lessons).

Students with no previous music study or minimal background may be required to take MUSC 1103 or 1107 as a prerequisite or corequisite for enrollment in lessons. Moderate proficiency is required of students continuing their study of strings or woodwinds, while students who wish to study organ, harpsichord, or fortepiano must have some keyboard proficiency. Lessons in strings, woodwinds, brass, and guitar are subject to the availability of an instructor.

There is no additional charge for music performance lessons to music minors who have declared by the end of the first week of the session. All other students taking music performance lessons will be charged $325 each session for weekly one hour lessons (1 credit). Should the student drop the music minor then music performance lesson fees will be charged retroactively for the session.

All music performance lessons and ensembles (MUSC 1131 through 1173, and 2209) are repeatable for credit.

For more information on departmental policies (including lesson procedures, recitals, and juries), please consult the Department of Music Student Handbook: www.randolphcollege.edu/musichandbook.

Total for Minor in Music 20

Music Courses

MUSC 1103. Basic Elements of Music  An introduction to the components that constitute music. Topics include rhythm, melody, chords, harmony, tonality, scales, phrases, and how to read and write music notation. Credit hours: 2. Not open to students who have passed MUSC 1107 or the equivalent. Offered Fall, Session 2. (AE)

MUSC 1107. Music Theory I  An introduction to the terms, structures, and functions of music. After a review of fundamentals, students will study harmonic function, cadences, non-chord tones, part-writing (including figured bass, melodic analysis, and harmonization), and diatonic harmonic analysis. To include laboratory work, MUSC 1107L should be taken concurrently. Credit hours: 3. Offered Spring, Session 3. (AE).
MUSC 1107L. Music Theory I Laboratory  Ear training, sight-singing, and keyboard harmony studies designed to provide aural understanding and practical application of theoretical knowledge of tonal music. Credit hours: 1. Prerequisite or corequisite: MUSC 1107. Offered Spring, Session 3. (AE)

MUSC 1108. Music Theory II  Continued study of harmonic analysis and part-writing in diatonic harmony. Course material includes harmonic progression, cadences, counterpoint, and an introduction to analysis of form and compositional procedures. To include laboratory work, MUSC 1108L should be taken concurrently. Credit hours: 3. Prerequisite: MUSC 1107. Offered Spring, Session 4.

MUSC 1108L. Music Theory II Laboratory  Continued study of ear-training, sight-singing, and keyboard harmony studies to correlate with MUSC 1108. Credit hours: 1. Prerequisite or corequisite: MUSC 1108. Offered Spring, Session 4.

MUSC 1129. Introduction to Voice Study  Designed for students with no college-level voice study. An introduction to the art and science of singing. Topics for discussion include anatomy/physiology of the voice, diet and nutrition, fitness and exercise, and voice types. Basic principles of vocal technique, musicianship, artistry, communication, posture, diction, breath control, and stage presence are also addressed. Credit hours: 1. Prerequisite: permission of instructor. Offered Fall, Session 1. (AE)

MUSC 1131. Voice  Credit hours: 1. Prerequisite: by audition only. Lyric diction coursework is recommended for singers who wish to study voice at intermediate or advanced levels. Lesson Fee. (AE)

MUSC 1133, 1134. Chorale I, II  A major performing ensemble which presents sacred and secular choral music of all periods. Concerts include Showcases, Candlelight Concert and Spring Concert, and occasional shorter, community performances. Credit Hours: 0.5, 0.5. Prerequisite: by audition only. Sight-reading strongly recommended. These are sequential courses. MUSC 1133 is prerequisite for 1134, and students are expected to register for both courses during the same semester. Repeatable for credit. Offered in successive sessions each semester. (AE)

MUSC 1147. Piano  Credit hours: 1. Prerequisite: permission of instructor. Lesson fee. (AE)

MUSC 1149. Organ  Credit hours: 1. Prerequisite: permission of instructor. Lesson fee. (AE)

MUSC 1151. Strings  Credit hours: 1. Prerequisite: permission of instructor. Lesson fee. (AE)

MUSC 1159. Guitar  Credit hours: 1. Prerequisite: permission of instructor. Lesson fee. (AE)

MUSC 1161. Woodwinds  Credit hours: 1. Prerequisite: permission of instructor. Lesson fee. (AE)

MUSC 1163. Brass  Credit hours: 1. Prerequisite: permission of instructor. Lesson fee. (AE)

MUSC 1165. Drumset  Credit hours: 1. Prerequisite: permission of instructor. Lesson fee. (AE)

MUSC 1167. Percussion  Credit hours: 1. Prerequisite: permission of instructor. Lesson fee. (AE)

MUSC 1172, 1173. Chamber Orchestra I, II  Concerts may include Showcases, Candlelight Concert, and Spring Concert. Credit Hours: 0.5, 0.5. Prerequisite: by audition only. These are sequential courses. MUSC 1172 is prerequisite for 1173, and students are expected to register for both courses during the same semester. Repeatable for credit. Offered in successive sessions each semester. (AE)

MUSC 2207. Music Theory III  Introduction to contrapuntal procedures and continued study of harmonic analysis and part-writing including secondary function, chromatic harmony, and modulation. To include laboratory work, MUSC 2207L should be taken concurrently. Credit hours: 3. Prerequisite: MUSC 108. Offered Fall 2022, Session 1.

MUSC 2207L. Music Theory III Laboratory  Continued study of ear training, sight-singing, and keyboard harmony to correlate with MUSC 2207. Credit hours: 1. Prerequisite: MUSC 108L. Prerequisite or corequisite: MUSC 220. Offered Fall 2022, Session 1.
MUSC 2209. **Composition**  An exploration of musical composition through the elements of melody, harmony, rhythm, orchestration, and form. Projects include creating new musical works for various solo instruments, voices, and ensembles. Instruction is conducted by individual private lessons. May be repeated. **Credit hours:** 1. **Prerequisite:** MUSC 1107. Lesson fee.

MUSC 2219. **America’s Music**  In this course, the varieties of music that have been heard in the United States from colonial times through the early 20th century will be surveyed. The works that the students listen to and discuss span four centuries of music making, ranging from music of indigenous Americans to spirituals, from ballads and traditional fiddle tunes to the concert stage. **Credit hours:** 4. **Prerequisite:** sophomore standing or permission of instructor. **Offered as needed.** (HE)

MUSC 2220. **American Popular Music**  A survey of societal trends, culture, and popular musical styles in the United States beginning from the 1890s to present day. Genres covered include ragtime, blues, jazz, rock and roll, pop, and hip-hop. **Credit hours:** 4. **Alternate years:** offered Spring 2023, Session 4. (CI, HE)

MUSC 2224. **History of Western Opera**  An introduction to the colorful and varied history of opera from comic to serious, from ballad to grand. While focusing primarily on selected works currently in the repertoire, historically significant composers, works, and developments in opera will also be discussed. **Credit hours:** 4. **Alternate years:** offered Fall 2021, Session 1. (HE)

MUSC 2227. **Women in Music**  A survey of the roles and achievements of women in the history of Western music. Students will consider social and historical perspectives, examining how attitudes have developed toward women in music and how women have achieved renown in the field. Study of classical music genres will comprise the first half of the session, exploring women as performers, composers, teachers, conductors, and patrons. The second half will cover contemporary genres: pop/rock, jazz and blues, folk/country, and rap/hip-hop. **Credit hours:** 4. **Alternate years:** offered Fall, 2021, Session 2. (CI, HE)

MUSC 2228. **Introduction to World Music**  An introduction to traditional and popular music outside the Western art music tradition. This course examines musical traditions of various parts of the world including Latin America, Africa, the Middle East, and Asia. Students will gain awareness of the scope of global musical activity in historical, cultural, political, and social contexts. **Credit hours:** 4. **Alternate years:** offered Spring 2023, Session 3. (CI, HE)

MUSC 2235. **Lyric Diction I**  Principles of phonetic diction for singers, with use of the International Phonetic Alphabet and practical application. IPA/English/German. **Credit hours:** 4. **Strongly recommended for intermediate and advanced voice study.** **Alternate years:** offered Fall 2022, Session 2.

MUSC 2236. **Lyric Diction II**  Principles of phonetic diction for singers, with use of the International Phonetic Alphabet and practical application. IPA/Italian/French/Latin. **Credit hours:** 4. **Strongly recommended for intermediate and advanced voice study.** **Alternate years:** offered Spring 2023, Session 3.

MUSC 2241. **Topics in Piano**  Topics will be selected from keyboard mechanics (tuning, voicing, and other technical matters), piano literature, piano pedagogy, and vocal/instrumental accompanying. **Credit hours:** 2. **Prerequisite:** permission of instructor. **May be repeated for credit when topic differs.** **Offered as needed.**

MUSC 2247. **Introduction to Conducting**  Fundamentals of conducting, exploration of expressive elements. **Credit hours:** 2. **Prerequisite:** MUSC 1107. **Offered as needed.**

MUSC 2248. **Advanced Conducting**  Application of musical analysis and expression and development of the ability to organize and lead rehearsals of vocal and instrumental ensembles, with the opportunity to lead an ensemble in rehearsal to acquire practical experience in applying the techniques examined in the classroom. **Credit hours:** 2. **Prerequisite:** MUSC 2247. **Offered as needed.**

MUSC 2291. **Sophomore Recital**  Preparation for and performance of sophomore recital as part of candidacy requirements for BFA in music performance. **Credit hours:** 1. **Prerequisite:** sophomore standing and candidacy in B.F.A Program. **Corequisite:** individual instruction. **Offered on a Pass/Fail basis only.**

MUSC 3308. **Form and Analysis**  The first half of the session will study small- and large-scale formal structures (binary, ternary, rondo, sonata-allegro forms). The second half of the session will address post-tonal practices and procedures. Material
throughout the session will include both theoretical and musicological context, examining works within the standard canon of repertoire. Credit hours: 4. Prerequisite: MUSC 2207. Offered Fall 2022, Session 2.

MUSC 3309. Survey of Western Music The history of western music from the Middle Ages through the present. Discussion, which uses analyses of works and biography as points of departure, will be directed toward considerations of the development of the major style periods. Credit hours: 4. Prerequisite or Corequisite: MUSC 1108. Offered Spring 2022, Session 4.

MUSC 3332. Vocal Pedagogy The mechanism of the human voice, and methods of teaching singing in private lessons or in coaching voices in an ensemble are studies. Particular attention is paid to physiology and diagnosis and correction of vocal faults. Credit hours: 4. Prerequisite: permission of instructor. Alternate years: Offered Fall 2021, Session 2.

MUSC 4491. Senior Recital Preparation for and performance of senior recital. Credit hours: 1. Prerequisite: MUSC 4493. Corequisite: individual instruction. Offered on a Pass/Fail basis only.

MUSC 4493. Senior Seminar Students will acquire bibliography and research techniques by studying selected compositions from the literature, writing papers, and making oral presentations of their research. This course will familiarize students with research and analysis methods in music and prepare students for success in the senior project, whether research paper or recital. Credit hours: 4. Prerequisite: MUSC 3308 and 3309.

MUSC 4494. Senior Paper Preparation and presentation of the senior paper. Credit hours: 4. Prerequisite: MUSC 4493.

Theatre

Faculty: Amy R. Cohen, Stephanie H. Earl, Heather Sinclair

Both in study and practice, theatre at the College is directed toward developing an understanding and appreciation of the interrelationship of actor, script, performing space, and audience. The Department’s curriculum centers on courses that explore performance (acting and directing), text (literature and playwriting), and performing space (design and technology), and that recognize—in various considerations of styles, periods, history, standards, and conventions—the essentiality of the audience in completing the theatre circle.

Acknowledging the unique and elemental nature of theatre as live performance, the Department emphasizes direct and personal expression through production experience. Students from all majors participate in the production of plays and enroll in theatre courses. Theatre majors are guided through the academic and production programs to hone their specialty area of emphasis while cultivating a generalist approach to theatre. The Department is committed to helping students focus their career goals in theatre and prepares students to meet them by advising them from declaration about opportunities outside the Red Brick Wall to complement their work within the Department.

The Department presents two or three productions each academic year, with additional productions added through directing class, independent study projects, and allied programs. The production season serves as laboratory work for the academic program and production work is an inherent part of the major. Theatre majors are expected to develop skill in their specialty area through course work and assignments in every department production. This apprenticeship path leads to earning a major role or production responsibility that can serve as their capstone project in their senior year. Theatre majors receive regular evaluations to ensure their successful progress along that path.

Seasons of plays are chosen with deliberation. The Department strives to offer an artistically compelling and socially relevant season of plays to its students, to the College community, and to Lynchburg in general, a season that is entertaining while advancing our knowledge of the human condition. The Department is dedicated to exposing each student to the breadth of theatrical expression in their time on campus, emphasizing the best of period and contemporary work and the variety of production styles, while providing an individually crafted program of study and set of experiences that maximizes artistic growth.

### Interdisciplinary Core:

| Courses selected must be from ARTH, ARTS, ENGL, MUSC, DANC with two different departments represented and must include one course in artistic expression. |

### Two of the following:

| THTR 2215      | Lighting Design                             |              |
| THTR 2216      | Scenic Design                               |              |
| THTR 2217      | Sound for Theatre                           |              |
| THTR 2221      | Costume Design & Technology                 |              |
| THTR 2222      | Computer Drafting                           |              |

### Senior Program:

| THTR 4493       | Professional Development Seminar           | 1            |
| THTR 4494       | Senior Project                             | 4            |

### Total for B.F.A. Degree in Theatre Design and Technology

62

Additionally for B.F.A.

Students who intend to enroll in the B.F.A. must apply to the program Audition is required for the acting track and portfolio review for the design and technology or directing tracks. Juried review required at the end of each year to continue in the
program. Students in the theatre B.F.A. are expected to assume a leadership position in multiple productions and to select their additional courses in consultation with their advisor. Students may choose the option to pursue multiple tracks and can receive a B.F.A. in more than one area of study if all the appropriate requirements are completed.

**Recommended Courses**

For students interested in performance: courses in business management and marketing, literature, media and culture, psychology, dance, and voice. For students interested in design and technical production: courses in art studio, geometry, and engineering physics.

**Theatre Courses**

**THTR 1107. Production Laboratory** Practical experience with departmental productions in the area of performance, stage management, technical production, and/or theatrical design. Placement will be decided by an interview by the instructor in conjunction with department faculty and/or assignment to a specific project with a current production. A minimum number of laboratory hours will be required for satisfactory completion of the assignment or project. The amount of laboratory hours shall be based upon the nature of the project and dependent upon the credit hours selected. **Credit hours: 1, or 2 (stage management or crew head only). Prerequisite: permission of the Department. Offered on a Pass/Fail basis only. May be repeated for credit.**

**THTR 1111. Stagecraft** An introduction to stage scenery, theatrical technology, terminology, and common standards and practices. The methodology and engineering of scenic and technical elements will be introduced. Students will develop an informed appreciation of theatrical productions and technical theatre professions. Formal and self-scheduled laboratories provide hands-on learning with departmental productions. **Credit hours: 4. (AE)**
THTR 1117. Basics of Design  An introduction to the principles of design as they apply to performance and the design process. This is a project-based class in which students will practice the basic techniques of costume, scenery, and lighting design. Practical experience with departmental productions. **Credit hours:** 4. (AE)

THTR 1123. Beginning Acting  This course explores the process of preparing for a role. Through improvisational exercises and scene study, students explore approaches to the creative state, discovering physical actions, defining simple objectives, developing powers of observation, character development, expressing the super-objective, communicating subtext and the magic if. The course culminates in a final scene presentation. **Credit hours:** 4. (AE)

THTR 1142. Introduction to Theatre  A general orientation to dramatic and theatrical conventions, theatre periods and styles, dramatic genres, theatre organization and production. The roles of audience, actor, director, playwright, and designer. The reading and discussion of plays and musicals. Viewing and reviewing the play in production. **Credit hours:** 4. (AE)

THTR 1181. Greek Drama Production Laboratory  This course is open to students who are full-time members of the cast or crew of the Greek Play but not enrolled in CLAS/THTR 2275. It provides practical experience with the production of an ancient play. Identical with CLAS 1181. **Credit hours:** 1 or 2. **Prerequisite:** permission of instructor. **Alternate years.** Offered on a Pass/Fail basis only. May be repeated for credit.

THTR 2212. Topics in Theatre  Specialized study in areas of theatre technology, production, styles, or genres. Depending upon topic, course work may extend from a minimum of four weeks to the entire semester and may call for practical experience with departmental/Sock & Buskin and senior theatre majors’ productions. **Credit hours:** 1, 1.5, 2, or 3. **Prerequisite:** permission of instructor. Offered at the discretion of the Department. May be repeated for credit when topic differs.

THTR 2215. Lighting Design  An introduction to stage lighting, including the study of elementary electricity, optics, manual and computerized control, and the principles of lighting design. Exploration of the process of lighting through the analysis of design choices and development of lighting designs using standard graphic conventions. Practical experience with departmental productions. **Credit hours:** 4. **Alternate years:** (AE)

THTR 2216. Scenic Design  An introduction to the design of theatrical scenery. Basic design techniques to be explored include thumbnail studies, scaled drafting of ground plans and design drawings, architectural rendering, paint elevations, and scale model building. Practical experience with departmental productions. **Credit hours:** 4. **Prerequisite:** THTR 117. **Alternate years:** offered Fall. (AE)

THTR 2217. Sound for Theatre  An introduction to sound as a design element in stage production, the aural landscape, recording and sound creation techniques, sound reinforcement and reproduction in performance. **Credit hours:** 4. **Prerequisite:** THTR 1117 or permission of instructor. **Alternate years:** (AE)

THTR 2221. Costume Design and Technology.  An introduction to the art of design with specific emphasis on its relation to costuming for the theatre. Students will explore the use of various media and techniques used for the creation of costume design. A variety of rendering techniques may be explored including collage, watercolor, and transfer drawing. Students will also receive an introduction to costume construction techniques for the stage. Topics include basic stitching technique for costume construction, identification and use of costume shop tools and equipment, shop safety and protocols, and professional wardrobe practices. Work on department productions is required. **Credit hours:** 4. **Prerequisite:** THTR 1117. **Alternate years:** offered Spring. (AE)

THTR 2222. Computer Drafting  An introduction to computer aided drafting. This is a project-based course in which students will use programs such as AutoCAD, Vectorworks, Google SketchUp, and a photo editing software. This course is open to all majors and minors. **Credit hours:** 3. **Alternate years:** offered second semester 2021-2022.

THTR 2224. Intermediate/Advanced Acting  This course builds upon the foundation laid in Fundamentals of Acting. Through movement and vocal exercises, scene study and topic specific exercises, this course introduces students to performing in a variety of styles and techniques, including the acting methods of Laban, Meisner, Chekov, Suzuki and Anne Bogart’s Viewpoints, and addresses non-traditional, verse, absurdist and post-modern texts. The class runs on a three-semester cycle that rotates the subject matter every three semesters. The course culminates in a presentation of final scenes. **Credit hours:** 4.
Prerequisite: THTR 1123 or permission of instructor. May be repeated for credit with consultation with the instructor required after twelve credit hours.

THTR 2228. Movement for the Stage  This course aims to further the development of artistic expression through movement and body awareness. Students will learn the importance of physical expression as it relates to creating acting choices and other theatrical principles. The class will achieve this through the exploration of techniques such as core strengthening, conditioning, Suzuki, Laban, yoga, flexibility, stage combat, dance, visualization/movement exercises, clowns, mask, and monologue/scene work. The course will also work to foster a collaborative approach to theatre through partner and ensemble projects. Credit hours: 4. May be repeated for up to 6 credit hours. Prerequisite: sophomore standing or permission of instructor. Alternate years: (AE, PE)

THTR 2233. Fundamentals of Directing  Detailed play analysis. Development of the director’s concept. Instruction in stage composition, picturization, movement, rhythm, and pantomimic dramatization. Direction of scenes from outstanding contemporary plays. Credit hours: 4. Prerequisite: THTR 1117 and 1123 or permission of instructor. Alternate years: offered Fall.

THTR 2235. Voice and Diction  Voice and diction will develop student ability in vocal production and enhance clarity in public presentations. Students will be introduced to the International Phonetic Alphabet (IPA) and will address individual regionalisms. Students will improve their vocal power and clarity through physical and vocal exercises as well as individual presentations. Credit hours: 4. May be repeated for credit up to a maximum of eight hours. May meet concurrently with MUSC 2235 for the first half of the session. Alternate years: offered Fall.

THTR 2241. History of Theatre  A detailed survey of Western theatre in form and style with emphasis on production techniques and forces affecting the development of the theatre as a cultural phenomenon. Credit hours: 4. Prerequisite: Any 3-credit 1100-level theatre course or permission of instructor. Alternate years: offered Spring. (HE)

THTR 2244. Script Analysis  Play analysis techniques for dramatic literature from a variety of historical periods. Students will focus on language and structure created by playwrights with special attention given to dramaturgical conventions of various epochs. Credit hours: 4. Prerequisite: any 3-credit 1100-level theatre course. Alternate years.

THTR 2245. Stage Management  An introduction to theatre organization and the forms and procedures of managing for the stage, including pre-planning, the rehearsal process, production management, and running a performance. Students will focus on organization and communication skills and the stage manager’s role in the production process. Practical experience with departmental productions. Credit hours: 4. Prerequisite: 1100-level theatre course or permission of instructor. Alternate years: offered Spring.

THTR 2275. Greek Drama  The tragedies of Aeschylus, Sophocles, and Euripides and the comedies of Aristophanes studied in the context of ancient theatrical conventions, with an emphasis on theories and practices of performance. In-depth study of the play in production as the Greek Play, with required student participation (in any of a number of capacities) to put principles of the class into action. Identical with CLAS 2275. Credit hours: 4. Alternate years: offered. (AE, HE)

THTR 2276. Reading Drama  A study of tragedy, comedy, and other varieties of works for the theatre, with attention given to historical and social context. Students will examine periods such as the Restoration, types such as melodrama, and movements such as theatre of the absurd. Attendance at screenings and at live productions by the theatre department may be required. Representative authors may include Sophocles, Behn, Ibsen, Shaw, and O’Neill. Identical with ENGL 2276. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. (AE, WI)

THTR 2277. Shakespeare  An introductory course dealing with the principles of Renaissance stagecraft, the nature of performance, the construction and themes of the plays, and the concept of genre or type. Representative plays in all genres from throughout Shakespeare’s career. Identical with ENGL 2277. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. (AE, WI)

THTR 2279. Writing Plays  In this course, students learn how to structure a scene, how to structure a play, how to create, hold, and release the tension of a dramatic moment through taut and convincing dialogue, how to create characters that an audience will identify with and care about. Through the reading of modern and contemporary plays, both short and full length, students will study the ways that highly accomplished playwrights solve the problems presented by a variety of dramatic
situations, and will begin to implement into their own scenes and plays the elements of the craft that they discover. Identical with ENGL 2279. Credit hours: 4. Prerequisite: ENGL 1161 or THTR 1142 or permission of instructor. Alternate years. (AE, WI)

THTR 3311. Design/Technology Portfolio This class will focus on presenting a polished and professional physical portfolio as well as the skills needed to be effective in design presentations and production meetings. The course will seek to further develop previous work and to help student designers and technicians build their professional image through mock presentations, interviews, and adjudications by guest artists. Credit hours: 4. Prerequisite: THTR 2201; 2215; 2216; 2217; 2219 or 3348. May be repeated for credit. Alternate years.

THTR 3337. Directing Workshop Further study and practice of concepts and techniques developed in Fundamentals of Directing (Theatre 233). Detailed examination and application of twentieth-century directing theories. Direction of short plays or scenes from classic and modern plays. Credit hours: 4. Prerequisite: THTR 1142 and 2233. May be repeated for credit. Offered as needed.

THTR 3347. Performance Portfolio This course is the pre-professional training that acting and directing students need to prepare them for graduate school and job pursuits. Actors will explore the skills and techniques that encourage effective auditioning. For them, the class will focus on personal preparation, script analysis, cold reading, effective interview techniques, receiving directorial adjustments, and monologue work. Resume preparation and headshot selection will also be touched upon. For directors, the class will guide each student through the process of creating their own directing portfolio and resume. Both actors and directors will develop the flexibility and confidence to handle actual job interviews and auditions. Credit hours: 4. Prerequisite: THTR 1123 or 2233. Alternate years: offered Fall.

THTR 4493. Professional Development Seminar Seniors will use resume, interview, portfolio, and audition skills developed in THTR 347/THTR 311 to prepare for the actual process of applying for graduate school/professional theatre work through conferences like Southeastern Theatre Conference, Unified Professional Theatre Auditions, and University Resident Theatre Association. The instructor will guide each student through their individual process of applying for post graduate opportunities. Credit Hours: 1. Prerequisite: permission of the department.

THTR 4494. Senior Project Senior Project includes directed work in one or more of the following areas as arranged with the Department—design, technical production, management, directing, acting, playwriting, or dramatic literature. Seminar study and research. Credit hours: 4. Prerequisite: permission of the Department.

PHILOSOPHY: SEE COMPARATIVE PHILOSOPHY DEPARTMENT LISTINGS FOR COURSES AND ADDITIONAL INFORMATION

PHYSICAL EDUCATION

Faculty: Meghan Halbrook, Carolyn Sarson

Full-Time Staff and Coaches: Bernadette Connor, Adam Godwin, Pete Hamilton, Steve Lanpher, Lee Lewis, Kara Matthews, Jamie Megginson, Kevin Porterfield, Ryan Purrington, Andy Sinclair, Kasdyn Waldron

Physical education is a very important part of the student’s overall development. The program includes a number of academic and activity courses aimed at increasing the understanding of lifetime fitness and skills as well as a variety of wellness-orientated activities. Students may earn a maximum of eight credit hours in physical education activity courses toward the 124 hours required for graduation.

The Sport and Exercise Studies program focuses on introducing students to a framework of knowledge in areas supporting sport and exercise. A broad intellectual base challenges our students to explore foundations of personal health and fitness, and sport administration, with multidimensional courses such as kinesiology, motor development, sport nutrition, sport management, and sport psychology. The integration of our classroom, laboratory, and field experiences with the college’s general education program provides a well-rounded liberal arts education experience.
Sport and Exercise Studies graduates will be prepared for master’s programs such as exercise science, health promotion, coaching, athletic training, sport management, sport psychology, and therapeutic recreation. Furthermore, our graduates will be well-equipped to enter directly into careers in community, clinical, and corporate sport and exercise settings. Senior capstone and internship components are significant aspects of the educational experiences. In culmination of the senior year, students will orally present a literature review paper of a topic of interest in sport and exercise studies. The required internship experience allows the students to gain first-hand experience in a discipline of choice related to sport and exercise professions.

Students are encouraged to supplement the Sport and Exercise Studies major with a minor that supports their area of interest. Minors in biology, business, dance, communication studies, psychology, or sociology provide additional opportunities to expand knowledge in areas supporting sport and exercise studies.

There is only one major in the Department: Sport and Exercise Studies. However, students are able to choose an emphasis to focus their coursework within the major in either health and fitness or coaching and sport performance. A student can only choose one of the following tracks. Either a major in Sport and Exercise Studies with a Health and Fitness track emphasis or a major in Sport and Exercise Studies with a Coaching and Sport Performance track emphasis. There are a number of core course requirements that all students within the major will complete, as these courses are essential to the content and understanding of the Sport and Exercise Studies field as a whole. The Sport and Exercise Studies faculty are committed to the encouragement of engaging specific student interests while also producing students who are capable of embarking in their live and future careers with a holistic and comprehensive approach to knowledge and application in their chosen path.

Activity Courses

All activity courses are .5 credit hours, unless otherwise indicated.

All activity courses are offered on a pass/fail basis only and all may be repeated for credit. A maximum of 8 credit hours in physical education activity courses may count in the 124 required for a degree.

Courses in the 1100’s denote beginning level of skill; 2200’s intermediate level. Course in the 4400’s are team level. A student who is unable, because of physical limitations, to participate in the regular program of activities may take Physical Education 1101, which will be designed to meet individual needs and interests.

P ED 1103. Adapted Activities An individualized program of physical activities for the student with health limitations. Credit hours: .5 Offered as needed. Prerequisite: permission of instructor. (PE)

P ED 1105. Yoga (PE)
P ED 1106. Aquatic Fitness and Conditioning (PE)
P ED 1110. Fitness Walking (PE)
P ED 1111. Aerobic Activities (PE)
P ED 1116. Disc Golf (PE)
P ED 1117. Weight Training (PE)
P ED 1118. Organic Gardening (PE)
P ED 1120. Self Defense (PE)
P ED 1125. Beginning Tennis (PE)
P ED 1130. Rock Climbing (additional fee) (PE)
P ED 1135. Tai Chi (PE)
P ED 1136. Scuba Diving Prerequisite: must know how to swim. Additional fee. (PE)
P ED 1146. Beginning Fencing (PE) Additional fee
P ED 1147. Intermediate Fencing Prerequisite: P ED 122 or permission of instructor. Additional fee. (PE)

Team Courses

Registration for all teams requires permission of instructor

P ED 4420. Indoor Track Team Credit hours: .5 per session of participation. Offered Session 3. (PE)
P ED 4422. Outdoor Track Team Credit hours: .5 per session of participation. Offered Session 4. (PE)
P ED 4425. Tennis Team Credit hours: .5 per session of participation. Offered sessions 1, 2 and 4. (PE)
P ED 4428. Lacrosse Team Credit hours: .5 per session of participation. Offered Sessions 3 and 4. (PE)
P ED 4430. Basketball Team Credit hours: .5 per session of participation. Offered Sessions 2 and 3. (PE)
P ED 4432. Swim Team Credit hours: .5 per session of participation. Offered Session 1, 2 and 3. (PE)
P ED 4433. Volleyball Team Credit hours: .5 per session of participation. Offered Sessions 1 and 2. (PE)
P ED 4434. Soccer Team Credit hours: .5 per session of participation. Offered Session 1 and 2. (PE)
P ED 4435. Cross Country Team Credit hours: .5 per session of participation. Offered Session 1 and 2. (PE)
P ED 4437. Softball Team Credit hours: .5 per session of participation. Offered Sessions 3 and 4. (PE)

Academic Courses

SES 1141. Professional Issues in Sport and Exercise Studies This 1-credit undergraduate course provides students majoring in Sport and Exercise Studies a comprehensive overview of the SES field. Students will also be exposed to professional organizations within the field of SES, practical elements of their major, research experience and application. Through participation in this course, students will develop experiences and materials that will help enhance their career opportunities. Credit hours: 1. Offered Session 1.
SES 1143. First-Aid and Safety  This course uses lectures, demonstrations, and video with hands-on training and practice. Participants in this course learn to recognize and respond to emergencies including, but not limited to, shock, cardiac, and breathing emergencies for adults, children and infants. Students will gain First-Aid, CPR, and AED certification. Credit hours: 2. Offered Session 4. Additional fee for certification card.

SES 1161. Introduction to Athletic Training  An introductory course which explores a variety of common athletic injuries and focuses on prevention, care, and rehabilitation. Other issues such as fitness, nutrition, and psychological effects of injury will be briefly discussed. Laboratory experience in taping and first-aid techniques will be included. Credit hours: 4. Offered Session 2.

SES 1163. Nutrition and Fitness Performance  The course will explore general nutrition with emphasis looking at how food intake choices relate health and to exercise performance. Special issues such as diabetes, cardiovascular disease, obesity, food allergies, protein, vitamin, and mineral supplementation, weight control, and fad diets will be discussed. Credit hours: 4. Offered Session I.

SES 1165. Lifetime Wellness  This course introduces various dimensions of wellness including lifestyle choices that directly influence physical and emotional health. Health issues such as diabetes, cancer, coronary artery disease, stress, weight control, environmental health, and substance abuse will be discussed in the realm of prevention and recognition of effects on total wellness. Credit hours: 4. Offered Session 2.

SES 1166. Sport Psychology  This course prepares students to deal with psychological principles related to sport and performance. Students will study the various aspects of sports psychology (stress, anxiety, arousal, leadership, group dynamics, relaxation, motivation, personality, etc.). Credit hours: 4. Offered Session 4.

SES 1175. Sport and Spectacle  This course explores the ancient roots of modern athletics and mass entertainment through analyses of texts, works of art, and the archaeological settings of sport and spectacle that highlight their essential role in ancient societies. The Olympic games asserted Greek identity, civic virtue and competitive spirit; gladiatorial combat and chariot racing defined relationships between Romans and others, rulers and subjects. Identical with CLAS 1175. Credit hours: 4. Alternate years: offered Fall. (HE)

SES 2204. Leadership and Organizational Dynamics  This course will examine the interactions and relationships between leadership and organizational culture within sporting institutions and sports teams. Primary topic areas covered include leadership styles, personality, diversity issues, motivation, levels of administration, conflict resolution, and creating positive change. Students will also have the opportunity to analyze the subject matter and develop their own leadership philosophy. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years: Offered Spring 2023, Session 4.

SES 2206. Essentials of Strength and Conditioning  This course addresses the basic principles of strength and conditioning including power, agility, speed, hypertrophy, flexibility and endurance training methods. Students will have the opportunity to develop fitness programs with practical application of knowledge through a needs analysis. Students will also learn how to adapt conditioning programs for special areas such as obesity, elderly, children, pregnancy, injury and back pain. Credit hours: 4. Prerequisite: Sophomore standing. Alternate years: offered Session 3, 2022.

SES 2241. Exercise Adherence & Compliance  This course will be a lecture/seminar course. Students will learn about factors that contribute to the relationship between psychosocial factors and exercise. There is a focus on both theory (understanding research) and application (practicing). As such, this course requires exploratory readings and requires students to learn new skills (interviewing, self-monitoring, journaling, behavior change). Credit hours: 4. Prerequisite: Sophomore standing. Alternate years: offered Fall 2021, Session 1.

SES 2261. Exercise Physiology  A study of the human body’s physiological adaptations to short-term and long-term exercise. Areas of study include energy metabolism, musculoskeletal function, cardiovascular and respiratory responses and adaptations, environmental factors (altitude, heat, cold), neurological control, and general conditioning principles including the development of coordination, agility, power, balance, and speed as they pertain to exercise. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Offered Session 1.
SES 2262S. LGBTQ+ Experiences in Sport  
This course will review the participation history of LGBTQ athletes. Furthermore, the course will explore the social, political, economic, and cultural constraints that have been placed on these athletes, and their attempts to transcend such limitations. The class will use gender as a means of understanding the evolution of LGBTQ athletes in sport, particularly with regard to issues of femininity, masculinity, and homonegativity.  
Credit hours: 4. 
Summer online course. (CI)

SES 2263. Sport Management  
The course will involve a study of sport industry roles and functions including collegiate, high school, professional, youth and community sport settings. Areas of content will include facility and event management, risk management, marketing, financing, sponsorship, communications and legal and ethical issues as they pertain to sport industry settings.  
Credit hours: 4.  
Prerequisite: sophomore standing or permission of instructor. Alternate years: Offered Fall 2022, Session 1.

SES 2264. Evaluation of Athletic Injuries  
A study of evaluative assessment of specific joint injuries. Topics include joint and muscle anatomy and mechanics, biomechanical effectiveness of human movement, etiological evaluations, and specialized testing of specific injuries and anatomical deficiencies.  
Credit hours: 4.  
Prerequisite: SES 1161 or permission of instructor. Alternate years: Offered Spring 2023, Session 3.

SES 3307. Motor Learning and Development  
This course will discuss motor development throughout the lifespan. Students will be able to trace the path of motor development and discuss the implications of general principles for appropriate physical education and movement specialist strategies to enhance motor skill learning. Special attention will be paid to motor learning in the preK-12 and special needs populations.  
Credit hours: 4.  
Prerequisite: sophomore standing. Offered Session 3. (WI)

SES 3342. Psychology of Sport Injury  
This course will explore the theory and research related to the psychological aspects of injury and injury rehabilitation. The focus is on theory and application. Intake interviews and case studies will be used to explore assessment and intervention approaches relevant for different levels of sport medicine as well as other sport and exercise professionals.  
Credit hours: 4.  
Prerequisite: PED 1166 or Junior standing. Alternate years: Offered Spring 2022, Session 4.

SES 3361. Kinesiology  
This course examines human anatomy and function of the musculoskeletal systems and mechanical aspects of human movement analysis as it relates to physical activity, exercise, and sport. Students will be able to analyze joint actions, muscle actions, and mechanical principles that apply to specific sport and exercise movements.  
Credit hours: 4.  
Prerequisite: junior standing or permission of instructor. Offered Session 2.

SES 3362. Exercise Testing and Prescription  
This course prepares students in developing knowledge and skills to effectively administer health appraisals and fitness tests in measuring cardiovascular endurance, muscular fitness, flexibility, and body composition in varied populations of healthy individuals. Topics include medical/health screening, exercise program development, and related discussions on diabetes, pregnancy, coronary heart disease, arthritis, low back pain, children, and the elderly in exercise assessment and prescription.  
Credit hours: 4.  
Prerequisites: SES 1163 and 2261 and junior standing or permission of instructor. Offered Session 3.

SES 3364. Social and Ethical Issues in Sport  
This course examines the function of sports in contemporary American Society. Students will perform a critical analysis of sport-related controversies, and study the ethical considerations used in decision-making. As an upper level course, students will be expected to read and comprehend advanced material, contribute meaningfully to class discussions, and exhibit personal involvement in order to complete course objectives.  
Credit hours: 4.  
Prerequisite: junior standing or permission of instructor. Offered Session 3. (WI)

SES 3394. Research in Sport and Exercise Studies  
Students will have the opportunity to participate in conducting research projects in conjunction with a faculty member in the Sport and Exercise Studies Department. Students will learn the research preparatory process, research methods, qualitative and statistical software, and journal submission guidelines. Research results will be transcribed, developed, and analyzed as well as presented and published in some cases.  
Credit hours: 1-2.  
Prerequisite: Permission of the instructor. May be repeated for credit up to a maximum of 4 hours.

SES 4494. Senior Seminar for Sport and Exercise Studies  
Students will explore readings and engage in discussions on current trends in sport and exercise studies. Students orally present a literature review paper on a topic area of interest in relation to sport and exercise studies.  
Credit hours: 4.  
Prerequisite: senior standing. Offered Session 2 and Session 4.
Master of Arts in Coaching and Sport Leadership

Faculty: Meghan Halbrook, Carolyn Sarson

The coaching and sport leadership M.A. program is a one-year, 36-credit intensive program that focuses on introducing students to an established framework of knowledge surrounding sport, coaching, and leadership disciplines. A broad intellectual base challenges our students to explore foundations of their own values and beliefs in an effort to create thoughtful, knowledgeable, and adaptable coaches and sport leaders. The integration of the classroom, laboratory, and field experiences will be offered as either a fully online program or as a blended, residential option.

Graduates will be prepared for entry into the wide variety of coaching or sport leadership occupations, such as health promotion, wellness management, athletic administration, sport psychology, sport sociology, officiating, and of course, coaching. Additionally, students will have the opportunity to participate in research, setting them up for admittance into more advanced graduate education.

A capstone course and practicum component are significant aspects of the educational experiences for our students. In culmination of the practicum experience students will orally present their leadership philosophies, important research, as well as their personal experiences within their coaching and/or leadership roles. The required practicum experience allows the student to gain first-hand experience in a population or organization of choice related to coaching and sport leadership.

Students with a variety of undergraduate disciplines are encouraged to apply.

Academic Standing

Graduate students must maintain a minimum cumulative GPA in order to meet satisfactory academic progress standards. As a part of the academic progress review each session, M.A.C.S.L. students must meet the academic standing criterion defined as a cumulative grade point average of 3.0. Candidates who do not meet this standard will be placed on academic probation. The student must attain the appropriate minimum cumulative GPA by the close of the subsequent seven-week session or the student may be declared ineligible to continue at the College. Academically ineligible students will be notified by the Program Director and may submit a written appeal to continue to the Board of Review through the Associate Provost. Students whose appeals are successful will be notified by the Board of Review.

Any student earning more than six hours with grades of C or below must retake courses as needed to bring the student back up to the program requirements.

Admission Requirements See Admission.

Course Load

For full-time status, a student normally maintains a course load of at least 4-8 credits each seven-week session. The residential program may be completed only on a full-time, cohort-style, degree seeking basis. Online program students may be full-time, degree seeking or part-time, non-degree seeking.

Financial Aid For loan information, see Student Financial Services.

Graduation Application and Information

Master’s degree candidates should complete degree applications by October 1 of the Fall semester for May commencement. Information obtained from the degree applications is used in the ordering of diplomas and preparing the Commencement Program. Degree completion date is in May, culminating with a Commencement exercise at Randolph College in Lynchburg, VA.

For Registration, Add/Drop, and Withdrawal from a Course, see Academic Procedures and Regulations.
Requirements for the Degree

Randolph College confers the Master of Arts in Coaching and Sport Leadership degree. Requirements for the degree are:

1. 36 credit hours of graduate coursework must be completed.
2. A maximum of 6 credit hours may be transferred to Randolph College at the graduate level.
3. All requirements, including transfer courses, must be completed within a period of two calendar years.
4. The student must earn a cumulative grade point average of 3.0 (rounded) both for all courses taken for a grade.

Graduate Assistantship Opportunity

One unique aspect of the M.A.C.S.L. program is that residential students will have the opportunity to apply for an on-campus graduate assistantship. The number of graduate assistantships offered each year will vary upon necessity and availability. Those students awarded a graduate assistantship will be required to complete an additional 20 hours per week on campus in addition to their practicum hours and coursework. For this work, graduate assistants will receive:

1. Discounted tuition rate - $525 per credit hour instead of $575
2. Free room and board on campus (students may choose to not utilize this option if they prefer to live off campus, but no stipend will be awarded in its place)

To the best of the program’s ability, students will be placed in graduate assistantships that suit their interests and long-term goals. For example:

1. Students interested in the application of coaching will be placed in a sport outside of their practicum.
2. Students interested in sport leadership/administration will be assigned to an academic or athletic administrative role.
3. Students interested in the science of coaching or in attending further educational endeavors, will have the opportunity to be paired with a faculty member for research assistance and guidance.

An application for Graduate Assistantships will be sent to interested residential students after being admitted to the M.A.C.S.L. program.

Total for the MACSL Program 36

Coaching and Sport Leadership courses

CSL 5504 Group Dynamics Students will examine group influences and dynamics with regard to teams and departments. Components of effective team building and communication strategies will be reviewed as well as overall program development. Credit hours: 3.

CSL 5506 Conditioning & Safety Principles for Performance Students will examine coaching strategies based upon fundamental principles and best practices for training and conditioning such as periodization, assessment, and nutrition. Students will be required to obtain First Aid and CPR certified. Credit hours: 3.
CSL 5514 Sport Media & Technology (Online Only)  Students will examine the importance of social media in contemporary sports media and gain hands on experience in technology management, content development, and data analysis. A theoretically-driven investigation of the rhetoric of sports media and persuasive tactics common to sports industries.  Credit hours: 3.

CSL 5541 Coaching and Sport Leadership Capstone Course  A capstone course that draws together previous coursework, leader observations, and self-reflection into practical lessons that may be taken forward into the applied, professional context or into Ph.D. programs.  Credit hours:3.

CSL 5563 Sport Administration (Online Only)  Students will review the administrative side of coaching and leadership positions within sport. Topics covered will include Title IX, recruiting, fundraising, and department organizational structures.  Credit hours: 3.

CSL 5564 Sport Sociology & Ethics  Students will examine sport as a petri dish for society at large, considering issues of power, social stratification, identity, and cultural heritage. This course provides a comprehensive analysis of sport structures with a close view of who competes and the consequences of competition. A major emphasis is placed on the sociological phenomena that contribute to sport in the United States. In-depth discussion of the positive and negative side effects of how sport is organized in society will also occur.  Credit hours: 3.

CSL 5565 Coaching Theories & Principles  This course will include understanding the various roles of the coach and introduce students to the field of coaching. An emphasis is placed on creating an athletic environment to enhance holistic growth of the athletes.  Credit hours: 3.

CSL 5566 Coaching Psychology  This course will emphasize theories, concepts, and research applied to the role of a coach for the purpose of psychologically developing and sustaining team, organization, and individual competitive success.  Credit hours: 3.

CSL 5575 Sport History (Online Only)  A topics course that explores the historical role of sport in history and cultures around the globe. Examines the roots of American sport in colonial play and recreation, the emergence of organized and national sports. The course will consist of films, readings, lectures and discussions.  Credit hours: 3.

CSL 5591 Practicum Experience(s)  Practicum placements may be on or off-campus. Students will create and present a practicum portfolio in the final session of the program. The practicum offers students the opportunity to apply classroom knowledge in an actual work environment, under the guidance of an athletic administrator, coach, or other sport professional. Each hour of academic credit requires a minimum of 42 clock hours (a minimum of 210 hours total) of on-the-job training performed under the framework of a contract, mutually agreed upon by the student, the faculty supervisor, and appropriate agency personnel.  Credit hours:1-6.  Pass/Fail only.

CSL 5594 Research Methods & Inquiry (Online Only)  A survey course that introduces each cohort to the many different ways that one can do scholarly and/or applied inquiry of sport. Both qualitative and quantitative processes will be discussed.  Credit hours: 3.

**PHYSICS AND ENGINEERING**

Faculty: A. Katrin Schenk, Peter A. Sheldon, Sarah L. Sojka

Physics is a discipline that seeks to explain the behavior of the natural world with a comprehensive set of fundamental laws. Success in physics requires a keen analytical mind, a strong desire to understand the fundamental principles of nature, and the ability to work hard and persevere.

A physics major earned in the context of a liberal arts education prepares the student for a wide variety of careers. Scientific careers in universities, research laboratories, and industry are the most obvious opportunities, but the training that a physicist receives in analytical reasoning prepares one for a career in medicine, engineering, law, and business as well. Problem-solving ability combined with knowledge of computer programming also leads to careers in computer science and computer programming.
The Bachelor of Arts degree is for the student interested in studying physics, but who is likely to pursue a career in a related field, or a field which requires an analytical mind. The Bachelor of Science degree is for those planning a career in physics or engineering, and for those considering going on to graduate school.

A student interested in a degree in engineering, but who also wants the benefits of a liberal arts education can elect the engineering physics major. See Engineering Physics for a description of the interdisciplinary major.

Recommended Courses

It is recommended that students take at least one course in each of the fields of biology and chemistry, and additional courses in computer science. MATH 3343; 4426; and MAC/PHIL 1175; 2230.

Special Programs

Recent physics majors have successfully participated in Summer research programs at NASA, the University of Virginia, the College of William and Mary, the National Institute of Standards and Technology, Lehigh University, Bucknell University, Kansas State University, and the Thomas Jefferson National Lab.

Physics Courses

PHYS 1102. Science Outreach  This is a hands-on, experiential, cultural learning course for science enthusiasts. Students will build science demonstration apparatuses, learn about the educational benefits, and actually go out in the field and do science demonstration shows and classes in the Lynchburg area. Students will participate in 42 hours of outreach activities per
credit hour. Credit hours: .5 or 1. Offered on a Pass/Fail basis only. May be repeated for credit up to a maximum of four credits.

PHYS 1105, 1106. Introductory Physics  An algebra-based introduction to fundamental topics in physics, including mechanics, thermodynamics, wave motion, and electromagnetism. Credit hours: 3, 3. Co- or Pre-requisite: MATH 119 or equivalent or permission of instructor. Calculus is not required. Offered Summers. (NS, QR)

PHYS 1105L, 1106L. Introductory Physics Laboratory  Laboratory work and experiments related to topics studied in Physics 1105, 1106. Credit hours: 1, 1. Corequisite or prerequisite: PHYS 1105, 1106 or the equivalent. Offered Summers. (NS)

PHYS 1115, 1116. General Physics  Classical mechanics, heat, and electromagnetism. A calculus-based presentation of basic physical principles for students interested in the sciences or mathematics. Credit hours: 3, 3. Prerequisite or corequisite: MATH 1149 or the equivalent. Offered Summers. (NS, QR)

PHYS 1115L, 1116L. General Physics Laboratory  Laboratory work and experiments related to the topics studied in Physics 1115, 1116. Credit hours: 1, 1. Corequisite or prerequisite: PHYS 1115, 1116 or the equivalent. (NS)

PHYS 2216. Statics  This course focuses on external (both applied and reactive) and internal forces on rigid bodies or particles that are stationary or moving with constant velocity. These concepts are applied to simple trusses, frames, and machines. Credit hours: 4. Prerequisite: PHYS 1115. Alternate years: offered Spring 2023.

PHYS 2251. Relativity and Introduction to Quantum Mechanics  Topics include special relativity, rotational mechanics, wave/particle duality, the Bohr model of hydrogen, and an introduction to quantum mechanics. Credit hours: 4. Prerequisite: PHYS 1116.

PHYS 2256. Green Engineering Design  Rising energy prices. Climate change. Massive oil spills. Engineering design is the process of devising a system to meet a need, and green engineering – one of the fastest growing fields in the US – addresses these pressing issues and more that are pertinent to our planet today. This course is meant to be a general introduction to the field of engineering, and students will be given a chance to see first-hand how engineers design power plants, buildings, and transportation to be cleaner and more energy efficient. Credit hours: 4. Prerequisite: one session of any science. Alternate years: offered Fall 2022.

PHYS 3301S. Differential Equations for Scientists and Engineers  Introduction to ordinary and partial differential equations. Topics include first order equations, mathematical modeling, qualitative methods (slope fields, phase plots, equilibria, and stability), numerical methods, second and higher order equations, series solutions, Laplace transforms, Fourier series, and systems of linear differential equations. Course also covers partial differential equations, such as the heat equations, the wave equations, and Laplace’s equation. Credit hours: 4. Prerequisite: MATH 1105 or the equivalent. (QR)

PHYS 3302. Quantum Mechanics I  A continued study of quantum mechanics including important one-dimensional applications and the hydrogen atom. Credit hours: 4. Prerequisite: PHYS 2251.

PHYS 3331. Electronics Laboratory  A lecture laboratory course with emphasis on practical applications. Includes hands-on experience in building and testing electronic circuits and devices, and an introduction to digital logic, digital electronics, and computer interfacing. Credit hours: 4. Prerequisite: PHYS 1116, 1116L; MATH 1150. Alternate years: offered Spring 2022. (WI)

PHYS 3332. Advanced Physics Laboratory  A lecture laboratory with experiments in various branches including optics and lasers of physics with emphasis on modern physics. Includes the study of physical systems through computer simulations and modeling as well as advanced techniques in data analysis. Credit hours: 4. Prerequisite: PHYS 2251, MATH 1150. Alternate years: offered Spring 2023. (WI)

PHYS 3341. Classical Mechanics  Topics include solutions of Newtonian equations of motion, Lagrangian and Hamiltonian dynamics. Credit hours: 4. Prerequisite: PHYS 1116 and MATH 2250; 3331. MATH 3331 may be a corequisite. Alternate years: offered Fall 2021.
PHYS 3361. Electromagnetic Theory  A study of classical electromagnetic theory, including electrostatic and magnetostatic fields, Maxwell’s equations, and electromagnetic plane waves. *Credit hours: 4. Prerequisite: PHYS 1116 and MATH 2250; 3331. Alternate years: offered Spring 2022.*

PHYS 3371. Topics in Theoretical Physics  Topics selected from classical mechanics, electromagnetic theory, quantum mechanics, statistical mechanics, optics, or other subjects of interest. *Credit hours: 4. Prerequisite: PHYS 3302. May be repeated for credit when topic differs. Alternate years: offered Fall 2022.*

PHYS 3378. Classical and Statistical Thermodynamics  An introduction to thermodynamics and statistical mechanics, including review of important topics from statistics and probability, statistical description of particle systems, calculation of thermodynamic quantities, quantum statistics of ideal gases, and other basic methods and results of thermodynamics and statistical mechanics. *Identical with CHEM 3378. Credit hours: 3. Prerequisite: MATH 1150 and PHYS 1116 (WI, when both lecture and lab are passed).*

PHYS 3378L. Classical and Statistical Thermodynamics Lab  Laboratory experiments that supplement concepts presented in Chemistry/Physics 3378, with an emphasis on professional writing in ACS format. *Identical with Chemistry 3378L. Credit hours: 1. Identical with CHEM 3378L. Corequisite: CHEM/PHYS 3378. (WI, when both lecture and lab are passed).*

PHYS 3394. Research Topics in Physics  Students take part in research projects in conjunction with a faculty member in a field of mutual interest and learn research and problem solving methods. Research results are written up in formal lab reports and in some cases will be published. *Credit hours: 1, 2, 3 or 4. Prerequisite: permission of the Department. May be repeated for credit up to a maximum of twelve hours.*

PHYS 4474. Quantum Mechanics II  Quantum mechanics including postulates and formalism, angular momentum, and spin. *Credit hours: 4. Prerequisite: PHYS 3302 and MATH 2241 and 3331. Alternate years: offered Spring 2023.*

PHYS 4494. Senior Research  Students complete individualized research projects. Research results are presented in a formal paper and an oral presentation before faculty and students. *Credit hours: 1 or 4. Prerequisite: permission of the Department.*

PHYS 4495, 4496. Senior Seminar I-II  The seminar requires students to explore the areas of their personal interest in physics in order to inform their choice of research, graduate school, and employment. Students are also asked to make connections across topics in physics through a review of the major ideas in mechanics, electricity and magnetism, relativity, and quantum mechanics, culminating in a comprehensive final examination in physics. *PHYS 4495 focuses on careers; PHYS 4496 focuses on topics. Credit hours: .5. Prerequisite: permission of the Department.*

Astronomy Courses

ASTR 1101. Introductory Astronomy: The Solar System  An introduction to astronomy, including naked-eye astronomy, the historical development of astronomical models, and basic astrophysical principles with a focus on our solar system and the growing number of examples of extrasolar systems. *Credit hours: 3. Alternate years: offered Fall 2021. (NS, QR)*

ASTR 1101L. Introductory Astronomy Laboratory: The Solar System  Laboratory work and exercises related to topics studied in Astronomy 1101. No previous laboratory experience is assumed. *Credit hours: 1. Prerequisite or corequisite: ASTR 1101L. Alternate years: offered Fall 2021. (NS)*

ASTR 1103. Introductory Astronomy: Cosmology  An introduction to astronomy, including naked-eye astronomy, the historical development of astronomical models, and basic astrophysical principles with a focus on astronomy outside of our solar system including surveying the stars, galactic dynamics, and the beginnings and fate of the universe. *Credit hours: 3. Alternate years: offered Fall 2022. (NS, QR)*

ASTR 103L. Introductory Astronomy Laboratory: Cosmology  Laboratory work and exercises related to topics studied in Astronomy 1103. No previous laboratory experience is assumed. *Credit hours: 1. Prerequisite or corequisite: ASTR 103L. Alternate years: offered Fall 2022. (NS)*
POLITICAL SCIENCE

Faculty: Mari Ishibashi, Aaron Shreve, Vincent Vecera

Political science is a wide ranging discipline composed of many separate fields and specializations at the local, national and international levels. What holds all the separate fields together is a common interest in questions regarding the following: governmental and international institutions and their sources of power, political conflict and its resolution, political mechanisms for defining and achieving justice, and the origins and results of policy choices at the local, national, and international level, among other things. The Department addresses these and other issues through a variety of courses in American government, comparative government, and international relations. Given the diversity of interests within the field, majors will work with their advisor to tailor their program to their particular interest. Most are encouraged to undertake internships or engage in other experiences to bolster their understanding of political processes. Majors are encouraged to take courses outside the Department that support their academic interests and/or their career goals.

Those with a very strong interest in international politics and issues might want to consider the global studies major. Students may choose to major in political science or do one of the two minors.

Political Theory Minor

Courses | Course Title | Credit Hours
--- | --- | ---
**Required:**
POL 1102 | Political Theory | 4
POL 2203 | Philosophy of Law | 4
POL 3372 | History of Political Thought | 4
POL 3374 | Contemporary Political Thought | 4

*One of the following:*
PHIL 1133 | Intro Phil: Ethics and Public Life | 4
PHIL 1177 | Classical Philosophy |
PHIL 1183 | Faith and Doubt |
PHIL 2214 | Bioethics |

**Total for Minor in Political Theory** 20

Comparative Politics/International Relations Minor

Courses | Course Title | Credit Hours
--- | --- | ---
**Required**
POL 1113 | International Relations | 4

*Choose four from the following:* 16
POL 2201 | Trafficking: Where Global Meets Local |
POL 2220 | Global Issues at the United Nations |
POL 2222 | Gender Politics in Asia |
POL 2265 | International Law |
POL 3332 | Global Politics of Extremism |
POL 3365 | War and Peace |

*Note: May include one-time only POL courses at the 2200-level or higher with department approval*

**Total for Minor in Comparative Politics/International Relations** 20

Special Programs

Majors with an emphasis on American politics are encouraged to participate in appropriate programs combining practical experience with courses taken through other institutions. Interested students should discuss available options with their advisers or the chair of the department.

Experiential Learning Examples

Law office intern; Circuit Court intern; staff aide to a member of Congress; campaign aide.

Political Science Courses

**POL 1101. American Politics**  An examination of the American political system through an analysis of the political culture, Constitution, party and interest group structure, governmental institutions, and the decision-making process in the United States.  *Credit hours: 4. (SS)*

**POL 1102. Political Theory**  This is an introduction to political thought. We’ll study the origins of important ideas, such as justice, freedom, equality, progress, and the rights of the individual, in the context of the great conflicts of human history, from Sun Tzu and Plato to our contemporaries.  *Credit hours: 4. (HE)*

**POL 1106. Rights of a Child**  This course examines why violations of the most vulnerable continue to exist in countries from different regions of the world through issues such as children’s bonded labor, involuntary participation in armed conflict and terrorism, forced marriage, sex-trafficking, and denied access to food, health care, and education. Through the lens of children’s human rights, students will examine how attenuated aspects of failed and/or weak states affect the rights of children.  *Credit hours: 4. Prerequisite: Sophomore standing. (SS)*
POL 1107. Peace and Conflict Resolution. Introduces students to different ways of understanding peace, violence, and war and of analyzing the war culture which encourages aggression, violence, and injustice in our immediate and global communities. Toward the goal of social and political change, students will be challenged to examine various approaches to peacemaking and peacebuilding, including nonviolence, peace education, and reconciliation. Credit hours: 4. (HE)

POL 1113. International Relations. Surveys the dominant international relations theories and contemporary forces that shape human, national, and global security. Special attention is given to new players, such as intergovernmental organizations, nongovernmental actors, and civil society, and issues, such as terrorism and the global justice movement, that are giving new shape to the global political environment. Credit hours: 4. (SS)

POL 1115. Introduction to East Asian Politics and Culture. An introduction to the societies and politics of East Asia with the focus on Japan, China, and Korea. Topics covered will include gender and cultural issues, immigration, minority politics, and nationalism. Credit hours: 4. (CI)

POL 2201. Trafficking: Where Global Meets Local. The course explores aspects of interdependency between global and domestic politics through the lens of global trafficking issues including sex, marriage, drugs, minerals, money weapons, wildlife, cultural properties, organs, and others. The focus will be on how forces of globalization are shaping human lives and numerous state and non-state actors are setting global agenda. The course is open to all students. Those intending to major in global studies will learn about the options for their focus area. Credit hours: 4. Prerequisite: Sophomore standing. (SS)

POL 2203. Philosophy of Law. This course focuses on questions about the law dealing with issues like truth, fairness, justice, and autonomy in a free society. We’ll explore debates about criminal justice and punishment; unconscionable contracts; exploitation; economic efficiency; class, race, gender, sexuality and other forms of inequality; and the pursuit of civil and political rights. Credit hours: 4. Prerequisite: POL 1102 or permission of instructor. (HE)

POL 2205. Survey of World Geography. This course encompasses a study of geography throughout the major regions of the world. Attention is given to the physical processes that shape the surface of the earth and to the relationship between human activity and the physical environment. In addition, the course will explore how political forces influence the division and control of the earth’s resources. Maps, along with other geographic representations, tools, and techniques, will be used to demonstrate critical analysis of techniques for representation and presentation of information. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Identical with GEO 2203. (CI)

POL 2211. Elections and Public Opinion. An examination of the interaction of political parties and public opinion in electoral politics in the U.S. Topics will include the history and current status of political parties, the changing nature of elections, and trends in public opinion. Credit hours: 4. Prerequisite: sophomore standing. Alternate years.

POL 2220. Global Issues at the United Nations. Covers the basics of the UN system, including its history, structures, and documentation system. Heavy emphasis is placed on writing, research, speaking, and collaboration skills. The class will undertake a parallel study of a specific country in conjunction with the Spring National Model United Nations (NMUN) conference. Only students selected in late Fall for the NMUN Conference can enroll in the course and participate in the NMUN conference. All conference participants must be enrolled in the course for full credit during the semester of the conference. Credit hours: 4. Prerequisite: permission of instructor. May be repeated for credit when topic differs up to a maximum of twelve hours.

POL 2222. Gender Politics in Asia. Surveys the ways gender is experienced by women in Asia. Issues covered include sexual and reproductive decision making, domestic violence, human trafficking, son preference, dowry, and honor killing drawn from Asia. The class will also learn how gender issues are treated in their societies and politics and explore how different actors seek solutions to these issues in the context of global politics. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. (HE, SS)

POL 2225. Contemporary Issues in Global Health. The course explores sources of threats to global health and illustrates why health disparities exist. In the first part of the course, students will be introduced to global health principles, key measures, and concepts. This will be followed by examinations of health consequences especially among vulnerable populations caused by neo-colonialism, poverty, racism, cultural belief and practice, climate change, conflict, environmental degradation, and pollutions. In the second half of the course, we will explore ways to achieve global health equity and justice by studying
successful regional cases of interventions, new technology and medicine, innovative health programs, and expanding access to health care. Credit hours: 4. (HE; SS) Prerequisite: Sophomore standing or permission of instructor. Alternate years. (HE, SS)

POL 2231. Research Methods in Political Science This course familiarizes students with a variety of techniques for the investigation of political problems. The first half of the session is an exploration of how to ask and answer social science questions. In the second half of the course students gain hands-on experience using statistical software to investigate and describe political problems. No prior familiarity with statistics is assumed. Credit hours: 4. A student may receive credit for two these courses: ECON 2227, MATH 2227, POL 2231, PSYC 2227, or SOC 3395. Alternate years: offered Spring. (QR)

POL 2245. Nuclear Strategy An examination of the causes and consequences of nuclear proliferation drawing on both academic theory and historical evidence. The course examines moral questions surrounding nuclear technology, why countries acquire nuclear weapons, and what are the effects of nuclear proliferation on national and international security. We will also examine nuclear strategy, explanations for the non-use of nuclear weapons, and case studies of different nuclear programs. Credit hours: 4. Prerequisites: POL 1113 or sophomore standing. (SS)

POL 2265. International Law This course introduces students to the major elements of international public law. We begin with the sources and functions of international law. We then cover the effects of international law and non/compliance with international law. We examine several substantive areas of international law, such as human rights law and law of war. The course also includes an international law simulation. Credit hours: 4. Offered in alternate years. (SS, WI)

POL 3310. Civics and Economics Students will examine the roles citizens play in U.S. politics and government, and the basic economic principles that underlie the U.S. market economy. Students will investigate the processes by which decisions are made in the American market economy and explain the government’s role in it. Students study how patriotism, respect for the law, willingness to perform public service, and a sense of civic duty facilitate thoughtful and effective active participation in the civic life of an increasingly diverse democratic society. This course is open to all students and required of students seeking elementary education licensure or students seeking the history/social science teaching licensure. Course content maps to the Virginia Standards of Learning. Identical with IST 3310. Credit Hours: 4.

POL 3325. Constitutional Law A study of the constitutional politics of the United States, focusing on federalism, the separation of powers, and civil rights and liberties. We’ll read Supreme Court decisions and situate them in their political, economic, and cultural context to explore the relative powers of American political institutions. Credit hours: 4. Prerequisite: POL 1101 or permission of instructor.

POL 3326. Public Policy Analysis This is an advanced course on federal domestic policy making in the United States. In the first half of the course students will discuss the theory of public policy analysis, focusing on the influence of institutional norms and rules, interest groups, and the public. The second half of the course will consist of a series of case studies of domestic policy issues. Topics may include social security, health care, employment discrimination, criminal justice, and/or anti-poverty policy. Students will pay particular attention to how individuals and institutions interpret policy questions differently as a result of their position in society. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years: offered Fall.

POL 3332. Global Politics of Extremism Surveys why extremism emerges in societies and transcends borders. Through case studies, students will explore topics including psychology of terrorism, gendered violence, rhetoric of terror, recruitment and use of social networks, cyber terrorism, and the political economy of terrorism. This will be followed by a section on deradicalization and disengagement of extremist actors and groups. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years. (SS)

POL 3365. War and Peace An in-depth exploration of the international system, how it evolved and currently operates. We are primarily concerned with the causes of international conflict, international cooperation, and the uses of power. The course examines conflict in the international system, how cooperation, institutions, and domestic politics affect conflict, and current issues in international security. Current topics include terrorism, nuclear proliferation, the environment, culture, and human security. Credit hours: 4. Prerequisite: POL 1113 or sophomore standing.

POL 3372. History of Political Thought A study of the ideas underlying political conflict from the Ancient world through the mid-20th Century. We’ll discuss the origins of government; the ethical obligations of citizens and the state; whether rulers
should be priests, kings, legislatures, dictators, or no one; and theories about freedom, equality, property, class, race, gender, nation-states, and revolution. Credit hours: 4. Prerequisite: POL 1102 or permission of instructor. (HE, WI)

POL 3374. Contemporary Political Thought In this course we'll study the political conflicts of our world through the works of important political theorists of the past 50 years. We'll explore major thinkers in contemporary debates about capitalism, freedom, tolerance, national identity, power, community, representation, and human nature. Credit hours: 4. Prerequisite: POL 1102 or permission of instructor.

POL 4493. Global Studies/Political Science Seminar The first course in the senior program sequence. The seminar includes the discussion of current issues in U.S. politics and global studies and current research fields with a focus on research design. Students will have weekly assignments and identify a research problem they will undertake. Credit hours: 4. Prerequisite: Permission of department.

POL 4494. Senior Research Each student will work on a research problem chosen in consultation with departmental faculty. A final paper embodying original research in an area of politics will be required. Credit hours: 4. Prerequisite: senior standing.

POL 4495. Global Studies/Political Science Capstone The second course in the senior program sequence. The capstone completes the student’s course of study in the major. Each student will work on a research problem chosen in consultation with departmental faculty. A final paper embodying original research in an area of politics is required. Credit hours: 4. Prerequisite: POL 4493.

DEPARTMENT OF PSYCHOLOGICAL SCIENCE

Faculty: Sara Beck, E. Blair Gross, Stephanie RiCharde, Holly E. Tatum

Psychological science is the study of behavior and mental processes. Although the science of psychology is relatively new (The first psychology laboratory was established in 1879 at the University of Leipzig, Germany), the College has had a psychology laboratory since the beginning in 1893. In fact, the College’s psychology laboratory was the first at a college or university in the South. This tradition of a laboratory-based education continues in the current academic program.

The Department offers study in a broad range of sub-fields within the discipline, including courses in cognition, development, biological bases of behavior, psychopathology, personality, and social psychology. The emphasis within these areas is to prepare students to critically evaluate empirical evidence about behavior and mental processes with a strong emphasis on research design and interpretation of data. The knowledge and skills acquired in this liberal arts program enable students to pursue a career in related areas or to continue their education at the graduate level. The Department offers a major and a minor in Psychology and a minor in Cognitive Science.

Experiential Learning Examples

Clinical work in child development, acute psychiatric care, marketing, juvenile and domestic courts, clinical social work, art therapy, residential treatment of adolescents.

Psychology Courses

**PSYC 1105. Introduction to Psychology**  
This course will survey basic principles of psychology. Topics include history of psychology, research methods, neuroscience and behavior, nature, nurture, development through the lifespan, thinking and language, psychological disorders, sensation and perception, states of consciousness, learning, memory, emotions, and social psychology. Additional topics could include motivation, personality, intelligence, health/stress, and therapy. **Credit hours: 4. (SS)**

**PSYC 2202. Personality Psychology**  
The study of theories and research on individual differences and the sense of self. Readings and discussion focus on the major theoretical perspectives on the structure and development of human personality, and on methods for assessing individual differences. Cultural differences in theories of personality are considered, and current research studies on biological and environmental influences on personality are explored. **Credit hours: 4. Prerequisite: PSYC 1105. Alternate years: offered Spring 2022, Session 4.**

**PSYC 2205. Social Psychology**  
An introduction to the scientific study of social behavior. Traditional areas such as attitudes, aggressive and prosocial behavior, interpersonal attraction, person perception, and group dynamics are covered, as well as the application of social psychological research to contemporary social problems. **Credit hours: 4. Prerequisite: PSYC 1105.**

**PSYC 2208. Developmental Psychology**  
An overview of growth, maturation, and change in the human from conception through adolescence. The topics discussed include prenatal effects on the development of behavior, development of cognitive abilities in early childhood, and the effects of social interactions on development of personality and cognition. **Credit hours: 4. Prerequisite: PSYC 1105.**
PSYC 2209. Sensation and Perception  How do we come to learn about the world around us? How do we construct a conception of physical reality based on sensory experience? This course will cover the basic theories and methods of studying sensation and perception. The major emphasis is on vision and audition, although other modalities may be covered. Representative topics include receptor function and physiology, color, motion, depth, psychophysics of detection, perceptual constancies, adaptation, pattern recognition, and the interaction of knowledge and perception. Credit hours: 4. Prerequisite: PSYC 1105. Alternate years: offered Fall 2021, Session 2.

PSYC 2211. Cognitive Psychology  This course is an introduction to human cognition and will cover how humans learn to deal with information from the environment. Students will concentrate on the classic topics including memory, attention, categorization, problem solving, language, reasoning, and decision making. Included is a discussion of the established theories and findings of cognitive psychology, how they relate to brain structure and functions, how these findings can be applied to real world problems, and how different methods of cognitive research can be used to understand mental processes. Credit hours: 4. Prerequisite: PSYC 1105. Alternate years: offered 2022-2023.

PSYC 2212. Psychology of Gender  Consideration of how gender is related to the way people think, feel, and act in the world, and how gender-related differences develop. Course will focus on theories, questions, methods, and findings of psychological research on gender and gender development. The role of gender will be studied in relation to gender roles, identity, child and adolescent development, sexuality, health (physical and mental), close relationships, family life, work (paid and unpaid), violence, and harassment. Credit hours: 4. Prerequisite: PSYC 1105 or G ST 2202. Alternate years: offered 2022-2023. (CI)

PSYC 2213. Psychological Disorders  A survey of the etiology, diagnosis, and treatment of the various forms of psychopathology, e.g., a comparison of the physiological and environmental explanations of depression and the implication of each of these explanations for treatment. Credit hours: 4. Prerequisite: PSYC 1105.

PSYC 2227. Applied Statistical Analysis  An introduction to statistical analysis in psychological science. Topics include sampling, probability, descriptive statistics, null hypothesis testing, including t-tests, ANOVAs, regression, and correlations, and non-parametric tests. Additionally, students will learn about effect size and estimating power in statistical tests, as well as have an introduction to using statistical software (SPSS), and interpreting statistical results from articles in the research literature. Credit hours: 4. Prerequisite: PSYC 105 or permission of instructor. A student may receive credit for two of these courses: ECON 2227, MATH 2227, POL 2231, PSYC 2227, or SOC 3395. (QR)

PSYC 2228. Research Methods  Discussion of techniques used in psychological research. Topics include basic research designs, ethical research practices, the use of descriptive and inferential statistics within psychological research, drawing conclusions from results, and writing and reporting findings. Throughout the course, students will develop an original research hypothesis and will write a research proposal in an APA-style paper. Credit hours: 4. Prerequisite: PSYC 1105 and 2227.

PSYC 2251. Biological Bases of Behavior  This course presents a survey of the biological bases of human behaviors. The first part of the course consists of an introduction to structure and functions of the nervous system including the role of hormones in that function. The latter part of the course explores the application of those concepts to explanations of behavior with a special focus on humans. Credit hours: 4. Prerequisite: PSYC 1105. Alternate years.

PSYC 2260. Language Acquisition and Development  This course will introduce students to the study of human language. Topics will include processes and theories of language development, as well as cognitive and neurological building blocks of language. Although emphasis will be placed on typical patterns of language development, we will also explore how language develops in other contexts (e.g. developmental disability, deafness, bilingual households). Credit hours: 4. Prerequisite: PSYC 1105. Alternate years: offered 2022-2023.

PSYC 2286. One-Time Only

Fall 2021, Session 2: Biopsychology of Addiction

This course examines the biological, psychological and social factors related to addiction and recovery. The focus will be on the process of change that underlies both initiation and cessation of addictive behaviors and how influences interact with that process. Students will become familiar with the psychological theories of addiction, with special emphasis on neurobiological and learning theories. Prerequisite: PSYC 1105. Credits: 4.

181
PSYC 2288. One-Time Only

Spring 2022, Session 3: Extreme Cases of Psychopathology

Students will deeply and thoughtfully explore five cases of real persons with serious mental illness, ranging from a successful professor with schizophrenia to a personality-disordered serial murderer. Students will study the diagnostic features and myriad risk factors for the development of serious mental illness allowing them to gain greater awareness, understanding, and empathy towards those with significant psychological disorders.

PSYC 3305. Research in Psychology  Each student works on a research project in conjunction with a faculty member in the department. Projects may be at any stage of the research process, including a review of the literature, study design, data collection, data entry and analysis, writing up the final results and preparing research for a presentation. Often these projects precede or continue a Summer research project. The research time is supplemented by readings and individual conferences with the instructor. Credit hours: 1, 2, 3, or 4. Open only to psychology majors in consultation with faculty. Individual conferences to be arranged. Prerequisite: PSYC 228 or permission of instructor. May be repeated for credit up to a maximum of eight hours. Sections might be offered on a Pass/Fail basis at the discretion of the instructor.

PSYC 3316. Testing and Measurements  This course explores the theory and practice of psychological assessment. Major topics include test construction and validation, with attention to statistical techniques; appropriate test use, including legal and ethical issues; and major tests for measuring mental abilities, achievement, personality, and psychopathology. Throughout the course, students will develop and validate an original measurement tool and will report on their research in an APA-style paper. Credit hours: 4. Prerequisite: PSYC 2228. Alternate years: offered 2022-2023.

PSYC 3325. Psychology of Music  In this course, students will explore the ways that music engages the mind, brain, and body. The course will function as a seminar, with students reading research articles from the fields of music cognition, cognitive science, neuroscience, and developmental psychology. Students will understand and evaluate behavioral science methods used in research and integrate content with their own musical experiences. Credit hours: 4. Prerequisites: PSYC 2227 or permission of instructor. Alternate years: offered Fall 2021, Session 2.

PSYC 3330. Health Psychology  A study of psychological influences on health, illness, coping, stress, pain, and health-related behaviors. Discussion of how health is related to attitudes, emotions, personality, and social support. A focus on health-enhancing and health-compromising behaviors will allow students to develop and implement a personal health behavior modification program. Credit hours: 4. Prerequisite: PSYC 2228 or permission of instructor. Alternate years: offered Spring 2022, Session 3.

PSYC 3334. Thinking and Reasoning in Psychological Science  We are all necessarily consumers of psychological research. This course focuses on the skills that students need to critically evaluate scientific research. Students learn to analyze primary source articles, to identify strengths in weaknesses in research design, and more importantly, extrapolate from study results to draw conclusions regarding research findings. This includes discussing how study results generalize to other areas in psychology, and to other fields of study, such as law, educational settings, medical practice, and ethics. The course also focuses on building arguments, assessing the validity of assumptions, and understanding how historical schools of thought have influenced both scientific questions asked and how scientists have interpreted the answers. In order to accomplish these goals, the class studies a variety of historical and contemporary myths and controversies in the field of psychology, examining the research that gave rise to and/or refutes the myths and controversies, ending with a study of the current Open Science movement in psychology. Credit hours: 4. Prerequisite: PSYC 2228 or permission of instructor. Alternate years: offered 2022-2023.

PSYC 3338. Cognitive Neuroscience  This course explores the link between processes of mind and brain. The class will investigate how scientists utilize current technologies to understand the neuronal activity and anatomy of the brain that supports perception, memory storage, and recall, among other topics. Students will read and evaluate scientific sources and compare those findings to one popular culture depiction of a mind—zombies. Credit hours: 4. Prerequisite: PSYC 2228 or permission of instructor. Alternate years: offered Spring 2021, Session 4.

PSYC 3341. Evolutionary Psychology  An examination of how the processes of evolution have influenced the development of human thinking and behaviors. Exploration may include the study of reproductive behaviors, parental behaviors, aggression, altruism, emotional expression, language, and others. The course will be conducted primarily as a
seminar and include readings from popular press texts, theoretical scholarly articles, and original reports of research results. 
Credit hours: 4. Prerequisite: PSYC 2228 or permission of instructor. Alternate years.

PSYC 3343. Psychopharmacology  This course presents a look at the ways that drugs can affect behavior. The course will include an in depth review of neurotransmission including neurotransmitter systems and functions of the synapse. The effects of both recreational drugs and psychotherapeutic drugs on those systems will be presented along with discussion of behavioral consequences of using those drugs. Primary source readings will be used to explore the methodology of research in this area. Historical and contemporary social and medical policy for use and misuse of these drugs will also be considered. Credit hours: 4. Prerequisite: PSYC 2228. Alternate years.

PSYC 3351. History of Psychology  This course addresses the roots of modern psychological thought and methodology, from their origins in philosophy and the natural sciences through the refinements of psychology in its current form. In addition to learning about the major schools of psychology, e.g., Functionalism, Behaviorism, Psychoanalysis, students will explore how cultural forces shape psychological theories and the experiences of the people who develop them. Credit hours: 4. Prerequisite: sixteen hours in psychology and junior standing or permission of instructor.

PSYC 3361. Advanced Topics in Psychology  Exploration of a focused research area of psychology through primary source readings and discussion. Topics will vary from year to year. Credit hours: 4.

Fall 2021, Session 1: Psychology of Trauma

Explores traumatic events, the contexts in which they occur, and the range of posttraumatic reactions including cognitive, emotional, physical, and interpersonal functioning. Topics include sexual abuse, childhood trauma, terrorism, natural disasters, cultural trauma, school shootings, and combat trauma. Societal, cultural, and historical views of trauma as well as the epidemiology and theories of trauma and their impact will be discussed. Prerequisites: PSYC 2213 or permission of instructor. Credit hours: 4

PSYC 4401. Experimental & Advanced Research Designs  A lab-based course in research design with an emphasis on experimental design. Students conduct several experiments, analyze data, and interpret results. Critical analysis and synthesis of a body of literature informs the design and execution of a pilot study for the capstone project. An in-depth study of ethical principles in psychological research includes statistical and writing practices. This course is writing-intensive. Credit hours: 4. Prerequisite: PSYC 2228 and senior standing. (WI)

PSYC 4493, 4494. Capstone Seminar in Psychology  The two-session seminar involves development and execution of a senior research project. During the first session each student, in consultation with faculty, develops a proposal for a research project in a chosen area of psychology. These projects are carried out during the second session and are presented both in an American Psychological Association style research paper and orally to the seminar. Students present the results of their research at a regional conference. Credit hours: 4, 4. Prerequisite: PSYC 2228 and 4401.

RELIGIOUS STUDIES: SEE COMPARATIVE PHILOSOPHY DEPARTMENT LISTINGS FOR COURSES AND ADDITIONAL INFORMATION

RENAISSANCE STUDIES

Interdisciplinary Minor Coordinators: Mara I. Amster, Andrea W. Campbell

This minor will allow students to make connections across disciplines and to experience one of the richest periods in the history of Western culture, refracted through several lenses of humanistic scholarship. Recommended for students majoring in one of the fields included in the program with a special interest in this historical period.

SOCIOLGY

Faculty: Bradley P. Bullock, Danielle M. Currier

Sociology studies societies and cultures within a broadly comparative framework. The discipline illuminates the reciprocal relationship between human beings and their sociocultural environments and gives students a keener appreciation of their own social world, a less ethnocentric view of different ways of life, and a better understanding of the world system in which their society is one of many interdependent entities. The knowledge and perspective of sociology provide a useful approach to the analysis of interaction, inequality, and institutions, and offers insights into many topics of personal relevance and contemporary public debate.

The Department emphasizes applied sociology, theoretical and methodological expertise, service, and experiential learning. Students contribute to their major through internship and experiential learning outside the classroom. Moreover, sociology offers practical skills that lead to employment in a wide variety of professions.

Recommended Associated Courses

BIOL 1118; ECON 1101, 1102; EDU 1108; EVST 1104; GST 2201, 2203; MAC 1101; MATH 2227; POL 1102, 1113; PHIL1101, 1133; PSYC 1105, 2205, 2212; and SES 2262, 3364.

Experiential Learning Examples

Positions at the YWCA or Sexual Assault Awareness Program; research at the Central Virginia Planning District Commission; Miriam’s House (shelter); Daily Bread (food pantry); counseling and related programs at retirement centers, a halfway house for troubled youth, children’s homes, or family-planning agencies; various projects in local government agencies and law offices; health services for recent immigrants; Summer internships in social welfare agencies; service learning study abroad in the Caribbean.

Sociology Courses

SOC 1101. Human Societies    A study of the development and structure of human societies. Students are introduced to major sociological concepts, principles, and theories which contribute to a better understanding of the social world. Credit hours: 4. This course cannot be taken on a Pass/Fail basis. (SS)

SOC 1114. Contemporary U.S. Society  An introduction to contemporary social life in the United States through a survey of social structures, social interaction, and social change. Topics include the American family, sports, gender inequality, deviance and social control, electronic media, and the evolving concept of community. Credit hours: 4. This course cannot be taken on a Pass/Fail basis for major/minor credit. (CI, SS)

SOC 2209. Deviance and Social Control  Addresses the creation and enforcement of societal rules, why and how rules are violated, the repercussions of violating norms, and the ways that race, class, gender, and sexuality affect those repercussions. General explanations of deviance will be applied to a wide variety of specific examples ranging from gender non-conformity to white collar crime. Credit hours: 4. Prerequisite: Sophomore standing and either SOC 1101 or 1114 or permission of instructor. Offered every three years: Spring 2022. (SS)

SOC 2216. Contemporary Social Problems  An application of sociological perspectives toward understanding some widely recognized contemporary social problems, such as: poverty; sexism, racism, and homophobia; substance abuse; family violence and sexual abuse; AIDS, health care reform; global inequality; overpopulation; and the destruction of natural environments. The class focuses on creative and practical solutions, with particular attention to how countries similar to the U.S. address such problems. Credit hours: 4. Prerequisite: either SOC 1101 or 1114 or permission of instructor. Alternate years. (CI)

SOC 2218. Family and Kinship   An examination of the social construction of family and kinship, with a primary focus on the contemporary U.S. Special attention will be given to the significance of gender, race, and class in systems of kinship and to the interaction between family and other institutions. Credit hours: 4. Prerequisite: Sophomore standing and either SOC 1101 or 1114 or permission of instructor. Alternate years: offered Spring. (SS)

SOC 2222. Human Populations and Global Issues   The most challenging problems in the world are tied to changes in human populations and the future quality of life on our planet depends on how people address those demographic changes.
This course is an introduction to population processes such as fertility, rapid world population growth and migration, and to human geography. Issues addressed include globalization, urbanization, human trafficking, conflict, geopolitics, and environmental change. Credit hours: 4. Prerequisite: sophomore standing. (SS)

**SOC 2231. America at the Margins** An examination of the social construction of difference in late 20th and early 21st century America. This course focuses on social groups and communities that live on the physical and metaphorical borders of American culture such as addicts, queers, criminals, and illegal immigrants. Particular attention will be given to the ways in which their presence shapes contemporary ideological discourse. Credit hours: 4. Prerequisite: sophomore standing or permission of instructor. Alternate years. (CI)

**SOC 2262. Topics in Sociology** Concentrated reading and discussion pertaining to a specific area or issue in sociology. Previous topics include Sociology of Sexuality, Black Feminist Theory, The Construction and Deconstruction of Masculinity, and Race and Cartoons. Credit hours: 4. Prerequisite: sophomore standing and either SOC 1101 or SOC 1114 or permission of instructor.

**SOC 2265. Social Theory** Discussion of the nature and role of theory in social science research. Notable works in sociology will be read, discussed, and evaluated, starting with Karl Marx, Emile Durkheim, and Max Weber and finishing with Critical Theory, Feminist Theory, and Postmodernism. Credit hours: 4. Prerequisite: sophomore standing and either SOC 1101 or 1114 or permission of instructor. Offered Fall. (SS)

**SOC 2276. Sociology of Gender** An introduction to the sociological way of studying and understanding gender. Gender is social — it affects everyone, regardless of sex, sexual orientation, race, class, religion, etc. This class explores the ways gender is socially constructed and perpetuated. Students study how to examine gender at the micro (individual) and macro (social institutions, culture) levels in society. Credit hours: 4. Prerequisite: sophomore standing and either SOC 1101 or SOC 1114 or G ST 2201 or G ST 2203 or permission of instructor. Alternate years: offered Spring. (CI, SS)

**SOC 2310. Community** This course is designed to give students some tools for thinking and talking about community, allowing them room to explore the meaning and value of that concept, in various guises and from varied points of view. While focused on the U.S., the course will frequently compare the concepts and practices of community in the U.S. to those of other societies. The course is structured around some large questions within which the class will consider issues or topics related to community. For example, around the question “In what ways does technology affect community?” The class will explore the use of automobiles and INTERNET chat-rooms. Around “How do we encourage or conserve community?” students will examine ecology and architecture. It is better to see the course as an open, ongoing dialog, dynamic and circular, rather than a linear series of lectures about topics in some definite order. The main objective of the course is to leave students with their own, informed sense of community and enough ideas, concepts, skills, and resources to enhance their future understanding of community however they may create or experience it. Credit hours: 4. Prerequisite: Sophomore standing and either SOC 1101 or SOC 1114 or permission of instructor. Alternate years: offered Spring. (CI, SS)

**SOC 3310. The Individual and Society** Focusing on sociological social psychology, this course examines how people’s ideas, thoughts, beliefs, attitudes, feelings, and actions are affected by the actual, imagined, or implicit presence of others. The class highlights social and institutional influences on individuals, assuming that our lives are directed by both internal and external factors. Students study how cultural expectations about things like gender, race, sexuality, class, religion, agency, power, and inequality affect our self-conceptions and interactions with others. Credit hours: 4. Prerequisite: junior standing and SOC 1101 or 1114 or permission of instructor. Alternate years. (SS)

**SOC 3327. Social Stratification** A study of the nature, causes, and consequences of social inequality. Students will analyze concepts of class, status, and power, and examine issues such as credentialism and upward mobility, welfare, unemployment, and comparable worth. The course concentrates on distributive processes in the United States but is broadly comparative and includes the study of international inequality. Credit hours: 4. Prerequisite: Sophomore standing and SOC 1101 or 1114 or permission of instructor. Alternate years: offered Spring. (CI)

**SOC 3335. Developing Countries of the Caribbean Basin** An exploration of the challenges and obstacles facing the developing countries in this region. The course is structured to address a series of controversial issues such as: Why are some countries developing rapidly while others remain stagnant? Are rates of poverty, hunger, or other indicators of social well-being improving over time in countries that post economic gains? What roles, if any, should the United States or other industrialized countries play in providing technology, foreign aid, or other forms of assistance? Topics will include population
growth, the emerging roles of women, the impact of transnational corporations and international trade, destruction of natural habitats, and eco-tourism. Students develop case studies of a particular country in the region and may choose to participate in a mock international forum. **Credit hours:** 4. **Prerequisite:** sophomore standing or permission of instructor. Alternate year, offered Fall. (CI)

**SOC 3342. Assuming Whiteness**  
An examination of the creation, representation, and maintenance of “whiteness” as a racial category. It explores the process by which certain groups have moved from racial “other” to “white,” the visual representation of “whiteness,” and the social, cultural, and political ramifications of being white (and non-white) in America. **Credit hours:** 4. **Prerequisite:** junior standing or permission of instructor. Identical with MAC 3342. Alternate years. (CI)

**SOC 3355. Black Feminist Theory**  
This course examines the development of Black Feminist Theory in Sociology, starting in the 1800s and going to the present day. The concept of “intersectionality” came from this theoretical tradition, so students will learn both about the history of Black Feminist thinkers and applications in today’s world, including various social movements (feminist, civil rights, #BLM, #MeToo). **Credit hours:** 4. **Prerequisite:** junior status and SOC 1114, or permission of instructor.

**SOC 3367, 3368. Research Project**  
An investigation of a sociological problem, under the supervision of a member of the Department. **Credit hours:** 1, 1; 2, 2; or 3, 3. **Prerequisite:** junior standing and SOC 1101 or SOC 1114 or permission of instructor.

**SOC 3394. Social Research and Qualitative Analysis**  
This course is an intensive, hands-on introduction to the gathering and analysis of qualitative data. Students will be introduced to various techniques for selecting and formulating research problems, designing research projects, and collecting and analyzing qualitative data. Specifically, students will focus on interviews, oral histories, field research, and content analysis. The research, writing, and analysis skills learned in this course are useful for a wide variety of jobs and are necessary for pursuing graduate study in any social science. **Credit hours:** 4. **Prerequisite:** junior standing and SOC 1101 or 1114, and SOC 2265, or permission of instructor. **Offered Spring.** (SS)

**SOC 3395. Social Research and Quantitative Analysis**  
A practical workshop emphasizing learning by doing, survey research and quantitative analysis. Students will be introduced to basic techniques for selecting and formulating research problems, designing research projects, and collecting and analyzing data. The course is structured to practice basic quantitative skills. These skills are useful toward more advanced study in graduate or professional schools and are immediately desirable for many professions. **Credit hours:** 4. **Prerequisite:** junior standing and either SOC 1101 or 1114 or permission of instructor. A student may receive credit for two of these courses: ECON 2227, MATH 2227, POL 2231, PSYC 2227R, or SOC 3395. **Offered Fall.** (QR)

**SOC 4495. Seminar in Advanced Social Research**  
In this capstone course for the major, students will focus on high-level, applied analysis of recent research in the field. Goals include sharpening analytical abilities, honing skills for writing or speaking professionally about important sociological issues, and finishing the major with knowledge of some important studies from major academic journals. Students will also practice skills needed for making the transition to graduate school or employment, including writing critiques of professional research in an area of the student’s interest and selection of a previously written paper to revise as a writing sample. Finally, students will hear presentations or engage in other activities to facilitate meeting their goals following graduation. **Credit hours:** 4. **Prerequisite:** senior standing, SOC 2265, and either SOC 3394 or 3395 or the equivalent or permission of instructor. **Offered Fall.**

**SOC 4496. Sociology Thesis**  
Students will undertake an original, independent research project under the supervision of a faculty member. The finished project will approach a paper of publishable quality, suitable for submission to professional conferences. Findings from these projects will, at least, be presented to the faculty and majors. Note: this course is an option for students who meet a minimum GPA requirement in the major and who are advised to pursue the project based on their personal and professional goals. **Credit hours:** 4. **Prerequisite:** senior standing and SOC 4495 or permission of instructor.

**SOC 4496L. Advanced Analysis**  
Students will collect original data or apply a specific method as part of their thesis project, under the direction of a faculty mentor. Students complete an analysis of data that meets professional standards and gain practical experience in conducting advanced research projects. Highly encouraged for students with plans for graduate or professional school or professional careers that prioritize analytical skills. **Credit hours:** 1. **Corequisite:** SOC 4496. **Offered on a Pass/Fail basis only.**
Spanish: See World Languages Department listings for courses and additional information

Theatre: See Performing Arts Department listings for courses and additional information

World Languages

Faculty: Kun An, Daniel Cooper, Maria Vázquez-Castro

Students who complete a major or minor in the Modern Languages, Literatures, and Cultures Department gain an appreciation of modern cultures as well as a new perspective on their own heritage. Study of the literary, cultural, social, and political institutions of the country where the language is spoken help develop the student’s awareness of international interdependence. At the same time, the departmental offerings encourage an increased understanding of the logic of language and a proficiency in speaking, writing, reading, and understanding a second language.

The Department offers majors and minors in Spanish, as well as minors in Chinese Studies, Classical Civilization and Latin. Opportunities also exist for students interested in teaching English as a foreign language.

Students majoring in Spanish become conversant with the language, literature, and culture of Spain and Latin America. The Major Program in Spanish helps prepare the student for work in international business and industry and for graduate study in areas such as language and literature, art, music, law, international relations, and teaching, among others. Chinese Studies, an interdisciplinary minor, presents students the opportunity to gain spoken proficiency in Mandarin, as well as Chinese reading and writing skills. Beyond providing language training, the College offers a number of courses that give insight into Chinese culture, society, and politics.

Students are strongly encouraged to supplement their coursework in the Department by spending one or two semesters abroad, in a country where the language they study is spoken.

Classics

Faculty: Amy R. Cohen, Susan T. Stevens

The history of thought since the time of Aristotle has witnessed the fragmentation of knowledge into increasingly more specialized categories, a trend which continues unabated today. Yet in the public debate on almost any contemporary issue of significance, there are moral, political, aesthetic, or technological considerations which overlap and often conflict; an understanding of these interrelationships is crucial if one is to be a competent citizen in an increasingly complex world.

The unique virtue of a minor in Classical Civilization is that it is by nature interdisciplinary, entailing the study of language, history, art and literature, religion, and philosophy. Because many of the great issues which confronted the Greeks and Romans are precisely those which we are still trying to resolve, the study of the classics provides an excellent introduction to the many facets of human struggle and achievement. It is the essence of the liberal arts, to which, to borrow a phrase from Terence, no dimension of human experience is foreign.

Twenty hours in Spanish courses above SPAN 2202

Total for Minor in Spanish

20

Recommended Courses

For majors: a second foreign language through the intermediate level; courses in European, Spanish or Latin American history; art; religion; philosophy; mythology; comparative politics; and in English, American, and foreign literature. For Spanish majors: courses in Latin American civilization, economics, and politics.
Special Programs

Majors are encouraged to study abroad in Summer and junior year programs, to make use of the Media Center and the Department’s collection of audiovisual materials and foreign language periodicals, and to participate in the language dining-hall tables and interest clubs. Exchange programs exist with the University of Santiago de Compostela in Spain and the l’Université Catholique de l’Ouest in France.

Experiential Learning Examples

Teaching in the elementary grades at James River Day School and interning in the marketing division of BWX Technologies, Inc. Internships are also available through the auspices of a sister cities program with Rueil-Malmaison, France.

Chinese Language Courses

CHIN 1101, 1102. Elementary Chinese An introduction to modern Chinese (Mandarin), emphasizing correct pronunciation, conversational skills, basic grammar, and reading and writing. Credit hours: 4, 4. (LA)

CHIN 2201, 2202. Intermediate Chinese This course focuses on acquisition of practical, oral vocabulary, as well as development of reading skills. In addition, it treats grammatical structures and idiomatic speech. Credit hours: 4, 4. Prerequisite: CHIN 1102. (LA)

CHIN 3301, 3302. Third-Year Modern Chinese This course sequence continues the development of vocabulary, as well as conversational and reading skills, acquired in the first two years of Chinese language training. Credit hours: 4, 4. Prerequisite: CHIN 2202 or the equivalent. (LA)

CHIN 3310. Business Chinese Designed for advanced Chinese language students, this course aims to develop a student’s understanding of a business environment, mixing command-economy from the Maoist era and the market economy after Deng Xiaoping’s reforms. Students will also learn courteous speech, business jargon, and the language of marketing and foreign trade. Credit hours: 1. Prerequisite: CHIN 2202 and permission of instructor.

CHIN 4401, 4402. Fourth-Year Modern Chinese This course sequence expands and extends material from third-year Chinese through the study of newspaper articles and films produced in the People’s Republic of China. Through the reading and discussion of materials relating to current political and social issues, students are led to enhance their communicative skills (in both speaking and writing) to a more formal level, as well as to develop awareness of social issues in contemporary China. Instruction is in Chinese in a teacher-learner discussion format, with compositions and verbal debate required. Credit hours: 4, 4. Prerequisite: CHIN 3302.

Chinese Culture and Literature Courses in English

CHIN 1105. Chinese Culture through Film This course will study a broad variety of films produced in Mainland China, Taiwan, and Hong Kong and will provide a window into Chinese culture and society. Discussion of films will enable students to improve their understanding of many aspects of Chinese culture. Credit hours: 4. Alternate years: offered Spring. (CI, HE)

CHIN 1106. Modern Chinese Literature This course will introduce students to the ideas of important writers in the 20th and 21st centuries. By relating the modern fiction, poetry, and essays to those works’ historical contexts, this course will provide students with insight into a) how the Chinese live, work, think, feel, interact, love, and die; b) how the beliefs, mentality, and social relations of the Chinese have changed and why they have changed; c) how the West has affected China; and d) how Chinese works and masterpieces stand on their own merit. Credit hours: 4. Alternate years. (CI, HE)

CHIN 3386: One-Time Only

Fall 2021, Session 2: Chinese Cultural Issues in International Media

Designed for Chinese international students and Chinese language learners at 300/400 levels. The aim of the course is to enhance students’ intercultural knowledge and intercultural communication skills. Students will read and discuss texts on controversial topics occurring within the past 5 years in China. Each controversial topic will be explored by
comparing propaganda news from People’s Daily with publications from diverse international media. Credit hours: 4. Prerequisite: CHIN 2202.

Classical Civilization Courses

CLAS 1132. Classical Mythology  An investigation into the nature and uses of myth in ancient Greek and Roman cultures. Topics include the social significance of myth, the use of myth in art and literature, and the influence of Greco-Roman myth on Western civilization. Credit hours: 4. (HE, WI)

CLAS 1144. Athens, Rome, and Alexandria  This course examines Athens, Rome and Alexandria as the physical setting for the drama of daily life and history in three culturally distinct but interrelated urban centers in the ancient Mediterranean. Besides considering how the landscape, monuments, and material culture of these cities reflected and shaped the political, commercial, domestic, religious, and social lives of its citizens, the course reflects on the changing patterns of urban life in these living cities in the ancient, medieval, and modern worlds. Credit hours: 4. Rotating. (HE)

CLAS 1175. Sport and Spectacle  This course explores the ancient roots of modern athletics and mass entertainment through analyses of texts, works of art, and the archaeological settings of sport and spectacle that highlight their essential role in ancient societies. The Olympic games asserted Greek identity, civic virtue and competitive spirit; gladiatorial combat and chariot racing defined relationships between Romans and others, rulers and subjects. Identical with SES 1175. Credit hours: 4. Alternate years. (HE)

CLAS 1177. Classical Philosophy  An introduction to ancient Greek philosophy. Topics include the nature of reality, human nature and happiness, political order. Readings are selected from the pre-Socratics, Plato, Aristotle, and others. Identical with PHIL 1177. Credit hours: 4. (HE)

CLAS 1179. Masterworks of Greek and Roman Art  As an introduction to the artistic culture of ancient Greece and Rome, this team-taught course discusses select works of art and architecture in depth, from both art historical and archaeological perspectives. Its aim is to set works of art in their specific historical and cultural context while exploring the connection (in style, material, technique, aesthetic) between them and our world. Identical with ARTH 1179. Credit hours: 4. Rotating. (HE)

CLAS 1180. Mediterranean Empires  This is a survey course covering the history of the Mediterranean from the introduction of agriculture (c. 9000 BCE) to the rise of Islam (632 CE). The course considers the cultural, political, and social history of the region across this period, paying particular attention to the Greeks and Romans. Credit hours: 4. Identical with HIST 1180. Rotating. (HE)

CLAS 1181. Greek Drama Production Laboratory  This course is open to students who are full-time members of the cast or crew of the Greek Play but not enrolled in CLAS/THTR 275. It provides practical experience with the production of an ancient play. Identical with THTR 1181. Credit hours: 1 or 2. Prerequisite: permission of instructor. Alternate years: offered Fall. Offered on a Pass/Fail basis only. May be repeated for credit.

CLAS 1183. Classical Rhetoric and Persuasive Power  We have inherited from ancient orators an understanding of the power of words to persuade and ideas about what makes a good speech appeal to an audience. Students will analyze speeches, delve into ancient rhetorical thinking, and apply its arts to speeches of their own. Students will read and write in English. Identical with MAC 1183. Credit hours: 4. Alternate years. (AE)

CLAS 1186. One-Time Only

Spring 2022, Session 4: Scientific and Legal Terminology from Greek and Latin

This course focuses on the history and structure of words of the majority of technical terms in medicine, the sciences, and law that use Greek and Latin roots as their building blocks. Students will learn elements of word formation (prefixes, suffixes, and bases) to develop word-analytical techniques and build vocabulary and recognition. Excellent preparation for standardized tests such as the GMAT, GRE, LSAT, and MCAT. Credit hours: 4.
CLAS 2275. Greek Drama  The tragedies of Aeschylus, Sophocles, and Euripides and the comedies of Aristophanes studied in the context of ancient theatrical conventions, with an emphasis on theories and practices of performance. In-depth study of the play in production as the Greek Play, with required student participation (in any of a number of capacities) to put principles of the class into action. Identical with THTR 2275. Credit hours: 4. Alternate years: offered Fall. (AE, HE)

CLAS 2280. Sci-Fi, Fantasy, and Classical Traditions  This course explores how the genres of speculative fiction draw on and departs from ancient Greek and Roman literature, philosophy, myth, history, and art: in other words, how sci-fi and fantasy both transmit and transmute ancient materials and form deep wells of receptions of the ancient world. Students will focus on themes of perennial human significance (e.g., the uses of history, technology, fantastic voyages, metamorphosis, knowledge/wonder, and so on) in books, comics, films, television, and more. Identical with ENGL 2280. Credit hours: 4. Prerequisite: CLAS 1132 or permission of instructor.

CLAS 4491. Research for the Senior Program  A course for preliminary preparation of the senior project. Course requirements include meeting with a supervisor to explore the feasibility of possible topics for the senior project, refining the questions to be asked, compiling an annotated list of sources, and generally laying the groundwork for writing the senior paper. Credit Hours: 1. Prerequisite: senior standing or permission of instructor.

CLAS 4494. Senior Project  An independent research project carried out in close consultation with the faculty supervisor. It will normally be an investigation of some aspect of Greek or Roman civilization and will typically utilize ancient source materials as well as modern scholarship. Credit hours: 4. Prerequisite: permission of the Department.

French Language, Literature and Culture Courses
Courses in French are available at University of Lynchburg as part of a Tri-College consortium agreement.

FREN 1101, 1102. Elementary French  Introduction to the four basic skills and to French culture, with emphasis on oral communication. The program is strongly supported by audio and visual materials. Coursework is supplemented with weekly one-on-one conversation sessions with language tutors. Credit hours: 4, 4. (LA)

FREN 2201, 2202. Intermediate French  Continued practice for oral proficiency with increased emphasis on reading and writing. The program is supported by audio and visual materials. Coursework is supplemented with weekly one-on-one conversation sessions with language tutors. Credit hours: 4, 4. Prerequisite: satisfactory completion of a first-year college-level French language course or the equivalent, or placement. (LA)

FREN 2213. Conversation and Phonetics  Development of fluency and accuracy of spoken French, building discussion skills and listening comprehension, refining pronunciation through the study of phonetics, and practice with audio materials. In addition to conversations on daily life, students will learn and practice higher level speaking skills to express and support opinions and discuss abstract ideas. Discussions may revolve around current social issues in French society. Credit hours: 4. Prerequisite: FREN 2202, placement, or permission of the Department. (LA)

FREN 2216. Grammar and Composition  Review of French grammar as preparation for 300- and 400-level courses. Practice in aural-oral skills and also in building more complex sentences and organizing paragraphs and short papers. Credit hours: 4. Prerequisite: FREN 2202, placement, or permission of the Department. (LA)

FREN 2232. Reading French Literature  An introduction to reading French literature through short stories, short novels, plays, and/or poetry. Emphasis is on the development of strategies and techniques for reading comprehension, building vocabulary, and developing the oral and written skills necessary for discussion and analysis of literature. Credit hours: 4. Prerequisite: FREN 2202 or the equivalent, or permission of the Department. (LA)

FREN 3310. Topics in French Literature  This course will explore a particular topic, theme, era, or genre in French literature. Sample topics include “The New Generation: French Fiction Since 1990,” “Short Fiction Genres,” and “Power Plays: Master and Servant in French Literature.” Credit hours: 4. Prerequisite: FREN 2213; 2216; or 2232; or permission of the Department. May be repeated for credit when topic differs.

FREN 3319. Women Writers  An introduction to French literature and literary analysis based on texts illustrating relationships, roles, and achievements of women from the Middle Ages to the present. Credit hours: 4. Prerequisite: FREN 2213; 2216; or 2232; or permission of the Department.
FREN 3320. Topics in Post-Colonial African and Caribbean Literatures in French  Emphasis on the concepts of diversity, alienation and identity formation in post-colonial African and Caribbean literature, written in French. Topics may include “Literature of the Maghreb,” “Voices of Women from the Maghreb and Sub-Saharan,” “Cinema and Literature of Immigration.”  Credit hours: 4. Prerequisite: FREN 2213; 2216; or 2232; or permission of the Department. May be repeated for credit up to a maximum of eight hours when topic differs. Offered as needed. (CI)

FREN 3365. French Civilization I  A historical approach to the understanding of French civilization, highlighting its importance in the making of contemporary society, politics, artistic, and intellectual life. This course will help students develop the speaking and writing strategies of advanced-level users. Credit hours: 4. Prerequisite: FREN 2213; 2216; or 2232; or permission of the Department. (CI)

FREN 3366. French Civilization II  Understanding the French through their everyday life. This course will focus on contemporary aspects of French society: education, the political system, the economy, music and films, immigration, and globalization. Taught from a comparative perspective. This course will help students develop speaking strategies of advanced-level language users, such as the ability to formulate and defend opinions. Credit hours: 4. Prerequisite: FREN 2213; 2216; or 2232; or permission of the Department. (CI)

FREN 3372. Advanced Language Workshop  This course will focus on the development of advanced competence in written French, with special emphasis on stylistic variations, lexical nuances, and complex grammatical structures. Extensive revision and rewriting, in-class analysis and critique as well as individual conferences. Highly recommended for all students currently taking or planning to take upper-level work in French. Credit hours: 4. Prerequisite: FREN 2216 and one 3300-level course.

FREN 4410. Topics in French Civilization and Literature  This course will examine various themes that are relevant to French intellectual and social life. Past themes have focused on “French for Business,” “Voices of Marginality,” “French Cinema,” “Kings and Rebels in Seventeenth and Eighteenth Century Literature,” and “Images of Childhood in French Literature.”  Credit hours: 4. Prerequisite: two 3300-level courses, one of which must be in literature. May be repeated when the topic differs.

FREN 4420. Topics in French and Francophone Literature  The course will focus on a theme, movement, genre, or period which links the selected works in a common or conflicting tradition. Class discussion and short papers will aim at developing the ability to read literature critically. Credit hours: 4. Prerequisite: two 3300-level courses, one of which must be in literature. May be repeated when the topic differs.

FREN 4493. Senior Seminar  Intensive study and discussion on a topic to be announced each year. The seminar is designed to help develop critical perspectives in literature and culture and to offer a framework for the early stages of work on the senior paper. The course will require both essays and oral presentations. Credit hours: 4. Prerequisite: permission of the Department.

FREN 4494. Senior Thesis  Each student will work closely with a faculty supervisor to prepare a substantial critical paper of about 25 pages to be presented to faculty and students of the Department. Introduction to schools of critical thought. Credit hours: 4. Prerequisite: FREN 4493 and permission of the Department.

German Language Courses
Courses in German are available at University of Lynchburg as part of a Tri-College consortium agreement.

Greek Courses

GREK 1101, 1102. Elementary Ancient Greek  An introduction to classical Greek, with emphasis on basic grammar and syntax. Reading of simple prose and poetry. Classical Greek is also excellent preparation for Homeric and biblical Greek.  Credit hours: 4, 4. (LA)

GREK 1105. Online Beginning Ancient Greek  An introduction to classical Greek, with emphasis on basic grammar and syntax. An excellent preparation for Homeric and biblical Greek as well as the prose and poetry of classical Athens, this online course is designed for students seeking swift advancement to further levels of Greek, for students getting their Greek back up to speed, or for students enriching their understanding of Latin. Students seeking to fulfill Randolph College language requirements should enroll in Greek 1101, 1102. Credit hours: 6. Offered Summer only.
**GREK 2201, 2202. Intermediate Ancient Greek**  Students read a selection of unabridged ancient Greek prose and poetry with special attention to fluid translation and comprehension. Coursework will include review of basic grammar and syntax and introductions to the variations of Greek style and meter. *Credit hours: 4, 4. Prerequisite: GREK 1102, two high school entrance units of Greek, or placement.*

**GREK 3301. Plato**  As an introduction to his thought and Greek style, the course will focus on a whole dialog of Plato. *Credit hours: 4. Prerequisite: GREK 2202. Rotating. (AE)*

**GREK 3302. Homer**  The course will present the Homeric dialect, the place of epic in ancient and world literature, and selections from the Iliad and Odyssey. *Credit hours: 4. Prerequisite: GREK 2202. Rotating. (AE)*

**GREK 3304. Greek Choral and Lyric Poetry**  From Sappho to Pindar to Callimachus, the course surveys the varieties of non-Epic Greek poetry, with special concentration on the musicality of meters. *Credit hours: 4. Prerequisite: GREK 2202. Rotating. (AE)*

**GREK 3305. Greek Rhetoric**  This course will delve into Athenian rhetoric through the speeches of Lysias and Demosthenes. *Credit hours: 4. Prerequisite: GREK 2202. Rotating. (AE)*

**GREK 3307. Greek Dramatic Poetry**  A whole Athenian tragedy or comedy, with selections from other plays, will introduce students to the language and style of the earliest Western dramas. *Credit hours: 4. Prerequisite: GREK 2202. Rotating. (AE)*

**GREK 3309. Koine Prose: New Testament and the Greek Novel**  An introduction to the Greek that was the lingua franca of the eastern Roman Empire. With reference to classical Greek models for prose narrative style, the course will be divided between selections from the New Testament and other early Christian writings and selections from ancient romances such as Daphnis and Chloe and An Ethiopian Story. *Credit hours: 4. Prerequisite: GREK 2202. Rotating. (AE)*

**Latin Courses**

**LATN 1101, 1102. Elementary Latin**  An introduction to classical Latin, with emphasis on basic grammar and syntax and reading of simple prose and poetry. *Credit hours: 4, 4. (LA)*

**LATN 2201, 2202. Intermediate Latin**  Students read a selection of unabridged Latin prose and poetry with special attention to fluid translation and comprehension. Coursework will include review of basic grammar and syntax and introductions to the variations of Latin style and meter. *Credit hours: 4, 4. Prerequisite: two or three high school entrance units in Latin, LATN 1102, or placement.*

**LATN 3301. Roman Comedy**  An introduction to the genre of ancient comedy through reading one play each of Plautus and Terence. *Credit hours: 4. Prerequisite: LATN 2202. Rotating. (AE)*

**LATN 3302. Roman Historians**  An introduction to Roman historiography through reading selections from Livy and Tacitus. The course emphasizes the history of early Rome and the Julio-Claudian principate. *Credit hours: 4. Prerequisite: LATN 2202. Rotating.*

**LATN 3303. Vergil**  Reading selections from the Aeneid. The course emphasizes the culture of the Augustan Age. *Credit hours: 4. Prerequisite: LATN 2202. Rotating. (AE)*

**LATN 3304. Lucretius and Ovid**  Readings in non-heroic Roman epic with selections from Lucretius and Ovid. *Credit hours: 4. Prerequisite: LATN 2202. Rotating. (AE)*

**LATN 3305. Cicero**  An introduction to Latin prose style through reading one of Cicero’s oratorical works and a selection of letters. The course emphasizes the history of the late Republic. *Credit hours: 4. Prerequisite: LATN 2202. Rotating. (AE)*

**LATN 3306. Latin Prose Composition**  A survey of advanced grammar and syntax of the Latin language accompanied by extensive exercises in composition. The course also includes readings in Latin prose with an emphasis on sight reading. *Credit hours: 4. Prerequisite: six hours of college-level Latin numbered above LATN 2202. Rotating. (AE)*
LATN 3308. Lyric Poets  
Introduction to Latin lyric through reading selections of Horace and Catullus. Credit hours: 4. Prerequisite: LATN 2202. Rotating. (AE)

Spanish Language, Literature and Culture Courses

SPAN 1101, 1102. Elementary Spanish  
First session: Introduction to the basic phonological and structural patterns. Emphasis on oral-aural skills. Second session: Continuation of Spanish 1101 with increased practice in simple reading and writing. Credit hours: 4, 4. (LA)

SPAN 2201, 2202. Intermediate Spanish  
Continued practice in oral-aural skills. A grammar review designed to strengthen the command of the spoken and written language. Online exercises are used to improve fluency and comprehension. Spanish 2202 is a continuation of Spanish 2201. Credit hours: 4, 4. Prerequisite: SPAN 1102 or placement. (LA)

SPAN 2222. Topics in Hispanic Literature  
When offered, this course is identical to Spanish 422, except that the student may read much of the literature in English (a few works may be available only in Spanish), and may write papers in English. Classes are conducted in Spanish. Credit hours: 4. Prerequisite: SPAN 3302 or permission of instructor. May be repeated for credit when topic differs.

SPAN 2231. Modern Latin American Literature  
Readings in the short story, the novel, drama, and poetry. Special focuses are political and social problems, as these are defined by contemporary Latin American writers, and literary styles and techniques. The course is conducted in Spanish, but non-Spanish majors may do most of the reading in English and may write their papers in English. Credit hours: 4. Prerequisite: SPAN 3302 or permission of instructor. Alternate years: offered Fall.

SPAN 2286 and 2286S: One-Time Only (International Travel Course)

Spring 2021, Session 4 and Summer 2021: Conflict and Confluence: Christianity, Islam, and Judaism in the Art and Literature of Early Spain

This international travel course begins on campus in the fourth session and travels to Spain in late May. With an interdisciplinary approach, the class will explore intercultural exchanges between Christians, Muslims, and Jews in early modern Spain. Through the study of art, architecture, and literature, students will learn about key moments in Spain’s development from the fifth to the seventeenth centuries, including the Visigothic period, the Muslim conquest of the Iberian peninsula, the Christian “reconquest” against Islam, and the expulsion of the Jews. Students will learn that despite the oppression and conflict between these groups, there was the assimilation of artistic forms and even friendship, as seen in the novel The Abencerraje. No prior knowledge of Spanish is required. Credit hours: 1 (2286); and 3 (2286S). Identical with SPAN 2286 and 2286S with the same title. (AE, HE)

SPAN 3301, 3302. Composition and Conversation  
Intensive practice in oral and written Spanish. Readings from a variety of texts and a review of grammar. The course includes weekly individual conversation sessions. Credit hours: 4, 4. Prerequisite: SPAN 2202 or placement. (LA)

SPAN 3321. Conversational Spanish  
This course provides the opportunity to practice conversational skills one hour per week. The course format may include class discussion of general topics, small group activities such as role playing, and weekly individual conversation sessions. Credit hours: 1. Prerequisite: SPAN 3301 or permission of instructor. May be repeated for credit. Offered on a Pass/Fail basis only.

SPAN 3333. Spanish Culture  
An overview of the culture and civilization of Spain from pre-Roman times to the present. Focuses include geography, the arts, and social institutions and contemporary society in the post-Franco era. Recommended in preparation for study in Spain. Credit hours: 4. Prerequisite: SPAN 3302 or permission of instructor. Alternate years: offered Spring

SPAN 3335. Topics in Latin American Culture  
An exploration of selected aspects of Latin American Culture primarily through literature, painting, and film. More popular cultural elements such as music, cuisine, and leisure pastimes are also considered. Focuses include Latin American attitudes toward pre-Columbian civilizations, religion, social structures, and the U.S., as well as regional differences. Recommended as preparation for study in Latin America. Credit hours: 4. Prerequisite: SPAN 3302 or permission of instructor. Alternate years.
SPAN 3366. Approaches to Hispanic Literature    An introduction to the short stories, drama, and poetry of Spain and Latin America. The student will examine and practice various approaches to literary interpretation. Credit hours: 4. Prerequisite: SPAN 3302 or permission of instructor. (HE)

SPAN 4406. Advanced Language Study    Readings from periodicals, essays, and fiction will be used in conjunction with a grammar text to explore modern Spanish usage and contrasts between Spanish and English. Focuses include advanced grammar, use of idiomatic expressions, translation, word order, and stylistics. Students polish their language skills through writing and conversation. This course is recommended for those planning to teach Spanish. Credit hours: 4. Prerequisite: SPAN 3302 or equivalent. Alternate years.

SPAN 4422. Topics in Hispanic Literature    Special focuses on aspects of Hispanic and Spanish literature. Recent topics have included “The Modern Latin American Novel” and “An Introduction to Latino Literature.” Credit hours: 4. Prerequisite: SPAN 3302 or permission of instructor. May be repeated for credit when topic differs.

SPAN 4431. Modern Latin American Literature    Readings in the short story, the novel, drama, and poetry. Special focuses are political and social problems, as these are defined by contemporary Latin American writers, and literary styles and techniques. Identical with SPAN 2231, but readings and papers must be done in Spanish. Credit hours: 4. Prerequisite: SPAN 3302 or permission of instructor. Alternate years: offered Fall.

SPAN 4469. Research for the Senior Program    An independent study course for preliminary preparation of the Spring senior project. Course requirements include compiling an annotated list of sources, meeting with a supervisor to explore the feasibility of possible topics for the senior project, and generally laying the groundwork for writing the senior paper. The goal is to maximize the time a student devotes to writing and revising the senior paper in the Spring. Credit hours: 1. Prerequisite: senior standing. Offered on a Pass/Fail basis only. This course is required of all senior majors who are not reading for Honors in Spanish.

SPAN 4471. Seminar    Intensive study and discussion on a topic or author(s) to be announced each year. Preparation and presentation of short papers during the session. Credit hours: 4. Prerequisite: senior standing or permission of the Department. May be repeated for credit once when topic differs.

SPAN 4494. Senior Project    An independent research or study project on a topic of the student’s choice under the direction of a member of the Department. Credit hours: 4. Prerequisite: SPAN 4471 and senior standing, or permission of the Department.

Grant Kittrell, M.F.A.
Director of Academic Services Center and the Writing Program

Martha Kjeseth-Johnson, M.A.
Director of the Maier Museum

Jeannette M. Rork, M.A.
Registrar

Diane L. Roy, M.A., M.Ed.
Coordinator of Disability Services

Kimberly Sheldon, M.Ed.
Director of Student Success

ENROLLMENT DIVISION

Travis Carter, B.B.A.
Dean of Admission

Roderick Johnson, Ed.D.
Director of Financial Aid

Denise Rindler, B.S.
Assistant Director of Financial Aid

Emily P. Sorensen, B.S.
Director of Admission Operations

FINANCE AND ADMINISTRATION

Jonathan P. Tyree, B.B.A., C.P.A.
Vice President for Finance and Administration

Tracey T. Garrett, M.Ad.
Director of Finance and Budget

Victor M. Gosnell, M.Ed.
Chief Technology Officer

John Leary
Director of Buildings and Grounds

Mitchell T. Rodhe, B.S.
Director of Dining Services

INSTITUTIONAL ADVANCEMENT

Farah M. Marks, B.S.
Vice President for Institutional Advancement

Brenda D. Edson, B.A.
Director of College Relations

Tamara D. Jamerson, B.A.
Director of the Annual Fund

Marianne Ramsey, B.S.
Director of Principal and Planned Giving

Robyn Smith, B.A.
Director of Advancement Services and Prospect Research

Kathryn Yarzebninski, M.B.A.
Director of Development

STUDENT AFFAIRS

Christopher LeMasters, M.A.
Dean of Students

Jennifer Bondurant, M.A., LPC
Director of the Counseling Center

Ruby A. Bryant, R.N.
Director of the Health Center

Amanda P. Denny, M.A.
Assistant Dean for Residence Life and Student Conduct

OFFICE OF DIVERSITY, IDENTITY, CULTURE AND INCLUSION

Keesha Burke-Henderson, M.A.
Chief Diversity Officer and Director of Identity Culture and Inclusion
Faculty
Date in parentheses indicates the year of first appointment at the Randolph College.

Bradley W. Bateman (2013)
President of the College and Professor of Economics
B.A., Alma College; M.A., Ph.D., University of Kentucky.

Carl A. Girelli (2012)
Provost, Vice President for Academic Affairs, and Professor of Linguistics
B.A., M.A., Ph.D., University of Connecticut.

John D. Abell (1991)
Carl Stern Professor of Economics
B.S., Centre College of Kentucky; M.S., Ph.D., University of Kentucky.

Bradley P. Bullock (1987)
Charles A. Dana Professor of Sociology
B.A. Baylor University; M.A., Ph.D., Vanderbilt University.

Selda Altan (2019)
Assistant Professor of History
B.A., M.A., Boğaziçi University, Istanbul; Ph.D., New York University

Andrea W. Campbell (2004)
Professor of Art
B.A., The American University; M.A., Ph.D., Rutgers, The State University of New Jersey.

Mara I. Amster (2001)
Charles A. Dana Professor of English and Arts and Letters Division Head
B.A., Duke University; M.A., University of Virginia; Ph.D., University of Rochester.

Emily Yap Chua (2002)
Professor of Music
B.A., Florida State University; M.M., D.M.A., College-Conservatory of Music, University of Cincinnati.

Kun An (2007)
Professor of Chinese Language
B.A., Beijing Normal University; M.A., Ph.D., University of Pittsburgh.

Amy R. Cohen (1999)
Catherine Ehrman Thoresen ’23 and William E. Thoresen Professor of Speech and Theatre and Professor of Classics and Theatre
B.A., Yale University; Ph.D., Stanford University.

William D. Bare (2002)
Associate Professor of Chemistry
B.S., Florida State University; Ph.D., University of Virginia.

Christopher Cohen (2010)
Assistant Professor of Art
B.A., Yale University; M.F.A., James Madison University

Sara Beck (2018)
Assistant Professor of Psychology
B.A., M.S., Ph.D., Vanderbilt University.

Daniel Cooper (2018)
Assistant Professor of Spanish
B.A., University of California; M.A., Universitat Leipzig, Germany; Ph.D., University of California.

Kris An (2007)
Professor of Chinese Language
B.A., Duke University; M.A., University of Virginia; Ph.D., University of Rochester.

Amy R. Cohen (1999)
Catherine Ehrman Thoresen ’23 and William E. Thoresen Professor of Speech and Theatre and Professor of Classics and Theatre
B.A., Yale University; Ph.D., Stanford University.

Lisa Lee Broughman (1999)
Director of Lipscomb Library
B.A., Randolph-Macon Woman’s College; M.L.I.S., University of South Carolina.
Ann M. Fabirkiewicz (1987)
Charles A. Dana Professor of Chemistry and Natural Sciences and Mathematics Division Head
B.S., University of Michigan (Dearborn); Ph.D., University of Tennessee (Knoxville).

Beth W. Gafford (2021)
Visiting Instructor of Education
B.S., University of Virginia; M.A.T., Randolph College; Ed.S., Grand Canyon University.

Professor of Media and Culture
B.A., Vassar College; M.A., Wesleyan University; Ph.D., George Mason University.

Ronald D. Gettinger (1991)
Catherine Ehrman Thoresen ’23 & William E. Thoresen Chair of Biology
B.S., Miami University of Ohio; M.S., Colorado State University; Ph.D., University of California (Los Angeles).

E. Blair Gross (2016)
Assistant Professor of Psychology
B.A., M.A., Ph.D., University of Virginia.

Meghan Halbrook (2017)
Assistant Professor of Sports and Exercise Studies, Founding Director, M.A. Coaching and Sport Leadership
B.A., University of Missouri- St. Louis; M.S., Ball State University; M.A., Ph.D., West Virginia University.

Jeff M. Heinfeldt (2010)
Professor of Economics/Business
B.S., M.B.A. Bowling Green State University; Ph.D., Kent State University.

Erin Heller (2020)
Visiting Professor of Biology
B.A., Virginia Polytechnic Institute and State University; M.S., Old Dominion University; Ph.D., Virginia Polytechnic Institute and State University.

Adam J. Houlihan (2011)
Associate Professor of Biology
B.S., University of Southern Mississippi; Ph.D., Cornell University.

Crystal D. Howell (2018)
Assistant Professor of Education
B.A., M.A., Marshall University; Ph.D., Indiana University.

Mari Ishibashi (2002)
Associate Professor of Political Science
B.A., Sophia University (Japan); M.A., Ph.D., University of Notre Dame.

Jesse L. Kern (2017)
Associate Professor of Chemistry
B.S., Baker University; Ph.D., University of Kansas.

Heidi M. Kunz (1987)
Katherine Haas Eichelbaum ’32 Professor of English
B.A., The College of William and Mary; M.A., Ph.D., Vanderbilt University.

Justina Licata (2020)
Visiting Professor of American Culture
B.A., Wagner College; M.A., Ph.D., University of North Carolina, Greensboro.

Rhonda Miller (2001)
Senior Lecturer in Spanish
Certificate of Major Randolph-Macon Woman’s College; B.A., Eastern Mennonite College; M.A., University of Virginia.

Kelsey Molseed (2018)
Research and Instruction Librarian
B.A., Juniata College; M.L.I.S., University of North Carolina, Greensboro.

Kaija Mortensen (2013)
Associate Professor of Philosophy
B.A., Colorado College; Ph.D., University of California.

Marc S. Ordower (2002)
Associate Professor of Mathematics
B.A., University of Waterloo; Ph.D., SUNY, Stony Brook.

Michael Penn (2017)
Associate Professor of Mathematics
B.S., University of Arkansas at Little Rock; M.A., Indiana University; Ph.D., University at Albany.

Elizabeth A. Perry-Sizemore (2000)
Catherine Ehrman Thoresen ’23 and William E. Thoresen Professor of Economics and Social and Behavioral Sciences Division Head
B.A., Randolph-Macon Woman’s College; M.A., Ph.D., Virginia Polytechnic Institute and State University.

Stephanie G. RiCharde (2021)
Visiting Assistant professor of Psychology
B.S., Virginia Polytechnic Institute and State University; M.A., University of Central Florida; Ph. D., Chicago School of Professional Psychology.

Julio Rodriguez (2001)
Associate Professor of Sociology
B.A., East Stroudsburg University; M.A., Ph.D., Bowling Green University.
Amanda C. Rumore (2012)  
*Associate Professor of Biology*  
B.S., Ph.D., Virginia Polytechnic Institute and State University.

Janna Russell (2014)  
*Biology Lab Instructor*  
B.S., Bridgewater College; M.Ed., Lynchburg College.

Carolyn Sarson (1990)  
*Associate Professor of Physical Education*  
B.S., Pennsylvania State University; M.Ed., University of Virginia.

ATM Sayfuddin (2019)  
*Assistant Professor of Economics*  
B.A., University of Dhaka, Bangladesh; M.B.A., University of Greenwich, U.K.; M.A., Ph.D., Middle Tennessee State University.

A. Katrin Schenk (2010)  
*Associate Professor of Physics*  
B.S., University of California at Los Angeles; M.S., Ph.D., Cornell University.

Margaret A. Schimmoeller (1993)  
*Charles A. Dana Professor of Education and Director of Teacher Education, Founding Director, M.A.T.*  
B.S., University of Dayton; M.A.T., Oakland University; Ed.D., University of Virginia.

David T. Schwartz (1997)  
*Mary Frances Williams Professor of Philosophy*  
B.A., Texas Christian University; M.A., Ph.D., Rice University.

Michael W. Sechler (2012)  
*Librarian*  
B.A., Messiah College; M.A.R. Evangelical Theological Seminary; M.S.L.S., Clarion University of Pennsylvania.

Peter A. Sheldon (1998)  
*Charles A. Dana Professor of Physics*  
B.A., Amherst College; M.S., Ph.D., University of Massachusetts.

Gerard F. Sherayko (1998)  
*Theodore H. Jack Professor of History*  
B.A., Widener University; M.A., Pennsylvania State University; Ph.D., Indiana University.

Lesley E. Shipley (2016)  
*Assistant Professor of Art History*  
B.A., University of Maryland; M.F.A., American University; M.A., Ph.D., Bryn Mawr College.

Aaron Shreve (2017)  
*Assistant Professor of Political Science*  
B.A., Minnesota State University; M.A., University of Pittsburgh; Ph. D., University of California, Davis.

Heather Sinclair (2018)  
*Technical Director, Assistant Professor in Theater Arts*  
B.S., Ball State University; M.F.A. Design & Technology, Kent State University.

Sarah L. Sojka (2012)  
*Associate Professor of Environmental Studies & Physics*  
B.A., Eckerd College; M.S., Ph.D., University of Virginia.

*Professor of Music*  
B.A., California State University, Fresno; M.A., University of Iowa; D.M.A., College-Conservatory of Music, University of Cincinnati.

*Barbara Boyle Lemon ’57 and William J. Lemon Professor of Religious Studies*  
B.A., St. Olaf College; M.Div., Yale University; M.A., Ph.D., University of Virginia.

Susan T. Stevens (1993)  
*Catherine Ehrman Thoresen ’23 and William E. Thoresen Professor of Classics*  
B.A., University of South Carolina; M.A., Ph.D., University of Wisconsin.

Laura-Gray Street (1996)  
*Associate Professor of English*  
B.A., Hollins College; M.A., University of Virginia; M.F.A., Warren Wilson College.

*Mary Sabel Girard ’34 Professor of Psychology*  
B.A., Mary Baldwin College; M.A., Ph.D., University of Tennessee.

Maria Vázquez-Castro (1997)  
*Associate Professor of Spanish*  
B.A., Universidad de Santiago de Compostela; M.A., Ph.D., University of Nebraska.

Vincent B. Vecera (2012)  
*Associate Professor of Political Science*  
B.A., Reed College; M.A., Ph.D., University of Minnesota.

Jia Wan (2013)  
*Assistant Professor of Mathematics*  
B.S., University of Science and Technology of China; M.S., Ph.D., University of Idaho.
Karin P. Warren (2002)  
_Herzog Family Professor of Environmental Studies_  
B.S., Cornell University; M.S., Ph.D., University of California (Berkeley).

Marie Zvosec (2021)  
_Visiting Assistant Professor of Dance_  
EMERITI FACULTY

Richard D. Barnes  
Mary Sabel Girard ’34 Professor of Psychology, Emeritus  
B.A., Vanderbilt University; M.A., Ph.D., University of Wisconsin.

Carolyn Wilkerson Bell  
Susan Duval Adams Professor of English, Emerita  
A.B., Randolph-Macon Woman’s College; A.M., University of Pennsylvania; Ph.D., University of Texas.

Lawrence R. Bowden  
Chaplain and Professor of Religion and Culture, Emeritus  
A.B., Monmouth College; M.Div., American Baptist Seminary of the West; Ph.D., Drew University.

William A. Coulter  
Katherine Haas Eichelbaum ’32 Professor of English, Emeritus  
B.A., University of Virginia; M.A., Ph.D., Princeton University.

John d’Entremont  
Theodore H. Jack Professor of History, Emeritus  
B.A., M.A., University of Virginia; M.A., Ph.D., Johns Hopkins University.

Sarah I. Davis  
Professor of English, Emerita  
A.B., A.M., University of North Carolina; Ph.D., New York University.

Patricia DeMars  
Reference Librarian, Emerita  
A.B., University of Rochester; M.S.L.S., University of Southern California.

Margot K. Frank  
Charles A. Dana Professor of Russian Studies, Emerita  
A.B., University of Maryland; Ph.D., Georgetown University.

Bradley K. Geisert  
Professor of History, Emeritus  
B.A., Bridgewater College; M.A., Ph.D., University of Virginia.

Dennis Goff  
Charles A. Dana Professor of Psychology, Emeritus  
Ph.D., Virginia Polytechnic Institute and State University, Psychology; M.S., Virginia Polytechnic Institute and State University, Psychology; B.S., Lynchburg College, Psychology

Mary B. Guthrow  
Associate Professor of English and Director of the Writing Program, Emerita  
A.B., Randolph-Macon Woman’s College; M.A., University of California (Berkeley); Ph.D., University of Pennsylvania.

Chester S. Halka  
Professor of Spanish, Emeritus  
B.A., Dartmouth College; M.A., Ph.D., Brown University.

Mark Harrison  
Professor of Business, Emeritus  
B.A., Mississippi State University; M.S., Ph.D., University of Texas (Austin)

Carla Wilson Heath  
Catherine Ehrman Thoresen ’23 and William E. Thoresen Professor of Communication, Emerita  
A.B., Smith College; M.A., Ph.D., University of Illinois.

Ann R. Hill  
Charles A. Dana Professor of French, Emerita  
A.B., Wilson College; A.M., Middlebury College; Ph.D., University of Virginia.

James L. Hoban, Jr.  
Catherine Ehrman Thoresen ’23 and William E. Thoresen Professor of Communication, Emeritus  
B.A., M.Ed., University of Virginia; Ph.D., University of Illinois.

Theodore Jon Hostetler  
Director of the Lipscomb Library, Emeritus  
B.A., Bluffton College; M.A., University of Iowa.

Paul L. Irwin  
Charles A. Dana Professor of Mathematics, Emeritus  
B.S., Rensselaer Polytechnic Institute; M.A., Ph.D., University of Maryland.

Randolph W. Ivy  
Director of World in Britain Program and Professor of English, Emeritus  
B.A., University of Louisville; M.A., Ph.D., University of Chicago.

Jan Johnson  
Librarian, Emerita  
A.B., Sweet Briar College; M.S.L.S., University of North Carolina.

John Keith Justice, Jr.  
Mary Frances Williams Professor of Philosophy, Emeritus  
B.A., Abilene Christian College; Ph.D., University of Texas.
Anne S. Kimball  
*Charles A. Dana Professor of Romance Languages, Emerita*  
B.A., Mount Holyoke College; M.A.T., Harvard University;  
M.A., Middlebury School of French in France; Ph.D.,  
University of Wisconsin.

Elizabeth Johnston Lipscomb  
*Catherine Ehrman Thoresen ’23 and William E. Thoresen  
Professor of English, Emerita*  
B.A., Sweet Briar College; Ph.D., Harvard University.

Susan A. Lockhart  
*Professor of Political Science, Emerita*  
B.A., Colby College; M.A., University of Nevada (Reno);  
Ph.D., University of California (Davis).

Ray Egan Luck  
*Charles A. Dana Professor of Music, Emeritus*  
B. Mus., University of London; D. Mus., Indiana University.

William A. Mattson  
*Professor of Chemistry, Emeritus*  
B.S., University of Virginia; M.S., American University;  
Ph.D., University of Virginia.

Thomas R. Michalik  
*Professor of Physics, Emeritus*  
B.S., Newark College of Engineering; M.A.,Ph.D., Temple  
University.

James R. Muehlemann  
*Professor of Art, Emeritus*  
B.F.A., University of Illinois; M.F.A., Syracuse University.

Kathy Muehlemann  
*Professor of Art, Emerita*  
B.P.S., State University of New York, Empire State College

Ken Parks  
*Associate Professor of Theatre, Emeritus*  
M.F.A., University of Mississippi, Design & Technical  
Production; B.A., Centre College, Drama Arts

James E. Peterson  
*Associate Professor of English, Writer in Residence, and  
Coordinator of the Creative Writing Program, Emeritus*  
B.A., M.A., Ph.D., University of South Carolina.

Fumiko Radile  
*Assistant Professor of Japanese and Coordinator of  
Japanese Sister School Program, Emerita*  
B.A., International Christian University; M.Ed., University  
of Oregon.

Daniel M. Raessler  
*Charles A. Dana Professor of Music, Emeritus*  
B.A., Fresno State College; M.A., Ph.D., University of  
California (Santa Barbara).

Pamela Risenhoover  
*Charles A. Dana Professor of Dance and Director of Visiting  
Artist Program, Emerita*  
B.F.A., The Julliard School; M.F.A., University of North  
Carolina (Greensboro)

Jaymes Rohrer  
*Professor of French, Emerita*  
B.A., Hamilton College; Ph.D., University of Pennsylvania

Clarissa M. Rowland  
*Reference Librarian, Emerita*  
A.B., M.A., Oxford University; M.L.S., University of  
Maryland.

Kurt Seidman  
*Professor of Chemistry, Emeritus*  
B.S., Washington and Lee University; M.S., University of  
South Carolina; Ph.D., Colorado State University.

Doug Shedd  
*Catherine Ehrman Thoresen ’23 & William E. Thoresen  
Chair of Biology, Emeritus*  
Ph.D., Cornell University, Vertebrate Zoology; B.S., Rutgers  
University, Wildlife Biology

Thomas W. Stephens  
*Catherine Ehrman Thoresen ’23 and William E. Thoresen  
Professor of Speech and Theatre, Emeritus*  
A.B., Gannon College; M.F.A., The Catholic University of  
America; Ph.D., University of Denver.

Ivor B. Thomas  
*Professor of Religious Studies, Emeritus*  
A.B., Northwestern University; M.Div., Ph.D., Union  
Theological Seminary (New York).

Linda L. Thomas  
*Professor of German Studies, Emerita*  
B.A., University of South Carolina; M.A., Bowling Green  
State University; Ph.D., University of Connecticut.

Klawa Nepscha Thresher  
*Associate Professor of Russian, Emerita*  
B.A., M.A., Ph.D., University of Wisconsin.

Joanne Elizabeth Todd  
*Associate Professor of Physical Education, Emerita*  
B.S., University of North Carolina (Greensboro); M.Ed.,  
University of Oklahoma.

Francoise Watts  
*Professor of French, Emerita*  
Maitrise-es-lettres, University of Pau; M.A., Ph.D. Ohio  
State University
Frances E. Webb
Reference Librarian, Emerita
A.B., Randolph-Macon Woman’s College; M.S.L.S., University of Kentucky.

Marjorie Wheeler-Barclay
Charles A. Dana Professor of History, Emerita
B.A., University of Illinois; Ph.D., Northwestern University.

Consuella K. Woods
Assistant Professor of Education, Emerita
B.S., Bluefield College; M.A., Lynchburg College.
